Suppression of Break Point Prechlorination by Fast Biological Filtration, Comparative Study of Clarification Efficiencies Obtained by Single or Multilayered Blankets (Suppression de la Prechloration au Break Point par Filtration Biologique Rapide: Etude Comparee de L'efficacite de Decanteurs Biologiques a Lits Fluidises Simples ou Superposes),
W82-04765 1511 5F

Effect of Rotation Speed on Reaction Rate on a Rotating Biological Contactor,
W82-04992 1511 5D

Development of Water Treatment in France (Evolution dans le Traitement des Eaux en France: Quelques Exemples d'Actualite),
W82-05367 1511 5F

High Rate Biological Treatment of TMP Effluent,
W82-05955 1512 5D

Immobilized Microbes and a High-Rate, Continuous Waste Processor for the Production of High Btu Gas and the Reduction of Pollutants,
W82-06005 1512 5D

Scanning Electron Microscope Evaluation of Rotating Biological Contactor Biofilm,
W82-06047 1512 5D

Simplified Clarifier Axes Treatment Stages,
W82-06820 1512 5D

The Effect of Increased Nickel Ion Concentrations on Microbial Populations in the Anaerobic Digestion of Sewage Sludge,
W82-06832 1512 5D

BIOLOGICAL WASTEWATER TREATMENT
Wastewater Treatment by Rooted Aquatic Plants in Sand and Gravel Trenches,
W82-00093 1501 5D

Small is Environmentally Acceptable . . .,
W82-00311 1501 5D

Treatment of Coal Gasification Process Wastewaters,
W82-00434 1501 5D

Massive Cultivation of Microalgae: Results and Prospects,
W82-00913 1502 5D

Fluidized Bed for Biological Wastewater Treatment,
W82-00968 1502 5D

Biological Treatment of Synthetic Fuel Wastewater,
W82-00971 1502 5D

Advanced Wastewater Plant is Energy Saver,
W82-01177 1503 5D

Combining Sewer Water Purification Processes to Treat Effluents Produced by Transient Populations,
W82-01992 1504 5D

Biodegradability Studies with Organic Priority Pollutant Compounds,
W82-02231 1505 5D

Influence of Dissolved Oxygen on Activated Sludge Viability,
W82-02582 1505 5D

Two-Stage Biological Treatment of Coke Plant Wastewater,
W82-03029 1507 5D

Prediction of the Fate of Organic Compounds in Biological Wastewater Treatment Systems,
W82-03133 1507 5D

Factors Influencing Biological Nitrification of Steel Industry Wastewaters,
W82-03134 1507 5D

Troubleshooting and Control of Nitrification Wastewater Treatment Systems,
W82-03135 1507 5D

Intermittent Biological Waste Treatment Systems-Process Considerations,
W82-03141 1507 5D

A Stoichiometric Model of Bacterial Growth,
W82-03756 1509 5D

Experiences of MLSS Control of the Activated Sludge Process,
W82-03849 1509 5D

A New Mixed Liquor Suspended Solids Method of Control with Total Sludge Management,
W82-03853 1509 5D

A Method for the Evaluation of the Effectiveness of a Quality Control Operation in Activated Sludge Process,
W82-03854 1509 5D

An Approach to Full-Automatic Control of Activated Sludge Process,
W82-03855 1509 5D

Investigation on Constant F/M Ratio by Adaption of Aeration Tank Volume,
W82-03860 1509 5D

Simplified Mathematical Models for a Fluidized Bed Biofilm Reactor,
W82-03877 1509 5D

Prediction of RBC Performance for Nitrification,
W82-04043 1509 5D

An Approach to the Control of the Activated Sludge System by Use of a Succession Model,
W82-04057 1509 5D

Demonstration Physical Chemical Sewage Treatment Plant Utilizing Biological Nitrification,
W82-04397 1510 5D

Treatability Studies of Pesticide Manufacturing Wastewaters,
W82-04406 1510 5D

On Line Control of Pharmaceutical Influent Loads to a Biological Wastewater Treatment Plant,
W82-04665 1510 5D

Pollution: Cleaning Up with the Water Hyacinth,
W82-04770 1511 5D

Nitrification in the Sequencing Batch Biological Reactor,
W82-05254 1511 5D

Does Conventional Sewage Treatment Meet the Demands of the 1980's,
W82-05407 1511 5D

Some Perspectives in the Modelling of Biological Treatment of Wastewaters,
W82-05430 1511 5D

Energy Conservation and Alternative Energy Sources in Wastewater Treatment,

BIOMASS

Aerial Biomass Distribution in an Undisturbed and Disturbed Subarctic Bog,
W82-00211 1501 2C

The Prediction of Lacustrine Phytoplankton Diversity,
W82-00319 1501 2H

Processing Needs and Methodology for Wastewaters from the Conversion of Coal, Oil Shale and Biomass to Synfuels.
W82-00431 1501 5D

A Survey of ATP Concentrations in Lake Ontario, 1975-1976,
W82-01144 1503 2H

Biological Pollution and Pollution Control in Canals Diverting Flow from One River Basin to Another,
W82-01922 1504 5C

On the Dynamics of Feeding of Young Fish from Mozhaysk Reservoir in Various Years,
W82-02434 1505 2H

Screen Mesh Size Affects Estimates of Macro- and Meio-Benthos Abundance and Biomass in the Great Lakes,
W82-02912 1506 2H

Predicting Reactor Biomass Concentration in a Fluidized-Bed System,
W82-02932 1506 5D

Relationship Between Chlorophyll-a Concentration and Phytoplankton Biomass in Several Reservoirs in Czechoslovakia,
W82-03185 1507 2H

Preliminary Studies on Control Parameters and Biological Community for the Activated Sludge Process,
W82-04008 1509 5D

Metabolic Activity of Herbivorous Zooplankton in Lake Kinneret (Israel) During 1972-1977,
W82-05074 1511 2H

Biomass and Annual Production of the Freshwater Mussel Elliptio Complanata in an Oligotrophic Softwater Lake,
W82-05104 1511 2H

Bioassays and the Algal Populations of Hastings Lake, Alberta, Canada,
W82-05484 1511 2H

Effect of the Spring Flood Regime on the Development of North Caspian Zoobenthos,
W82-05596 1511 2E

The Mechanism of Uranium Biosorption by Rhizopus Arrhizus,
W82-05723 1511 5D

A Conceptual Model of Primary Productivity in Shallow Streams Using Biomass Simulation,
W82-06153 1512 5C

Sampling Characteristics of Macrophyte Biomass,
W82-06779 1512 5A

BIOMONITORING

Overview and Assessment of Biological Sensing,
W82-05156 1511 5C

New In-Situ Techniques in Biomonitoring,
W82-05157 1511 5A

BIOTA

Biota and Biological Principles of the Aquatic Environment.
W82-04499 1510 5C

BIOTRANSFORMATION

Relationship Between Biotransformation and the Toxicity and Fate of Xenobiotic Chemicals in Fish,
W82-00186 1501 5C

Contents of Chlordane-, PCB- and DDT-Compounds and the Biotransformation Capacity of Fishes in the Lake Area of Eastern Finland,
W82-04827 1511 5A

Biotransformation of PCB by Natural Assemblages of Freshwater Microorganisms,
W82-06719 1512 5B

BLACK CANYON

Influence of Dredging and High Discharge on the Ecology of Black Canyon,
W82-06091 1512 6G

BLACK EARTH CREEK

Climate Variation and the Mobility and Storage of Sediment in Watersheds,
W82-05931 1512 4D

BLACK RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing: Black River Basin, New York.
W82-01758 1504 6D

BLACK SEA
Manganese, Zinc and Copper in Hydrobionts in the Danube and the Northwestern Black Sea,
W82-05458 1511 5B

BLACK WARRIOR RIVER
Effluent Fees, An Alternative System for Achieving Water Quality: A Case Study,
W82-01665 1503 6F

BLANCO DIVERSION DAM
Hydraulic Sediment Model Study for Proposed Blanco Diversion Dam Modification,
W82-00446 1501 8A

BLEACHING WASTES
Pulp Companies Face Billion Dollar Cleanup.
W82-00343 1501 5D

O2 Bleaching Shows Potential for Reducing Costs and Effluent Problems,
W82-01578 1503 5D

Oxygen Bleaching Shows Potential for Reducing Costs, Effluent Problems,
W82-01899 1504 5D

Field Report on a Nonpolluting Bleach Plant,
W82-02793 1506 5D

Evaluation of Ion Exchange Technology for Toxic and Non-Conventional Pollutant Reduction in Bleach Plant Effluents,
W82-02967 1506 5D

Environmental Aspects of Some Alternative Pulp Bleaching Techiques,
W82-05913 1512 5D

The Use of an Alga Chlorella Pyrenoidosa and a Duckweed Lemna Perpusilla as Test Organisms for Toxicity Bioassays of Spent Bleaching Liquors and Their Components,
W82-06721 1512 5C

BLOOD
Serum Enzymes in Rainbow Trout as Tools in the Diagnosis of Water Quality,
W82-00857 1502 5A

BLOOMINGTON DAM
Bloomington Lake - Potomac River Water Resources Project.
W82-06183 1512 8A

BLOSSOM-END ROT
Effects of Soil Water Regime and Nitrogen Form on Blossom-End Rot, Yield, Water Relations, and Elemental Composition of Tomato,
W82-00162 1501 2I

BLUEBERRIES
A Survey of Azinphos Methyl and Azinphos Methyl Oxon in Water and Blueberry Samples from Hancock and Washington Counties of Maine,
W82-05376 1511 5B

BLUEGILLS
Abate: Effects of the Organophosphate Insecticide on Bluegills and Invertebrates in Ponds,
W82-01445 1503 5C

Temperature Effects on Hydrazine Toxicity to Bluegills,
W82-03603 1508 5C

A Stress Function for Evaluating Strategies for Water Quality Management,
W82-04407 1510 5C

BLUFF EROSION
Factors and Mechanics of Bluff Erosion on Wisconsin's Great Lakes Shorelines,
W82-03720 1508 2J

BLUFF RECESSION
Rates and Implications of Bluff Recession Along the Lake Michigan Shorezone of Michigan and Wisconsin,
W82-03817 1509 2J

BOATING
The Effect of Boat Activity on Turbidity in a Shallow Broadland River,
W82-06330 1512 5C

BOG LAKES
UV-Sensitive Complex Phosphorus: Association with Dissolved Humic Material and Iron in a Bog Lake,
W82-06930 1512 5C

BOGS
Aerial Biomass Distribution in an Undisturbed and Disturbed Subarctic Bog,
W82-00211 1501 2C

Vegetation and Nutrient Status of Northern Michigan Bogs and Conifer Swamps with a Comparison to Fens,
W82-00484 1501 2I

Biogeochemistry of Thoreau's Bog, Concord, Massachusetts,
W82-00887 1502 2K

Vegetational Analysis of Big Run Bog, A Nonglaciated Sphagnum Bog in West Virginia,
W82-00992 1502 2I

Frequencies of Developmental Morphs of Chaoborus Americanus in Four Fishless Bog Lakes,
W82-02238 1505 2H

Effects of Short-Term Changes in Rain Water Supply on the Ionic Composition of Acid Moorland Pools in the Campine of Antwerp (Belgium),
W82-02775 1506 2H

Size and Shape in Raised Mire Ecosystems: A Geophysical Model,
W82-06215 1512 2G

UV-Sensitive Complex Phosphorus: Association with Dissolved Humic Material and Iron in a Bog Lake,
W82-06930 1512 5C

BOILER WATER
Mixed Bed Technology for Polishing Make-Up Water and Condensate Return, Part One,
W82-03471 1508 5F

Operating Experiences on a Reverse Osmosis Plant Which Converts Sea Water into Boiler Feed Water,
W82-05976 1512 3A

BOISE
Boise Looks Underground for Heat.
W82-02636 1506 2F

BOISE RIVER
Selecting Seasonal Streamflow Models,
W82-02502 1505 2E

Evaluation of Models and Procedures Used for River Operations and Planning in the Upper Snake and Boise Rivers in Idaho,
W82-05925 1512 4A

BOISE RIVER PROJECT
Primary and Secondary Impacts of a Water Resource Development Project,
W82-03907 1509 6B

BORDER IRRIGATION
Optimal Design of Border Irrigation Systems,
W82-01977 1504 3F

Prediction of the Advancing Wetting Front in Border Strip Irrigation,
W82-02309 1505 2G

Evaluation of Infiltration Measurements for Border Irrigation,
W82-03264 1507 7B

Irrigation Practices for Reclaimed Alkali Soils,
W82-04269 1510 3F

Dimensionless Stream Advance in Sloping Borders,
W82-04308 1510 3F

BOREHOLE GEOPHYSICS
Determination of Hydrogeological Parameters Using Sinusoidal Pressure Tests: A Theoretical Appraisal,
W82-00603 1502 7B

Borehole Data-Collection Methods Applicable for the Regional Observation and Monitor Well Program, Southwest Florida Water Management District,
W82-04493 1510 4B

BOREHOLES
Vadose Zone Permeability Tests: Summary,
W82-06301 1512 2G

Vadose Zone Permeability Tests: Steady State Results,
W82-06302 1512 2G

Vadose Zone Permeability Tests: Unsteady Flow,
W82-06303 1512 2G

BORON
Boron Status of Berlin Waters (Bor-Status Berliner Gewasser),
W82-04767 1511 5A

BOSMINA LONGIROSTRIS
The Recolonization of Lake Tahoe by Bosmina Longirostris: Evaluating the Importance of Reduced Mysis Relicta Populations,
W82-02305 1505 2H

BOSTON
Readying Boston's Water and Sewer System for the Next Century,
W82-03870 1509 6B

Drought Management: Expecting the Unexpected,
W82-05649 1511 3D

BOTSWANA
Histopathological Changes in the Liver and Brain of Fish Exposed to Endosulfan Insecticide During Tsetse Fly Control Operations in Botswana,
W82-05630 1511 5C

The Likelihood of Active Groundwater Recharge in the Botswana Kalahari,
W82-05657 1511 4B

BOTTOM CURRENTS
Contourites in Lake Superior,
W82-01935 1504 2H

Formation of a Bottom Flow in a Natural Water Body with Various Types of Density Stratification,
W82-02205 1505 2J

BOTTOM OUTLETS
Aeration at Floor Offsets in Bottom Outlets (Beluftung an Sohlsprungen Von Grundablassen),
W82-06242 1512 8C

Confluence of Two Jets Created by Two Parallel Segment Gates of a Bottom Outlet (Schussstrahl-Zusammenfuhrung Bei Einem Grundablass Mit Nebeneinyanderliegenden Segmentschutzen),
W82-06243 1512 8B

Hydraulic Jump, Air Entrainment and Slug Flow in Bottom Outlets (Wechselsprung, Lufteintrag Und Schwallformiger Abfluss in Grundablassen),
W82-06244 1512 8B

BOTTOM SAMPLING
The Kyholm Corer--A Diver-Operated Sediment Corer,
W82-00793 1502 7B

The Distribution of Heavy Metals in the Bottom Sediments of Three Streams in the Kansas City, Missouri, Metropolitan Area,
W82-06702 1512 5B

BOTTOM SEDIMENT
Survival of Escherichia Coli in Lake Bottom Sediment,
W82-06741 1512 5B

BOTTOM SEDIMENTS
Modeling of Processes of Decomposition of Organic Matter in Bottom Sediments,
W82-00553 1502 5B

On Lake Bottom Dynamics--The Energy-Topography Factor,
W82-00837 1502 2H

Evidence of the Unsuitability of Gravity Coring for Collecting Sediment in Pollution and Sedimentation Rate Studies,
W82-00840 1502 7B

A Method for the Evaluation of Conditions in a Fish Pond Sediment,
W82-01019 1502 2H

A Review on Sediment Traps in Aquatic Environments,
W82-01020 1502 7B

Trace Metal Fluxes to Nearshore Long Island Sound Sediments,
W82-01040 1502 5B

On The Use of Carotenoid Stratigraphy in Lake Sediments for Detecting Past Developments of Phytoplankton,
W82-01706 1503 2H

Distribution, Morphology, and Origin of Sedimentary Furrows in Cohesive Sediments, Southampton Water,
W82-01720 1503 2L

Heavy Metals in River Sediments - Calculation of Metal Adsorption Maxima Using Langmuir and Freundlich Isotherms,
W82-02290 1505 5B

A Sediment Trap Experiment in Funka Bay, Japan: 'Upward Flux' of Particulate Matter in Seawater,
W82-02893 1506 2K

Size Distribution of Amazon River Bed Sediment,
W82-03488 1508 2J

Effect of Temperature on Heterotrophic Glucose Uptake, Mineralization, and Turnover Rates in Lake Sediments,
W82-04466 1510 2H

Metal Ion Complex Formation Constants of Some Sedimentary Humic Acids with Zn(II), Cu(II) and Cd(II),
W82-05136 1511 2K

Fluxes of Polycyclic Aromatic Hydrocarbons to Marine and Lacustrine Sediments in the Northeastern United States,
W82-05138 1511 5B

Anthropogenically Derived Changes in the Sedimentary Flux of Mg, Ni, Cu, Zn, Hg, Pb and P in Lough Neagh, Northern Ireland,
W82-05145 1511 5B

BOTTOMLAND
The Ecology of Bottomland Hardwood Swamps of the Southeast: A Community Profile,
W82-05054 1511 6G

BOUNDARIES
Boundary Calculations of Sluice and Spillway Flows,
W82-02677 1506 8B

The Moving Interface Problem with Finite Elements,
W82-06546 1512 2L

BOUNDARY LAYERS
Structure of the Flow Within the Coastal Boundary Layer of the Great Lakes,
W82-04572 1510 2H

Hereditary Phenomena in Turbulent Boundary Layers,
W82-06618 1512 8B

BOUNDARY PROCESS
Evaluation of Effective Boundary Roughness for Gravel-Bed Rivers,
W82-01161 1503 8B

BOUNDRY LAYERS
A Laboratory and Theoretical Study of the Boundary Layer Adjacent to a Vertical Melting Ice Wall in Salt Water,
W82-05084 1511 2C

BOW LAKE
The Effect of Changing Sediment Supply on Sedimentation in a Glacier-Fed Lake,
W82-01510 1503 2H

BRACKISH WATER
Inorganic Transformation of Applied Phosphorus in Brackish Water Fish Pond Soil Under Different Water Salinity Levels,
W82-00920 1502 2H

Effect of Different Water Salinity Levels and Organic Matter Application on the Composition of Water Soluble and Exchangeable Bases in a Brackishwater Fish Pond Soil,
W82-02027 1504 2H

Biology of Brackish Water, (In Japanese),
W82-04179 1509 2L

The Acute Toxicity of Motor Fuels to Brackish Water Organisms,
W82-05985 1512 5C

The Distribution of Aquatic Oligochaetes in Brackish Inland Waters in the SW Netherlands,
W82-06905 1512 5B

BRAIDED RIVERS
Channel Instability in a Braided, Sand Bed River,
W82-01316 1503 2J

BRAIDED STREAMS
Anastomosed River Deposits: Modern and Ancient Examples in Alberta, Canada,
W82-04531 1510 2J

BRAZIL
Physical and Chemical Studies of Lago Tupe, A Central Amazonian Black Water 'Ria Lake',
W82-01381 1503 2H

Irrigation for Brazil's Poligono Das Secas,
W82-01744 1503 3F

Pumped-Storage Development in Brazil. Part III,
W82-03381 1507 8A

Flow-Augmentation and Water Quality in Paraiba Do Sul River Basin-Brazil,
W82-03744 1508 5G

Turbines for Itaipu,
W82-04955 1511 8C

BRAZOS RIVER
Environmental Assessment; Geothermal Direct Heat Project; Marlin Texas.
W82-06404 1512 6G

BRAZOS RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing; Brazos River Basin, Texas-New Mexico.
W82-01439 1503 6D

BREAKWATERS
Floating Breakwater,
W82-00067 1501 8A

Large Rubble-Mound Breakwater Failures,
W82-00862 1502 8D

Canadian Wave Climate Study: Organization and Operation,
W82-06393 1512 8B

BREWERY INDUSTRY
Avoiding an Environmental Hangover,
W82-00344 1501 5D

BREWING INDUSTRY
Control of Sludge Bulking in the Brewing Industry,
W82-05260 1511 5D

BRIDGE DESIGN
Hydraulic Analysis of Chenango River, Broome County, New York, in Relation to State Highway Plan,
W82-02477 1505 4C

Umfolozi Road Bridge Hydraulic Model Investigation,
W82-02868 1506 8A

Methods for Assessment of Stream-Related Hazards to Highways and Bridges,
W82-04626 1510 8A

The Design of Encroachments on Flood Plains Using Risk Analysis,
W82-04631 1510 8A

Optimal Risk-Based Hydraulic Design of Bridges,
W82-06432 1512 8A

Hydraulic Analysis, Paint Creek at State Route 772, Chillicothe, Ohio,
W82-06948 1512 8B

BRIDGE PIERS
The Vortex Scour Mechanism at Bridge Piers,
W82-04642 1510 8B

BRIDGES
Umfolozi Road Bridge Hydraulic Model Investigation,
W82-02868 1506 8A

Floodflow Characteristics of the Sacramento River in the Vicinity of Giancla Bridge, Hamilton City, California,
W82-03985 1509 2E

Devon Floods and the Waterways of Bridges,
W82-05948 1512 8A

Statistical Search for High Water at Board Landing Bridge, Truro, Nova Scotia,
W82-06394 1512 2L

Floodflow Characteristics of Honcut Creek at State Highway 70 Bridges Near Live Oak, California,
W82-06945 1512 4A

BRIISH COLUMBIA
Potential Evaporation in the Peace Region of British Columbia,
W82-06528 1512 2D

BRINE
Dissolution of Salt on the East Flank of the Permian Basin in the Southwestern U.S.A.,
W82-03586 1508 2F

BRINE DISPOSAL
An Assessment of Geothermal Development in the Imperial Valley of California; Volume 2 - Environmental Control Technology,
W82-05213 1511 5E

BRINE WASTES
Magnesium Oxide Production from Concentrated Brines,
W82-06111 1512 3A

BRINES
Evaluation of the Malaga Bend Salinity Alleviation Project, Eddy County, New Mexico,
W82-00018 1501 5B

The Origin and Evolution of Saline Formation Water, Lower Cretaceous Carbonates, South-Central Texas, U.S.A.,
W82-03540 1508 2F

Patterns of Groundwater Salinity Changes in a Deep Continental-Oceanic Transect Off the Southeastern Atlantic Coast of the U.S.A.,
W82-03582 1508 2F

Character of Brines from the Belle Isle and Weeks Island Salt Mines, Louisiana, U.S.A.,
W82-03584 1508 2F

BRISTOL CHANNEL
A Numerical Simulation of the Vertical and Horizontal M2 Tide in the Bristol Channel and Comparisons with Observed Data,
W82-02193 1505 2L

BRITISH COLUMBIA
Variations of pH with Annual Cumulative Precipitation in Acid Forest Soils,
W82-01118 1503 2G

Environmental Recovery in a Marine Ecosystem Impacted by a Sulfite Process Pulp Mill,
W82-01548 1503 5B

Some Types of Temperature Inversion Encountered in a Freshwater Lake with Short Residence Time,
W82-02224 1505 2H

Galvanized Pipe Vies for Equal Alternative Status in Storm Sewer Projects.
W82-02601 1506 8G

Regionalization and Prediction of Annual Floods in the Fraser River Catchment, British Columbia,
W82-02910 1506 2E

Effects of Clearcutting and Slashburning on Stream Temperature in Southwestern British Columbia,

Changes in Extractable Metal Concentrations During Storage of Surface Water Samples Containing Sediments,
W82-06630 1512 2K

Attached and Free-Floating Bacteria in a Diverse Selection of Water Bodies,
W82-06887 1512 5B

BROMACIL
Dye-Sensitized Photooxidation of Bromacil in Water,
W82-00514 1502 5B

BROMAMINES
New Supplementary DPD Procedures Using Sodium Nitrite for (a) Bromine-Bromamine Separation and (b) Correction of Chlorine Dioxide Readings for Any Bromine Derived from Natural Bromide in Waters,
W82-02394 1505 5A

BROMIDES
Methyl Bromide and Bromide-Ion in Drainage Water After Leaching of Glasshouse Soils,
W82-01492 1503 5B

Bromide in Canterbury Ground Water,
W82-02056 1504 5B

Kinetics of Monochloramine Decomposition in the Presence of Bromide,
W82-02651 1506 5B

The Identification and Treatment of Bromides and Trihalomethanes in Potable Water from the Pearl River at Jackson, MS: Evaluation of Toxicity on Species Diversity,
W82-04413 1510 5A

BROMINE
New Supplementary DPD Procedures Using Sodium Nitrite for (a) Bromine-Bromamine Separation and (b) Correction of Chlorine Dioxide Readings for Any Bromine Derived from Natural Bromide in Waters,
W82-02394 1505 5A

Comparative Disinfection by Bromine Chloride and Chlorine of Viruses and Bacteria in Wastewater,
W82-05446 1511 5D

BROMINE CHLORIDE
An Alternative Wastewater Disinfectant,
W82-00950 1502 5D

Comparative Disinfection of Poliovirus by Bromine Chloride and Chlorine in a Model Contact Chamber,
W82-04661 1510 5D

BROWARD COUNTY
Stormwater Quality Processes for Three Land-Use Areas in Broward County, Florida,
W82-02469 1505 5B

BROWN SOILS
Direct Evidence of Water-Soluble Organic Matter Leaching in Brown Earths and Slightly Podzolized Soils,
W82-02034 1504 2G

BUBBLE DIFFUSERS
New Bubble Diffusers Reduce Treatment Costs,
W82-06513 1512 5D

BUBBLES
Electrical Aspects of Adsorbing Colloid Flotation. XI. Surfactant Adsorption Isotherms, Particle Displacement, and Differential Capacitance,
W82-00788 1502 1B

Measurement of Air in Flowing Water,
W82-04322 1510 7B

The Development of a Viable Method of Stream Flow Measurement Using the Integrating Float Technique,
W82-04643 1510 7B

Domes, Bubbles, and Paper Waste,
W82-06025 1512 5D

BUCKLING
Application of the Southwell Plot Method to the Inspection and Testing of Buried Flexible Pipes,
W82-04649 1510 8A

BUDGETING
The Risk Business,
W82-03281 1507 6E

BUFFALO RIVER
Aromatic Amines in and Near the Buffalo River,
W82-00622 1502 5B

BUFFER CAPACITY
A Simplified Buffer Capacity Model for Sanitary Landfill Leachate,
W82-06038 1512 5B

BUFFERS
Fluoride Determination in Water: An Optimum Buffer System for use with the Fluoride-Selective Electrode,
W82-03269 1507 5A

BULKING SLUDGE
Sludge Settling Hampered by Industrial Discharge,
W82-00290 1501 5D

Relationship Between Organic Loading, Dissolved Oxygen Concentration and Sludge Settleability in the Completely-Mixed Activated Sludge Process,
W82-05441 1511 5D

BULL RUN WATERSHED
Mount St. Helens Volcanic-Ash Fall in the Bull Run Watershed, Oregon, March-June 1980,
W82-00002 1501 5B

BUMPING LAKE
An Analysis of Reservoir Storage Contents for the Proposed Enlargement of Bumping Lake in Washington,
W82-00421 1501 4A

BUOYANCY
Buoyancy Force Reversals in Vertical Natural Convection Flows in Cold Water,
W82-00981 1502 1A

BURLINGTON
Low Turbidity Water from Fast Processes,
W82-00946 1502 5F

Restoring an Antique Water System,
W82-02685 1506 5F

BUTTE BASIN
Flood Data for the Sacramento River and Butte Basin 1875 to 1978, Sacramento Valley, California,
W82-00019 1501 2E

BUTTRESS DAMS
Concrete of the Dam of the Kirovskoe Reservoir,
W82-03159 1507 8F

BUTYL BENZYL PHTHALATE
An Environmental Safety Assessment of Butyl Benzyl Phthalate,
W82-00615 1502 5A

BYPRODUCTS
Composition of Fruit and Vegetable Processing Wastes,
W82-01601 1503 5D

Two-Stage Biological Treatment of Coke Plant Wastewater,
W82-03029 1507 5D

BYRAM LAKE
Factors Controlling Phytoplankton Primary Productivity in Byram Lake, Mt. Kisco, N.Y., Summer, 1977,
W82-00915 1502 2H

CABLEGATION
Cablegation: II. Simulation and Design of the Moving-Plug Gated Pipe Irrigation System,
W82-05963 1512 3F

CACHE LA POUDRE RIVER
Recreational Enhancement of High Country Water Supply Reservoirs,
W82-03923 1509 6A

CACHE LA POUDRE RIVER BASIN
Water Reuse Planning by Means of an Input-Output Table,
W82-04794 1511 6A

CADDISFLIES
Bioconcentration of Pesticides by Egg Masses of the Caddisfly, Triaenodes Tardus Milne,
W82-00982 1502 5B

Pesticides in the Aquatic Environment,
W82-04727 1510 5C

CADILLAC
Phosphorus and Nitrogen Removal at Cadillac, Michigan,
W82-05270 1511 5D

CADMIUM
Sorption of Trace Cadmium on Clay Minerals and River Sediments: Effects of pH AND CD(II) Concentrations in a Synthetic River Water Medium,
W82-00174 1501 2K

Monitoring Trace Amounts of Cadmium in Natural Waters,
W82-00516 1502 5A

The Impact of an Industrially Contaminated Lake on Heavy Metal Levels in it's Effluent Stream,
W82-00886 1502 5B

Preference-Avoidance Reactions of Crayfish to Sublethal Concentrations of Cadmium,
W82-00916 1502 5A

Organic Matrix Modifiers for Direct Graphite Furnace Atomic Absorption Determination of Cadmium in Seawater,
W82-01085 1502 5A

Atomic Absorption Spectrophotometric Studies of Cadmium and Zinc in Commercial Fertilisers, Soils and River Waters,
W82-01388 1503 5B

The Physicochemical Speciation of Cd, Pb, Cu, Fe, and Mn in the Final Effluent of a Sewage Treatment Works and Its Impact on Speciation in the Receiving River,
W82-01498 1503 5B

Copper(II)- and Cadmium(II)-Binding Abilities of Some New Hampshire Freshwaters Determined by Dialysis Titration,
W82-01632 1503 5F

Chemical Availability of Cadmium in Mississippi River Sediment,
W82-02267 1505 5B

The Effect of Aquatic Humus on the Biological Availability of Cadmium,
W82-02353 1505 5C

Combined Effects of Cadmium and Nickel on Activated Sludge Process,
W82-02704 1506 5D

Microcosms as Test Systems for the Ecological Effects of Toxic Substances: An Appraisal with Cadmium,
W82-03026 1507 5C

Cadmium in Gammaridae (Amphipoda: Crustacea) of the Rivers Werra and Weser: Geographical Variation and Correlation to Cadmium in Sediments,
W82-03094 1507 5B

An In Situ Study of Cadmium and Mercury Stress in the Plankton Community of Lake 382, Experimental Lakes Area, Northwestern Ontario,
W82-03612 1508 5C

Movement of Cadmium and Water in Split-Root Wheat Plants,
W82-03662 1508 5B

Detoxication of Zinc and Cadmium by the Freshwater Protozoan Tetrahymena Pyroformis. I. The Effect of Water Hardness,
W82-03678 1508 5C

Cadmium in an Aquatic Ecosystem,
W82-03724 1508 5A

Combined Effects of Cadmium and Zinc on a Lake Michigan Zooplankton Community,
W82-04379 1510 5C

Treatment of Noncyanide Electroplating Cadmium Wastewater by Reverse Osmosis,
W82-04664 1510 5D

The Use of the Three-Ridge Clam (Amblema Perplicata) to Monitor Trace Metal Contamination,
W82-04948 1511 5A

A Simple and Rapid Method for the Determination of Lead and Cadmium in Sediment by Graphite Furnace Atomic Absorption Spectrometry,
W82-05020 1511 5A

Determination of Cadmium in Lake Michigan by Mass Spectrometric Isotope Dilution Analysis or Atomic Absorption Spectrometry Following Electrodeposition,
W82-05040 1511 5A

Extraction and Spectrophotometric Determination of Cadmium Based on the Formation of a Ternary Complex with Cadion and 1,10-Phenanthroline,
W82-05041 1511 5A

Industrial Waste Pretreatment and EPA Cadmium Limitations,
W82-05443 1511 5E

Evaluation of Bacterial Binding and Release of Cadmium from Aquatic Sediments,
W82-05934 1512 5C

Peripheral Effects of Cadmium on the blood and Head Kidney in the Brown Bullhead (Ictalurus Nebulosus),
W82-06003 1512 5C

Transport of Iron, Manganese, Cadmium, Copper, and Zinc by Magela Creek, Northern Territory, Australia,
W82-06054 1512 5B

Effects of pH, Temperature, and eH on the Uptake of Cadmium by Bacteria and an Artificial Sediment,
W82-06580 1512 5B

Cadmium in Gammaridae (Amphipoda: Crustacea) of the Rivers Werra and Weser-II. Seasonal Variation and Correlation to Temperature and Other Environmental Variables,
W82-06659 1512 5B

CAIMANERO LAGOON
The Effect of Dried and Cracked Sediment on the Availability of Phosphorus in a Coastal Lagoon,
W82-04299 1510 2L

CALCIUM
Leaching of Calcium and Magnesium from Soil Columns as Affected by Form of Nitrogen in Applied Sewage,
W82-00192 1501 5E

Consecutive Amperometric Titrations for Calcium and Magnesium,
W82-00208 1501 5A

Microbial Mobilization of Calcium and Magnesium in Waterlogged Soils,
W82-00560 1502 2G

Effect of Waters of Various Hardness on the Cardiovascular System. (O Vliyanii vod Raznoi Zhestkosti na Serdechno Sosudistuyu Sistemu),
W82-03699 1508 5C

Fractionation of Metal Forms in Natural Waters by Size Exclusion Chromatography with Inductively Coupled Argon Plasma Detection,
W82-06545 1512 5A

CALCIUM CARBONATE
The Search for a Corrosion Index,
W82-04279 1510 5F

Acid Pond Drainage,
W82-05199 1511 5G

Effects of Increased Atmospheric C02 on Great Lakes,
W82-05209 1511 2H

CALCIUM CARBONATE PREVENTION
Morphology of Inhibitor-Treated CaCo3 Precipitate,
W82-06120 1512 3A

CALCIUM HYDROXIDE
Effect of Magnesium and Calcium Precipitation on Coagulation-Flocculation with Lime,

Making Chlorination Trustworthy,
W82-06639 1512 5F

A Guide to Treatment for Bacterial Problems,
W82-06847 1512 5F

CHLORINE
Determination of Organically Combined Chlorine in High Molecular Weight Aquatic Organics,
W82-00258 1501 5A

Assessment of Some Aqueous Residual Chlorine Measurements,
W82-00867 1502 5F

Kinetics of Monochloramine Decomposition in the Presence of Bromide,
W82-02651 1506 5B

Bacteria from a Suspended Growth System as Organic Precursors to the Formation of Trihalomethanes,
W82-02806 1506 5F

Relative Effects on Stream Biota of Chlorine and Ammonia Occurring in Secondary Sewage,
W82-04409 1510 5C

Comparative Disinfection of Poliovirus by Bromine Chloride and Chlorine in a Model Contact Chamber,
W82-04661 1510 5D

Factors Influencing Formation of Trihalomethanes in Drinking Water with Special Reference to Swedish Conditions,
W82-04826 1511 5F

Elimination of Hexachlorobenzene (HCB) by Rainbow Trout (Salmo Gairdneri), and an Examination of Its Kinetics in Lake Ontario Salmonids,
W82-05195 1511 5B

Comparative Disinfection by Bromine Chloride and Chlorine of Viruses and Bacteria in Wastewater,
W82-05446 1511 5D

The Corrosion of Copper by Chlorinated Drinking Waters,
W82-06051 1512 5F

Chloride Ion Concentrations as an Aid to Estimating Recharge to the Woburn,
W82-06234 1512 2F

Performance of Modified Chlorine Contact Chamber,
W82-06359 1512 5D

Optimum Use of Chlorine in Circulating Water,
W82-06498 1512 5F

Influence of Stabilizer Concentration on Effectiveness of Chlorine as an Algicide,
W82-06539 1512 5F

CHLORINE DIOXDE
Disinfection Efficiencies of Chlorine Dioxide in a Gravity Flow Contractor,
W82-04782 1511 5D

CHLORINE DIOXIDE
Chlorine Dioxide for Wastewater Disinfection: A Feasibility Evaluation,
W82-02989 1506 5D

Study of Chlorine Dioxide and Its Metabolites in Man,
W82-05057 1511 5F

CHLOROFORM
Chlorinated Drinking Water,
W82-00467 1501 5F

Detection of Chloroform in the Tissues of Freshly Eviscerated Poultry Carcasses Exposed to Water Containing Added Chlorine or Chlorine Dioxide,
W82-02374 1505 5A

Removing Trace Organics from Drinking Water Using Activated Carbon and Polymeric Adsorbents,
W82-02987 1506 5F

CHLOROPHENOLS
Gas-Liquid Chromatographic Determination of Some Chloro- and Nitrophenols by Direct Acetylation in Aqueous Solution,
W82-05363 1511 5A

The Use of an Alga Chlorella Pyrenoidosa and a Duckweed Lemna Perpusilla as Test Organisms for Toxicity Bioassays of Spent Bleaching Liquors and Their Components,
W82-06721 1512 5C

CHLOROPHYLL
Rapid, Quantitative Separation of Chlorophylls and Their Degradation Products by High-Performance Liquid Chromatography,
W82-01619 1503 5A

Effects of Thermocline Displacement Upon Subsurface Chlorophyll Maxima in Lake Michigan,
W82-01957 1504 2H

Seasonal and Diurnal Changes of Chlorophyll in a Tropical Fresh Water Impoundment,
W82-02052 1504 2H

Dissolved Humic Substances: A Major Source of Error in Fluorometric Analyses Involving Lake Waters,
W82-02223 1505 5A

Plankton Studies in San Francisco Bay. I. Chlorophyll Distributions and Hydrographic Properties of the San Francisco Bay Estuary, July 1977 - December 1979,
W82-02831 1506 2L

Effect of Filtration Pressure on Analyses for Chlorophyll,
W82-04247 1509 2H

Seasonal Variations in Primary Production in Surface Waters of the Saguenay River (Variations Saisonnieres de la Production Primaire dans les eaux de Surface de la Riviere du Saguenay),
W82-04678 1510 5C

Horizontal Distribution of Chlorophyll in the Bielersee (Die Horizontale Verteilung von Chlorophyll Im Bielersee),
W82-05007 1511 2H

The Influence of Phytoplankton Composition on the Relative Effectiveness of Grinding and Sonification for Chlorophyll Extraction,
W82-06902 1512 5A

Effects of Naturally Senescing Aquatic Macrophytes on Nutrient Chemistry and Chlorophyll A of Surrounding Waters,
W82-06943 1512 5C

CHLOROPHYLL A
Some Effects of Sewage Discharge Upon Phytoplankton in Hong Kong,
W82-02095 1504 5C

Studies on the Primary Production of the River Shatt Al-Arab at Basrah, Iraq,
W82-02776 1506 5C

Relationship Between Chlorophyll-a Concentration and Phytoplankton Biomass in Several Reservoirs in Czechoslovakia,
W82-03185 1507 2H

Ridge Regression Techniques Applied to Landsat Investigation of Water Quality in Lake Okeechobee,
W82-04440 1510 2H

CHOLESTEROL
Effects of Dissolved Organic Matter on Adsorption of Hydrophobic Organic Compounds by River- and Sewage-Borne Particles,
W82-06056 1512 5B

CHOPTANK RIVER
Role of Natural Colloids in the Transport of Hydrophobic Pollutants,
W82-04539 1510 5B

CHOWAN RIVER
Algal-Bacterial Symbiosis in the Chowan River, NC,
W82-02177 1505 5A

Nitrogen Recycling in a North Carolina Coastal River,
W82-02822 1506 5B

CHROMATES
A New Method of Regeneration of Anion Exchangers Used For Recovering Chromates from Wastewater,
W82-02723 1506 5D

CHROMATOGRAPHY
Measurement of the Solubilities of Slightly Soluble Organic Liquids in Water by Elution Chromatography,
W82-00207 1501 5A

Cation Chromatography With a Conductivity Detector,
W82-00582 1502 5A

Determination of Alkaline Earth and Divalent Transition Metal Cations by Ion Chromatography with Sulfate-Suppressed Barium and Lead Eluents,
W82-01082 1502 5A

General Method for Determination of Pesticide Residues in Samples of Plant Origin, Soil, and Water. III. Gas Chromatographic Analysis and Confirmation,
W82-03215 1507 5A

Sephadex LH-20 Chromatography of Extracts of Marine Sediment and Biological Samples for the Isolation of Polynuclear Aromatic Hydrocarbons,
W82-03370 1507 5A

Orthophosphate and Its Flux in Lake Waters,
W82-03613 1508 2H

Concentration and Isolation of Organic Acids on Graphitized Carbon Black,
W82-04038 1509 5A

High-Performance Liquid Chromatographic Determination of Nitrite in Environmental Samples by the Use of Hydralazine,
W82-04855 1511 5A

Trace Enrichment of Difenzoquat in Water and Its Determination by Reversed Phase High Performance Liquid Chromatography,
W82-05362 1511 5A

Procedures for Analyzing Contaminants in Drinking Water,
W82-05438 1511 5A

Determination of Phosphate in Wastewater by Ion-Exclusion Chromatography with Flow Coulometric Detection,
W82-06040 1512 5A

Determination of Methomyl and Methomyl-Oxime in Fruit Crops and Water by HPLC,
W82-06466 1512 5A

A Rapid High-Performance Liquid-Chromatographic Method for Simultaneously Determining the Concentrations of TFM and Bayer 73 in Water During Lampricide Treatments,
W82-06495 1512 5A

Fractionation of Metal Forms in Natural Waters by Size Exclusion Chromatography with Inductively Coupled Argon Plasma Detection,
W82-06545 1512 5A

Determination of Aldicarb Residues in Water by Combined High Performance Liquid Chromatography Mass Spectrometry,
W82-06549 1512 5A

CHROMIUM

Determination of Chromium Speciation in Natural Waters by Electrodeposition on Graphite Tubes for Electrothermal Atomization,
W82-01084 1502 5A

Identification and Reclamation of Chromium Sludge Disposal Sites,
W82-01437 1503 5E

Chromium Levels in Fish from a Lake Chronically Contaminated with Chromates from Cooling Towers,
W82-01941 1504 5B

Ion Flotation-Spectrophotometric Determination of Traces of Chromium (VI),
W82-02007 1504 5A

Removal of Hexavalent Chromium from Estuarine Waters by Model Substrates and Natural Sediments,
W82-03637 1508 5G

Reduction of Chromium(VI) by Bacterially Produced Hydrogen Sulphide in a Marine Environment,
W82-03758 1509 5B

Shock Load of Chromium (VI),
W82-05253 1511 5D

Characterization, Renovation, and Utilization of Water from Slurry Transport Systems,
W82-05289 1511 5D

Comparison of the Extractabilities of Zn, Cu, Ni and Cr from Sewage Sludges Prepared by Treating Raw Sewage with the Metal Salts Before or After Anaerobic Digestion,
W82-06079 1512 5D

Recovery of Chromium(VI) from Wastewaters with Iron(III) Hydroxide-I. Adsorption Mechanism of Chromium(VI) on Iron(III) Hydroxide,
W82-06658 1512 5D

Pilot Plant Studies of Copper, Zinc, and Trivalent Chromium Removal by Adsorbing Colloid Foam Flotation,
W82-06708 1512 5D

The Kinetics of Hexavalent Chromium Reduction by Metallic Iron,
W82-06771 1512 5D

The Electrolytic Process for Chromate Removal in Cooling Towers,
W82-06996 1512 5D

CHURCHILL COUNTY

Reconnaissance of the Hot Springs Mountains and Adjacent Areas, Churchill County, Nevada,
W82-02830 1506 1A

CIRCULATION

Modeling Circulation in Depth-Averaged Flow,
W82-02679 1506 2E

CISTERNS

Application of a Single Reservoir Operation Policy to a Rain Water Cistern System,
W82-03088 1507 3B

CITRUS FRUITS

Water Stress and Cold Hardiness in Field-Grown Citrus,
W82-00864 1502 2I

Hydraulic Conductivity of Four Commercial Citrus Rootstocks,
W82-01546 1503 2I

Production of Aromatic Acids During Anaerobic Digestion of Citrus Peel,
W82-02049 1504 5D

CIVIL ENGINEERING

Irrigation for Brazil's Poligono Das Secas,
W82-01744 1503 3F

Research Needs: Hydraulics, Coastal Engineering and Irrigation,
W82-03254 1507 8A

CIVIL LAW

United States V. Ward: FWPCA Civil Penalty Prosecution, Not a Criminal Case for the Fifth Amendment,
W82-06181 1512 6E

CLADOPHORA

Phosphorus Uptake Dynamics as Related to Mathematical Modeling of Cladophora at a Site on Lake Huron,
W82-01149 1503 5C

Denitrification Associated With Periphyton Communities,
W82-01814 1504 5B

Environmental Factors Controlling Physiological Changes in Cladophora in Lake Erie,
W82-06935 1512 5C

Projected Cladophora Growth in Southern Georgian Bay in Response to Proposed Municipal Sewage Treatment Plant Discharges to the Mary Ward Shoals,
W82-06936 1512 5C

Abundance Patterns of Diatoms on Cladophora in Lake Huron with Respect to a Point Source of Wastewater Treatment Plant Effluent,
W82-06937 1512 5C

Residues of PCB in a Cladophora Community Along the Lake Huron Shoreline,
W82-06938 1512 5C

Ecological Studies and Mathematical Modeling of Cladophora in Lake Huron: I. Program Description and Field Monitoring of Growth Dynamics,
W82-06939 1512 5C

Ecological Studies and Mathematical Modeling of Cladophora in Lake Huron: 2. Phosphorus Uptake Kinetics,
W82-06940 1512 5C

Biomass and Distribution of Cladophora Glomerata in Relation to Some Physical-Chemical Variables at two Sites in Lake Erie,
W82-06941 1512 5C

Monitoring Cladophora Growth Conditions and the Effect of Phosphorus Additions at a Shoreline Site in Northeastern Lake Erie,
W82-06942 1512 5C

The Use of Remote Sensing to Map the Areal Distribution of Cladophora Glomerata at a Site in Lake Huron,
W82-06973 1512 5B

CLAMS

The Effect of Season and Location on Phosphoadenylate Concentrations and Adenylate Energy Charge in Two Species of Freshwater Clams,
W82-00810 1502 2H

A Comparison of the Incidence of Five Pathological Conditions in Soft-Shell Clams, Mya Arenaria, from Environments with Various Pollution Histories,
W82-02357 1505 5C

CLARIFICATION

History of a Water Chemical,
W82-00074 1501 5F

Low Turbidity Water from Fast Processes,
W82-00946 1502 5F

Technology and Performance of the Hi-Capacity Thickener,
W82-01929 1504 5D

Water Clarification and Decolorization with Regenerable Magnetic Particles,
W82-02351 1505 5F

Clarification with Microsand Seeding. A State of the Art,
W82-03880 1509 5F

Solids Inventory Control in the Activated Sludge Process,
W82-04048 1509 5D

Simplified Clarifier Axes Treatment Stages,
W82-06820 1512 5D

CLARIFIED WASTEWATER

Organic Groups and Molecular Weight Distribution in Tertiary Effluents and Renovated Waters,
W82-05480 1511 5D

CLARIFIERS

Sludge Blanket in Activated Final Clarifiers,
W82-00951 1502 5D

Simulation Modeling of Primary Clarifiers,
W82-01027 1502 6A

Upward Flow Clarification of Secondary Sewage Effluent Using Lime,
W82-02413 1505 5D

A Finite Differencing Scheme for the Dynamic Simulation of Continuous Sedimentation,
W82-03876 1509 5D

CLARK FORK-PEND OREILLE RIVER BASIN

Water Resources Appraisal for Hydroelectric Licensing: Clark Fork-Pend Oreille River Basin, Montana, Idaho, Washington.
W82-00374 1501 6B

CLASSIFICATION

An Appraisal of Pond-Net Samples for Biological Monitoring of Lotic Macroinvertebrates,
W82-00308 1501 7B

Classification of Central Amazon Lakes on the Basis of their Microbiological and Physico-Chemical Characteristics,
W82-00666 1502 2H

Water Quality Indices: An Additional Management Tool,
W82-01994 1504 5G

A Decision Theory Approach to Earth Dam Classification,
W82-04152 1509 8A

Process-Response Systems: A Practical Approach to Watershed Classification Considering Water and Sediment Yields,
W82-04217 1509 2A

Hydrogeologic Evaluation of Wetland Basins for Land Use Planning,
W82-04439 1510 2A

Procedure for Calculating the Complex Rank Index of Water Quality,
W82-05457 1511 5A

Wetlands and Deepwater Habitats: A New Classification,
W82-05716 1511 2L

Lower Flow Regime Bedforms: Rational Classification,
W82-06421 1512 2E

CLAY BOSWELL GENERATING STATION
Wet Disposal of Fossil Plant Waste: Case History,
W82-04385 1510 5E

CLAYS
Dewatering of Industrial Clay Wastes,
W82-00041 1501 5D

Dewatering Florida Phosphatic Clay Wastes With Moving Screens,
W82-00049 1501 5D

The Effect of Bentonite Clay on Ozone Disinfection of Bacteria and Viruses in Water,

Water Resources Appraisal for Hydroelectric Licensing: Altamaha River Basin, Georgia,
W82-01764 1503 6D

Water Resources Appraisals for Hydroelectric Licensing, Saginaw and Au Sable River Basins Area, Michigan.
W82-01767 1503 6D

Chromium Levels in Fish from a Lake Chronically Contaminated with Chromates from Cooling Towers,
W82-01941 1504 5B

Ecological and Physiological Characteristics of Dikerogammarus Haemobaphes in the Areas in Which Heated Water Is Discharged from the Tripol'ye Power Station,
W82-01970 1504 5C

Combined Flue Gas Desulfurization and Water Treatment in Coal-Fired Power Plants,
W82-02606 1506 3E

Kinetics of Monochloramine Decomposition in the Presence of Bromide,
W82-02651 1506 5B

Response of Subtropical Phytoplankton to Power Plant Entrainment,
W82-02708 1506 5C

An Aerial Technique for Assessing the Impact of Cooling Water Discharges on Receiving Water,
W82-03016 1507 7B

Cooling Water Discharge into Floodplain Meadows and Marshes: Effects, Mechanisms, and Implications for Environmental Analysis,
W82-03022 1507 5C

Treatment of Cooling Tower Blowdown,
W82-03126 1507 5D

Mixed Bed Technology for Polishing Make-up Water and Condensate Return: Conclusion,
W82-03774 1509 5D

Reuse of Biologically Treated Wastewater as Cooling Tower Makeup,
W82-04317 1510 3C

Zero-Discharge in Practice at Ray D. Nixon Power Plant,
W82-04320 1510 5D

Recycling Allows Zero Powerplant Wastewater Discharge,
W82-04323 1510 5D

Vertical Round Buoyant Jet in Shallow Water,
W82-04365 1510 7C

Refuse of Power Plant Cooling Water for Irrigation,
W82-04445 1510 3C

Geothermal Power: Accidental Fluid Releases and Waste Disposal,
W82-04911 1511 5B

Executive Summary for Power Plant Cooling System Water Consumption and Nonwater Impact Reports.
W82-05067 1511 2D

Trihalomethanes in Chlorinated Cooling Waters of Nuclear Reactors,
W82-05713 1511 5F

Radionuclides in Dardanelle Lake in the Area of the Nuclear I Facility: 1979-1981,
W82-06169 1512 5B

Environmental Assessmental, Geothermal Energy, Heber Geothermal Binary-Cycle Demonstration Project; Imperial County, California.
W82-06406 1512 6G

Application of Ozone to Eliminate Tertiary Treatment of Wastewater Used for Industrial Cooling,
W82-06709 1512 5F

The Electrolytic Process for Chromate Removal in Cooling Towers,
W82-06996 1512 5D

COON CREEK
Changes in Sediment Storage in the Coon Creek Basin, Driftless Area, Wisconsin, 1853 to 1975,
W82-01563 1503 2J

COOPER
Determination of Free Metal Ion Concentrations Using Bioassays,
W82-01821 1504 5A

COOPERATIVES
The U.S. Geological Survey Federal-State Cooperative Water Resources Program,
W82-00735 1502 6B

COPEPODS
Seasonal Particle-Size Selection by Diaptomus Sicilis in Offshore Lake Michigan,
W82-00485 1501 2H

Toxicities of Paraquat and Diquat Herbicides to Freshwater Copepods (Diaptomus Sp. and Eucyclops Sp.),
W82-00589 1502 5C

Effect of Metals on the Biomass Production Kinetics of Freshwater Copepods,
W82-00593 1502 5C

Interactive Effects of Metals in Mixtures on Biomass Production Kinetics of Freshwater Copepods,
W82-01125 1503 5C

Determination of Free Metal Ion Concentrations Using Bioassays,
W82-01821 1504 5A

Variation in Life-History Patterns Between Intertidal and Subtidal Populations of the Meiobenthic Copepod Microarthridion Littorale,
W82-02560 1505 2L

Cyclops Scutifer Sars - One and Two-Year Life Cycles with Diapause in the Meromictic Lake Blankvatn,
W82-02865 1506 2H

Sodium Regulation in the Tidepool Copepod Tigriopus Californicus,
W82-03262 1507 5A

Toxicities of Paraquat and Metribuzin (Sencor) Herbicides to the Freshwater Copepods, Eucyclops Agilis and Diaptomus Mississippiensis,
W82-04814 1511 5C

Dynamics of a Subtropical Plankton Community, with Emphasis on the Copepod Mesocyclops Edax,
W82-06906 1512 5C

COPPER
Effect of Kaolin Concentration on Distribution Coefficient of Copper,
W82-00153 1501 5B

Effect of Cations on Copper Adsorption by Kaolin,
W82-00172 1501 2K

Effect of Copper on Nitrification in Activated Sludge,
W82-01497 1503 5C

Copper(II)- and Cadmium(II)-Binding Abilities of Some New Hampshire Freshwaters Determined by Dialysis Titration,
W82-01632 1503 5F

Effect of the Copper Content of Distillery Spent Wash on Its Utilization for Single-Cell Protein Production by Geotrichum Candidum, Hansenula Anomala and Candida Kruzei,
W82-01750 1503 5C

Extraction of Copper with Liquid Surfactant Membranes,
W82-01896 1504 5D

A New Method for Assessing the Lethal Impact of Short-Term, High-Level Discharges of Pollutants on Aquatic Animals,
W82-01993 1504 5C

A Study on the Accumulation of Copper and Zinc in the Mid-Gut Gland of Cultured Scallop for Environmental Monitoring, (In Japanese),
W82-02379 1505 5B

Effect of Sediment Copper on the Distribution of Benthic Macroinvertebrates in the Keweenaw Waterway,
W82-04030 1509 5C

Automatic Monitoring of Copper in Waste Water from Plating Shops,
W82-04845 1511 5A

Transport Processes of Copper and Zinc in a Highly Eutrophic and Meromictic Lake,
W82-05518 1511 5B

Copper Removal by an Adsorbing Colloid Foam Flotation Pilot Plant,
W82-05960 1512 5D

The Corrosion of Copper by Chlorinated Drinking Waters,
W82-06051 1512 5F

Transport of Iron, Manganese, Cadmium, Copper, and Zinc by Magela Creek, Northern Territory, Australia,
W82-06054 1512 5B

Comparison of the Extractabilities of Zn, Cu, Ni and Cr from Sewage Sludges Prepared by Treating Raw Sewage with the Metal Salts Before or After Anaerobic Digestion,
W82-06079 1512 5D

Sediment-Water Interactions of Cu, Zn, and Pb Discharged from a Domestic Waste Water Source into a Bay of Lough Neagh, Northern Ireland,
W82-06080 1512 5B

Liquid-Liquid Extraction Combined with Atomic-Absortpion Spectrometry for Determination of Copper in Waters, Foods and Analytical Reagents Using 1,2-Naphthoquinone Thiosemicarbazone,
W82-06179 1512 5A

Heavy Metals in Sludge--Are Their Toxic Effects Additive,
W82-06646 1512 5E

The Adsorption of Cu, Mn, and Zn by Iron Oxyhydroxide in Model Estuarine Solutions,
W82-06668 1512 2L

Pilot Plant Studies of Copper, Zinc, and Trivalent Chromium Removal by Adsorbing Colloid Foam Flotation,
W82-06708 1512 5D

COPPER SULFATE
Chemical and Biological Processes Controlling the Response of a Freshwater Ecosystem to Copper Stress: A Field Study of the CuSO4 Treatment of Mill Pond Reservoir, Burlington, Massachusetts,
W82-02233 1505 5C

COPROSTANOL
Coprostanol and Bacterial Indicators of Faecal Pollution in the Scheldt Estuary,
W82-04923 1511 5A

CORE DRILLING
Test-Hole Data for the Edwards Aquifer in the San Antonio Area, Texas,
W82-05218 1511 7C

CORE SAMPLING
Downcore Variation in Sediment Organic Nitrogen,
W82-05124 1511 2H

CORER
The Kyholm Corer--A Diver-Operated Sediment Corer,
W82-00793 1502 7B

CORES
Design of Filters for Clay Cores of Dams,
W82-04321 1510 8G

Sedimentation Rates and Depositional Processes in Lake Superior from Pb210 Geochronology,
W82-04380 1510 2J

Preliminary Data from Arbuckle Test Wells, Miami, Douglas, Saline, and Labette Counties, Kansas,
W82-04512 1510 7C

The Waters of Merom: A Study of Lake Huleh 7. Diatom Stratigraphy of the 54-M Core,
W82-06880 1512 5C

CORN
Reduced Transpiration and Increased Water Efficiency by Diuron in Corn (Zea Mays),
W82-00196 1501 2D

Effects of Municipal Waste Water Effluent on Performance and Feed Quality of Maize Vs. Reed Canarygrass,
W82-00564 1502 3C

Consumptive Use and Daily Evapotranspiration of Corn Under Different Levels of Nitrogen and Moisture Regimes,
W82-00660 1502 2D

Climatic Factors Contributing to Year-To-Year Variation in Grain Yield of Corn on Brookston Clay,
W82-01115 1503 2I

Simulation of Soil Water Within the Root Zone of a Corn Crop,
W82-01834 1504 2G

The Evalcation of a Leaf-Water Potential Function for Corn,
W82-02226 1505 2I

Effect of Moisture Levels in Vegetative and Reproductive Phases of Winter-Sown Maize on Grain Yield, Irrigation Requirement and Water-Use Efficiency,
W82-05120 1511 2I

Sizing Farm Reservoirs for Supplemental Irrigation of Corn. Part II. Economic Analysis,
W82-05966 1512 6B

Sizing Farm Reservoirs for Supplemental Irrigation of Corn. Part I: Modeling Reservoir Size Yield Relationships,
W82-05967 1512 2I

CORN BELT
  Risk and the Demand for Supplemental Irrigation: A Case Study in the Corn Belt,
  W82-00522 1502 6A

CORPS OF ENGINEERS
  Report of Survey of Corps of Engineers Construction Workforce,
  W82-00102 1501 6B

CORPUS CHRISTI BAY ESTUARY TEXAS
  Estuarine Benthic Community Dynamics Related to Freshwater Inflow to the Corpus Christi Bay Estuary,
  W82-02135 1505 2L

CORRELATION ANALYSIS
  Space-Time Variability of the Runoff of European Rivers,

Access to Water-Related Data in Texas,
W82-04000 1509 10B

Water Use Data--Who Needs It,
W82-04198 1509 7C

TNRIS: A Source for Water-Related Data in Texas.
W82-04651 1510 10B

An Interactive Data Management System for River Water Quality Data,
W82-04659 1510 10B

Graphic Retrieval, Analysis and Spatial Portrayal: An Information System for Idaho's Freshwater Lakes,
W82-05914 1512 2H

Time-Shared Computer Technology for the Water and Wastewater Industries,
W82-06511 1512 5D

The Practical Handling of Water Quality Monitoring Data,
W82-06591 1512 7C

DATA TRANSMISSION
Where Do We Go from Here.
W82-02086 1504 7A

Microprocessor Architecture and Performance in Wastewater Process,
W82-04056 1509 5D

Water Quality Monitoring System in Niedersachsen - Application of Automatic Stations for Control and Monitoring of Water Quality,
W82-04575 1510 7B

Utilization of Data from Automatic Water Quality Monitoring Stations in Finland,
W82-04585 1510 7B

Automatic Collection and Transmission of Data for the Federal Waterway Authority.
W82-04596 1510 7A

Automated Biomonitoring Applications in Remote Water Quality Surveillance and Time Rated Toxicological Assay,
W82-05305 1511 7B

Comparison of Automated Satellite Systems with Conventional Systems for Hydrologic Data Collection in West-Central Florida,
W82-06951 1512 7B

DATING
Carbon 14 Dating of Groundwater in Confined Aquifers: Implications of Aquitard Diffusion,
W82-01464 1503 2F

Palaeoecological Studies of the Recent Development of Lake Vaxjosjon. III. Reassessment of Recent Chronology on the Basis of Modified Pb210 Dates,
W82-03480 1508 5B

Hydrological Studies Possible with Radionuclides of Bomb-Test, Primordial and Natural Origin to Complement Investigations Using Manufactured Radiotracers,
W82-03836 1509 5B

A Tree-Ring Reconstruction of Drought in Southern California,
W82-04229 1509 2B

Reconstructed Stream Flow for the Salt and Verde Rivers from Tree-Ring Data,
W82-04340 1510 2E

DDE
Chlorinated Hydrocarbons as a Factor in the Reproduction and Survival of Lake Trout (Salvelinus Namaycush) in Lake Michigan.
W82-01079 1502 5C

DDT
Behavior of DDT, Kepone, and Permethrin in Sediment-Water Systems Under Different Oxidation-Reduction and PH Conditions,
W82-00382 1501 5B

Influence of PCBs in Water on Uptake and Elimination of DDT and DDE by Lake Trout,
W82-01342 1503 5C

DEAD SEA
Solubilities of Gypsum and Halite in the Dead Sea and in Its Mixtures with Seawater,
W82-03708 1508 2K

DEBRIS BASINS
Debris Flow Deposits of Early Miocene Age, Deadman Stream, Marlborough, New Zealand,
W82-00694 1502 2J

DEBRIS CONE
Debris Flows in Small Mountain Stream Channels of Colorado and Their Hydrologic Implications,
W82-01597 1503 2E

DECHLORINATION
Detoxification of Chlorinated Sewage Effluent by Dechlorination in Estuarine Waters,
W82-02688 1506 5C

Wastewater Dechlorination State-Of-The-Art Field Survey and Pilot Studies,
W82-04392 1510 5D

DECIDUOUS FORESTS
The Role of Atmospheric Deposition in an Eastern U.S. Deciduous Forest,

Occurrence of Fluoride Bearing Groundwaters and Their Relationship with Water Table Fluctuations,
W82-06443 1512 2K

Multiple Potentiometric System for Continuous Determination of Cloride, Fluoride, Nitrate, and Ammonia in Natural Waters,
W82-06718 1512 5A

FLUOROMETRY
Fluorometric Determination of DNA in Aquatic Microorganisms by Use of Hoechst 33258,
W82-06889 1512 5A

FLUSHING
Significant Features of Emitter Flushing Mode Characteristics,
W82-01576 1503 3F

An Evaluation of Aquatic Life Found at Hydraulic Scour Sites in the Columbia River Estuary Selected for Potential Sediment Deposition,
W82-02132 1505 2L

The Dilution/Flushing Technique in Lake Restoration,
W82-02270 1505 2H

Conducting a Regular Main Flushing Program,
W82-04118 1509 5F

Reducing the Flush,
W82-04654 1510 3D

FLUSHING MEADOWS PROJECT
Rapid-Infiltration Research at Flushing Meadows Project, Arizona,
W82-05334 1511 5D

FLUTED TUBES
Hydrodynamics of Condensate Films on Fluted Tube Surfaces. Part I,
W82-06105 1512 3A

Effect of Surface Configuration on Heat Transfer by the Condensation of Steam over Fluted Surfaces. Part II,
W82-06106 1512 3A

FLUVIAL SEDIMENTS
Field Observations of the Isotopic Composition of Particulate Organic Carbon in the Southern North Sea and Adjacent Estuaries,
W82-01714 1503 2J

Erosion and Sediment Control in China's Yellow River Basin,
W82-01729 1503 4D

Sediment Data for Streams Near Mount St. Helens, Washington--Volume 1, 1980 Water-Year Data,
W82-01792 1503 7C

Quantitative Relationships Between Numbers of Fluvial Cycles, Bulk Lithological Composition and Net Subsidence in a Scottish Namurian Basin,
W82-05959 1512 2J

FLY ASH
Monitoring Ground-Water Contamination at a Fly Ash Disposal Site Using Surface Electrical Resistivity Methods,
W82-01218 1503 5B

The Effect of Flyash Disposal on a Shallow Ground-Water System,
W82-01220 1503 5B

Reassessment of the Effects of Construction Dewatering on Ground-Water Levels in the Cowles Unit, Indiana Dunes National Lakeshore, Indiana. Supplement to Geological Survey Water-Resources Investigations 78-138,
W82-02478 1505 4A

Effect of Leachate Solutions from Fly and Bottom Ash on Groundwater Quality,
W82-03798 1509 5B

Phosphate in Water: I. Reduction Using Northern Lignite Fly Ash,
W82-03882 1509 5F

FLYNN CREEK
Bedload Transport in an Oregon Coast Range Stream,
W82-03548 1508 2J

FOAM FLOTATION
Verification of a Model for Foam Flotation Column Operation,
W82-06001 1512 5D

FOAM SEPARATION

Foam Control in Aeration Tanks,
W82-00171 1501 5D

Foam Control in Aeration Tanks,
W82-00525 1502 5D

Water Purification Studies with Activated Carbon and Foam Flotation,
W82-01692 1503 5D

Foam Fractionation-Flotation as Partial Pretreatment for Reverse Osmosis,
W82-05290 1511 3A

Copper Removal by an Adsorbing Colloid Foam Flotation Pilot Plant,
W82-05960 1512 5D

The Removal of Mixtures of Metals by an Adsorbing Colloid Foam Flotation Pilot Plant,
W82-06821 1512 5D

Removal of Zinc by Adsorbing Colloid Foam Flotation: Pilot Plant Study,
W82-06822 1512 5D

FOAMING

Foam Control in Aeration Tanks,
W82-00171 1501 5D

Foam Control in Aeration Tanks,
W82-00525 1502 5D

Origin and Chemical Composition of Androscoggin River Foam,
W82-02970 1506 5B

Start-Up Problems of Sludge Dewatering Facility,
W82-05444 1511 5D

FOG

The Potential Acidity Associated with Dews, Frosts, and Fogs,
W82-06246 1512 2K

FOOD CHAIN

Uptake and Transfer of the Chlorinated Hydrocarbon Lindane (Gamma-BHC) in a Laboratory Freshwater Food Chain,
W82-01033 1502 5C

FOOD CHAINS

Laboratory Procedure for Estimating Residue Dynamics of Xenobiotic Contaminants in a Freshwater Food Chain,
W82-01443 1503 5B

Fate of Kepone and Mirex in a Model Aquatic Environment: Sediment, Fish, and Diet,
W82-01820 1504 5B

Tracing Food Webs with Stable Hydrogen Isotopes,
W82-02021 1504 6G

Comparative Uptake of Actinides by Plants and Rats from the Shoreline of a Radioactive Pond
W82-02323 1505 5B

Study of the Transfer of Cd, Pb, Cu, and Zn in Neritic and Estuarine Trophic Chains - I. State in the Internal Estuary of the Loire (France) During the Summer of 1978. (Etude du Transfert de Cd, Pb, Cu et Zn dans les Chaines Trophiques Neritiques et Estuariennes - I. Etat dans l'Estuaire Interne de la Loire (France) au Cours de l'Ete 1978),
W82-03492 1508 5B

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewater--IV. Conclusions, Design and Operational Considerations for Artificial Food Chains,
W82-04369 1510 5D

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--III. Uptake of Dissolved Heavy Metals by Artificial Food Chains,
W82-04370 1510 5D

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--I. Nutrient Uptake and Release by Artificial Food Chains,
W82-04371 1510 5D

Metabolic Activity of Herbivorous Zooplankton in Lake Kinneret (Israel) During 1972-1977,
W82-05074 1511 2H

FOOD HABITS

Seasonal Particle-Size Selection by Diaptomus Sicilis in Offshore Lake Michigan,
W82-00485 1501 2H

FOOD PROCESSING INDUSTRY

Gerber Saves 465,000 Gallons of Water/Day,
W82-00187 1501 3E

Assimilation of Lemonade-Processing Wastewater by Yeasts,
W82-00204 1501 5D

Treatment of Potato-Processing Waste Water by an Anaerobic Lagoon-Filter System,
W82-00226 1501 5D

Anaerobic Biological Treatment of Food Industry Wastewaters,
W82-00698 1502 5D

Meat-, Fish-, and Poultry-Processing Wastes,
W82-01256 1503 5D

Geothermally Powered Food-Processing Systems,
W82-02543 1505 3E

Microbiology of Anaerobic Digestors for Wastewater Purification. (Microbiologie des Digesteurs Anaerobies de l'Epuration des eaux Residuaires),

Revised Rainfall Frequency Analysis for Houston,
W82-05863 1511 2B

Carrying Capacity for the Illinois River,
W82-05927 1512 6G

Statistical Flood Flow Estimation,
W82-05945 1512 2E

A Method of Estimating Flood-Frequency Parameters for Streams in Idaho,
W82-06142 1512 2E

FREQUENCY DISTRIBUTION
An Analysis of Areal Infiltration Considering Spatial Variability,
W82-02927 1506 2G

Empirical Investigation of Curve Number Technique,
W82-04112 1509 2A

Statistical Flood Flow Estimation,
W82-05945 1512 2E

FRESHWATER INFLOW
Monitoring Freshwater Inflow to Estuaries by Remote Sensing,
W82-02138 1505 7A

FRESHWATER MARSHES
Estimation of the Economic Value of Wetlands: Methodology and Application to Southeastern Michigan,
W82-02804 1506 6B

FRICTION
Calculation of the Strength of Rigid Diaphragms in Earth Dams,
W82-02667 1506 8D

Qualitative Stability Analysis of Geologic Systems, with an Example from River Hydraulic Geometry,
W82-06717 1512 2E

FRICTION LOSS
Pipeline Friction Losses for Wastewater Sludges,
W82-01545 1503 5D

Flow Resistance in Coarse Gravel Bed Rivers,
W82-02879 1506 2J

Coefficient of Friction in Conduits with Large Roughness,
W82-02901 1506 8B

FROGS
Tadpoles as Indicators of Harmful Levels of Pollution in the Field,
W82-00478 1501 5A

FROST
Water Frost and Ice: The Near-Infrared Spectral Reflectance 0.65-2.5 Microns,
W82-01346 1503 2C

The Potential Acidity Associated with Dews, Frosts, and Fogs,
W82-06246 1512 2K

FROST PROTECTION
Water Stress and Cold Hardiness in Field-Grown Citrus,
W82-00864 1502 2I

FROUDE NUMBER
Erosion by Submerged Circular Jets,
W82-05002 1511 2J

Thermal Front Formation from Buoyant Surface Jets,
W82-05004 1511 5C

FROZEN GROUND
Configuration of Ice in Frozen Media,
W82-05615 1511 2C

FRUIT CROPS
Performance of Bearing Cherry and Prune Trees Under Very Low Irrigation Rates,
W82-00119 1501 3F

Control of Peach Tree Growth and Productivity by Regulated Water Supply, Tree Density, and Summer Pruning,
W82-01883 1504 2I

Turnover of Tritiated Water in Calamondin Plants,
W82-02048 1504 5A

Wastewater Irrigation of Fruit Trees,
W82-06008 1512 3C

Fruit, Vegetable, and Grain Processing Wastes,
W82-06918 1512 5D

FUEL
Water Quality Issues and Energy Assessments,
W82-00036 1501 6B

Refuse-To-Energy Wastewater Treatment,
W82-00168 1501 5D

Water-Related Environmental Control Requirements of Waste-to-Energy Conversion,
W82-00443 1501 5D

Managing Oil and Gas Activities in Coastal Environments: Refuge Manual,
W82-01081 1502 5G

Energy Technology Scenarios for Use in Water Resources Assessments Under Section 13A of the Federal Nonnuclear Energy Research and Development Act.
W82-04635 1510 6B

The Acute Toxicity of Motor Fuels to Brackish Water Organisms,
W82-05985 1512 5C

FUEL REPROCESSING
The Status of Nuclear Waste Management,
W82-02659 1506 5E

241Am from the Decay of 241Pu in the Irish Sea,
W82-03199 1507 5B

FULLER'S METHOD
A Practical Method of Estimating Peak from Mean Daily Flows With Application to Streams in Ontario,
W82-06568 1512 2E

FULLY PENETRATING WELLS
Cavity Well,

GAMMA RADIATION
Airborne Soil Moisture Measurement Using Natural Terrestrial Gamma Radiation,
W82-03685 1508 2G

Direct Snow-Water Equivalent Measurements by Air-Borne Gamma-Ray Spectrometry,
W82-05643 1511 2C

GAMMARUS
Production of Gammarus Lacustris (Amphipoda, Gammaridae) in Lake Sevan,
W82-02781 1506 2H

Cadmium in Gammaridae (Amphipoda: Crustacea) of the Rivers Werra and Weser-II. Seasonal Variation and Correlation to Temperature and Other Environmental Variables,
W82-06659 1512 5B

GAMO ESTUARY
Effect of River Discharge on the Distribution Pattern of Dissolved Constituents in the Gamo Estuary, Miyagi Prefecture,
W82-04543 1510 2L

GAS CHROMATOGRAPHY
Gas Chromatographic Determination of Selenium (-II, O), -(IV), and -(VI) in Natural Waters,
W82-00257 1501 5A

Detection of Volatile Nitrosamines in Waste Water from Chemical Plants by Combined Capillary Gas Chromatography-Mass Spectrometry,
W82-00856 1502 5A

Rapid Methods of Chemical Analysis Used in Emergency Response Mobile Laboratory Activities,
W82-01431 1503 5A

Matacil Residue Determination in Foliage, Fish, Soil and Water,
W82-01621 1503 5A

Determination of Phthalates in Industrial and Municipal Wastewaters,
W82-02999 1506 5A

Gas Chromatographic Techniques for Controlling Organics Removal Processes,
W82-03888 1509 5A

Electron-Capture Gas Chromatographic Determination of Sulphide as a New Pentafluorobenzyl Derivative,
W82-04036 1509 5A

Determination of Volatile Organics in Industrial and Municipal Wastewaters,
W82-04396 1510 5A

Determination of Haloethers in Industrial and Municipal Wastewaters,
W82-04398 1510 5A

Gas Chromatographic Determination of Phenolic Compounds in Water, as their Pentafluorobenzoyl Derivatives,
W82-04816 1511 5A

Analysis of PCBs in Sediment by Glass Capillary Gas Chromatography,
W82-04916 1511 5A

Determination of Ultratrace Levels of Fluorine in Water and Urine Samples by a Gas Chromatographic/Atmospheric Pressure Helium Microwave Induced Plasma Emission Spectrometric System,
W82-05359 1511 5A

Headspace Chromatographic Determination of Water Pollutants,
W82-06016 1512 5A

Determination of Organochlorines in River Sediment by Capillary Gas Chromatography, Application to Dutch River Sediment,
W82-06274 1512 5A

GAS CHROMATOGRPHY
Direct Analytical Method for Aromatic Compounds in Water by Steam Carrier Gas Chromatography,
W82-05164 1511 5A

GAS LIQUID CHROMATOGRAPHY
Determination of Aminocarb in Water by High Performance Liquid Chromatography,
W82-00232 1501 5A

GASES
Health and Safety of Wastewater Treatment Plant Personnel,
W82-03535 1508 5D

Hydraulic Model Studies - Yellowtail Afterbay Dam Sluiceway,
W82-06962 1512 8A

GASTROENTERITIS
Waterborne Gastroenteritis Due to The Norwalk Agent: Clinical and Epidemiologic Investigation,
W82-03898 1509 5C

GASTROPODS

Rare and Endangered Species: Freshwater Gastropods of Southern New England,
W82-04968 1511 5C

Palaeoclimates at Lake Turkana, Kenya, from Oxygen Isotope Ratios of Gastropod Shells,
W82-06216 1512 2D

GATES

High-Head Vertical Lift Gates,
W82-02388 1505 8A

New Jet-Gate Design,
W82-02691 1506 8C

Estimating Water Flow Under Gates,
W82-05514 1511 8B

Aeration at Floor Offsets in Bottom Outlets (Beluftung an Sohlsprungen Von Grundablassen),
W82-06242 1512 8C

Confluence of Two Jets Created by Two Parallel Segment Gates of a Bottom Outlet (Schussstrahl-Zusammenfuhrung Bei Einem Grundablass Mit Nebeneinyanderliegenden Segmentschutzen).
W82-06243 1512 8B

GEL CHROMATOGRAPHY

Simple Procedures for Enrichment of Chlorinated Aromatic Pollutants from Fat, Water and Milk for Subsequent Analysis by High-Resolution Methods,
W82-06015 1512 5A

GENERA IDENTIFICATION

W82-04676 1510 2F

Characterization of Drained and Undrained Response of Thermally Loaded Repository Rocks,
W82-05904 1512 2F

GEOLOGIC HISTORY

Debris Flow Deposits of Early Miocene Age, Deadman Stream, Marlborough, New Zealand,
W82-00694 1502 2J

Hydrogeology of the Sierra Nevada Foothill Lineament Near Oakhurst, California,
W82-00831 1502 2F

Chemistry of a 7.5-M Sediment Core from Lake Valencia, Venezuela,
W82-02745 1506 2H

GEOLOGICAL FRACTURES
Lineaments and Fracture Traces, Jennings County and Jefferson Proving Ground, Indiana,
W82-06675 1512 2F

GEOLOGICAL SURVEY
Albedo Survey on Andrei Glacier, Iskut River Basin, B. C., Midsummer, 1980,
W82-06578 1512 2C

GEOLOGICAL SURVEY PROJECTS
Summary of U.S. Geological Survey Investigations and Hydrologic Conditions in Southwest Florida for 1979,
W82-00419 1501 10C

GEOLOGICAL SURVEYS
U.S. Geological Survey Research in Radioactive Waste Disposal--Fiscal Year 1979,
W82-04500 1510 5E

Site Investigation and Materials Save Money on Sallente.
W82-05878 1511 8A

GEOLOGY
Water Resources of the Santa Ysabel and Mesa Grande Indian Reservations, San Diego County, California,
W82-00021 1501 7C

Surficial Geology of Dugway Quadrangle, Oswego County, New York,
W82-01775 1503 7C

Development of an Environmental Geology Data Base for Land Use Planning,
W82-06552 1512 6A

GEOMORPHOLOGY
A Geomorphologic Synthesis of Nonlinearity in Surface Runoff,
W82-00604 1502 2A

Morphological Changes of River Channels Consequent Upon Headwater Impoundment,
W82-01087 1502 6G

Drainage Density as an Index of Climatic Geomorphology,
W82-01324 1503 2A

Geomorphology of the Colorado River in the Grand Canyon,
W82-01338 1503 2J

West Antarctic Ice Sheet Fluctuations in the Antarctic Peninsula Area,
W82-03362 1507 2C

Sawmill Brook: An Example of Rapid Geomorphic Change Related to Urbanization,
W82-05276 1511 4C

Quantitative Geomorphology of Drainage Basins in Sumter National Forest, South Carolina,
W82-05839 1511 2A

Geomorphic Parameters of Representative Basins and Their Hydrologic Significance,
W82-06384 1512 2A

Fire and Geomorphic Processes,
W82-06963 1512 2J

GEOPHYSICAL SURVEYS
Evaluation of Electromagnetic Terrain Conductivity Measurements for Detection and Mapping of Salt-water interfaces in Coastal Aquifers.
W82-04412 1510 5A

GEOPHYSICS
Hydrogeological and Geophysical Logging.
W82-00511 1502 7B

A Combination of Electrical Resistivity, Seismic Refraction, and Gravity Measurements for Groundwater Exploration in Sudan,
W82-00852 1502 2F

Structure and Permeability: Geologic Controls on Induced Seismicity at Nurek Reservoir, Tadjikistan, USSR,
W82-05133 1511 2F

GEOPHYSIS
Geophysical Reconnaissance of Lemmon Valley, Washoe County, Nevada,
W82-06949 1512 2F

GEORGIA
Fate and Effects of a Heavy Fuel Oil Spill on a Georgia Salt Marsh,
W82-02358 1505 5B

An Evaluation of the Potential for Water Conservation and Reuse in the Georgia Pulp and Paper Industry,
W82-02456 1505 3E

Electron Intensity, the Role of Humic Acids in Extracellular Electron Transport and Chemical Determination of pE in Natural Waters,
W82-02566 1505 2K

The Response of Macroinvertebrates to Aquatic Macrophyte Decomposition,
W82-02664 1506 2H

Nutrient Cycling in an Agricultural Watershed: Waterborne Nutrient Input/Output Budgets for the Riparian Zone,
W82-03825 1509 5B

Mathematical Simulations of The Toccoa Falls, Georgia Dam Break Flood,
W82-03920 1509 2E

Impact of Hexazinone on Invertebrates After Application to Forested Watersheds,
W82-05206 1511 5C

A Preliminary Appraisal of the Effects of Agriculture on Stream Quality in Southwest Georgia,
W82-05229 1511 5C

Retention of Urban Derived Phosphorus by an Alluvial Swamp of the Coastal Plain of Georgia,
W82-05286 1511 5B

Effects of Waterhyacinth on the Physicochemistry of a South Georgia Pond,
W82-05809 1511 5C

Effects of Urbanization on Stream Ecosystems,
W82-06165 1512 5C

The Benefits of Pre-Operational Baseline Aquatic Biology Studies,
W82-06235 1512 5A

GEORGIA BIGHT
Benthic Enrichment in the Georgia Bight Related to Gulf Stream Intrusions and Estuarine Outwelling,
W82-02583 1505 2L

GEORGIA COAST
Patterns of Groundwater Salinity Changes in a Deep Continental-Oceanic Transect Off the Southeastern Atlantic Coast of the U.S.A.,
W82-03582 1508 2F

GEOSTATIONARY METEOROLOGICAL SATELLITE
Estimation of the Precipitable Water from the IR Channel of the Geostationary Satellite,
W82-06995 1512 7B

GEOTHERMAL POWER
Identification of the Wairakei Geothermal System,
W82-01312 1503 2F

Geothermal Energy: An Old Ally,
W82-02333 1505 2F

Energy Technology Scenarios for Use in Water Resources Assessments Under Section 13A of the Federal Nonnuclear Energy Research and Development Act.
W82-04635 1510 6B

Geothermal Power: Accidental Fluid Releases and Waste Disposal,
W82-04911 1511 5B

An Assessment of Geothermal Development in the Imperial Valley of California; Volume 2 - Environmental Control Technology,
W82-05213 1511 5E

An Assessment of Geothermal Development in the Imperial Valley of California; Volume 1 - Environment, Health and Socio-economics,
W82-05214 1511 6G

Environmental Assessmental, Geothermal Energy, Heber Geothermal Binary-Cycle Demonstration Project; Imperial County, California.
W82-06406 1512 6G

GEOTHERMAL RESOURCES
State-of-the-Art of Liquid Waste Disposal for Geothermal Energy Systems: 1979,
W82-00375 1501 5E

On Identification and Validation of Some Geothermal Models,
W82-01467 1503 6A

Extraction Timing and Economic Incentives for Geothermal Reservoir Management,
W82-01504 1503 4B

Environmental Control Technology Development for Geothermal Energy,
W82-02197 1505 5C

Geothermally Powered Food-Processing Systems.
W82-02543 1505 3E

Boise Looks Underground for Heat.
W82-02636 1506 2F

Warming Up to Geothermal,
W82-03156 1507 8A

An Assessment of Geothermal Development in the Imperial Valley of California; Volume 2 - Environmental Control Technology,

On Site Continuous Liquid-Liquid Extraction of Nonpolar Organic Compounds in Water,
W82-02008 1504 5A

Water Pollution Control in the Federal Republic of Germany,
W82-02766 1506 6E

The Relation Between 'Hydraulic Stress' and Microdistribution of Benthic Macroinvertebrates in a Lowland Running Water System, the Schierenseebroks (North Germany),
W82-02790 1506 5C

Computerized Data Acquisition and Data Handling in Sewage Treatment Plants,
W82-04023 1509 5D

Roads in Water-Procuring Regions - Water Pollution Control and Safeguarding of Water Supply, Exemplified by the Stuttgart-Singen Autobahn (Strassen in Wassergewinnungsgebieten-gewasserschutz und Sicherstellung der Wasserversorgung am Beispiel der Autobahn A 81 Stuttgart-Singen),
W82-04551 1510 4B

Water Quality Monitoring System in Niedersachsen - Application of Automatic Stations for Control and Monitoring of Water Quality,
W82-04575 1510 7B

Telemetric Water Control System of the Artificially Aerated Mosel River,
W82-04598 1510 5G

Evaluation of Water Quality Data Received by Automatic Control Stations at the Teltow-Canal in Berlin (West),
W82-04607 1510 5A

Detoxification of Waste Water Containing Cyanides from the Wet-Scrubbing Systems of Steel Mills (Entgiftung Cyanidhaltigen Gichtgaswaschwasser von Hochofen),
W82-04616 1510 5D

Pilot Studies of the Nitrification Process in Fixed Film Reactors (Pilotversuche zur Nitrifikation in Festbettreaktoren),
W82-04652 1510 5D

Automatic Control of the Discharge of Radioactive Subsubstances from Light Water Nuclear Power Plants of the Pressurized Water Reactor Type into Flowing Streams with Special Reference to the Unterweser Nuclear Power Plant,
W82-04839 1511 5E

Nutrient Distribution in North German Lake Sediments and Remarks on Sediment-Pelagic Exchange (Die Nahrstoffverteilung in Sedimenten Norddeutscher Seen und Hinweise Auf Den Austausch Sediment-Pelagial),
W82-05091 1511 2H

Disposing of Sewage Sludge at Sea,
W82-05127 1511 5E

Experiences with Purification Lakes and Polishing Lagoons,
W82-05241 1511 5D

Northern Elbe Culvert,
W82-05427 1511 8B

GERMINATION
Investigations of Control Mechanisms of Germination Under Water Stress,
W82-00912 1502 2I

Drought Resistance of Sorghum Bicolor L. Moench. 3. Seed Germination Under Osmotic Stress,
W82-03479 1508 2I

GETTYSBURG FORMATION
Groundwater Resources of the Gettysburg and Hammer Creek Formations, Southeastern Pennsylvania,
W82-04973 1511 2F

GHANA
Periphyton in the Volta Lake. I. Seasonal Changes on the Trunks of Flooded Trees,
W82-02882 1506 2H

Periphyton in the Volta Lake. II. Seasonal Changes on Wooden Blocks with Depth,
W82-02883 1506 2H

Epidemiology of Human Schistosoma Haematobium Infection Around Volta Lake, Ghana, 1973-75,
W82-05988 1512 5C

The Role of the Akosombo Dam on the Volta River in Causing Coastal Erosion in Central and Eastern Ghana (West Africa),
W82-06100 1512 2J

Further Observations on the Effect of Abate on Fish Catches,
W82-06722 1512 5C

GIARDIA
Effect of Halogens on Giardia Cyst Viability,
W82-04401 1510 5F

GIARDIASIS
Waterborne Giardiasis--An Overview,
W82-04186 1509 5C

GILA RIVER
Channel Instability in a Braided, Sand Bed River,
W82-01316 1503 2J

GILA RIVER BASIN
Nitrogen and Phosphorus Dynamics in Hot Desert Streams of Southwestern U.S.A.,
W82-04930 1511 2K

GILBERT ISLANDS
A Ground Water Resources Study Of A Pacific Ocean Atoll--Tarawa, Gilbert Islands,
W82-04254 1510 2F

GILLETTE
42-Mile Water Pipeline for Coal Boom Town.
W82-02359 1505 6D

GLACIAL AQUIFERS
Predictive Depositional Model for Glacial Aquifers,
W82-00828 1502 2F

Surficial Geology of Dugway Quadrangle, Oswego County, New York,
W82-01775 1503 7C

Geoelectric Soundings for Predicting Aquifer Properties,
W82-02619 1506 2F

Glaciation and Ground Water.
W82-04002 1509 2C

Ground-Water Reconnaissance of Part of the Lower Kenai Peninsula, Alaska,
W82-05837 1511 2F

GLACIAL DRIFT
West Antarctic Ice Sheet Fluctuations in the Antarctic Peninsula Area,
W82-03362 1507 2C

GLACIAL LAKES
Monitoring Glacier Outburst Floods,
W82-01558 1503 2C

Estimates of the Magnitude of Glacier Outburst Floods from Lake Donjek, Yukon Territory, Canada,
W82-02241 1505 2C

The Structure of Crustacean Zooplankton Communities in Glaciated Eastern North America,
W82-05379 1511 2H

Topologic Model for Drainage Networks with Lakes,
W82-05905 1512 2A

GLACIAL SEDIMENTS
The Effect of Changing Sediment Supply on Sedimentation in a Glacier-Fed Lake,
W82-01510 1503 2H

GLACIAL STREAMS
Channel Form and Flow Characteristics of Supraglacial Streams, Austre Okstindbreen, Norway,
W82-02787 1506 2E

GLACIER MASS BALANCE
The Mass Balance of Peyto Glacier, Alberta, Canada, 1965 to 1978,
W82-02638 1506 2C

GLACIERS
Effects of Volcanism on the Glaciers of Mount St. Helens,
W82-00007 1501 2C

Shallow Core Snow Chemistry of Athabasca Glacier, Alberta,
W82-00320 1501 2C

Glacier Surveys in Alberta - 1979,
W82-01855 1504 2C

Development and Applications of a Runoff Model for Snowcovered and Glacierized Basins,
W82-01885 1504 2C

Recrystallisation and Electrical Behaviour of Glacier Ice,
W82-03702 1508 2C

Glaciers and Their Fluctuations,
W82-04777 1511 2C

Albedo Survey on Andrei Glacier, Iskut River Basin, B. C., Midsummer, 1980,
W82-06578 1512 2C

GLACIOHYDROLOGY
Monitoring Glacier Outburst Floods,

Minor - Element Distribution in Mineral and Thermal Waters (Repartition des Elements Traces dans les Eaux Thermo-Minerals),
W82-03541 1508 2F

Factors of the Chemical Composition of Seepage and Groundwaters in the Intertropical Zone (West Africa),
W82-03543 1508 2K

Character of Brines from the Belle Isle and Weeks Island Salt Mines, Louisiana, U.S.A.,
W82-03584 1508 2F

Analysis of Ground-Water Hydrographs for Defining a Crystalline Hydrogeological Environment,
W82-03648 1508 2F

Storage and Retrieval of Ground-Water Data at the U.S. Geological Survey,
W82-03649 1508 10B

Groundwater Quality Improvement Through Nonlinear Diffusion,
W82-03652 1508 5G

Chemical and Hydrological Heterogeneity of Groundwaters in the Upper 'Jura Neuchatelois', Switzerland. (Heterogeneite Chimique et Hydrologique Des Eaux Souterraines D'un Karst Du Haut-Jura Neuchatelois, Suisse),
W82-03794 1509 2K

Flow-System Controls of the Chemical Evolution of Groundwater,
W82-03795 1509 2K

Geochemical Inputs for Hydrological Models of Deep-Lying Sedimentary Units: Loss of Mineral Hydration Water,
W82-03796 1509 2F

The Rate of Flushing as a Major Factor in Determining the Chemistry of Water in Fossil Aquifers in Southern Israel,
W82-03799 1509 2K

Chemical Evolution of Groundwater in a Drainage Basin of Holocene Age, East-Central Alberta, Canada,
W82-03800 1509 2K

Isotopic and Geologic Studies to Identify the Sources of Sulfate in Groundwater Containing High Barium Concentrations,
W82-03931 1509 2K

Hydrologic Almanac of Florida,
W82-03974 1509 7C

Map Showing General Chemical Quality of Ground Water in the Richfield Quadrangle, Utah,
W82-03977 1509 7C

Annual Water-Resources Review, White Sands Missile Range, New Mexico, 1980,
W82-03980 1509 2F

Water Resources Investigations in Mississippi 1980-81.
W82-03988 1509 7C

Water Resources Data for West Virginia, Water Year 1979. Appendix - Coal Areas.
W82-03990 1509 7C

Ground-Water Hydrology of the Mormon Island Crane Meadows Wild-Life Area, Near Grand Island, Hall County, Nebraska,
W82-03991 1509 2F

Ground-Water Levels in Selected Well Fields and in West-Central Florida, May 1981,
W82-03992 1509 7C

Results of Exploratory Drilling at Point Mackenzie, Alaska, 1981,
W82-03993 1509 2F

A Historical Jewelpiece--Discovery of the Millennium Hydrological Works of Karaji,
W82-04155 1509 2F

Chemical Species Dissolved in Shallow Groundwaters of the Plains Around Rokko Mountains, (In Japanese),
W82-04177 1509 2K

Geohydrologic Appraisal of Water Resources of the South Fork, Long Island, New York,
W82-04206 1509 7C

Hydrologic Effects from Changes in Ground Water Pumpage,
W82-04428 1510 2F

The Use of Landsat Imagery in Ground Water Exploration,
W82-04436 1510 7B

A Lumped Approach to the Inverse Problem in Ground Water Hydrology,
W82-04451 1510 4B

Ground-Water Conditions in the Upper Virgin River and Kanab Creek Basins Area, Utah, with Emphasis on the Navajo Sandstone,
W82-04486 1510 6D

Digital Models of Ground-Water Flow in the Cape Cod Aquifer System, Massachusetts,
W82-04487 1510 2F

Maps Showing Ground-Water Conditions in the Bill Williams Area, Mohave, Yavapai, and Yuma Counties, Arizona--1980,
W82-04488 1510 7C

Ground-Water Levels in Arkansas, Spring 1981,
W82-04489 1510 7C

Two-Dimensional Ground-Water Flow Model of the Cretaceous Aquifer System of Lee County and Vicinity, Mississippi,
W82-04492 1510 2F

Borehole Data-Collection Methods Applicable for the Regional Observation and Monitor Well Program, Southwest Florida Water Management District,
W82-04493 1510 4B

The Geothermal Hydrology of Warner Valley, Oregon: A Reconnaissance Study,
W82-04496 1510 1A

Effect of Irrigation Pumping on the Ground-Water System in Newton and Jasper Counties, Indiana,
W82-04497 1510 4B

Geohydrologic Reconnaissance of the Crofton Unit, Northeastern Nebraska,
W82-04498 1510 4B

Dissolved-Solids Concentrations of Ground Water in the Sacramento Valley, California,
W82-04502 1510 7C

Water Resources Data for Arkansas, Water Year 1980.
W82-04503 1510 7C

Water Resources Inventory of Connecticut, Part 7, Upper Connecticut River Basin,
W82-04505 1510 2E

Potentiometric Surface of the Floridan Aquifer in Central Sumter County, Florida, May 1981,
W82-04507 1510 7C

Water-Resources Investigations of the U.S. Geological Survey in Kansas--Fiscal Year 1979 and 1980,
W82-04510 1510 7C

Probable High Ground-Water Levels on Cape Cod, Massachusetts,
W82-04511 1510 7C

Water-Quality Data for Selected Stations in the East Everglades, Florida,
W82-04513 1510 7C

Water-Quality Data for the Potomac-Raritan-Magothy Aquifer System, Trenton to Pennsville, New Jersey, 1980,
W82-04515 1510 7C

Survey of Selected Organic Compounds in Aquifers of New York State Excluding Long Island,
W82-04520 1510 5B

Water Resources Data for Pennsylvania, Water Year 1980--Volume 1. Delaware River Basin.
W82-04521 1510 7C

Water Resources Data for Louisiana, Water Year 1981--Volume 3. Coastal Louisiana.
W82-04523 1510 7C

Manual Groundwater Sampling device (Vorrichtung Zur Manuellen Wasserprobenentnahme Aus Grundwassermessstellen),
W82-04582 1510 7B

Groundwater Monitoring,
W82-04809 1511 6E

Potable Water Production in Holland.
W82-04851 1511 5F

The Occurrence and Origin of Methane in Some Groundwater Flow Systems,
W82-04925 1511 2K

Lineboro Quadrangle: Hydrogeology,
W82-04969 1511 7C

Hydrologic Data of the Shawsheen River Basin, Massachusetts,
W82-04970 1511 7C

Groundwater Resources of the Williamsport Region, Lycoming County, Pennsylvania,
W82-04971 1511 2F

Groundwater and Geology of the Cumberland Valley, Cumberland County, Pennsylvania,
W82-04972 1511 2F

Groundwater Resources of the Gettysburg and Hammer Creek Formations, Southeastern Pennsylvania,
W82-04973 1511 2F

Hydrogeologic Data Collected from the Kissimmee Planning Area, South Florida Water Management District,
W82-04974 1511 7C

Littletown Quadrangle: Hydrogeology,
W82-04984 1511 7C

Ground-Water Hydrology of Jefferson County, West Virginia,
W82-04986 1511 2F

Compilation of Hydrologic Data for the Edwards Aquifer, San Antonio Area, Texas, 1934-79.
W82-04987 1511 7C

Migration of Ruthenium-106 in a Nevada Test Site Aquifer: Discrepancy between Field and Laboratory Results,
W82-05008 1511 5B

Hydrologic Reconnaissance of the Southern Great Salt Lake Desert and Summary of the Hydrology of West-Central Utah,
W82-05221 1511 7C

Quality of Ground Water in Routt County, Northwestern Colorado,
W82-05227 1511 2F

Chemical Character of Water in the Red River Alluvial Aquifer, Louisiana,
W82-05228 1511 7C

Maps Showing Ground-Water Conditions in the San Simon Wash Area, Papago Indian Reservation, Arizona--1979,
W82-05231 1511 7C

Maps Showing Ground-Water Conditions in the Agua Fria Area, Yavapai and Maricopa Counties, Arizona-1979,
W82-05232 1511 7C

A Wind-Powered, Ground Water Monitoring Installation at a Radioactive Waste Management Site in Idaho,
W82-05233 1511 5B

The Status of Groundwater Law in New York State,
W82-05400 1511 6E

Groundwater Strategy: Protecting a Vital Resource,
W82-05403 1511 5B

Radium Content and the 226Ra/228Ra Activity Ratio in Groundwater from Bedrock,
W82-05450 1511 2K

Ground-Water Contamination Due to Vanishing and Finite-Size Continuous Sources,
W82-05799 1511 5B

Hydrology of Area 32, Eastern Region, Interior Coal Province, Indiana,
W82-05825 1511 7C

Annual Summary of Ground-Water Conditions in Arizona, Spring 1979 to Spring 1980.
W82-05826 1511 4B

Map Showing Ground-Water Conditions in the Sacramento Valley Area, Mohave County, Arizona--1979,
W82-05827 1511 7C

Hydrogeologic Reconnaissance of the Republican River Basin in Nebraska,
W82-05828 1511 7C

Chloride and Total Hardness Concentrations of Water From the Upper Part of the Floridan Aquifer in St. Johns County, Florida,
W82-05829 1511 7C

Hydrogeologic Sections Through Lee County and Adjacent Areas of Hendry and Collier Counties, Florida,
W82-05830 1511 7C

Hydrology of Area 3, Eastern Coal Province, Pennsylvania,
W82-05831 1511 7C

Hydrology of Area 25, Eastern Region, Interior Coal Province, Illinois,
W82-05832 1511 7C

Hydrology of Area 4, Eastern Coal Province, Pennsylvania, Ohio, and West Virginia,
W82-05833 1511 7C

Hydrology of Area 5, Eastern Coal Province, Pennsylvania, Maryland, and West Virginia,
W82-05834 1511 7C

Hydrology of Area 18, Eastern Coal Province, Tennessee,
W82-05835 1511 7C

Ground-Water Reconnaissance of Part of the Lower Kenai Peninsula, Alaska,
W82-05837 1511 2F

Potentiometric Surface of the Floridan Aquifer, Southwest Florida Water Management District, September 1981,
W82-05840 1511 7C

Computer Simulation of the Steady-State Flow System of the Tertiary Limestone (Floridan) Aquifer System in East-Central Florida,
W82-05844 1511 2F

Hydrology and the Effects of Industrial Pumping in the Nikiski Area, Alaska,
W82-05846 1511 2F

Potentiometric Surface of the Floridan Aquifer in the St. Johns River Water Management District and Vicinity, Florida, September 1981,
W82-05849 1511 7C

Potentiometric Surface of the Floridan Aquifer in Central Sumter County, Florida, September 1981,
W82-05850 1511 7C

Map of the Antelope Valley-East Kern Water Agency Area, California, Showing Ground-Water Subunits and Areas, and Dissolved-Solids Concentrations, 1970-80,
W82-05851 1511 7C

The Chemistry and Isotopic Composition of Saline Groundwaters from the Sudbury Basin, Ontario,
W82-05990 1512 2F

Hydrogeologic Data from Selected Wells and Test Holes in Suffolk County, Long Island, New York, 1972-80,
W82-06131 1512 7C

Water Resources of the Ochlockonee River Area, Northwest Florida,
W82-06132 1512 2A

Ground-Water Data for the Beryl-Enterprise Area, Escalante Desert, Utah,
W82-06134 1512 7C

Potentiometric Map of the Sparta Aquifer System in Mississippi, Fall 1980,
W82-06135 1512 7C

Availability and Quality of Water from Underground Coal Mines in Johnson and Martin Counties, Kentucky,
W82-06136 1512 3B

Water-Level Map of the Mississippi Delta Alluvium in Northwestern Mississippi, April 1981,
W82-06138 1512 7C

Ground-Water Hydrology of Strip-Mine Areas in Eastern Ohio (Conditions During Mining of Two Watersheds in Coshocton and Muskingum Counties),
W82-06141 1512 2F

Water Resources Data for Oregon, Water Year 1980--Volume 2. Western Oregon.
W82-06143 1512 7C

San Juan River Basin,
W82-06144 1512 7C

Groundwater and Meltwater in the Snowmelt Induced Runoff,
W82-06198 1512 2E

Groundwater Seepage as a Nutrient Source to a Drainage Lake; Lake Mendota, Wisconsin,
W82-06285 1512 5B

Steady State Perched Groundwater Mounds on Thick Sublayers,
W82-06317 1512 2F

Occurrence of Fluoride Bearing Groundwaters and Their Relationship with Water Table Fluctuations,
W82-06443 1512 2K

Water Resources Data for Tennessee, Water Year 1980.
W82-06670 1512 7C

Water-Resources Investigations of the U. S. Geological Survey in Arkansas--Fiscal year 1981.
W82-06673 1512 7C

Water Resources Data, Louisiana, Water Year 1981--Volume 1. Central and Northern Louisiana.
W82-06674 1512 7C

Areal Extent of a Plume of Mineralized Water from a Flowing Artesian Well in Dade County, Florida,
W82-06680 1512 5B

Summary of Hydrologic Testing in Tertiary Limestone Aquifer, Tenneco Offshore Exploratory Well--Atlantic OCS, Lease-Block 427 (Jacksonville NH 17-5),
W82-06685 1512 2F

Ground Water in the Piedmont Upland of Central Maryland,
W82-06686 1512 2F

Organic Solutes in Ground Water at the Idaho National Engineering Laboratory,
W82-06688 1512 7C

Evaluation of a Predictive Ground-Water Solute-Transport Model at the Idaho National Engineering Laboratory, Idaho,
W82-06689 1512 5B

Hydrologic and Chemical Evaluation of the Ground-Water Resources of Northwest Elkhart County, Indiana,
W82-06691 1512 5B

Ground Water,
W82-06807 1512 5B

Identification of Aquifer Transmissivities: The Comparison Model Method,
W82-06859 1512 2F

Geophysical Reconnaissance of Lemmon Valley, Washoe County, Nevada,
W82-06949 1512 2F

Reconnaissance of the Ground-Water Resources of Kings and Queens Counties, New York,
W82-06952 1512 4B

Water Resources Data for Alabama, Water Year 1980–Volume 1. Apalachicola, Choctawatchee, Blackwater, Escambia, Perdido, and Alabama River Basins,
W82-06953 1512 7C

Water Resources Data for Alabama, Water Year 1980–Volume 2. Tombigbee, Mobile, Dog, Pascagoula, and Tennessee River Basins,
W82-06954 1512 7C

Water Resources Data for Florida, Water Year 1980–Volume 2B. South Florida Ground Water,
W82-06956 1512 7C

Water Resources Data for Oregon, Water Year 1980–Volume 1. Eastern Oregon.
W82-06957 1512 7C

GROUNDWATER AVAILABILITY

Groundwater Availability in Acadia National Park and Vicinity, Hancock and Knox Counties, Maine,
W82-00017 1501 2F

Temporary Hydrologic Changes After Deforestation for Pioneer Homesteading,
W82-03544 1508 4C

The Meadowbrook Artificial-Recharge Project in Nassau County, Long Island, New York,
W82-03630 1508 4B

Isotope Hydrology of Groundwaters in the Pampa Del Tamarugal, Chile,
W82-03651 1508 2F

Surface Water and Groundwater Interactions in a Surficial Aquifer in Northwest Iowa,
W82-03718 1508 2A

Ground Water Protection by Recharge Zone Management: Institutional Arrangements,
W82-03951 1509 5G

Sewage Irrigation and Recharge Consequences, Oahu,
W82-04041 1509 3C

The Response of Groundwater to Artificial Recharge Schemes,
W82-04337 1510 4B

Hydrologic Effects from Changes in Ground Water Pumpage,
W82-04428 1510 2F

A Numerical Linked Model for the Prediction of the Decline of Groundwater Mounds Developed Under Recharge,
W82-04481 1510 2F

Carbonate Geochemistry of Vadose Water Recharging Limestone Aquifers,
W82-04526 1510 2F

Advanced Wastewater Treatment for Groundwater Recharge–Berlin Recharge Project (Recyclage et Traitement D'Eaux usees pour Recharger une nappe Souterraine: L'Installation Pilote de Berlin),
W82-04831 1511 5D

Assessment of a Regional Aquifer in Central Illinois,
W82-05052 1511 2F

Chemical Character of Water in the Red River Alluvial Aquifer, Louisiana,
W82-05228 1511 7C

The Likelihood of Active Groundwater Recharge in the Botswana Kalahari,
W82-05657 1511 4B

Potential for Groundwater Recharge Seepage from Flood-Retarding Reservoirs in South Central Nebraska,
W82-05663 1511 4B

Chloride Ion Concentrations as an Aid to Estimating Recharge to the Woburn,
W82-06234 1512 2F

Field Study of Organic Water Quality Changes during Groundwater Recharge in the Palo Alto Baylands,
W82-06831 1512 5B

GROUNDWATER RESERVOIRS

Waste Heat Balance in Aquifers Calculated by a Computer Programme,
W82-00830 1502 7B

GROUNDWATER RESOURCES

Ground-Water Data for Michigan, 1979,
W82-00014 1501 2F

GROUNDWATER RUNOFF

Investigations into the Dynamics of Water Movement on a Low Relief Landscape on the Eastern Shore of Maryland,
W82-01673 1503 2F

GROUNDWATER STORAGE

Drawdowns at the Free Water Table During Pumping Tests in Artesian and Semiartesian Aquifers,
W82-01890 1504 2F

Ground-Water Management in Basalts,
W82-04931 1511 4B

GROUTING

Grout Curtain in the Foundation of the Arch Dam of the Inguri Hydroelectric Station,
W82-01973 1504 8A

Use of Crack-Resistant Linings of Hydraulic Tunnels with Consolidation Grouting of the Rock,
W82-02670 1506 8A

Experience in the Construction and First Years of Operation of the Zeya Dam,
W82-02952 1506 8A

Evaluation of the Mechanical Properties of the Mass of a Concrete Dam with Interblock Joints,
W82-03158 1507 8G

Grouting Works in the Diversion Tunnel of the Inguri Hydroelectric Station,
W82-03164 1507 8A

Stopping Water with Chemical Grout,
W82-03396 1507 8G

Quantitative Relationship of Grouting to the Reduction of Groundwater Flow Through Rock Foundations,
W82-05201 1511 8E

Influence of Remedial Measures on the Mohne Gravity Dam (Einfluss Der Sanierungsmassnahmen Auf Die Mohnemauer),
W82-06239 1512 8A

GROWTH

SOYROOT - A Dynamic Model of Soybean Root Growth and Water Uptake,
W82-00114 1501 2I

The Harvest of Microalgae from the Effluent of a Sewage Fed High Rate Stabilization Pond by Tilapia Nilotica. Part 2: Studies of the Fish Ponds,
W82-00456 1501 3C

Abundance, Life History, and Growth of Introduced Populations of the Opossum Shrimp (Mysis Relicta) in Subalpine California Lakes,
W82-01638 1503 2H

Effects of the Aquatic Herbicide 2,4-D DMA on the Ecology of Experimental Ponds,
W82-01949 1504 5C

GROWTH KINETICS
The Effect of Environmental Factors on Phytoplankton Growth: Temperature and the Interactions of Temperature with Nutrient Limitation,
W82-02221 1505 2H

The Effect of Environmental Factors on Phytoplankton Growth: Light and the Interactions of Light with Nitrate Limitation,
W82-02331 1505 2H

Dynamics of Bacterial Sulfate Reduction in a Eutrophic Lake,
W82-03119 1507 2H

Phosphorus-Limited Growth of a Green Alga and a Blue-Green Alga,
W82-03120 1507 2H

GROWTH RATES
Effect of Crude Oil and Petroleum-Degrading Microorganisms on the Growth of Freshwater and Soil Protozoa,
W82-00517 1502 5C

Water Relations of Three Cowpea Cultivars (Vigna Unguiculata L.),
W82-00607 1502 2I

The Ecological Significance of a Stunted White Perch Population in an Eutrophic Maine Pond,
W82-04418 1510 5C

The Effect of Phosphorus Limitation on Algal Growth Rates: Evidence from Alkaline Phosphatase,
W82-05380 1511 5C

GROWTH STAGES
Freshwater Influences on Striped Bass Population Dynamics,
W82-02116 1505 6G

Sunflower Yield Vs. Water Deficits in Major Growth Periods,
W82-04361 1510 2I

Improved Water and Nutrient Management Through High-Frequency Irrigation, Vol 2: Response of Peanuts to Irrigation Management at Different Crop Growth Stages,
W82-05293 1511 3F

GUADALUPE MOUNTAINS NATIONAL PARK
Effects of Recreation on Water Quality in Guadalupe Mountains National Park,
W82-02821 1506 5B

GUAM
Metal Concentrations in Guam Urban Runoff,
W82-05302 1511 5B

The Effects of Land-Clearing on a Small Watershed in Southern Guam,
W82-05303 1511 5C

Water Quality Assessment for Agana Springs,
W82-05304 1511 5A

Ammonium Uptake by Micronesian Species of Gracilaria (Rhodophyta),
W82-05311 1511 5G

Diatom Assemblages as Indicators of Water Quality in Freshwater Habitats of Guam,
W82-06146 1512 5A

GUILFORD-CHESTER DIVISION
Year-Round Distribution System Maintenance,
W82-04699 1510 5F

GULF OF ALASKA
Major- and Trace-Element Composition of Suspended Matter in the North-East Gulf of Alaska: Relationships with Major Sources,
W82-02259 1505 5B

GULF OF MEXICO
Gulf of Mexico Wetlands: Value, State of Knowledge and Research Needs,
W82-01902 1504 2L

Industrial Waste Dumping at Deepwater Sites in the Gulf of Mexico,
W82-01903 1504 5E

Review of Estuarine-Related Projects by the Gulf of Mexico Fishery Management Council,
W82-02146 1505 6G

Isotope Geochemistry of Water in Gulf Coast Salt Domes,
W82-04742 1510 2K

GULF OF MEXICO STATES
Gulf of Mexico: A Socioeconomic View of Competing Resources,
W82-01901 1504 6B

GULF OF SIRTE
Major Evaporite Deposition from Groundwater Remobilized Salts,
W82-03339 1507 5B

GULFS
Major- and Trace-Element Composition of Suspended Matter in the North-East Gulf of Alaska: Relationships with Major Sources,
W82-02259 1505 5B

Zinc in Seawater and Sediments,
W82-03166 1507 5B

GULLY EROSION
Gully Development in the Deep Loess Hills Region of Central Missouri,
W82-00472 1501 2J

Gully Erosion,
W82-01407 1503 2J

GUNITE
Cavitation-Resistant Gunite Coatings for Hydraulic Structures,
W82-03677 1508 8G

GYPSUM
Effects of Tillage and Gypsum Incorporation on Rain Runoff and Crust Strength in Field Soils Irrigated With Saline-Sodic Water,
W82-00327 1501 2A

Quality of Irrigation Water and Effects of Sulfuric Acid and Gypsum on Soil Properties and Sundangrass Yields,
W82-00767 1502 3C

A Combined Salt Transport-Chemical Equilibrium Model for Calcareous and Gypsiferous Soils,
W82-01230 1503 5B

HABITATS
Photosynthesis and Growth in Populations of Populus Deltoides from Constrating Habitats,
W82-00935 1502 2I

Gulf of Mexico Wetlands: Value, State of Knowledge and Research Needs,
W82-01902 1504 2L

Effects of Wetland Changes on the Fish and Wildlife Resources of Coastal Louisiana,
W82-02129 1505 4C

Effects of Upland Drainage on Estuarine Nursery Areas of Pamlico Sound, North Carolina,
W82-02164 1505 2L

Wetlands and Deepwater Habitats: A New Classification,
W82-05716 1511 2L

HAIL
Various Kinetic Energy Characteristics of Hailpatterns in the Grossversuch IV Experiment,
W82-01732 1503 2B

Reciprocating Hail Processes in the Alps,
W82-03227 1507 2B

Calculations of Hailstone Growth in a Sloping Steady Updraft,
W82-06526 1512 2B

HALIFAC
Factors Affecting Coliform Bacteria Growth in Distribution systems,
W82-04792 1511 5F

HALIFAX HARBOR
Molecular Diffusion and the Sedimentary Environment: Results from the In Situ Determination of Whole Sediment Diffusion Coefficients,
W82-03091 1507 2J

HALL COUNTY
Ground-Water Hydrology of the Mormon Island Crane Meadows Wild-Life Area, Near Grand Island, Hall County, Nebraska,
W82-03991 1509 2F

HALOETHERS
Determination of Haloethers in Industrial and Municipal Wastewaters,
W82-04398 1510 5A

HALOGENATED HYDROCARBONS
Sources of Halogenated Hydrocarbons in an Urban Water Supply,
W82-02991 1506 5B

HALOGENATED PESTICIDES
Sources of Halogenated Hydrocarbons in an Urban Water Supply,
W82-02991 1506 5B

Selected Organic Pesticides, Behavior and Removal from Domestic Wastewater by Chemical and Physical Processes,
W82-05481 1511 5D

HALOGENS
Improved Water Management of Coal Conversion Processes by Preliminary Absorption of Halides,
W82-00437 1501 5D

Determination of Polyhalogenated Phenolic Compounds in Drinking Water, Human Blood Serum and Adipose Tissue,
W82-00879 1502 5A

The Effect of pH and Halogens on the Stability of Reverse Osmosis Membranes,
W82-02188 1505 5D

Removal of Total Organic Halogen by Granular Activated Carbon Adsorbers,
W82-04429 1510 5F

Comparative Disinfection of Poliovirus by Bromine Chloride and Chlorine in a Model Contact Chamber,
W82-04661 1510 5D

Comparison of Trihalomethane Levels and Other Water Quality Parameters for Three Treatment Plants on the Ottawa River,
W82-04810 1511 5F

HALOPHYTES
Finds of Relict Infusoria in Kiev Reservoir,
W82-02079 1504 2H

HAM'S LAKE
The Effect of Artificial Destratification on Physico-Chemical Parameters and Phytoplankton in Ham's Lake, Oklahoma,
W82-03510 1508 5G

HAMBURG
Automatic Flow Control in Combined Sewer Systems-Effectiveness and Implementation Problems,
W82-04049 1509 5D

Northern Elbe Culvert,
W82-05427 1511 8B

HAMILTON CITY
Floodflow Characteristics of the Sacramento River in the Vicinity of Gianella Bridge, Hamilton City, California,
W82-03985 1509 2E

HAMILTON HARBOR
Some Measurements on Near Surface Turbulence in the Depth Direction and Some Phytoplankton Distribution Implications,
W82-02227 1505 7B

Physical Variability and Phytoplankton Communities IV. Temporal Changes in the Phytoplankton Community of a Physically Variable Lake,
W82-03229 1507 2H

HAMMER CREEK FORMATION
Groundwater Resources of the Gettysburg and Hammer Creek Formations, Southeastern Pennsylvania,
W82-04973 1511 2F

HANDBOOKS
Water Resources Protection Measures in Land Development - A Handbook - Revised Edition,
W82-02453 1505 4D

HANFORD SITE
Biological Colonization of an Industrial Pond: Status After Two Decades,
W82-03772 1509 2H

HARBOR SPRINGS
A Fluoride Overfeed Incident at Harbor Springs, Michigan,
W82-04147 1509 5C

HARBORS
Resonator Studies for Kincardine Harbour, Lake Huron,
W82-00228 1501 8B

Richards Bay: An Ecological Dilemma,
W82-00679 1502 6A

Transports in the Duluth-Superior Harbor,
W82-01136 1503 5B

Sediment Distribution of Methanogenic Bacteria in Lake Erie and Cleveland Harbor,
W82-01233 1503 2H

Resonant Oscillation in Duluth-Superior Harbor,
W82-01837 1504 2H

On the Presence of Fecal Steroids in Sediments from Two Mexican Harbors,
W82-02012 1504 5A

Some Measurements on Near Surface Turbulence in the Depth Direction and Some Phytoplankton Distribution Implications,
W82-02227 1505 7B

Orthophosphate Uptake by Phytoplankton and Bacterioplankton from the Los Angeles Harbor and Southern California Coastal Waters,
W82-03172 1507 5B

Effects of Eutrophication on the Intertidal Ecology of Langstone Harbour, U.K. and Proposed Control Measures,
W82-03207 1507 5C

Physical Process and Eutrophication,
W82-06875 1512 5C

HARDING CREEK
Water-Quality Reconnaissance of Harding Creek, Lawrence County, Arkansas,
W82-03995 1509 7C

HARDNESS
Water Hardness Determination by the Catalytic Polarographic Wave of Magnesium Ion,
W82-01083 1502 5A

Precipitation Kinetics of Calcium Carbonate and Magnesium Hydroxide in a Scaling System,
W82-03136 1507 2K

Effect of Waters of Various Hardness on the Cardiovascular System. (O Vliyanii vod Raznoi Zhestkosti na Serdechno Sosudistuyu Sistemu),
W82-03699 1508 5C

Water Softening by Crystallization,
W82-03750 1508 5F

HARDNESS (WATER)
Process for Removing Alkalinity and Hardness From Waters,
W82-00063 1501 5F

HARTFORD AREA
Urban Rainfall-Runoff Modelling Using Remote Sensing Imagery,
W82-03820 1509 2A

HAWAII
Survival of Human Enteroviruses in the Hawaiian Ocean Environment: Evidence for Virus-Inactivating Microorganisms,
W82-00587 1502 5C

Water Resources Data for Hawaii and Other Pacific Areas, Water Year 1980 - Volume 1. Hawaii.
W82-01208 1503 7C

Water Resources Data for Hawaii and Other Pacific Areas, Water Year 1980 - Volume 2. Trust Territory of the Pacific Islands, Guam, American Samoa, and Northern Mariana Islands.
W82-01209 1503 7C

Application of Nutrient-Saturated Growth Model to Phytoplankton Management in Freshwater Prawn (Macrobrachium Rosenbergii) Ponds in Hawaii,
W82-01483 1503 2H

Suspended Sediment Production from Forested Watersheds on Oahu, Hawaii,
W82-01531 1503 2J

Response of Subtropical Phytoplankton to Power Plant Entrainment,
W82-02708 1506 5C

Physicochemical Influences on Phytoplankton Production in a Tropical Alpine Lake,
W82-02921 1506 2H

Application of a Single Reservoir Operation Policy to a Rain Water Cistern System,
W82-03088 1507 3B

Sewage Irrigation and Recharge Consequences, Oahu,
W82-04041 1509 3C

Waste Water Disposal Through a Coastal Aquifer,
W82-04231 1509 5E

Numerical Simulation of a Thick Freshwater Lens: Pearl Harbor Groundwater Model,
W82-05621 1511 2F

Summary of Available Data on Surface Water, State of Hawaii. Volume I: Island of Kauai,
W82-05836 1511 7C

Helium Isotopes in Geothermal Systems: Iceland, The Geysers, Raft River and Steamboat Springs,
W82-06085 1512 2F

Kaneohe Bay Sewage Diversion Experiment: Perspectives on Ecosystem Responses to Nutritional Perturbation,
W82-06846 1512 5G

Hypereutrophication of an Hawaiian Alpine Lake,
W82-06991 1512 5C

HAY
Soil Water Studies on Small Lucerne Plots,
W82-01713 1503 2I

HAZARDOUS MATERIAL
Evaluation of Remedial Treatment, Detoxification and Stabilization Alternatives,
W82-01434 1503 5D

HAZARDOUS MATERIALS
The Toxic Waste Dump Problem and a Suggested Insurance Program,
W82-00591 1502 5E

Environmental Health Hazards,
W82-00625 1502 5F

Report of the Aquatic Ecosystem Objectives Committee,
W82-00705 1502 5G

1980 Annual Report, Committee on the Assessment of Human Health Effects of Great Lakes Water Quality,
W82-00706 1502 5C

Toxics in Municipal and Industrial Wastewaters,
W82-00712 1502 5A

Dredging and Disposal of Toxic Material Using Japanese Technology Suggested for United States,
W82-01026 1502 5E

An Industrial and Hazardous Waste Inventory of Washington's Manufacturing Industries (1980),
W82-01065 1502 5B

Biological Testing Methods - Compliance with Hazardous Waste Regulation Chapter 173-302 WAC.
W82-01071 1502 5A

Preliminary Risk Evaluation for Suspected Hazardous Waste Disposal Sites in Connecticut,
W82-01417 1503 5G

Rating the Hazard Potential of Waste Disposal Facilities,
W82-01418 1503 5G

Evaluation of Hydrogeologic Conditions,
W82-01420 1503 5G

Site Assessment: Improving Confidence Levels with Surface Remote Sensing,
W82-01422 1503 5G

Mapping Contaminated Soil Plumes by Kriging,
W82-01423 1503 5G

Surface Water Management at Hazardous Waste Sites,
W82-01429 1503 5G

Comparative Evaluation of Processes for the Treatment of Concentrated Wastewaters at Uncontrolled Hazardous Waste Sites,
W82-01430 1503 5D

Rapid Methods of Chemical Analysis Used in Emergency Response Mobile Laboratory Activities,
W82-01431 1503 5A

Stabilization/Solidification of Waste from Uncontrolled Disposal Sites,
W82-01432 1503 5E

Preliminary Design and Cost Estimates for Remedial Actions at Hazardous Waste Disposal Sites,
W82-01435 1503 5G

Perspective on Management and Disposal of Hazardous Wastes,

HAZARDOUS WASTE INVENTORY

An Industrial and Hazardous Waste Inventory of Washington's Manufacturing Industries (1980),
W82-01065 1502 5B

HAZARDS

Water Quality Management Using the Hazard Assessment Approach,
W82-03823 1509 5G

Delineation of Flood Hazards in the Jaynes Quadrangle, Pima County, Arizona,
W82-03976 1509 7C

Flood and Related Debris Flow Hazards Map, Las Vegas SE Quadrangle,
W82-04490 1510 7C

Flood and Debris Flood Hazards Map, Carson City Quadrangle,
W82-05217 1511 7C

Safety Considerations in Handling Activated Carbon,
W82-05442 1511 5D

HEAD LOSS

Pipeline Friction Losses for Wastewater Sludges,
W82-01545 1503 5D

Power Characteristic Curve of Hydraulic Turbine Set,
W82-03163 1507 8B

Declining-Rate Filtration,
W82-03656 1508 5F

HEAT BALANCE

The Use of the Equilibrium Temperature to Establish the Heat Balance of a Water Surface (Sur l'Utilization de la Temperature d'Equilibre pour l'Etablissement du Bilan Thermique d'Un Plan d'Eau),
W82-01353 1503 2H

HEAT BUDGET

Winter Heat Budget and Frazil Ice Production in the Upper St. Lawrence River,
W82-05736 1511 2C

HEAT EXCHANGER TUBE

Scale Inhibition of Calcium Sulfate by a Fluidized Bed,
W82-06104 1512 3A

HEAT EXCHANGERS

An Evaluation of Twin Wells for Use with Water Source Heat Pumps,
W82-05307 1511 8B

Use of Twin Wells and Water-Source Heat Pumps for Energy Conservation in Louisiana,
W82-05535 1511 8B

HEAT FLOW

On The Rate of Ice Formation in Water Cooled by a More Saline Sublayer,
W82-04190 1509 2C

Heat Loss from Rapid Infiltration Basin in Winter,
W82-05317 1511 5D

Hydrogeothermal Mapping of the Active Water-Exchange zone in the USSR,
W82-06782 1512 7C

HEAT PUMPS

Design of Heat Pump Return Wells,
W82-06294 1512 8C

HEAT REUSE

A Study of the In-Situ Indirect Freezing Process,
W82-04168 1509 3A

HEAT TRANSFER

Wave Formation and Heat Transfer at an Ice-Water Interface in the Presence of a Turbulent Flow,
W82-01128 1503 2C

On the Values and Variability of Degree-Day Melting Factor in Finland,
W82-01735 1503 2C

Influence of Heat Dispersion on Steady Convection in Anisotropic Porous Media,
W82-02924 1506 2F

Design and Economics of a Solar Heater Aquifer Storage System,
W82-03143 1507 4B

Surface Heat Loss and Frazil Ice Production in The St. Lawrence River,
W82-03925 1509 2C

A Study of The MSF Desalination Process Utilizing The Controlled Two-Phase Flow Concept–Phase II,
W82-04084 1509 3A

A Derivation of the Equations for Transport of Liquid and Heat in Three Dimensions in a Fractured Porous Medium,
W82-04888 1511 2F

Surface Heat Fluxes from Lake Ontario: Further Verification of Lake Thermal Model,
W82-05048 1511 2H

An Evaluation of Twin Wells for Use with Water Source Heat Pumps,
W82-05307 1511 8B

Uprating Sludge Digesters by Improving the Heat Transfer of Heatamix Units,
W82-05405 1511 5D

Use of Twin Wells and Water-Source Heat Pumps for Energy Conservation in Louisiana,
W82-05535 1511 8B

Condensation of Butane Vapor in a Gravity-Drained Ice Bed,
W82-05917 1512 3A

Effect of Surface Configuration on Heat Transfer by the Condensation of Steam over Fluted Surfaces. Part II,
W82-06106 1512 3A

Enhanced Heat Transfer in Horizontal Evaporator-Condensers with Straight-Edged Grooved Tubes,
W82-06108 1512 3A

Heat Transfer in a Rotating Disk Evaporator,
W82-06112 1512 3A

Some Basic Observations on Heat Transfer and Evaporation in the Horizontal Flash Evaporator,
W82-06113 1512 3A

Waste-Heat Vertical Tube Foam Evaporation for Cooling Tower Blowdown Renovation/Recycle,
W82-06369 1512 3E

HEAT TRANSFER COEFFICIENTS

Hydrodynamics of Condensate Films on Fluted Tube Surfaces. Part I,
W82-06105 1512 3A

Transfer Characteristics of Convex and Concave Rivulet Flow on Inclined Surfaces with Straight-Edged Grooves,
W82-06107 1512 3A

HEAT TREATMENT
Pilot-Scale Anaerobic Filter Treatment of Heat Treatment Liquor,
W82-02972 1506 5D

Improved Thermal Sludge Conditioning by Treatment with Acids and Bases,
W82-04785 1511 5E

HEATED WATER
Waste Heat Balance in Aquifers Calculated by a Computer Programme,
W82-00830 1502 7B

Ecological and Physiological Characteristics of Dikerogammarus Haemobaphes in the Areas in Which Heated Water Is Discharged from the Tripol'ye Power Station,
W82-01970 1504 5C

Temperature Tolerance and the Final Preferendum - Rapid Methods for the Assessment of Optimum Growth Temperatures,
W82-01996 1504 5C

Dynamics of Carp Growth and Biosynthetic Processes in the Liver of the Carp Reared in Containers in Heated Waste Water from Themal Power Stations,
W82-01998 1504 5C

Solar Heat Pond System,

The Effect of Metal Ions on the Ultraviolet Spectra of Humic Acid, Tannic Acid and Lignosulfonic Acid,
W82-06273 1512 2K

Applicability of Light Absorbance as a Measure of Organic Carbon in Humic Lake Water,
W82-06773 1512 5A

UV-Sensitive Complex Phosphorus: Association with Dissolved Humic Material and Iron in a Bog Lake,
W82-06930 1512 5C

HUMID AREAS

Combination Surface-Subsurface Drainage Systems for Humid Regions,
W82-01228 1503 4A

Dew Fall in the Dry Climatic Zones of India,
W82-03278 1507 2B

An Economic Comparison of the Irrigation of Corn in Humid and Arid Regions of the United States,
W82-05909 1512 6B

HUMIDITY

Humidity Measurement by Infrared Thermometry,
W82-05611 1511 7B

Autocorrelations of Moisture Parameters on Isentropic Surfaces,
W82-06210 1512 2B

HUNGARY

The Use of Dialyzing Sacks in Estimation of Production of Bacterioplankton and Phytoplankton,
W82-02866 1506 7B

Increasing Wastewater Treatment Efficiency (Uber die Erhohung des Wirkungsgrades der Abwasserreinigung),
W82-04545 1510 5D

Heavy Metals in Animals of Lake Balaton,
W82-06284 1512 5C

Complex Sequence Treats Fluctuating Flows,
W82-06814 1512 5F

HUNTER VALLEY

Effects of Recent Increases in Rainfall on Floods and Runoff in the Upper Hunter Valley,
W82-00668 1502 2E

HUNTING BAYOU

Intensive Survey of Hunting Bayou,
W82-04080 1509 5A

HURON

The Use of Chloramines to Prevent Trihalomethane Formation,
W82-04115 1509 5F

HURRICANES

Large Vertical Salinity Gradients in the Ft. Pierce Inlet Associated with Hurricane David,
W82-02569 1505 2L

HUSTON

Comprehensive Analysis of Nitrification of Chemical Processing Wastewaters,
W82-05271 1511 5D

HYDRA

Summer Population Fluctuations, Feeding, and Growth of Hydra in an Arctic Lake,
W82-02287 1505 2H

HYDRATION

Unslaked Lime - Its Direct Use in Phosphorus Removal Processes.
W82-03539 1508 5D

Geochemical Inputs for Hydrological Models of Deep-Lying Sedimentary Units: Loss of Mineral Hydration Water,
W82-03796 1509 2F

Ion Hydration and Ion Interaction,
W82-05310 1511 2K

HYDRAULIC CAPACITY

Sludge Management in the Rocky Mountain State,
W82-05165 1511 5E

HYDRAULIC CONDUCTING

Hydraulic Conductivity of Four Commercial Citrus Rootstocks,
W82-01546 1503 2I

HYDRAULIC CONDUCTIVITY

Measuring the Hydraulic Conductivity of Soil Adjacent to Tile Drains in a Heavy Clay Soil in the Netherlands,
W82-01323 1503 2G

Simple In Situ Determination of Hydraulic Conductivity by Power Function Descriptions of Drainage,
W82-01666 1503 2G

A Formula for Estimating Fissure Transmissivities from Steady-State Injection-Test Data,
W82-02292 1505 8E

The Use of Ground-Water Flow Models for Estimating Lake Seepage Rates,
W82-02549 1505 2F

A Method of Performing Response Tests on Highly Permeable Aquifers,
W82-02916 1506 2F

Mass Transport. 3. Role of Hydraulic Conductivity Data in Prediction,
W82-03578 1508 2G

A Study of Intergranular and Fissure Permeability in Chalk and Permian Aquifers, Using Double-Packer Injection Testing,
W82-03804 1509 2F

Kinematic Subsurface Stormflow,
W82-03844 1509 2G

Improved Water and Nutrient Management Through High-Frequency Irrigation - Vol 1: Comparison of Methods for Determining Soil Hydraulic Characteristics,
W82-04169 1509 3F

HYDRAULIC DESIGN

Model Study of a Box-Inlet Chute Spillway and SAF Stilling Basin,
W82-00046 1501 8A

Hydraulic Design for the Two-Stage Stilling Basin,
W82-00849 1502 8B

Hourly Diurnal Flow Variations in Publicly-Owned Wastewater Treatment Facilities,
W82-04402 1510 5D

Methods for Assessment of Stream-Related Hazards to Highways and Bridges,
W82-04626 1510 8A

Bicycle-Safe Grate Inlets Study; Volume 5 - Hydraulic Design of General Slotted Drain Inlets,
W82-06095 1512 8B

Optimal Risk-Based Hydraulic Design of Bridges,
W82-06432 1512 8A

HYDRAULIC ENGINEERING

Maximum Pressure During Water Hammer Accompanied by Discontinuity of the Flow,
W82-04772 1511 8B

Erosion by Plane Turbulent Jets,
W82-05277 1511 8B

Practical Calculations and Recommendations on the Use of Gunpowder Rock Breakers in Hydrotechnical Construction,
W82-06086 1512 8H

Planned Measures for Water Regulation Constructing the New Munich Airport (Geplante Wasserwirtschaftliche Massnahmen Beim Bau des Neuen Flughafens fur Munchen),
W82-06825 1512 8A

HYDRAULIC ENGINEERINGS

Stages of Progress in the Organization of Hydraulic Construction,
W82-02858 1506 8A

HYDRAULIC EQUIPMENT

Practical Calculations and Recommendations on the Use of Gunpowder Rock Breakers in Hydrotechnical Construction,
W82-06086 1512 8H

Flow Control at Stormwater Overflows and Stormwater Tanks (Abflussteuerung von Regenwasserbehandlungsanlagen),
W82-06633 1512 8C

HYDRAULIC FILL

Calculation of the Temperature Regime of Hydraulic Fill Dams During Their Construction,
W82-04760 1511 8D

Damming of the Kara-Bogaz-Gol Strait without Side Diversion of the Flow,
W82-05114 1511 8A

HYDRAULIC FRACTURING

The Role of Pore Pressure in Deformation in Geologic Processes,
W82-03706 1508 2F

HYDRAULIC GATES

Hydraulic Gates: The State-of-the-Art,
W82-00332 1501 8C

Hydraulic Model Study for the Design of the Wreck Cove Control Gates,
W82-00880 1502 8B

Hydraulic Gates,
W82-02206 1505 8C

New Jet-Gate Design,
W82-02691 1506 8C

Prospects of Using Radial Gates on Overflow Dams of Large Hydroelectric Stations,
W82-02693 1506 8A

James Bay Spillways and Control Structures,
W82-04692 1510 8A

HYDRAULIC GEOMETRY
Hydraulic Geometry and Minimum Rate of Energy Dissipation,
W82-01918 1504 2J

Qualitative Stability Analysis of Geologic Systems, with an Example from River Hydraulic Geometry,
W82-06717 1512 2E

HYDRAULIC GRADIENT
Soil Hydraulic Stability in a Subsurface Drainage System,
W82-00115 1501 2G

Simple In Situ Determination of Hydraulic Conductivity by Power Function Descriptions of Drainage,
W82-01666 1503 2G

Hydraulic Connection Between Lake Michigan and a Shallow Ground-Water Aquifer,
W82-02010 1504 2F

HYDRAULIC JUMP
Analysis of the Hydraulic Jump Within a Diverging Rectangular Channel,
W82-04645 1510 8B

An Investigation of a Jet-Assisted Hydraulic Jump,
W82-05279 1511 8B

Hydraulic Jump, Air Entrainment and Slug Flow in Bottom Outlets (Wechselsprung, Lufteintrag Und Schwallformiger Abfluss in Grundablassen),
W82-06244 1512 8B

HYDRAULIC LOADING
Production of Ammonia in a Packed-Bed Anaerobic Upflow (ANFLOW) Bioreactor,
W82-03598 1508 5D

HYDRAULIC MACHINERY
Cavitation and Wear on Hydraulic Machines,
W82-00331 1501 8C

Use and Investigation of Water-Jet Pumps (Ejectors) at the Chirkey Hydroelectric Station,
W82-05592 1511 8C

HYDRAULIC MODELS
Hydraulic Sediment Model Study for Proposed Bianco Diversion Dam Modification,
W82-00446 1501 8A

Hydraulic Model Study of Daule-Peripa Spillway and Outlet Works,
W82-01446 1503 8A

Hydraulic Modeling for Waste Stabilization Ponds,
W82-01965 1504 5D

Hydraulic Model Studies of Theodore Roosevelt Dam - South Spillway,
W82-03051 1507 8A

Hydraulic Model Studies of Landslide-Generated Water Waves-Morrow Point Reservoir,
W82-05211 1511 8B

Effects of Reduced Stream Discharge on Fish and Aquatic Macroinvertebrate Populations,
W82-05923 1512 6G

Bicycle-Safe Grate Inlets Study; Volume 5 - Hydraulic Design of General Slotted Drain Inlets,
W82-06095 1512 8B

Dissolved Oxygen Modelling of the St. Croix River, Maine - New Brunswick,
W82-06572 1512 5B

Hydraulic Model Studies - Yellowtail Afterbay Dam Sluiceway,
W82-06962 1512 8A

HYDRAULIC PERMEABILITY
Relationship of Electrical Dispersion to Soil Properties,
W82-02561 1505 8D

HYDRAULIC PROPERTIES
Preliminary Data From a Series of Artificial Recharge Experiments at Stanton, Texas,
W82-00085 1501 7C

Hydraulic Properties of Coal and Related Materials, Northern Great Plains,
W82-00278 1501 2F

Hydraulic Testing of Plastic Filter Fabrics,
W82-01613 1503 8G

Calculation of Large Unlined Canals,
W82-05131 1511 8B

On Conducting the Modified 'Slug' Test in Tight Formations,
W82-06060 1512 8B

Practical Calculations and Recommendations on the Use of Gunpowder Rock Breakers in Hydrotechnical Construction,
W82-06086 1512 8H

Evaluation of the Water Resources Potential of the Lower Missouri River Valley Alluvium,
W82-06696 1512 6B

HYDRAULIC ROUGHNESS
Evaluation of Effective Boundary Roughness for Gravel-Bed Rivers,
W82-01161 1503 8B

Resistance Equation for Large-Scale Roughness,
W82-04696 1510 2E

HYDRAULIC STRUCTURES
Rational Dimensions of an Earth Blanket and Its Seepage Calculation,
W82-02666 1506 8A

The Effect of Wind on Ice Pressure on River Structures,
W82-02668 1506 2C

Improvement of the Seals of Expansion Joints of Hydraulic Structures,
W82-02669 1506 8A

New Technical Solutions Used for Concreting Tunnels of the Nurek Hydroelectric Plant,

Ice Nucleus Concentrations Measured During the 1975 Florida Area Cumulus Experiment (FACE),
W82-01522 1503 7B

An Improved Method for Obtaining the Water Content Values of Ice Hydrometeors from Aircraft and Radar Data,
W82-01523 1503 7B

Lidar Determinations of Atmospheric Ice Crystal Layers at South Pole During Clear-Sky Precipitation,
W82-01529 1503 2C

Summer Ice and Carbon Dioxide,
W82-01843 1504 2C

On Antarctic Glaciology: Ice Sheets--And Ice Cores,
W82-03170 1507 2C

Theory of the Dielectric Constant of Ice,
W82-03176 1507 2C

Some Basic Experiments with a Vertically-Integrated Ice Sheet Model,
W82-03209 1507 2C

Complete Vitrification in Pure Liquid Water and Dilute Aqueous Solutions,
W82-03361 1507 1A

Proton Mobility in Ice,
W82-03701 1508 2C

Convection Patterns in a Pond,
W82-04461 1510 2C

Acid Snow in the Canadian High Arctic,
W82-04542 1510 2C

A Laboratory and Theoretical Study of the Boundary Layer Adjacent to a Vertical Melting Ice Wall in Salt Water,
W82-05084 1511 2C

Spectral Reflectances of Freshwater Ice and Snow from 340 Through 1100 NM,
W82-05556 1511 2C

Cold Regions Engineering in Norway,
W82-06000 1512 8A

Bacteria Under the Ice,
W82-06561 1512 5A

ICE BREAKUP
A Solution to Spring Ice-Jam Flooding,
W82-02908 1506 2C

ICE BREAKUUP
A Mechanism for the formation of Large Icebergs,
W82-04798 1511 2C

ICE-BRINE SYSTEMS
Condensation of Butane Vapor in a Gravity-Drained Ice Bed,
W82-05917 1512 3A

ICE COVER
Ice Cover Effects on Stream Flows and Mixing,
W82-02698 1506 2C

Production Strategies in Antarctic Inland Waters: Phytoplankton Eco-Physiology in a Permanently Ice-Covered Lake,
W82-02862 1506 2C

Management of Ice-Covered Rivers: Problems and Perspctives,
W82-03807 1509 2C

Simulation of Ice-Cover Growth and Thermal Decay on the Upper St. Lawrence River.
W82-03822 1509 2C

Tests of Frazil Collector Lines to Assist Ice Cover Formation,
W82-04460 1510 2C

Discharge Capacity of Large Streams Under an Ice Cover,
W82-05106 1511 2E

The Fate of Organic Pollutants in Frozen Waters: Sunlight Photodecomposition of Uracil Herbicides in Frozen Aqueous Solutions,
W82-05479 1511 5B

Spectral Reflectances of Freshwater Ice and Snow from 340 Through 1100 NM,
W82-05556 1511 2C

Water Quality Modeling of Lake Michigan and Consideration of the Anomalous Ice Cover of 1976-1977,
W82-05638 1511 5B

ICE FORMATION
Physical Mechanics of Aufeis Growth,
W82-00836 1502 2C

Occurrence of Ice Layers at the Base of High Arctic Snowpacks,
W82-00844 1502 2C

Surface Heat Loss and Frazil Ice Production in The St. Lawrence River,
W82-03925 1509 2C

On The Rate of Ice Formation in Water Cooled by a More Saline Sublayer,
W82-04190 1509 2C

Tests of Frazil Collector Lines to Assist Ice Cover Formation,
W82-04460 1510 2C

Resistance of Beauharnois Canal in Winter,
W82-04998 1511 2C

Controlled Nucleation and Quasi-Ordered Growth of Ice Crystals From Low Temperature Electrolyte Solutions,
W82-05123 1511 2C

Configuration of Ice in Frozen Media,
W82-05615 1511 2C

Winter Heat Budget and Frazil Ice Production in the Upper St. Lawrence River,
W82-05736 1511 2C

ICE JAMS
Mean Characteristics of Asymmetric Flows: Application to Flow Below Ice Jams,
W82-02237 1505 2C

A Solution to Spring Ice-Jam Flooding,
W82-02908 1506 2C

Flow Characteristics Below Floating Covers with Application to Ice Jams,
W82-03011 1507 2C

ICE PRESSURE
The Effect of Wind on Ice Pressure on River Structures,
W82-02668 1506 2C

ICE REMOVAL
Summer Reaeration and Winter Ice Removal from Lakes and Reservoirs,
W82-02526 1505 2H

ICE-WATER INTERFACES
Wave Formation and Heat Transfer at an Ice-Water Interface in the Presence of a Turbulent Flow,
W82-01128 1503 2C

Ice Blocks Melting Into a Salinity Gradient,
W82-01530 1503 2C

ICEBERGS
On the Estimation of Antarctic Iceberg Melt Rate,

W82-03919 1509 7A

Post-Secondary Treatment of Effluent for Drip Irrigation: July 1977 to March 1980, Phase II-B,
W82-04082 1509 3C

An Integrated Water-Quality Index for Irrigation Use,
W82-04723 1510 5C

Fecal Coliform Densities in a Western Watershed,
W82-05618 1511 5B

Ionic Composition of Ground Waters and Their Distribution in Karnal District (Haryana).
W82-05721 1511 5A

Wastewater Irrigation of Fruit Trees,
W82-06008 1512 3C

Effluent in Trickle Irrigation of Cotton in Arid Zones,
W82-06333 1512 3C

Land Application of Wastewater,
W82-06915 1512 5E

IRRIGATION WELLS
Water for New Zealand's Plains,
W82-02402 1505 3F

Salt-Water Intrusion in the Costa De Hermosillo, Mexico: A Numerical Analysis of Water Management Proposals,
W82-02547 1505 5B

Cavity Well,
W82-04920 1511 8A

The Applicability of Large-Diameter, Shallow Wells to a Coastal Plain Hydrogeologic Environment, Georgia,
W82-05548 1511 3B

IRTYSH-KARAGANDA CANAL
Formation of Water Quality in the Irtysh-Karaganda Canal,
W82-01716 1503 5B

ISLE AUX MORTS
Exchange of Marine Sodium for Calcium During Chemical Weathering in the Isle Aux Morts River Basin, Newfoundland,
W82-05414 1511 2K

ISLE OF MAN
Sulby Reservoir - Providing Water for the Isle of Man,
W82-02068 1504 8A

ISOHYETS
Objective Analyses and Mapping Techniques for Rainfall Fields: An Objective Comparison,
W82-06327 1512 2B

ISOLATION
Technique for Determining Total Bacterial Virus Counts in Complex Aqueous Systems,
W82-00222 1501 5A

New Waterborne Bacteriophages Active on Yersinia Enterocolitica,
W82-00662 1502 5A

ISOPOTIC TRACERS
Environmental Isotopes as a Tool in Hydrogeological Research in an Arid Basin,
W82-03415 1508 2F

ISOTHERMS
Organic Pollutants Adsorption from Multicomponent Systems Modeled by Freundlich Type Isotherm,
W82-05338 1511 5D

Addendum to: Evaluating Regenerated Activated Carbon Through Laboratory and Pilot-Column Studies,
W82-05680 1511 5F

ISOTOPE FRACTIONATION
Carbon Isotope Fractionation During Microbial Methane Oxidation,
W82-03188 1507 5A

The Concentration and Isotopic Fractionation of Gases Dissolved in Freshwater in Equilibrium with the Atmosphere. 1. Oxygen,
W82-03325 1507 1B

ISOTOPE STUDIES
Natural Abundances of 15N as a Source Indicator for Near-Shore Marine Sedimentary and Dissolved Nitrogen,
W82-00283 1501 5B

Determination of Picogram Amounts of Technetium-99 by Resin Bead Mass Spectrometric Isotope Dilution,
W82-00999 1502 5A

Deuterium/Hydrogen Ratios in Australian Rainfall,
W82-01325 1503 2B

Field Observations of the Isotopic Composition of Particulate Organic Carbon in the Southern North Sea and Adjacent Estuaries,
W82-01714 1503 2J

Uranium Isotopes and 226Ra Content in the Deep Groundwaters of the Tri-State Region, U.S.A.,
W82-02939 1506 5A

Environmental Isotopes as a Tool in Hydrogeological Research in an Arid Basin,
W82-03415 1508 2F

Geochemical and Isotopic Characteristics of Spring and Groundwater in the State of Sao Paulo, Brazil,
W82-03542 1508 2F

Character of Brines from the Belle Isle and Weeks Island Salt Mines, Louisiana, U.S.A.,
W82-03584 1508 2F

Isotope Hydrology of Groundwaters in the Pampa Del Tamarugal, Chile,
W82-03651 1508 2F

Isotope Geochemistry of Water in Gulf Coast Salt Domes,
W82-04742 1510 2K

Tracing Interaquifer Connections in the Kefar Uriyye-Agur Region (Israel), Using Natural Uranium Isotopes,
W82-05644 1511 2F

Estimation of Isotopic Exchange Parameters, Using Constant-Feed Pans,
W82-05648 1511 2D

The Relationship Between 018 and Deuterium in Water in Sand Columns Undergoing Evaporation,
W82-05759 1511 2G

Palaeoclimates at Lake Turkana, Kenya, from Oxygen Isotope Ratios of Gastropod Shells,
W82-06216 1512 2D

ISOTOPE TRACERS
Uranium Isotopes as a Natural Tracer in the Waters of the Bet Shean-Harod Valleys, Israel,
W82-01328 1503 2F

ISOTOPES STUDIES
Correlation of Oxygen 18 in Precipitation with Temperature and Altitude,
W82-03203 1507 2A

ISOTOPIC STUDIES
018 Modelling of Freshwater Inputs in Baffin Bay and Canadian Arctic Coastal Waters,
W82-01590 1503 2C

ISOTOPIC TRACERS
Characterisation of Domestic and Industrial Sewage in Southern California Coastal Sediments Using Nitrogen, Carbon, Sulphur, and Uranium Tracers,
W82-00147 1501 5B

The Distribution of Sea Ice Meltwater in the Eastern Canadian Arctic,
W82-00966 1502 2C

The Madrid Basin Aquifer: Preliminary Isotopic Reconnaissance,
W82-03059 1507 2F

Sulfur and Oxygen Isotopes as Tracers of the Origin of Sulfate in Lake Creteil (Southeast of Paris, France),
W82-03583 1508 2H

ISRAEL
Ames' Mutagenic Activity in Recycled Water from an Israeli Water Reclamation Project,
W82-00234 1501 5D

Transport of Salts in Soils and Subsoils,
W82-00930 1502 5B

Environmental Effects of Water Reuse Scheme,
W82-00973 1502 3C

Uranium Isotopes as a Natural Tracer in the Waters of the Bet Shean-Harod Valleys, Israel,
W82-01328 1503 2F

Shortening the Irrigation Interval as a Means of Saving Water in a Banana Plantation,
W82-02093 1504 3F

Growth and Photosynthesis of Najas Marina L. as Affected by Light Intensity,
W82-02365 1505 4A

Environmental Isotopes as a Tool in Hydrogeological Research in an Arid Basin,
W82-03415 1508 2F

The Rate of Flushing as a Major Factor in Determining the Chemistry of Water in Fossil Aquifers in Southern Israel,
W82-03799 1509 2K

Effect of Temperature on Heterotrophic Glucose Uptake, Mineralization, and Turnover Rates in Lake Sediments,
W82-04466 1510 2H

Metabolic Activity of Herbivorous Zooplankton in Lake Kinneret (Israel) During 1972-1977,
W82-05074 1511 2H

High-Rate Algae Ponds for Wastewater Treatment and Protein Production,
W82-05355 1511 5D

Carbon Limitation of Biomass Production in High-Rate Oxidation Ponds,
W82-05373 1511 5D

The Interaction Between Water Scarcity and Water Quality Degradation: Israel as a Case Study,
W82-05421 1511 6D

Tracing Interaquifer Connections in the Kefar Uriyya-Agur Region (Israel), Using Natural Uranium Isotopes,
W82-05644 1511 2F

Biological Equilibrium in a Wastewater Reservoir,
W82-06282 1512 5D

Effluent in Trickle Irrigation of Cotton in Arid Zones,
W82-06333 1512 3C

Free Surface Oscillations in Lake Kinneret,
W82-06879 1512 2H

The Waters of Merom: A Study of Lake Huleh 7. Diatom Stratigraphy of the 54-M Core,

LAKE KASUMIGAURA
Observation on the Occurrence of Microbial Agents Which Cause Lysis of Blue-Green Algae in Lake Kasumigaura,
W82-03177 1507 2H

Impact of Nutrient Enrichment in a Waterchestnut Ecosystem at Takahama-IRI Bay of Lake Kasumigaura, Japan. V. Dynamics of Organic Debris,
W82-03231 1507 2H

LAKE KEYSTONE
Development of Health Effects Criteria for Freshwater Bathing Beaches by Use of Microbial Indicators,
W82-03730 1508 5A

LAKE KINNERET
Effect of Temperature on Heterotrophic Glucose Uptake, Mineralization, and Turnover Rates in Lake Sediments,
W82-04466 1510 2H

Metabolic Activity of Herbivorous Zooplankton in Lake Kinneret (Israel) During 1972-1977,
W82-05074 1511 2H

LAKE KISSIMMEE
Diel Variations of Selected Physico-Chemical Parameters in Lake Kissimmee, Florida,
W82-00535 1502 2H

LAKE KIZAKI
Paleolimnology of Lake Kizaki,
W82-02863 1506 2J

LAKE KNAACK
The Role of Phototrophic Bacteria in the Sulfur Cycle of a Meromictic Lake,
W82-01831 1504 2H

LAKE LANSING
Arsenic in Lake Lansing, Michigan,
W82-03522 1508 5B

LAKE LENORE
Effects of Dilution on the Benthos of an Alkaline Lake,
W82-03064 1507 2H

LAKE LILLINONAH
Impact of Phosphorus Removal at the Danbury, Connecticut Sewage Treatment Plant on Water Quality in Lake Lillinonah,
W82-04298 1510 5D

LAKE LINNEVATN
Post-Glacial Sediments in Lake Linnevatn, Spitsbergen,
W82-02869 1506 2H

LAKE LUCERNE
Reconstruction of a Small Dam for a Recreational Lake.
W82-01604 1503 4D

LAKE MALINOVOYE
Salt and Trace Element Composition of the Water of Lake Malinovoye (Altai Territory); as a Habitat of Artemia Salina,
W82-05455 1511 2H

LAKE MARCO
Meromixis in a Coastal Zone Excavation,
W82-02120 1505 2H

LAKE MARIUT
Occurrence and Distribution of Chemical Pollutants in Lake Mariut, Egypt. II. Heavy Metals,
W82-04290 1510 5B

LAKE MATAMEC
Ultraplankton Biomass, Productivity and Efficiency in Lac Matamec, A Precambrian Shield Lake,
W82-04383 1510 2H

LAKE MEAD
The Limnological Status of Lake Mead and Lake Mohave Under Present and Future Powerplant Operations of Hoover Dam,
W82-06090 1512 6G

LAKE MEMPHREMAGOG
The Prediction of Lacustrine Phytoplankton Diversity,
W82-00319 1501 2H

Relationships Between Nannoplankton and Lake Trophic Status,
W82-01640 1503 5C

Phosphorus Availability in Lake Memphremagog and Its Tributaries,
W82-04324 1510 2H

Prediction of Water Inflow to Lake Memphremagog (Prevision des Apports Hydriques au lac Memphremagog),
W82-04459 1510 2A

LAKE MENDOTA
Dynamics of Bacterial Sulfate Reduction in a Eutrophic Lake,
W82-03119 1507 2H

LAKE MICHIGAN
Seasonal Particle-Size Selection by Diaptomus Sicilis in Offshore Lake Michigan,
W82-00485 1501 2H

Trace Element Concentrations Over Midlake Michigan as a Function of Meteorology and Source Region,
W82-00550 1502 5B

Chlorinated Hydrocarbons as a Factor in the Reproduction and Survival of Lake Trout (Salvelinus Namaycush) in Lake Michigan.
W82-01079 1502 5C

Soluble Element Concentrations and Complexation in Southeastern Lake Michigan,
W82-01147 1503 2H

Nutrient Loading of Southern Lake Michigan by Dry Deposition of Atmospheric Aerosol,
W82-01152 1503 5B

Fatty Acid and Hydrocarbon Content of Settling Sediments in Lake Michigan,
W82-01154 1503 2H

Organochlorine Insecticides and PCB in Surficial Sediments of Lake Michigan (1975),
W82-01190 1503 5A

Seasonal Features of Zooplankton Assemblages in the Nearshore Area of Southeastern Lake Michigan,
W82-01192 1503 2H

Evidence of Natural Reproduction by Planted Lake Trout in Lake Michigan,
W82-01194 1503 8I

Effects of Atmospheric Precipitation Additions on Phytoplankton Photosynthesis in Lake Michigan Water Samples,
W82-01196 1503 2H

Influence of PCBs in Water on Uptake and Elimination of DDT and DDE by Lake Trout,
W82-01342 1503 5C

Nepheloid and Suspended Particulate Matter in South-Eastern Lake Michigan,
W82-01499 1503 2H

Release of Phosphorus by Certain Benthic Invertebrates,
W82-01502 1503 2H

Effect of the Algal Length/Aperture Length Ratio on Coulter Analyses of Lake Seston,
W82-01823 1504 7B

Effects of Thermocline Displacement Upon Subsurface Chlorophyll Maxima in Lake Michigan,
W82-01957 1504 2H

Southern Lake Michigan Sediments: Changes in Accumulation Rate, Mineralogy, and Organic Content,
W82-01958 1504 2J

Inorganic Chemistry of Particulate Matter from the Nearshore Zone of Lake Michigan,
W82-01959 1504 2H

Dredged Material Evaluations: Correlations Between Chemical and Biological Evaluation Procedures,
W82-01985 1504 5C

Hydraulic Connection Between Lake Michigan and a Shallow Ground-Water Aquifer,
W82-02010 1504 2F

Effects of Lake Michigan Diversion on the Water Chemistry of the Illinois Waterway,
W82-02261 1505 6G

Quantitative Differences Between Benthic Algal Communities Along a Depth Gradient in Lake Michigan,
W82-02299 1505 2H

A Factor Analysis of Elemental Associations in the Surface Microlayer of Lake Michigan and Its Fluvial Inputs,
W82-03442 1508 2H

Field Observations of Fronts and High-Frequency Temperature Fluctuations in a Thermal Plume,
W82-03595 1508 5B

Rates and Implications of Bluff Recession Along the Lake Michigan Shorezone of Michigan and Wisconsin,
W82-03817 1509 2J

Laboratory and Field Studies of The Relative Mobility of 239, 24OPU and 241AM from Lake Sediments Under Oxic and Anoxic Conditions,
W82-03899 1509 5B

Evaluation of River Load Estimation Methods for Total Phosphorus,
W82-04034 1509 5B

Comparisons of Soluble Reactive Phosphorus and Orthophosphorus Concentrations at an Offshore Station in Southern Lake Michigan,
W82-04377 1510 2H

Combined Effects of Cadmium and Zinc on a Lake Michigan Zooplankton Community,
W82-04379 1510 5C

Water Chemistry of the Illinois Waterway,
W82-04390 1510 2K

Determination of Cadmium in Lake Michigan by Mass Spectrometric Isotope Dilution Analysis or Atomic Absorption Spectrometry Following Electrodeposition,
W82-05040 1511 5A

Overestimation of Orthophosphorus Concentrations in Surface Waters of Southern Lake Michigan: Effects of Acid and Ammonium Molybdate,
W82-05382 1511 5A

Fish Abundance and Distribution Near Three Heated Effluents to Lake Michigan,
W82-05383 1511 5C

Water Quality Modeling of Lake Michigan and Consideration of the Anomalous Ice Cover of 1976-1977,
W82-05638 1511 5B

PCB Uptake by Five Species of Fish in Lake Michigan, Green Bay of Lake Michigan, and Cayuga Lake, New York,
W82-06493 1512 5B

The Influence of Phytoplankton Composition on the Relative Effectiveness of Grinding and Sonification for Chlorophyll Extraction,
W82-06902 1512 5A

Colonization and Growth of Attached Algae at the Lake Michigan Water Line,
W82-06976 1512 5C

LAKE MJOSA
The Rehabilitation of Norway's Largest Lake,
W82-05243 1511 5G

LAKE MOHAVE
Evaluation of Impacts Associated with Reregulation of Water Levels in Lake Mohave,
W82-06089 1512 6G

The Limnological Status of Lake Mead and Lake Mohave Under Present and Future Powerplant Operations of Hoover Dam,
W82-06090 1512 6G

LAKE MORPHOLOGY
Major Physical Features of Long Point Bay and Its Watershed,
W82-02579 1505 2H

LAKE MORPHOMETRY
Limnology of Lake Rerewhakaaitu,
W82-01705 1503 2H

Hydrologic Description of Lake Hancock, Polk County, Florida,
W82-02843 1506 2H

Comment on 'A Relation Between Lake Morphometry and Primary Productivity and Its Use in Interpreting Whole-Lake Eutrophication Experiments' (E.J. Fee),
W82-03780 1509 5C

Hydrologic Description of Lake Jackson, Sebring, Florida,
W82-04975 1511 7C

LAKE NAINI TAL
Aspects of Water Pollution in Lake Naini Tal, U.P., India,
W82-02442 1505 5C

LAKE NAIVASHA
Major Ion Chemistry in a Tropical African Lake Basin,
W82-02440 1505 2K

Nutrient Relationships in Shallow Water in an African Lake, Lake Naivasha,
W82-03404 1508 2H

LAKE NASSER
Environmental Studies: Their Implications and the Special Case of Egypt,
W82-02062 1504 6G

LAKE NEUSIEDLER
Water Quality Management of Lake Neusiedler, Austria,
W82-02090 1504 5C

LAKE OGLETHROPE
The Relative Importance of Protozoans, Rotifers, and Crustaceans in a Freshwater Zooplankton Community,
W82-01840 1504 2H

LAKE OHRID
The Thermal Response of Lake Ohrid, Yugoslavia to Meteorological Conditions,
W82-02342 1505 2H

LAKE OKEECHOBEE
Water Budget Computations for a Shallow--Lake Okeechobee, Florida,
W82-04258 1510 2H

Ridge Regression Techniques Applied to Landsat Investigation of Water Quality in Lake Okeechobee,
W82-04440 1510 2H

LAKE ONTARIO
Mean Summer Circulation in Lake Ontario Within the Coastal Zone,
W82-00967 1502 2H

A Quantitative Study of Shoreline Marsh Communities Along Lake Huron in Ontario,
W82-01122 1503 2H

Changes in Lake Ontario Total Phosphorus Concentrations, 1976-1978,
W82-01126 1503 2H

Ferromanganese Nodules from Lake Ontario (Bay of Quinte): Minor Element Geochemistry,
W82-01143 1503 2H

A Survey of ATP Concentrations in Lake Ontario, 1975-1976,
W82-01144 1503 2H

PCB Residues in Bottom Sediments Collected From the Bay of Quinte, Lake Ontario 1972-1973,
W82-01155 1503 5B

A Method of Objective Analysis for Currents in a Lake with Application to Lake Ontario,
W82-01616 1503 2H

Voltammetric Studies on the Stability of the ZN(II) Chelates with NTA and EDTA and the Kinetics of their Formation in Lake Ontario Water,
W82-01839 1504 2H

The Warmwater Sport Fishery of Eastern Lake Ontario,
W82-02296 1505 7A

Physical Variability and Phytoplankton Communities IV. Temporal Changes in the Phytoplankton Community of a Physically Variable Lake,
W82-03229 1507 2H

Physical Variability and Phytoplankton Communities: II. Primary Productivity by Phytoplankton in a Physically Variable Environment,
W82-03336 1507 5C

Investigation of the Accuracy of Water Level Transfer to Determine Geodetic Elevation in Lake Ontario,
W82-03515 1508 2H

Simulation and Verification of Lake Ontario's Mean State,
W82-04570 1510 2H

Surface Heat Fluxes from Lake Ontario: Further Verification of Lake Thermal Model,
W82-05048 1511 2H

Organic Contaminants in the Suspended Sediments of the Niagara River,
W82-05636 1511 5B

A Study of Selected Great Lakes Coastal Marshes,
W82-06570 1512 5A

Physical Process and Eutrophication,
W82-06875 1512 5C

LAKE ONTARIO TRIBUTARIES
Photodegradation of the Lampricide 3-Trifluoromethyl-4-Nitrophenol (TFM) 1. Pathway of the Direct Photolysis in Solution,
W82-04032 1509 5B

LAKE PAIJANNE
Recent Trends of Biocides in Pikes of the Lake Paijanne,
W82-04819 1511 5A

LAKE PAVIN
Contribution to the Limnology of Lake Pavin (France) II. Relationships Between Nonbiological Parameters--Phyto and Zooplankton in the 0-20 Meter Zone (Contribution A L'Etude Limnologique du Lac Pavin (France). II. Relations Entre Parametres Abiotiques-Phyto et Zooplancton Dans la Zone 0-20 Metres),
W82-03178 1507 2H

Limnologic Study of Lake Pavin (France) 1: Abiotic Factors and Phytoplankton (Contribution a L'etude Limnologique Du Lac Pavin (France) 1: Facteurs Abiotiques et Phytoplancton),
W82-03219 1507 2H

LAKE PEPIN
Rates of Recent Sedimentation in Lake Pepin,
W82-03922 1509 2J

LAKE PONTCHARTRAIN
Numerical Modeling Study of Lake Pontchartrain,
W82-05006 1511 2A

LAKE QARUN
Some Ecological Aspects of Lake Qarun, Fayoum, Egypt. Part I. Physico-Chemical Environment,
W82-02859 1506 2H

Some Ecological Aspects of Lake Qarun, Fayoum, Egypt, Part II. Production of Plankton and Benthic Organisms,

LITTLE TENNESSEE RIVER BASIN
Water Resources Appraisal for Hydroelectric Licensing: Little Tennessee River Basin, Tennessee, North Carolina, and Georgia.
W82-00372 1501 6B

LITTLE TURTLE BASIN
Comparison of Behavior of Two Sub-Basins in the Turtle Creek Drainage System,
W82-02528 1505 2A

LITTLE WABASH BASIN
Potential Impact of Irrigation on Water Resources in the Little Wabash Basin of Illinois,
W82-03547 1508 6D

LITTORAL ENVIRONMENT
Horizontal Distribution and Flux of Phosphorus in Fish Lake, Wisconsin,
W82-04484 1510 2H

LITTORAL ZONE
Grazing Rate Determination of Corynoneura Scutellata Winnertz (Chironomidae:Diptera),
W82-00822 1502 2H

The Response of Macroinvertebrates to Aquatic Macrophyte Decomposition,
W82-02664 1506 2H

Structure and Dynamics of Zooplankton Communities in the Littoral Zone of Some North Carolina Lakes,
W82-06911 1512 5C

LIVER
Antagonism of Selenium and Cadmium Pretreatments to Subsequent Embryotoxic Doses of Mercury and Cadmium in Fish Embryos,
W82-06371 1512 5C

LIVESTOCK
Controlling Runoff for Livestock Feedlots; A State of the Art,
W82-01769 1503 5G

Feed from Sewage: Prospects and Constraints,
W82-06489 1512 5E

LLYN FRONGOCH
Allochthonous Plant Litter as a Source of Organic Material in an Oligotrophic Lake (Llyn Frongoch),
W82-02773 1506 2H

LOAD DISTRIBUTION
Bearing Capacity of Sand Bases (Discussion of Construction Specifications),
W82-05583 1511 8D

Water Quality Modeling of Lake Michigan and Consideration of the Anomalous Ice Cover of 1976-1977,
W82-05638 1511 5B

Seasonal Variation of Nitrogen and Phosphorus Species in the Red River,
W82-06573 1512 5B

LOAD FACTORS
Load Factors and Non-Destructive Testing of Clay Pipe,
W82-05700 1511 8G

LOADING ESTIMATES
The OECD Cooperative Programme on Eutrophication; Canadian Contribution, Summary Report,
W82-06566 1512 5A

LOAM
Hydraulic Properties of Fullerton Cherty Silt Loam,
W82-01561 1503 2G

LOANS
The Financing of Private Small Scale Hydroelectric Projects.
W82-04633 1510 6B

LOBSTERS
Arseno-Sugars from Brown Kelp (Ecklonia Radiata) as Intermediates in Cycling of Arsenic in a Marine Ecosystem,
W82-03183 1507 5B

LOCAL GIVERNMENTS
A Manual for Development of Small Scale Hydroelectric Projects by Public Entities.
W82-04634 1510 6E

LOCAL GOVERNMENTS
Texas to Vote on Water Trust Fund.
W82-02302 1505 6C

River Basin Management in Ontario,
W82-05393 1511 6E

Organizational and Political Considerations in the Municipal Development of Small Hydropower,
W82-06588 1512 6E

LOCH NESS
The Mixing Layer of Loch Ness,
W82-02421 1505 2H

LOCKS
Hydropower Losses from Navigation in the Snake-Columbia Rivers: 1978-79,
W82-01139 1503 6D

LOESS
Gully Development in the Deep Loess Hills Region of Central Missouri,
W82-00472 1501 2J

LOG PEARSON DISTRIBUTION
Log Pearson III Distribution - Is It Applicable to Flood Frequency Analysis of Australian Streams,
W82-01731 1503 2E

LOGGING
Seston Dynamics in Southern Appalachian Streams: Effects of Clear-Cutting,
W82-00543 1502 4C

Changes in Soil Water Quality Resulting from Three Timber Cutting Methods and Three Levels of Fiber Utilization,
W82-01135 1503 2G

Effects of Logging on Macroinvertebrates in Streams with and Without Buffer Strips,
W82-01227 1503 5C

Storm Flow Response to Road Building and Partial Cutting in Small Streams of Northern California,
W82-01295 1503 4C

Hydrology of Okarito Lagoon and the Inferred Effects of Selective Logging in Okarito Forest,
W82-01703 1503 4C

Effects of Clearcutting and Slashburning on Stream Temperature in Southwestern British Columbia,
W82-03087 1507 5C

Effect of Felling Forests on Flood Runoff in the Carpathian Mountains with Special Reference to Beech Forests,
W82-03574 1508 4C

Decrease in Stream Gravel Permeability After Clear-Cut Logging: An Indication of Intragravel Conditions for Developing Salmonid Eggs and Alevins,
W82-06910 1512 5C

Forest Management and Anadromous Fish Habitat Productivity,
W82-06965 1512 5C

LOGGING (RECORDING)
Hydrogeological and Geophysical Logging.
W82-00511 1502 7B

LOIRE ESTUARY
The Distribution of Mercury, Cadmium and Lead Between Water and Suspended Matter in the Loire Estuary as a Function of the Hydrological Regime,
W82-03757 1509 2L

LONG ISLAND
Use of Flow-Duration Curves to Evaluate Effects of Urbanization on Streamflow Patterns on Long Island, New York,
W82-00416 1501 4C

A Finite Element Model for the Migration of Leachate from a Sanitary Landfill in Long Island, New York - Part II: Application,
W82-03220 1507 5B

The Meadowbrook Artificial-Recharge Project in Nassau County, Long Island, New York,
W82-03630 1508 4B

Geohydrologic Appraisal of Water Resources of the South Fork, Long Island, New York,
W82-04206 1509 7C

A Finite Element Model for the Migration of Leachate from a Sanitary Landfill in Long Island, New York - Part I: Theory,
W82-04434 1510 5B

Base Flow of Streams in Nassau County Sewer Districts 2 and 3, Long Island, New York, 1978-79,
W82-04980 1511 2E

Hydrogeologic Data from Selected Wells and Test Holes in Suffolk County, Long Island, New York, 1972-80,
W82-06131 1512 7C

Reconnaissance of the Ground-Water Resources of Kings and Queens Counties, New York,
W82-06952 1512 4B

LONG ISLAND SOUND
Trace Metal Fluxes to Nearshore Long Island Sound Sediments,
W82-01040 1502 5B

Distribution of Methanogenic and Sulfate-Reducing Bacteria in Near-Shore Marine Sediments,
W82-04894 1511 2L

A Steady State Model for Buoyant Surface Plume Hydrodynamics in Coastal Waters,
W82-06837 1512 2L

LONG LAKE
The Effect of Continuous Advanced Wastewater Treatment by the City of Spokane on the Trophic Status of Long Lake, WA During 1979.
W82-01070 1502 2H

LONG POINT BAY
Major Physical Features of Long Point Bay and Its Watershed,
W82-02579 1505 2H

History of Human-Use Impacts on Long Point Bay,
W82-02580 1505 5B

LONG POINT MARSH
The Economic Significance of the Long Point Marsh, Lake Erie, as a Recreational Resource,
W82-02229 1505 6B

LONG-TERM PLANNING
WQM Five Year Strategy (FY 81-Baseline).
W82-00045 1501 5G

Proposed Water Quality Control Plan for Indio Subarea of the Whitewater Hydrologic Unit, West Colorado River Basin.
W82-00716 1502 6F

Federal Water Resources Research: A Review of the Proposed Five-Year Program Plan.
W82-01051 1502 6E

Pennsylvania Ground Water Problems and Needs,
W82-01058 1502 4B

State of Washington Water Quality Assessment Report 1980.
W82-01067 1502 6E

Long-Run Effects of Environmental Regulation,
W82-01848 1504 6A

Municipal Needs,
W82-02513 1505 6E

Efficient Groundwater Utilization,
W82-02520 1505 6D

Reliability of Water Resources,
W82-02749 1506 6A

Policies and Goals for California Water Management: The Next 20 Years.
W82-03111 1507 6D

LORRAINE
Radiocarbon Dating of Groundwater of the Aquifer Confined in the Lower Triassic Sandstones of the Lorraine Region, France,
W82-02877 1506 2F

LOS ANGELES
Computer Modeling of Los Angeles Water Resources,
W82-01168 1503 6A

Community Metabolism of Adenylates by Microheterotrophs from the Los Angeles Harbor and Southern California Coastal Waters,
W82-03301 1507 5B

Composting Results in Los Angeles,
W82-03400 1507 5E

Controlling the Cost of System Maintenance,
W82-04139 1509 8G

Experience with Computer Control of Wastewater Treatment Processes at Los Angeles and Other Communities,
W82-04609 1510 5D

LOS ANGELES COUNTY
A Local Source Control Program for Metal Finishing Plants,
W82-04172 1509 5D

LOS ANGELES HARBOR
Orthophosphate Uptake by Phytoplankton and Bacterioplankton from the Los Angeles Harbor and Southern California Coastal Waters,
W82-03172 1507 5B

LOTIC ENVIRONMENT
Insect Community Structure as an Index of Heavy-Metal Pollution in Lotic Ecosystems,
W82-00596 1502 5C

Sediment Oxygen Demand and Its Effect on Dissolved Oxygen in a Cutoff Meander of the Kaskaskia River,
W82-01448 1503 4A

LOTIC PERIPHYTON
A Portable Pump Sampler for Lotic Periphyton,
W82-00826 1502 7B

LOUGH NEAGH
Upward Trend in Nitrate Concentrations in River Discharging into Lough Neagh for the Period 1969-1979,
W82-05017 1511 5B

Phosphorus Reduction Studies,
W82-05408 1511 5D

LOUISIANA
Potentiometric Surface of the Wilcox-Carrizo Aquifer; Bienville, Red River, Northern Natchitoches, and Southern Webster Parishes, Louisiana,
W82-00728 1502 7C

Modeling Hydrology and Eutrophication in a Louisiana Swamp Forest Ecosystem,
W82-00890 1502 4A

Degradation of Hydrocarbons in Oxidized and Reduced Sediments,
W82-00907 1502 5B

Avoyelles Sportsmen's League V. Alexander,

TVA Hydro Scheduling Model: Theoretical Aspects,
W82-06430 1512 4A

TVA Hydro Scheduling Model: Practical Aspects,
W82-06431 1512 4A

Solutions of the Colebrook-White Function for Resistance to Uniform Turbulent Flow,
W82-06501 1512 8B

Qualitative Stability Analysis of Geologic Systems, with an Example from River Hydraulic Geometry,
W82-06717 1512 2E

An Upstream Finite Element Method for Solution of Transient Transport Equation in Fractured Porous Media,
W82-06858 1512 2F

MATRIC POTENTIAL
Estimating Soil Water Retention from Soil Properties,
W82-06332 1512 2G

MAUMEE RIVER
Limnetic Larval Fish of the Maumee and Sandusky River Estuaries,
W82-01197 1503 7A

MAUMEE RIVER BASIN
Floods of March 1978 in the Maumee River Basin, Northeastern Indiana,
W82-02485 1505 2E

MAYURAKSHI IRRIGATION PROJECT
Optimal Reservoir Management and Crop Planning Under Deterministic and Stochastic Inflows,
W82-03914 1509 3F

MCNAUGHTON LAKE AREA
Seismicity in the Mica Reservoir (McNaughton Lake) Area: 1973-1978,
W82-05196 1511 8E

MEADOWS
Application of the Wastewater Effluent of a Rural Community to a Mountain Meadow,
W82-04705 1510 5E

MEAN DAILY FLOWS
A Practical Method of Estimating Peak from Mean Daily Flows With Application to Streams in Ontario,
W82-06568 1512 2E

MEANDERS
Bend Theory of River Meanders. Part 1. Linear Development,
W82-05085 1511 2E

Bend Theory of River Meanders. Part 2, Nonlinear Deformation of Finite-Amplitude Bends,
W82-05651 1511 2E

MEASUREMENT TECHNIQUES
Comparison of Automated Segmented-Flow and Discrete Analyzers for the Determination of Nutrients in Water,
W82-00483 1501 5A

Microplate Technique for Determining Accumulation of Metals by Algae,
W82-00492 1501 5A

Methods of Investigating the State of Metal Ions in Natural Waters,
W82-00859 1502 5A

Field Application of the Four-Electrode Technique for Determining Soil Solution Conductivity,
W82-03260 1507 2G

Measurement of Sorptivity and Soil Water Diffusivity in the Field,
W82-03764 1509 2G

Discussion of 'Visualization of Separation over Sand Waves',
W82-03783 1509 8B

Refinement of Lake Evaporation Measurements, Using an Ion-Balance Technique,
W82-03808 1509 2D

A Method for the Determination of Sulphides in Water, Sewage and Effluents,
W82-05477 1511 5A

Changes in Extractable Metal Concentrations During Storage of Surface Water Samples Containing Sediments,
W82-06630 1512 2K

MEASURING INSRUMENTS
Continuous Measurement of Organic Solvents in Air and Water (Kontinuierliche Messung Organischer Losemittel in Luft und Wasser),
W82-04579 1510 5A

MEASURING INSTRUMENTS
A Proposed Technique to Measure Evapotranspiration Using Micrometeorological Methods,
W82-00183 1501 2D

A More Versatile Soil Water Sampler,
W82-00191 1501 7B

BIONESS, A New Design in Multiple Net Zooplankton Samplers,
W82-00210 1501 7B

Automation of Water Bacteriological Analysis: Running Test of an Experimental Prototype,
W82-00225 1501 5A

Hydrogeological and Geophysical Logging,
W82-00511 1502 7B

Measurement of PH in the Estuarine Environment on the NBS Scale. (LA Mesure Du PH En Milieu Estuarien Sur L'Echelle NBS),
W82-00521 1502 7B

Identification of Organic Compounds,
W82-00635 1502 5A

Effects of Joule Heating on Thermocouple Psychrometer Water Potential Determinations,
W82-00892 1502 7B

Electronic Measurement and Recording of Evaporation Loss,
W82-01602 1503 7B

A Test Utilizing Sediment Traps, Survey Rods, and Radiographs to Monitor Sediment Accumulation from a Dredging Disposal Operation,
W82-01950 1504 7B

Infrared Absorption Study of Humic Substances from Lake Apopka Sediment, Plankton and the Surrounding Drainage Basin,
W82-02348 1505 2H

Leak Detection - Two Methods That Work,
W82-02521 1505 3D

Rainwater Acidity Measurement Problems,
W82-02627 1506 5A

Detection of Oil Pollutants on the Surface of Inland Waters by a Projector-Based Optical Detector,
W82-02853 1506 5A

Instrumentation for Aerated Flow on Spillways,
W82-02880 1506 7B

Large Rain Drops in the Bright Band,
W82-03065 1507 7B

A Portable Apparatus for the Measurement of Rate of Flow by the Lithium-Tracer Method,
W82-03428 1508 7B

An Evaluation of the Sedigraph as a Standard Method of Sediment Particle Size Analysis,
W82-03437 1508 7B

Particle Counter for Sediment Transport Studies,
W82-03666 1508 7B

A Study of Intergranular and Fissure Permeability in Chalk and Permian Aquifers, Using Double-Packer Injection Testing,
W82-03804 1509 2F

Improved Operation of Municipal Wastewater Treatment Plants in Sweden by Use of Instrumentation and Automation,
W82-03846 1509 5D

Monitoring of Turbidity and Suspended Solids Concentration in Wastewater Treatment Plants,
W82-04054 1509 5D

Problems and Solutions on Sludge Level Measurement,
W82-04055 1509 5D

ISFETs-New Tools for Water Quality Monitoring,
W82-04059 1509 5A

Theoretical Considerations for Control and Monitoring of Wastewater Treatment Systems,
W82-04060 1509 5D

Measuring the Velocity of Water in a Paddled Flocculator,
W82-04102 1509 5F

Attenuation of Incident Solar Radiation in Lake Water,
W82-04180 1509 2H

Sizing and Selecting Modern Water Meters,
W82-04194 1509 6D

Electromagnetic Measurements of Tidal Transports in Estuaries,
W82-04296 1510 7B

Ichthyoplankton Samplers for Simultaneous Replicate Samples at Surface and Bottom,
W82-04297 1510 7B

A New Method for Sampling Snow Melt and Rainfall in Forests,
W82-04435 1510 7B

Evaluation of Instruments for Continuous Activated Sludge Monitoring,
W82-04594 1510 5D

A Self-Evaluating Disdrometer for the Measurement of Raindrop Size and Charge at the Ground,
W82-04897 1511 2B

Viral Pollution Determination of Superficial Waters (River Water and Sea-Water) from the Urban Area of Barcelona (Spain),
W82-05014 1511 5A

Continuous Measurements of Dissolved Oxygen in Water Culture by a Self-Calibrating Monitor,
W82-05015 1511 7B

A Portable System for Measuring Water Temperature, Conductivity, Dissolved Oxygen, Light Attenuation and Depth of Sampling,
W82-05105 1511 7B

Handling and Measurement Techniques for Anoxic Interstitial Waters,
W82-05176 1511 7B

A Reliable Dissolved Oxygen Probe for Waste Water Treatment Plants,
W82-05248 1511 7B

A Field Technique to Directly Measure River Bank Erosion,
W82-05410 1511 7B

Recording Raingage Modifications,
W82-05665 1511 7B

How Proper Prospecting Improves the Odds,
W82-05757 1511 3B

On the Sampling Variance of Raingage Networks,
W82-05875 1511 7B

Liquid Level Interferometer,
W82-05929 1512 7B

The Grosse Dhunn Dam and the Facilities for the Control of Stability and Functioning (Die Grosse Dhunn-Talsperre Und Die Messeinrichtungen Zur Uberwachung Der Standsicherheit Und Der Funktionstuchtigkeit Des Dammes),
W82-06240 1512 8D

Maintenance of Analog Instrument systems,
W82-06263 1512 5D

Statistical Sampling Technique for Controlling the Accuracy of Small Water Meters,
W82-06350 1512 6C

The Outlook for Precipitation Measurements from Space,
W82-06531 1512 7B

Evaluation of a System to Automatically Sample Zooplankton from the Discharge of Dams,
W82-06628 1512 5A

An Automated Recording System for Evaporation Pans,
W82-06780 1512 2D

MEAT PROCESSING INDUSTRY
Pilot Scales Tests on the Flotation of Abattoir Wastes by Deep U Tubes,
W82-00322 1501 5D

Meat-, Fish-, and Poultry-Processing Wastes,
W82-01256 1503 5D

Protein Recovery from Beef Packing Effluent,
W82-02994 1506 5D

Coliform and Chemical Oxygen Demand Removal from Meatworks Effluents by Different Treatment Processes,
W82-03570 1508 5D

Laboratory Experiments on the Physico-Chemical Treatment of Meat Processing Effluents,
W82-04532 1510 5D

Elimination of Odor from Anaerobic Lagoons,
W82-06221 1512 5D

Evaluation of the 'Lectro Clear Z' Electro-Coagulation Process for Meat Packing Wastewater Treatment.
W82-06378 1512 5D

Meat-, Fish-, and Poultry-Processing Wastes,
W82-07000 1512 5D

MECHANICAL EQUIPMENT
Device for Collecting Replicate Artificial Substrate Samples of Benthic Invertebrates in Large Rivers,
W82-01947 1504 7B

MECHANICAL FAILURE
Bank Failure and Erosion on the Ohio River,
W82-04473 1510 2J

MECHNICAL ENGINEERING
Parametric Analysis of Direct-Contact (Pistonless) Work Exchanger for Reverse Osmosis Applications,
W82-05309 1511 3A

MEDFIELD
Vacuum Filtration of Septage,
W82-04710 1510 5D

MEDITERRANEAN
Environmental Resources and Restraints to Agricultural Production in a Mediterranean-Type Environment,
W82-00329 1501 2I

MEDITERRANEAN SEA
Relationship Between Populations of Amphipods and Pollution,
W82-02444 1505 5C

The Successful Treatment of Tanker Ballast Water at a Mediterranean Site,
W82-03703 1508 5D

Atmospheric Moisture Transport and the Water Balance of the Mediterranean Sea,
W82-05050 1511 2A

The Mediterranean Action Plan: Design and Implementation,
W82-06154 1512 5B

MEDUXNEKEAG RIVER
Methods of Studying Population Shifts in Aquatic Bacteria in Response to Environmental Change,
W82-06558 1512 5C

Seasonal and Diurnal Changes in the Predominant Heterotrophic Bacterial Species of the Meduxnekeag River,
W82-06562 1512 5A

Interactions of Heterotrophic Bacteria in the Sediment Water Phases of Two Contrasting Rivers,
W82-06564 1512 5A

MEEWASIN VALLEY AUTHORITY
A Case Study of Rural Opposition Toward River Valley Planning,
W82-05386 1511 6E

MELT WATER
Glacier Surveys in Alberta - 1979,
W82-01855 1504 2C

MELTING
On the Estimation of Antarctic Iceberg Melt Rate,
W82-00166 1501 2C

Ice Blocks Melting Into a Salinity Gradient,
W82-01530 1503 2C

MEMBRANE FILTERS
Comparison of Nine Brands of Membrane Filter and the Most-Probable-Number Methods for Total Coliform Enumeration in Sewage-Contaminated Drinking Water,
W82-00203 1501 5A

Application of a Multiple Alginate Filter Method for the Determination of Water Viruses Concentration (Conception D'Une Membrane Filtrante a Base D'Alginate Pour La Concentration Des Virus Hydriques),
W82-00458 1501 5A

Membrane Filter Method for Enumerating Escherichia Coli,
W82-00487 1501 5A

Impact of Verification Media and Resuscitation on Accuracy of the Membrane Filter Total Coliform Enumeration Technique,
W82-00494 1501 5A

Mechanism of Charged Membrane Ultrafiltration of Salt Solutions,
W82-00641 1502 5D

Comparison of Selective Media for the Enumeration and Identification of Fecal Streptococci from Natural Sources,
W82-01564 1503 5A

High Temperature Ultrafiltration with Kynar Poly(Vinylidene Fluoride) Membranes,
W82-01566 1503 5D

Extraction of Copper with Liquid Surfactant Membranes,
W82-01896 1504 5D

Selective Removal of Heavy Metal Ions from Aqueous Solutions by Diafiltration of Macromolecular Complexes,
W82-01900 1504 5D

Positively Charged Filters for Virus Recovery from Wastewater Treatment Plant Effluents,
W82-02338 1505 5A

Artificial Particulate Fouling of Hyperfiltration Membranes IV. Dynamic Protection from Fouling,
W82-03288 1507 3A

Analytical Note: Evaluation of the m-SPC Method as a Substitute for the Standard Plate Count in Water Microbiology,
W82-06280 1512 5F

MEMBRANE PROCESSES
Development of High Salt Rejection Reverse Osmosis Membranes--Final Report, July 1, 1978 Through December 31, 1980,
W82-02109 1505 3A

The Effect of pH and Halogens on the Stability of Reverse Osmosis Membranes,
W82-02188 1505 5D

Scanning Electron Microscopy Study on Reverse Osmosis Membranes Prepared from Indian Cellulosic Polymers,
W82-02929 1506 3A

Improved Porous Supports for Thin-Film Composite Reverse Osmosis Membranes,
W82-03943 1509 3A

Development of an Ultra-Thin-Skinned Reverse Osmosis Membrane Using Homogeneous Poroplastic Film As the Ultramicroporous Substrate,
W82-03947 1509 3A

Membrane Filter Method for Enumeration of Acinetobacter Calcoacceticus from Environmental Waters,
W82-04453 1510 5A

Low Pressure Membrane Separation Process to Remove Heavy Metal Complexes,
W82-05284 1511 5D

Water and Salt Transport in Membranes,
W82-05537 1511 3A

Further Results on the Performace of Present-Day Osmotic Membranes in Various Osmotic Regions,
W82-05660 1511 3A

Diffusive and Hydraulic Transfer of Solutes Through Homogeneous Membranes,
W82-06006 1512 5F

Removal of Humic Substances from Natural Waters by Reverse Osmosis,
W82-06045 1512 5F

Studies on Synetheses and Permeabilities of Special Polymer Membranes.28. Permeation Characteristics and Structure of Interpolymer Membranes from Poly(Vinylidene Fluoride) and Poly(Styrene Sulfonic Acid),
W82-06109 1512 3A

Oriented Monolayer Assemblies to Modify Fouling Propensities of Membranes.
W82-06167 1512 3A

Extraction of Phenolic Compounds and Organic Acids by Liquid Membranes,
W82-06331 1512 5D

Membrane Separation Processes,
W82-06445 1512 5D

Cellulose Acetate Membranes for the Reverse Osmosis Treatment of Sewage Effluents. Is Long term Performance a Limiting Factor,
W82-06657 1512 5D

Comparison of Four Membrane Filter Methods for Fecal Coliform Enumeration,
W82-06744 1512 5A

Separation of Aqueous Organic Mixtures by Pervaporation and Analysis by Mass Spectrometry or a Coupled Gas Chromatograph-Mass Spectrometer,
W82-06791 1512 5A

Treatment of Wastewaters and Demineralization of Saline Waters by Reverse Osmosis and Ultrafiltration,
W82-06988 1512 5D

MEMBRANES

Treatment of Effluent Waters Containing Chlorides by Reverse Osmosis Dynamically Formed Membranes,
W82-02382 1505 5D

Post-Treatment Process for Reverse Osmosis Membranes,
W82-02454 1505 3A

Reverse Osmosis Separation of Sulfate, Nitrate, and Ammonia from Mining Effluents,
W82-02640 1506 5D

Design and Development of an Automated Hydrostatic Flexible Membrane Test Facility,
W82-02978 1506 8G

Hygienic Evaluation of the Polyamide Membrane Pheylone-2S and Phenol Formaldehyde Resin VIAM-B for Use in Reverse Osmosis Treatment of Water. (Gigienicheskaya Otsenka Poliamidnykh Membran Fenilon-2S I Fenolformal'Degidnoi Smoly VIAM B, Primenenyaemykh pri Obratnoosmoticheskom Oprechnenii Vody),
W82-03698 1508 3A

Improved Porous Supports for Thin-Film Composite Reverse Osmosis Membranes,
W82-03943 1509 3A

Research on Piezodialysis - Sixth Report,
W82-05294 1511 3A

Fabrication and Characterization of Metal Membranes Having Pore Charge Control for Desalination,
W82-05314 1511 3A

Water and Salt Transport in Membranes,
W82-05537 1511 3A

Further Results on the Performace of Present-Day Osmotic Membranes in Various Osmotic Regions,
W82-05660 1511 3A

Studies on Synetheses and Permeabilities of Special Polymer Membranes.28. Permeation Characteristics and Structure of Interpolymer Membranes from Poly(Vinylidene Fluoride) and Poly(Styrene Sulfonic Acid),
W82-06109 1512 3A

Energy and Water Conservation Through Recycle of Dyeing Wastewater Using Dynamic Zr(IV)-PAA Membranes,
W82-06123 1512 5D

The Development of Dry-RO Membranes from Cellulosis and Noncellulosis Polymers Bearing Quaternary Ammonium Groups,
W82-06152 1512 3A

Oriented Monolayer Assemblies to Modify Fouling Propensities of Membranes,
W82-06167 1512 3A

Cellulose Acetate Membranes for the Reverse Osmosis Treatment of Sewage Effluents. Is Long term Performance a Limiting Factor,
W82-06657 1512 5D

MENARD CREEK

Water Quality of a Southeast Texas Stream,
W82-02570 1505 2K

MENOMINEE RIVER BASIN

Water Resources Appraisal for Hydroelectric Licensing; Menominee River Basin; Michigan, Wisconsin,
W82-01753 1504 6D

MERAMEC PARK LAKE

Quantitative Relationship of Grouting to the Reduction of Groundwater Flow Through Rock Foundations,
W82-05201 1511 8E

MERCURIC CHLORIDE

Effect of Carbon-Oxygen and Carbon-Sulfur Surface Complexes on the Adsorption of Mercuric Chloride in Aqueous Solutions by Activated Carbons,
W82-06788 1512 5D

MERCURY

Process for Removal of Mercury and Mercury Compounds From Aqueous Solutions and Industrial Waste Liquors,
W82-00058 1501 5D

Dynamics of Selenium in Mercury-Contaminated Experimental Freshwater Ecosystems,
W82-00595 1502 5B

Mercury and Selenium Concentrations in Fish, Sediments, and Water of Two Northwestern Quebec Lakes,
W82-00876 1502 5B

Relation Between Trophic Position and Mercury Accumulation Among Fishes from the Tongue River Reservoir, Montana,
W82-01041 1502 5A

Mercury and Zinc in the Sediments of Seneca Lake, Seneca River, and Keuka Outlet, New York,
W82-01151 1503 5B

Mercury and Lead Concentrations in Some Species of Fish From the Tuscan Coasts (Italy),
W82-01368 1503 5B

The Distribution of Mercury in the Sediments of the Plym Estuary,
W82-01390 1503 5B

Mercury in the Muscle Tissue of Fish from Three Northern Maine lakes,
W82-01459 1503 5B

Determination of Nanogram Quantities of Mercury in Water with a Gold-Plated Piezoelectric Crystal Detector,
W82-01509 1503 5A

Removal of Elemental Mercury from Wastewaters Using Polysulfides,
W82-01800 1503 5D

Mercury Methylation by Fish Intestinal Contents,
W82-01830 1504 5C

The Mercury Cycle,
W82-01869 1504 5B

Preconcentration of Phenylmercury, Methylmercury and Inorganic Mercury from Natural Waters with Diethylammonium Diethyldithiocarbamate-Loaded Polyurethane Foam,
W82-02297 1505 5A

Preconcentration of Inorganic Mercury with an Anion-Exchange Resin and Direct Reduction-Aeration Measurements by Cold-Vapour Atomic Absorption Spectrometry,
W82-03268 1507 5A

Methylmercury Contamination of an Experimental Trophic Chain: Importance of the Primary Producer-Consumer System. (Contamination D'une Chaine Trophique Experimentale par le Methylmercure: Importance du Systeme 'Producteur-Consommateur Primaire'),
W82-03303 1507 5C

Study of the Experimental Contamination of the Marine Phanerogam Posidonia Oceanica (L.) Delile by Mercury Compounds I. Modalities of the Contamination by Mercury Chloride. (Etude De La Contamination Experimentale De La Phanerogame Marine Posidonia Oceanica (L.) Delile Par Les Composes Mercuri Ques: Partie I-Modalites De La Contamination Par Le Chlorure Mercurique,
W82-03312 1507 5B

Comparative Study of the Trophic Transfer of Two Mercury Compounds--HGCL2 and CH3HGCL--Between Chlorella Vulgaris and Daphnia Magna. Influence of Temperature,
W82-03602 1508 5B

An In Situ Study of Cadmium and Mercury Stress in the Plankton Community of Lake 382, Experimental Lakes Area, Northwestern Ontaric,
W82-03612 1508 5C

Retention and Fate of Experimentally Added Mercury in a Massachusetts Salt Marsh Treated with Sewage Sludge,
W82-03695 1508 5B

Mercury in Coastal and Estuarine Sediments of the Northeastern Irish Sea,
W82-03696 1508 5B

Mercury Clean-Up in Canada's Lake St. Clair: Only a Partial Success,
W82-03788 1509 5C

Recent Trends of Biocides in Pikes of the Lake Paijanne,
W82-04819 1511 5A

Mercury Circulation in Aquatic Environment. Part 3. Mercury Transformations in Sediments,
W82-05094 1511 5B

The Role of Suspended Solids in the Estuarine Geochemistry of Mercury,
W82-06035 1512 5B

Mercury in the River Mersey, Its Estuary and Tributaries During 1973 and 1974,
W82-06049 1512 5B

Mercury Contamination of the Lerderderg River, Victoria, Australia, from an Abandoned Gold Field,
W82-06194 1512 5B

Removal of Inorganic Mercury from Water by Bitmuminous Coal,
W82-06265 1512 5D

Proportion of Methylmercury to the Total Amount of Mercury in River Waters in Canada and Japan,
W82-06609 1512 5B

Preliminary Study of Thessaloniki Bay for Contamination by Mercury and Lead,
W82-06728 1512 5B

MEROMICTIC LAKES
The Role of Phototrophic Bacteria in the Sulfur Cycle of a Meromictic Lake,
W82-01831 1504 2H

Fayetteville, Green Lake, New York: 3H-3HE Water Mass Ages and Secondary Chemical Structure,
W82-01838 1504 2H

Meromixis in a Coastal Zone Excavation,
W82-02120 1505 2H

Cyclops Scutifer Sars - One and Two-Year Life Cycles with Diapause in the Meromictic Lake Blankvatn,
W82-02865 1506 2H

Photosynthetic Bacterial Production and Carbon Mineralization in a Meromictic Lake,
W82-03403 1508 2H

MERRIMACK RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing: Merrimack River Basin; New Hampshire, Massachusetts,
W82-03041 1507 6D

MERSEY ESTUARY
The Effect of Tidal Heights on the Distribution and Abundance of Coliform Bacteria in the Sediments of Two Sites in the Mersey Estuary,
W82-03180 1507 2L

MESOCYCLOPS EDAX
Dynamics of a Subtropical Plankton Community, with Emphasis on the Copepod Mesocyclops Edax,
W82-06906 1512 5C

MESOTROPHIC LAKES
The Effect of Continuous Advanced Wastewater Treatment by the City of Spokane on the Trophic Status of Long Lake, WA During 1979,
W82-01070 1502 2H

An Assessment of the Trophic Status of Deer, Loon, and Diamond Lakes,
W82-01072 1502 2H

Ecological Characteristics of the Rhizosphere Microflora of Myriophyllum Heterophyllum,
W82-01796 1503 4A

METABOLISM
Comparison of Two Direct-Count Methods for Determining Metabolizing Bacteria in Freshwater,
W82-00495 1501 5A

Microbial Metabolism of N-Nitrosodiethanolamine in Lake Water and Sewage,
W82-00585 1502 2H

Studies of Biological Nitrogen Cycle Processes in the Upper Waters of the Ocean, with Special Reference to the Primary Nitrite Maximum,
W82-02742 1506 2A

Metabolic Activity of Herbivorous Zooplankton in Lake Kinneret (Israel) During 1972-1977,
W82-05074 1511 2H

Metabolic Response of Fish to Stress,
W82-05159 1511 5C

Effects of Treated Municipal Wastewater on the Hepatic, Xenobiotic, and Steroid Metabolism in Trout,
W82-05406 1511 5C

Intermediary Metabolism of Organic Matter in the Sediments of a Eutrophic Lake,
W82-06745 1512 5C

METAL ANALYTICAL TECHNIQUES
Applications of Stripping Analysis to Metal Determinations in Natural Waters,
W82-01670 1503 1A

METAL COMPLEXES
Metal Ion Complex Formation Constants of Some Sedimentary Humic Acids with Zn(II), Cu(II) and Cd(II),
W82-05136 1511 2K

METAL-FINISHING WASTES
The Nonfuel Minerals Industry: Regulatory Impacts,
W82-00612 1502 5B

The Effects of Heavy Metals on Microbial Biomass in Sediments of Palestine Lake,
W82-00925 1502 5C

Steel Industry Wastes,
W82-01264 1503 5D

Electroplating and Cyanide Wastes,
W82-01266 1503 5D

Managing Water at Helicopter Plant,
W82-01974 1504 5D

A Mechanistic Model of a Packed-Bed Electrode Cell to Remove Metal Ions from Dilute Effluent Solutions,
W82-02050 1504 5D

Group Treatment Evaluation for Metal Finishers,
W82-02995 1506 5D

Nickel Recovery from Electroplating Rinsewaters by Electrodialysis,
W82-03000 1506 5D

Assessment of Emerging Technologies for Metal Finishing Pollution Control: Three Case Studies,
W82-03001 1507 5D

Treatment of Metal Finishing Wastes by Use of Ferrous Sulfide,
W82-03002 1507 5D

Electroplating Wastes: History and Current Status,
W82-03588 1508 5D

A Local Source Control Program for Metal Finishing Plants,
W82-04172 1509 5D

Chrysler Upgrades Oily Wastes Treatment in Kokomo,
W82-04285 1510 5D

American Hoechst Upgrades a Treatment System Through Automation,
W82-04354 1510 5D

Demonstration of Zinc Cyanide Recovery Using Reverse Osmosis and Evaporation,
W82-04622 1510 5D

Ion-Precipitate Flotation of Iron-Cyanide Complexes,
W82-05259 1511 5D

Copper Removal by an Adsorbing Colloid Foam Flotation Pilot Plant,
W82-05960 1512 5D

Removal of Heavy Metals from Aqueous Solutions Using Microgas Dispersions,
W82-05962 1512 5D

Water Reuse by Metal Removal from Industrial Plating Effluents,
W82-06307 1512 5D

Recovery of Zinc from Wastewater Treatment Sludge,
W82-06485 1512 5E

Expanded Wastewater Treatment at a Metal Working Plant,
W82-06487 1512 5D

Pilot Plant Studies of Copper, Zinc, and Trivalent Chromium Removal by Adsorbing Colloid Foam Flotation,
W82-06708 1512 5D

Electroplating and Cyanide Wastes,
W82-06798 1512 5D

Steel Industry Wastes,
W82-06799 1512 5D

METAL IONS
The Effect of Metal Ions on the Ultraviolet Spectra of Humic Acid, Tannic Acid and Lignosulfonic Acid,
W82-06273 1512 2K

METALS
Consecutive Amperometric Titrations for Calcium and Magnesium,
W82-00208 1501 5A

Gas Chromatographic Determination of Selenium (-II, O), -(IV), and -(VI) in Natural Waters,
W82-00257 1501 5A

Effect of Leachate Flow Rate on Metal Migration Through Soil,
W82-00565 1502 5E

Metal Speciation. Effects on Aquatic Toxicity,
W82-00610 1502 5A

Adsorption as a Control of Metal Concentrations in Sediment Extracts,
W82-00614 1502 5A

Effect of Irrigating Loamy Sand Soil by Liquid Sewage Sludge on its Content of some Micronutrients,
W82-00661 1502 5E

Metal Leaching from Sewage Sludge Ash,
W82-00770 1502 5B

Methods of Investigating the State of Metal Ions in Natural Waters,
W82-00859 1502 5A

Determination of Alkaline Earth and Divalent Transition Metal Cations by Ion Chromatography with Sulfate-Suppressed Barium and Lead Eluents,
W82-01082 1502 5A

Interactive Effects of Metals in Mixtures on Biomass Production Kinetics of Freshwater Copepods,
W82-01125 1503 5C

The Effect of Flyash Disposal on a Shallow Ground-Water System,
W82-01220 1503 5B

Metal Ion Concentrations Associated with Late Summer Sediments of the Ohio River,
W82-01300 1503 5A

Simultaneous Determination of Trace Metals in Sewage and Sewage Effluents by Inductively Coupled Argon Plasma Atomic Emission Spectrometry,
W82-01828 1504 5A

Precipitate Flotation Studies with Monolauryl Phosphate and Monolauryldithiocarbamate,
W82-01863 1504 5D

Ion Flotation-Spectrophotometric Determination of Traces of Chromium (VI),
W82-02007 1504 5A

Comparison of Metals as Catalysts for the Photolysis of Water,
W82-02527 1505 5G

The Status of Nuclear Waste Management,
W82-02659 1506 5E

Model of Trace-Metal Partitioning in Marine Sediments,
W82-02824 1506 5B

Trace Analysis of Toxic Metals. I. Determination of Lead, Mercury, Cadmium and Thallium by Amperometric Titration,
W82-03236 1507 5A

Elimination of Toxic Metals from Wastewater by an Integrated Wastewater Treatment/Water Reclamation,
W82-03439 1508 5D

Evidence for Metal Poisoning in Acute Deaths of Large Red Drum (Sciaenops Ocellata),
W82-03606 1508 5C

The Case for the Protection of Mangrove Swamps: Geochemical Considerations,
W82-03683 1508 5B

Specific and Chelate Exchangers: New Functional Polymers for Water and Wastewater Treatment,
W82-04275 1510 5F

Kinetics of Nutrient and Metal Release from Decomposing Lake Sediments,
W82-05139 1511 2H

Determination of Arsenic and Antimony in Water and Soil by Hydride Generation and Atomic Absorption Spectroscopy,
W82-05141 1511 5A

Determination of Metals in Groundwaters by Trace Enrichment and Liquid Chromatography,
W82-05361 1511 5A

The Determination of Heavy Metals (Al, Mn, Fe, Ni, Cu, Zn, Cd, and Pb) in Urban Snow Using an Atomic Absorption Graphite Furnace,
W82-05397 1511 5A

Sulfur Speciation and Associated Trace Metals (FE, CU) in the Pore Waters of Great Marsh, Delaware,
W82-05415 1511 2K

Procedure for Investigating Metallic Ion Complexing in Natural Waters,
W82-05595 1511 5A

Effect of Sewage Effluent on the Sediments of Nordasvatnet (A Landlocked Fjord), Norway,
W82-05605 1511 5B

Application of X-Ray Microanalysis for the Detection of Heavy Metal in Great Lakes Algae,
W82-05993 1512 5A

Physiological and Biochemical Responses of Several Freshwater Algae to a Mixture of Metals,
W82-05996 1512 5C

A Sampling Study of the Brown Seaweed, Ascophyllum Nodosum as a Marine Monitor for Trace Metals,
W82-06050 1512 5B

New High-Performance Analytical Procedure for the Voltammetric Determination of Nickel in Routine Analysis of Water, Biological Materials and Food,
W82-06467 1512 5A

Fractionation of Metal Forms in Natural Waters by Size Exclusion Chromatography with Inductively Coupled Argon Plasma Detection,
W82-06545 1512 5A

Metal Removal 'A La Carte',
W82-06608 1512 5F

Changes in Extractable Metal Concentrations During Storage of Surface Water Samples Containing Sediments,
W82-06630 1512 2K

Aquatic Sediments,
W82-06806 1512 2J

The Removal of Mixtures of Metals by an Adsorbing Colloid Foam Flotation Pilot Plant,
W82-06821 1512 5D

Removal of Zinc by Adsorbing Colloid Foam Flotation: Pilot Plant Study,
W82-06822 1512 5D

Effect of Artificial Destratification on Iron, Manganese, and Zinc in the Water, Sediments, and two Species of Benthic Macroinvertebrates in an Oklahoma Lake,
W82-06897 1512 5G

METAMORPHIC ROCKS
Ground Water Quality and Quantity in Fracture Zones in the Piedmont of Northwestern South Carolina,
W82-06309 1512 4B

METEOROLOGICAL DATA
Analysis of the Origin of Water Which Forms Large Aufeis Fields on the Arctic Slope of Alaska Using Ground and Landsat Data,
W82-01690 1503 2C

METEOROLOGICAL DATA COLLECTION
Atmospheric Water Content Over the Tropical Pacific Derived from the Nimbus-6 Scanning Microwave Spectrometer,
W82-01004 1502 7B

An Improved Method for Obtaining the Water Content Values of Ice Hydrometeors from Aircraft and Radar Data,
W82-01523 1503 7B

The Thermal Response of Lake Ohrid, Yugoslavia to Meteorological Conditions,
W82-02342 1505 2H

Remote Sensing of Atmospheric Water Content from Satellite Microwave Radiometer (SAMIR) on Bhaskara,
W82-04647 1510 7B

METEOROLOGY
Meteorology of Important Rainstorms in the Colorado River and Great Basin Drainages,
W82-03047 1507 2B

METHANE
Methane Production from Ozonated Pulp Mill Effluent,
W82-00155 1501 5D

Anaerobic Methane Oxidation: Occurrence and Ecology,
W82-00218 1501 2H

Comparison of In Situ and In Vitro Rates of Methane Release in Freshwater Sediments,
W82-00245 1501 2H

Nitrogen Fixation and Methane Metabolism in a Stream Sediment-Water System Amended with Leaf Material,
W82-00486 1501 2K

Methane Formation in the Acid Peats of Okefenokee Swamp, Georgia,
W82-00936 1502 2H

The Contributions of Temperature and the Input of Organic Matter in Controlling Rates of Sediment Methanogenesis,
W82-01832 1504 2H

Carbon Isotope Fractionation During Microbial Methane Oxidation,
W82-03188 1507 5A

Biogeochemical Cycling in an Organic-Rich Coastal Marine Basin - I. Methane Sediment-Water Exchange Processes,
W82-03308 1507 2K

Methanogenesis in Marine Sediments of the Mississippi River Delta,
W82-03533 1508 5B

Texans Claim Breakthrough in Anaerobic Waste Treatment,
W82-03565 1508 5D

Anaerobic Activated Carbon Filter for the Treatment of Phenol-Bearing Waste Water,
W82-03680 1508 5D

Methane in Groundwater and Its Effect on 14 C Groundwater Dating,
W82-03801 1509 7B

Anaerobic Digestion of Farm Wastes: A Review - Part 2,
W82-04347 1510 5E

Comparison of Trihalomethane Levels and Other Water Quality Parameters for Three Treatment Plants on the Ottawa River,
W82-04810 1511 5F

The Occurrence and Origin of Methane in Some Groundwater Flow Systems,
W82-04925 1511 2K

A System for Measuring Methane Fluxes from Inland and Coastal Wetland Environments,
W82-04989 1511 2L

Methane in Water Wells,
W82-05262 1511 5F

Methanogenesis in Big Soda Lake, Nevada: An Alkaline, Moderately Hypersaline Desert Lake,
W82-06535 1512 2H

Methane Flux in the Great Dismal Swamp,
W82-06840 1512 2H

METHANE BACTERIA
Populations of Methane-Producing Bacteria and In Vitro Methanogenesis in Salt Marsh and Estuarine Sediments,
W82-00202 1501 2L

Methanogenesis in Freshwater Sediments: Inherent Variability and Effects of Environmental Contaminants,
W82-01825 1504 5C

Immobilized Microbes and a High-Rate, Continuous Waste Processor for the Production of High Btu Gas and the Reduction of Pollutants,
W82-06005 1512 5D

Kinetic Analysis of Competition Between Sulfate Reducers and Methanogens for Hydrogen in Sediments,
W82-06886 1512 2H

METHANOGENESIS
Methanogenesis in Marine Sediments of the Mississippi River Delta,
W82-03533 1508 5B

Methanogenesis in Big Soda Lake, Nevada: An Alkaline, Moderately Hypersaline Desert Lake,
W82-06535 1512 2H

Sulfate Reduction and Methanogenesis in the Sediment of a Saltmarsh on the East Coast of the United Kingdom,
W82-06541 1512 2L

METHANOL
A Comprehensive Study on the Biological Treatabilities of Phenol and Methanol--III. Treatment System Design,
W82-03568 1508 5D

Comprehensive Study on the Biological Treatabilities of Phenol and Methanol--II. The Effects of Temperature, pH, Salinity and Nutrients,
W82-03569 1508 5D

METHEMOGLOBINEMIA
An Alternative for Meeting the Nitrate Standard for Public Water Supplies,
W82-01623 1503 5C

METHOMYL
Determination of Methomyl and Methomyl-Oxime in Fruit Crops and Water by HPLC,
W82-06466 1512 5A

METHOXYCHLOR
Methoxychlor Residues in Treated Irrigation Canal Water in Southcentral Idaho,
W82-05726 1511 5B

METHYL BROMIDE
Methyl Bromide and Bromide-Ion in Drainage Water After Leaching of Glasshouse Soils,
W82-01492 1503 5B

METHYL CHLOROFORM
Removal of Refractory Organics from Water by Aeration. I. Methyl Chloroform,
W82-05174 1511 5D

METHYL EUGENOL
Environmental Fate of Methyl Eugenol,
W82-02013 1504 5B

METHYLATION
Methylation of Trimethyltin Compounds by Estuarine Sediments,
W82-00801 1502 5B

Mercury Methylation by Fish Intestinal Contents,
W82-01830 1504 5C

Chemical Alkylation of Lead(II) Salts to Tetraalkyllead (IV) in Aqueous Solution,
W82-03171 1507 5B

METHYLENE BLUE
Intraparticle Diffusivity of Methylene Blue into Porous Activated Carbon,
W82-03601 1508 5F

METHYLMERCURY
Thin Layer Chromatographic and Atomic Absorption Spectrophotometric Determination of Methyl Mercury,
W82-00503 1502 5A

Mercury Circulation in Aquatic Environment. Part 3. Mercury Transformations in Sediments,
W82-05094 1511 5B

Proportion of Methylmercury to the Total Amount of Mercury in River Waters in Canada and Japan,
W82-06609 1512 5B

METROPOLITAN WATER MANAGEMENT
Distribution System Liability,
W82-01028 1502 5F

Development of Water Supply to Metro-Manila,
W82-03742 1508 5F

Denver's Potable Reuse Project: Pathway to Public Acceptance,
W82-04140 1509 3C

Can Prices Tame the Inflationary Tiger,
W82-04142 1509 6D

Domestic Water Conservation Research Plan,
W82-05547 1511 6B

A Model River Test to Describe the Various Impacts of Chemical Substances on Microbial Biocommunities,
W82-03147 1507 5C

RNA Synthesis as a Measure of Microbial Growth in Aquatic Environments. II. Field Applications,
W82-03191 1507 5A

RNA Synthesis as a Measure of Microbial Growth in Aquatic Environments. I. Evaluation, Verification and Optimization of Methods,
W82-03192 1507 5A

Improved Microbe Detection in Water Samples.
W82-03258 1507 5A

Microbiological Quality of Selected Recreational Waters,
W82-03636 1508 5A

The Use of Respirography in Biological Treatment Plant Control,
W82-04011 1509 5D

Health Aspects of Waters at Public Health Resorts,
W82-04348 1510 5A

Microbial Ecology of River Deposits in the Rivers Kennet and Thames at Reading, England,
W82-04688 1510 5C

Initial Microbiological Response in Lakes to the Mt St Helens Eruption,
W82-05125 1511 2H

Enzyme Activity and Kinetics in Substrate-Amended River Sediments,
W82-05336 1511 5C

An Electron Microscopic Study of the Forms of Bacteria in the Surface Film of the Water,
W82-05452 1511 2H

Factors Affecting Flog Formation and Bulking in the Activated Sludge Process for Treatment of Textile Waste Waters,
W82-06171 1512 5D

Influence of Salinity and Organic Nutrient Concentration on Survival and Growth of Vibrio Cholerae in Aquatic Microcosms,
W82-06534 1512 5C

Determination of the Number of Respiring Thiobacillus Ferrooxidans Cells in Water Samples by Using Combined Fluorescent Antibody-2-(p-Iodophenyl)-3-(p-Nitrophenyl)-5-Phenyltetrazolium Chloride Staining,
W82-06542 1512 5A

Microbial Dynamics of an Epilithic Mat Community in a High Alpine Stream,
W82-06729 1512 2E

Dye-Coupled Electrode System for the Rapid Determination of Cell Populations in Polluted Water,
W82-06743 1512 5A

Development of a Method for Detection of Human Rotavirus in Water and Sewage,
W82-06885 1512 5A

Microbiology: Methodology and Quality Assurance,
W82-06919 1512 5A

Microbiology: Water,
W82-06924 1512 5B

Microbiology: Wastewater Treatment,
W82-06926 1512 5D

Microbiology: Detection, Occurrence and Removal of Viruses,
W82-06927 1512 5B

Comparative Photoheterotrophy, Chemoheterotrophy, and Photolithotrophy in a Eutrophic Reservoir and an Oligotrophic Lake,
W82-06978 1512 2H

MICROCOSMS

Microcosms as Test Systems for the Ecological Effects of Toxic Substances: An Appraisal with Cadmium,
W82-03026 1507 5C

MICROENVIRONMENT

Substrate-Associated Microfauna,
W82-06925 1512 5C

MICROGAS DISPERSIONS

Removal of Heavy Metals from Aqueous Solutions Using Microgas Dispersions,
W82-05962 1512 5D

Water Reuse by Metal Removal from Industrial Plating Effluents,
W82-06307 1512 5D

MICROINVERTEBRATES

A Faunal Analysis of the Springs off the Ouachita Mountains, Arkansas,
W82-06161 1512 2K

MICROORGANISMS

Substrate Associated Microfauna,
W82-01283 1503 5C

Abundance Dynamics of Microorganisms in the Decomposition of Macrophytes,
W82-01999 1504 2H

Non-Acid Pretreatment and Management of Microorganisms in Seawater Desalination by Reverse Osmosis,
W82-02108 1505 3A

Microbial Purification of Recycled Wastewater in a Closed System,
W82-02172 1505 5D

Quantitative Composition, Distribution, Community Structure and Standing Stock of Sea Ice Microalgae in the Canadian Arctic,
W82-02649 1506 2C

The Microfauna of Activated Sludges. Study of an Observation Method and Application to Monitor a Pilot Plant During the Start-Up Phase. (La Microfauna Des Boues Activees. Etude D'une Methode D'Observation Et Application Au Suivi D'un Pilote En Phase De Demarrage,
W82-02960 1506 5D

Improved Microbe Detection in Water Samples.
W82-03258 1507 5A

Microbial Activity of Trench Leachates from Shallow-Land, Low-Level Radioactive Waste Disposal Sites,
W82-03261 1507 5B

Microorganism Inventory in Activated Sludge Control,
W82-03483 1508 5D

Control of the Activated Sludge Process,
W82-03499 1508 5D

Movement of Cobalt in Freshwater Micro-Ecosystems,
W82-03524 1508 2H

The Growing Business of Bacterial Cultures,
W82-03786 1509 5D

Specific Oxygen Demand as an Operating Parameter for Activated Sludge Processes,
W82-04029 1509 5D

Ammonium Uptake by Micronesian Species of Gracilaria (Rhodophyta),
W82-05311 1511 5G

Radiotracer Experiments on Phosphorus Uptake and Release by Limnetic Microzooplankton,
W82-05381 1511 5B

Environmental Impact of the Microbial Aerosol Emissions from Wastewater Treatment Plants,
W82-05428 1511 5B

Scanning Electron Microscope Evaluation of Rotating Biological Contactor Biofilm,
W82-06047 1512 5D

A Method for Monitoring Mineralization of 14C-Labeled Compounds in Aqueous Samples,
W82-06272 1512 5A

Mineralization of Detrital Lignocelluloses by Salt Marsh Sediment Microflora,
W82-06410 1512 2L

Ultraviolet Systems in Water Treatment,
W82-06726 1512 5F

Differential Phosphorus Assimilation in Attached vs. Unattached Microorganisms,
W82-06762 1512 5B

Improved Method for Determination of Respiring Individual Microorganisms in Natural Waters,
W82-06883 1512 5A

MICROORGANSIMS

Variation of Sludge Volume Index with Activated Sludge Characteristics,
W82-04555 1510 5D

MICROPROCESSORS

Microprocessors and Computers in Analysis in the Water Industry,
W82-06259 1512 5F

Modelling of the Activated Sludge Process for Microprocessor-Based State Estimation and Control,
W82-06324 1512 5D

MICROPTERUS DOLOMIEUI

Microhabitat Selection by Fish: A Rationale for Developing Design Criteria for Mitigation Devices in Channelized Streams,
W82-03955 1509 8I

MICROSCOPIC ANALYSIS

Interim Method for Determining Asbestos in Water,
W82-00741 1502 5A

Scanning Electron Microscope Evaluation of Rotating Biological Contactor Biofilm,
W82-06047 1512 5D

Diatom Assemblages as Indicators of Water Quality in Freshwater Habitats of Guam,
W82-06146 1512 5A

MICROSCOPY

Aluminum Shadowing-Direct Projection Photomicroscopy of Diatom Frustules,
W82-00884 1502 5A

Improved Method for Determination of Respiring Individual Microorganisms in Natural Waters,
W82-06883 1512 5A

MICROWAVES

Remote Sensing of Soil Moisture Content Over Bare Field at 1.4 GHz Frequency,
W82-01345 1503 7B

Microwave Measurements of Snowpack Properties,
W82-02646 1506 2C

Possible Use of Active Microwave Remote Sensing Data for Prediction of Regional Evaporation by Numerical Simulation of Soil Water Movement in the Unsaturated Zone,
W82-04199 1509 2G

MID-ATLANTIC STATES

Summary of the Mid-Atlantic Conference on Small-Scale Hydro-Power in the Mid-Atlantic States: Resolution of the Barriers Impeding Its Development.
W82-00743 1502 6E

MIDDLE LOUP RIVER

Mathematical Simulation of Sediment Movement in Streams,
W82-04650 1510 2J

MIDGES

Sampling Emerging Chironomidae (Diptera) With Submerged Funnel Traps in a New Northern Canadian Reservoir, Southern Indian Lake, Manitoba,
W82-00520 1502 2H

Grazing Rate Determination of Corynoneura Scutellata Winnertz (Chironomidae:Diptera),
W82-00822 1502 2H

Investigations into the Occurrence of Midge Plagues in the Vicinity of Harderwijk (Netherlands),
W82-01378 1503 2H

Chironomidae (Diptera) of Baldwin Lake, Illinois, a Cooling Reservoir,
W82-02620 1506 2H

A Chironomus Tentans Bioassay for Testing Synthetic Fuel Products and Effluents, with Data on Acridine and Quinoline,
W82-02630 1506 5C

The Clear Lake Example: An Ecological Approach to Pest Management,
W82-02660 1506 5F

Transport of PCBs in Aquatic Laboratory Model Ecosystems from Sediment to the Atmosphere Via the Surface Microlayer,
W82-06180 1512 5B

Observations on the Immature Chironomides of Polluted Lowland Brook-Pond System (Antwerp, Belgium), Aerated by the Phallus Process,
W82-06912 1512 5G

MIDMAR DAM

The Study of Phosphorus and Nitrogen Fluxes in Enriched Isolation Columns,
W82-02563 1505 5C

MIDWESTERN STATES

Executive Summary; Legal Obstacles and Incentives to the Development of Small Scale Hydroelectric Potential in the Seven Mid-Western States.
W82-00718 1502 6E

MIGRATION

Postdepositional Mobility of Phosphorus in Lake Sediments,
W82-00474 1501 2H

Effect of Leachate Flow Rate on Metal Migration Through Soil,
W82-00565 1502 5E

Vertical Migration and Mortality of Benthos in Dredged Material. Part I: Mollusca,
W82-03317 1507 6G

MILFORD HAVEN ESTUARY

Effect of Pembroke Power Station on the Temperatures in Milford Haven, Wales,
W82-02406 1505 5C

MILLIGAN CANYON

Hydrochemical Facies in a Tertiary Basin in the Milligan Canyon Area, Southwest Montana,
W82-01481 1503 2F

MILWAUKEE

Railroad's Shops Correct an Oily Wastes Problem,
W82-05130 1511 5D

MINE DRAINAGE

Radionuclide Concentrations in Streams in the Upper Blackfoot River Basin, Southeastern Idaho,
W82-00418 1501 5A

Hydrogeochemistry and Simulated Solute Transport, Piceance Basin, Northwestern Colorado,
W82-00723 1502 5B

Mining Pollution and the Diet of the Purple-Striped Gudgeon Mogurnda Mogurnda Richardson (Eleotridae) in the Finniss River, Northern Territory, Australia,
W82-01366 1503 5C

The Effects of Mine Drainage and Organic Enrichment on Benthos in the River Nent System, Northern Pennines,
W82-02053 1504 5C

Character of Brines from the Belle Isle and Weeks Island Salt Mines, Louisiana, U.S.A.,
W82-03584 1508 2F

Progress Report on the Effects of Surface Mining on the Surface-Water Hydrology of Selected Basins in the Fort Union Coal Region, North Dakota and Montana,
W82-03975 1509 4C

Influence of Forest and Rangeland Management on Anadromous Fish Habitat in Western North America; 8. Effects of Mining.
W82-04071 1509 5C

What Is a Point Source,
W82-04158 1509 6E

Water Treatment at Homestake's Bulldog Mountain Operation,
W82-04311 1510 5D

A Simple Microdetermination of Polymer Flocculants (Polyacrylamides and Guar) in Mine Water,
W82-04457 1510 5A

Acid Pond Drainage,
W82-05199 1511 5G

Biological Processes for Concentrating Trace Elements from Uranium Mine Waters,
W82-06520 1512 5D

Thermodynamic Controls on Quality of Water from Underground Coal Mines in Colorado,
W82-06624 1512 5G

Coal and Coal Mine Drainage,
W82-06802 1512 5B

MINE WASTES

Absorption of Radium and Thorium From New Mexico Uranium Mill Tailing Solutions,
W82-00040 1501 5D

Distribution and Transport of Heavy Metals in the Sediments of a Small Northern Eutrophic Lake,
W82-00235 1501 5B

Control Technology Strategies for Coal Preparation Waste Drainages,
W82-00440 1501 5D

Coal and Coal Mine Drainage,
W82-01261 1503 5G

The Effect of Pollutants from the Coal Industry on the Fish Fauna of a Small River in the South Wales Coalfield,
W82-01389 1503 5C

Rosario Dominicana's Cyanide Tailings Dam Construction and Operation,
W82-01589 1503 5D

Effects of Sedimentation on the Gravels of an Industrial River System,
W82-01881 1504 5C

Technology and Performance of the Hi-Capacity Thickener,
W82-01929 1504 5D

Reverse Osmosis Separation of Sulfate, Nitrate, and Ammonia from Mining Effluents,
W82-02640 1506 5D

Seepage from Free Water Above Impermeable Tailings,
W82-02714 1506 5B

Changes in Flora Down a Stream Showing a Zinc Gradient,
W82-02946 1506 5C

Fine Coal-Refuse Slurry Dewatering,
W82-03049 1507 5D

Method of Selective Dissolution for Characterization of Particulate Forms of Radium and Barium in Natural and Waste Waters,
W82-03879 1509 5A

Impact of Mining Activities on Water Quality in Western North Carolina,
W82-03926 1509 5B

Placer Mining and Salmon Spawning in American River Basin, California,
W82-05200 1511 8I

Influence of Water Movements and Other Factors on Distribution and Transport of Heavy Metals in a Shallow Bay (Canada),
W82-05205 1511 5B

Geochemistry of Leachates from Selected Coal Mining and Combustion Wastes,
W82-05936 1512 5B

Recovery of Fine-Particle Coal by Colloid Flotation,
W82-05961 1512 5D

Mercury Contamination of the Lerderderg River, Victoria, Australia, from an Abandoned Gold Field,
W82-06194 1512 5B

Biological Processes for Concentrating Trace Elements from Uranium Mine Waters,
W82-06520 1512 5D

Coal and Coal Mine Drainage,
W82-06802 1512 5B

Preliminary Studies on the Dewatering of Coal-Clay Waste Slurries Using a Flocculant,
W82-06958 1512 5D

Electrokinetic Densification of Solids in a Coal Mine Sediment Pond- A Feasibility Study, (In Two Parts). 1. Laboratory and Field Tests,
W82-06960 1512 5D

MINERAL INDUSTRY

Dewatering Florida Phosphatic Clay Wastes With Moving Screens,
W82-00049 1501 5D

The Nonfuel Minerals Industry: Regulatory Impacts,
W82-00612 1502 5B

A Water Rights Strategy for Mining Operations in the Western US,
W82-01587 1503 6E

Determination of Mineral Fiber Concentrations in Fish Tissues,
W82-01822 1504 5C

Impact of Mining Activities on Water Quality in Western North Carolina,
W82-03926 1509 5B

MINERAL SPRINGS

Geochemistry of Thermal and Mineral Waters in the Cascade Mountains of Western North America,
W82-04673 1510 2K

MINERAL WATER

Minor - Element Distribution in Mineral and Thermal Waters (Repartition des Elements Traces dans les Eaux Thermo-Minerals),
W82-03541 1508 2F

MINERAL WATER REACTIONS

Non-Equilibrium Water/Rock Interactions,
W82-01684 1503 1A

MINERALIZATION

Lignocellulose Mineralization by Arctic Lake Sediments in Response to Nutrient Manipulation,
W82-00270 1501 2H

Nitrate Production, Uptake, and Leaching,
W82-01411 1503 5B

The Effect of Particle Substrate on Mineralization Performance and the Formation of Excess Sludge in a Complete Mixing Aeration Tank,
W82-04012 1509 5D

A Method for Monitoring Mineralization of 14C-Labeled Compounds in Aqueous Samples,
W82-06272 1512 5A

Rates of Mineralization of Trace Concentrations of Aromatic Compounds in Lake Water and Sewage Samples,
W82-06738 1512 5B

Kinetics and Extent of Mineralization of Organic Chemicals at Trace Levels in Freshwater and Sewage,
W82-06756 1512 5B

Comparative Aspects of Sulfur Mineralization in Sediments of a Eutrophic Lake Basin,
W82-06888 1512 5C

MINERALOGY

Limnological and Geochemical Survey of Williams Lake, Hubbard County, Minnesota,
W82-02471 1505 2H

MINERALS

Variations and Mechanisms of Asbestos Fibre Distribution in Stream Water,
W82-01853 1504 5A

Some Analyses of Aquatic Plants and Their Waters,
W82-02293 1505 2H

Factors of the Chemical Composition of Seepage and Groundwaters in the Intertropical Zone (West Africa),
W82-03543 1508 2K

The Effect of Pressure on the Solubility of Minerals in Water and Seawater,

Simulation Modeling of Primary Clarifiers, W82-01027 1502 6A

Groundwater Quality Models - State of the Art, W82-01061 1502 5G

Mathematical Modeling Techniques for Groundwater Management, W82-01062 1502 4B

The Impact of Effluent from the Renton Wastewater Treatment Plant on the Dissolved Oxygen Regimen of the Lower Green/Duwamish River, W82-01064 1502 5D

An Empirical Methodology for Estimating Entrainment Losses at Power Plants Sited on Estuaries, W82-01173 1503 6G

Studies for Abatement of Pollution from Combined Sewer Overflows in Canada,
W82-01200 1503 5G

A Model for Simulation of Flow in Singular and Interconnected Channels,
W82-01210 1503 2E

A Combined Salt Transport-Chemical Equilibrium Model for Calcareous and Cypsiferous Soils,
W82-01230 1503 5B

A Survey of Mathematical Optimization Models and Algorithms for Designing and Extending Irrigation and Wastewater Networks,
W82-01296 1503 6A

Identification of the Wairakei Geothermal System,
W82-01312 1503 2F

A Comparison of the Incomplete Cholesky-Conjugate Gradient Method with the Strongly Implicit Method as Applied to the Solution of Two-Dimensional Groundwater Flow Equations,
W82-01315 1503 2F

A Mathematical Model of Water Table Fluctuation in a Semi-Infinite Aquifer Induced by Localized Transient Recharge,
W82-01319 1503 2F

Hydroelectrical Model for Optimal Operation of a Single Multipurpose Reservoir,
W82-01329 1503 6A

Computer Modeling and Ground-Water Protection,
W82-01336 1503 2F

CREAMS: A Field-Scale Model for Chemicals, Runoff, and Erosion from Agricultural Management Systems.
W82-01401 1503 5B

Modeling Erosion and Sediment Yield from Flatland Watersheds,
W82-01406 1503 2J

Concentrated Flow Relationships,
W82-01409 1503 2J

Laboratory Procedure for Estimating Residue Dynamics of Xenobiotic Contaminants in a Freshwater Food Chain,
W82-01443 1503 5B

Hydraulic Model Study of Daule-Peripa Spillway and Outlet Works,
W82-01446 1503 8A

Methods for Generating Alternative Solutions to Water Resources Planning Problems,
W82-01449 1503 6A

Generating Alternative Solutions for Dynamic Programming Models of Water Resources Problems,
W82-01450 1503 6A

A One-Dimensional, Finite Element Salt Water Intrusion Model,
W82-01452 1503 7A

Comparison of First-Order Error Analysis and Monte Carlo Simulation in Time-Dependent Lake Eutrophication Models,
W82-01460 1503 2H

Performance Evaluation of a Stochastic Optimization Model for Reservoir Design and Management with Explicit Reliability Criteria,
W82-01462 1503 8A

On Identification and Validation of Some Geothermal Models,
W82-01467 1503 6A

River Basin Hydrosalinity Modeling,
W82-01469 1503 2K

Application of Nutrient-Saturated Growth Model to Phytoplankton Management in Freshwater Prawn (Macrobrachium Rosenbergii) Ponds in Hawaii,
W82-01483 1503 2H

Water Management Model Evaluation for North Central Ohio,
W82-01536 1503 4A

Snowmelt Prediction in a Subarctic Drainage Area,
W82-01571 1503 2C

Simulation of the Topographic Influence on SLAR Data for Soil Moisture Detection in a Hilly Area,
W82-01605 1503 2G

Can We Model the Rainfall-Runoff Process Today,
W82-01609 1503 2A

Soil Moisture Updating and Microwave Remote Sensing for Hydrological Simulation,
W82-01611 1503 2G

Kinematic Flow Approximation of Runoff on a Plane: An Exact Analytical Solution,
W82-01617 1503 2A

Kinetics for the Aquatic Environment,
W82-01631 1503 2K

Note on Two Limit Distributions of Bedload Movement,
W82-01643 1503 2J

Parameter Estimation of Rainfall-Runoff Models with Heteroscedastic Streamflow Errors--The Noninformative Data Case,
W82-01657 1503 2A

Simulation of Water and Nitrogen Movement and Nitrogen Transformations in Forest Soils,
W82-01668 1503 2G

River Basin Sequential Water Use and Salinity Effects on Crop Yield Economics,
W82-01671 1503 3F

Predicting Storm Runoff from Small Grassland Watersheds with the USDAHL Hydrologic Model,
W82-01672 1503 2E

Watershed Constituent Loading Analysis Utilizing Empirical Hydro-Chemical Modeling Techniques,
W82-01676 1503 5B

Water Management in the Colorado River Basin: An Application of Nonlinear Transportation Algorithms,
W82-01677 1503 6A

Random Differential Equations in Water Quality Modeling,
W82-01688 1503 6A

The Technology Transfer Process in Water Resources R&D Management,
W82-01694 1503 6A

Pollution Permits and Markets for Water Quality,
W82-01699 1503 6A

Hydrogeology of Well-Field Areas Near Tampa, Florida, Phase 1--Development and Documentation of a Two-Dimensional Finite-Difference Model for Simulation of Steady-State Ground-Water Flow,
W82-01780 1503 6A

Environmental Assessment of Industrial Discharges Based on Multiplicative Models,
W82-01808 1504 5B

A Gel Partition Model for Organic Desorption from a Pond Sediment,
W82-01844 1504 5A

Estimating Erosion and Sediment Yield on Field-Sized Areas,
W82-01849 1504 2J

Simulating Effects of Combined Sewer Overflows,
W82-01864 1504 6A

A Sensitivity Analysis of an Ecosystem Model of Estuarine Carbon Flow,
W82-01875 1504 2L

Development and Applications of a Runoff Model for Snowcovered and Glacierized Basins,
W82-01885 1504 2C

Generalized Computer Simulation Model for the Impact Assessment of Industrial Water Use on Fish Populations,
W82-01915 1504 5C

Variance Estimates for a Dynamic Eutrophication Model of Saginaw Bay, Lake Huron,
W82-01917 1504 2H

Mathematical Model for Regional Land Subsidence Due to Pumping 1. Integrated Aquifer Subsidence Equations Based on Vertical Displacement Only,
W82-01926 1504 2F

Effects of Freshwater Flow on Salinity and Phytoplankton Biomass in the Lower Hudson Estuary,
W82-02117 1505 2L

Assessment Methodologies for Freshwater Inflows to Chesapeake Bay,
W82-02118 1505 5B

Characterization of Freshwater Inflow Modification to Estuaries Resulting from River Basin Development,
W82-02162 1505 6G

Estimating Sediment Transport Capacity in Watershed Modeling,
W82-02265 1505 2J

Simulation of a Time Dependent Activated Sludge Wastewater Treatment Plant,
W82-02303 1505 5D

A Review of Single-Site Models for Monthly Streamflow Generation,
W82-02368 1505 2E

Possibility of Investigating Open-Channel Flows on an Analog Computer,
W82-02389 1505 6A

Point Process Models of Rainfall,
W82-02452 1505 2A

An Estimation of the Reaeration Coefficient in Natural Streams by Spectral Analysis of Time Series Data,
W82-02458 1505 5G

Rainfall-Runoff Modeling and Preliminary Regional Flood Characteristics of Small Rural Watersheds in the Arkansas River Basin in Colorado,
W82-02462 1505 2A

Simulation of an Aquifer Test on the Tesuque Pueblo Grant, New Mexico,
W82-02465 1505 2F

Analysis of Firm Water Supply Under Complex Institutional Constraints,
W82-02501 1505 6A

Selecting Seasonal Streamflow Models,
W82-02502 1505 2E

Simulation Model for Agricultural Non-Point-Source Pollution,
W82-02504 1505 5B

Delineation of Acid Mine Drainage Potential of Coal-Bearing Strata of the Pottsville and Allegheny Groups in Western Pennsylvania,
W82-02534 1505 6A

The Use of Ground-Water Flow Models for Estimating Lake Seepage Rates,
W82-02549 1505 2F

Influence of Dissolved Oxygen on Activated Sludge Viability,
W82-02582 1505 5D

Developing Dam-Break Flood Zone Ordinance,
W82-02585 1505 6F

Modeling Circulation in Depth-Averaged Flow,
W82-02679 1506 2E

Modeling Cavitation for Closed Conduit Flow,
W82-02700 1506 8B

Performance Predictions for Removal of Toxic and Carcinogenic Compounds from Water Supplies by Adsorption,
W82-02729 1506 5D

The Combination of Input-Output Analysis and Linear Programming for Water Resource Management: An Application to Northwest Iowa,
W82-02734 1506 6A

An Economic Analysis of Ground Water Management Alternatives,
W82-02740 1506 4B

Mathematical Models of Water Yield with Particular Reference to Mississippi Watersheds: Interim Report No. 1, A Study of Some Empirical Methods of Determining the Unit Hydrograph,
W82-02803 1506 2A

Supplement to Predictive Modeling of Effects of the Planned Kindred Lake on Ground-Water Levels and Discharge, Southeastern North Dakota,
W82-02828 1506 4A

Multiobjective Analysis of Irrigation Planning in River Basin Development,
W82-02855 1506 6A

Development of the River Seine Estuary: Case Study,

Morocco's Largest Multipurpose Scheme,
W82-01724 1503 8A

Eutrophication of the Lake-Reservoir Sidi Mohamed Ben Abdellah, Rabat, Morocco (L'Eutrophisation du Lac-Reservoir Sidi Mohamed Ben Abdellah Pres de Rabat, Maroco),
W82-03118 1507 2H

MORPHOLOGY
Algal Polymorphism in High Rate Wastewater Treatment Ponds,
W82-02564 1505 5D

Morphological Changes in Toxic and Non-Toxic Microcystis Isolates at Different Irradiance Levels,
W82-02906 1506 5C

Soil Morphology and Preferential Flow Along Macropores,
W82-03175 1507 2G

MORTALITY
Chlorinated Hydrocarbons as a Factor in the Reproduction and Survival of Lake Trout (Salvelinus Namaycush) in Lake Michigan.
W82-01079 1502 5C

Vertical Migration and Mortality of Benthos in Dredged Material. Part I: Mollusca,
W82-03317 1507 6G

MOSCOW RIVER
Seasonal Variations in the Actual Fecundity of Daphnia Magna in a Laboratory Culture,
W82-02083 1504 5C

MOSEL RIVER
Telemetric Water Control System of the Artificially Aerated Mosel River,
W82-04598 1510 5G

MOSSES
Aquatic Mosses as Monitors of Heavy Metal Contamination in the River Etherow, Great Britain,
W82-00787 1502 5A

The Production Ecology of Benthic Plants in Some Antarctic Lakes. II. Laboratory Physiology Studies,
W82-02861 1506 2H

MOST PROBABLE NUMBER TEST
Numerical Taxonomy Analysis of Bacteria Isolated from the Completed 'Most Probable Numbers' Test for Coliform Bacilli,
W82-01911 1504 5A

MOST PROBABLE NUMBER TESTS
A-1 Medium: Alternative Technique for Fecal Coliform Organism Enumeration in Chlorinated Wastewaters,
W82-02339 1505 5A

MOTORS
Pump Systems: What Price Inefficiency,
W82-04093 1509 8C

MOTZ
Generating Power from Compensating Flow.
W82-05624 1511 8C

MOUNT MONADNOCK
Winter Water Relations of Red Spruce on Mount Monadnock, New Hampshire,
W82-02634 1506 2I

MOUNT ST. HELENS
Toxicity of Mount St. Helens Ash Leachate to a Blue-Green Alga,
W82-00001 1501 5C

Mount St. Helens Volcanic-Ash Fall in the Bull Run Watershed, Oregon, March-June 1980,
W82-00002 1501 5B

Mudflows Resulting From the May 18, 1980, Eruption of Mount St. Helens, Washington,
W82-00003 1501 5B

Channel Conditions in the Lower Toutle and Cowlitz Rivers Resulting From the Mudflows of May 18, 1980,
W82-00004 1501 5B

Effects of the Mount St. Helens Eruption on the Benthic Fauna of the Toutle River, Muddy River, and Pine Creek Drainage Basins, Washington,
W82-00005 1501 5C

Effects of Mount St. Helens Eruption on Selected Lakes in Washington,
W82-00006 1501 2H

Effects of Volcanism on the Glaciers of Mount St. Helens,
W82-00007 1501 2C

Sediment Data for Streams Near Mount St. Helens, Washington--Volume 1, 1980 Water-Year Data,
W82-01792 1503 7C

Management of Watershed Rehabilitation-- Reflections from Mt. St. Helens and Redwood Creek,
W82-06968 1512 4D

Preliminary Post-Eruption Sediment Budget for the North Fork Toutle River Drainage, June 1980-May 1981,
W82-06970 1512 4D

Sediment Influx to the Toutle River from Erosion of Tephra, May 1980-May 1981,
W82-06971 1512 4D

MOUNTAIN BASINS
Biogeochemistry of Mountain Stream Waters: The Marmot System,
W82-06569 1512 5B

MOUNTAIN LAKES
Contribution to High Altitude Limnology of the Himalayan System I. Limnology and Primary Productivity of the Plankton Community of Nilnag Lake, Kashmir,
W82-03314 1507 2H

MOUNTAINS
Sessile Algae in European Mountain Streams. I. The Ecological Characteristics of Communities,
W82-03309 1507 5C

Dispersion in Mountainous Natural Streams,
W82-06357 1512 2E

Calibrating A Mountain Watershed in Wyoming,
W82-06583 1512 2E

MOZHAYSK RESERVOIR
On the Dynamics of Feeding of Young Fish from Mozhaysk Reservoir in Various Years,
W82-02434 1505 2H

MT. ST. HELENS
Submersible Pumps Help Quell Damage From Mount St. Helens Mudflow.
W82-00509 1502 4D

Initial Microbiological Response in Lakes to the Mt St Helens Eruption,
W82-05125 1511 2H

Impact of Mount St. Helens Eruption on Bacteriology of Lakes in the Blast Zone,
W82-06746 1512 5C

MUD FLATS
Sedimentological and Biological Changes in the Windsor Mudflat, an Area of Induced Siltation,
W82-00548 1502 5C

MUDFLOWS
Mudflows Resulting From the May 18, 1980, Eruption of Mount St. Helens, Washington,
W82-00003 1501 5B

Channel Conditions in the Lower Toutle and Cowlitz Rivers Resulting From the Mudflows of May 18, 1980,
W82-00004 1501 5B

Submersible Pumps Help Quell Damage From Mount St. Helens Mudflow.
W82-00509 1502 4D

Mechanics of Mudflow Mobilization in Low-Angled Clay Slopes,
W82-00989 1502 2J

The Disastrous Southern California and Central Arizona Floods, Flash Floods, and Mudslides of February 1980.
W82-04632 1510 2E

MUDMINNOW
Cytogenetic Effects on the Eastern Mudminnow, Umbra Pygmaea, Exposed to Ethyl Methanesulfonate, Benzo(a)Pyrene, and River Water,
W82-04480 1510 5C

MULCHING
Effect of Mulch Rate on Soil Loss by Raindrop Splash,
W82-00468 1501 2J

Effect of Soil Water Content and a Growing Season Straw Mulch on Grain Sorghum,
W82-00765 1502 3F

MULTI-FLASH DISTILLATION
Analysis of Large Desalination Plants,
W82-06122 1512 3A

MULTI-OBJECTIVE PLANNING
Proposed Water Quality Control Plan for Indio Subarea of the Whitewater Hydrologic Unit, West Colorado River Basin.
W82-00716 1502 6F

MULTIEFFECT DISTILLATION
Assessment of High Heat-Transfer Evaporators as Power Plant Condensers to Produce Abundant Freshwater,
W82-03949 1509 3A

MULTIOBJECTIVE PLANNING
Federal Water Resources Research: A Review of the Proposed Five-Year Program Plan.
W82-01051 1502 6E

Generating Alternative Solutions for Dynamic Programming Models of Water Resources Problems,
W82-01450 1503 6A

The California State Water Project--Current Activities and Future Management Plans.
W82-01851 1504 6E

A Multilevel Model and Algorithm for Some Multiobjective Problems,
W82-01884 1504 6A

Multiobjective Analysis of Irrigation Planning in River Basin Development,
W82-02855 1506 6A

Cascaded Tradeoffs: A Multiple-Objective, Multiple-Publics Method for Alternatives Evaluation in Water Resources Planning,
W82-02980 1506 6B

Regional Multiobjective Planning of Water Supply and the Disposal of Residuals with Due Regard to Intraregional Population Distribution,
W82-03210 1507 6A

Multi-Objective Decision Making in Water Management,
W82-04010 1509 6A

Nile Water for Sinai: Framework for Analysis,
W82-04203 1509 6A

A Multiobjective Branch and Bound Method for Network-Structured Water Resources Planning Problems,
W82-04563 1510 6A

A Multiobjective Branch-and-Bound Method for Planning Wastewater and Residual Management Systems,
W82-06149 1512 6A

MULTIPHASE FLOW
A Study of The MSF Desalination Process Utilizing The Controlled Two-Phase Flow Concept--Phase II,
W82-04084 1509 3A

Kinetics of Compressibility in Two-Phase Fluid Flows,
W82-05910 1512 1A

MULTIPLE FREQUENCY RESPONSE ANALYSIS
Time and Frequency Domain Analyses of Hydrological Systems,
W82-05655 1511 2E

MULTIPURPOSE PROJECTS
Utilization, Planning and Problem Evaluation of Urban Arterial Waterways and Corridors as an Urban Resource,
W82-03952 1509 6A

Problems of the Multipurpose Use of Water Resources of the Volga-Akhtuba Floodplain and Volga Delta,
W82-05487 1511 4A

Reservoir Planning for Brazilian Dams,
W82-06206 1512 6A

MULTIPURPOSE RESERVOIRS
Water Resources Appraisals for Hydroelectric Licensing; Brazos River Basin, Texas-New Mexico.
W82-01439 1503 6D

Water Resources Appraisals for Hydroelectric Licensing; Savannah and Edisto River Basins Area; Georgia-South Carolina-North Carolina.
W82-01440 1503 6D

Water Resources Appraisals for Hydroelectric Licensing; American River Basin, California.
W82-01441 1503 6D

A Model for Solving Multiperiod Multireservoir Water Resources Problems with Stochastic Inflows,
W82-03830 1509 6A

Aggregation-Disaggregation Techniques for the Operation of Multi-Reservoir Systems,
W82-03954 1509 6A

Water Quality Allocated Cost for Multipurpose Reservoirs,
W82-04255 1510 6C

Stochastic State Variable Dynamic Programming for Reservoir Systems Analysis,
W82-04430 1510 6A

Environmental Aspects of Multi-Purpose Reservoir Projects in Developing Countries,
W82-05426 1511 6G

Construction Criteria of the Mery-Sur-Oise Storage Basin - Improvements in Water Quality Obtained,
W82-06013 1512 5G

MULTIRESERVOIR NETWORKS
TVA Hydro Scheduling Model: Theoretical Aspects,
W82-06430 1512 4A

TVA Hydro Scheduling Model: Practical Aspects,
W82-06431 1512 4A

MULTISTAGE FLASH DISTILLATION
A Study of The MSF Desalination Process Utilizing The Controlled Two-Phase Flow Concept--Phase II,
W82-04084 1509 3A

RO, MSF and VTE/VC Desalination: A Comparative Evaluation,
W82-06110 1512 3A

MSF Desalination Plants, Availability, Reliability and Safety Analysis,
W82-06124 1512 3A

MULTIVARIATE ANALYSIS
Immediate Detection of Heterogeneities in Continuous Multivariate, Oceanographic Recordings. Application to Time Series Analysis of Changes in the Bay of Villefranche sur Mer,
W82-01393 1503 7A

A Multivariate Analysis of Municipal Water Use in Utah,
W82-04728 1510 3D

Generation of Weekly Streamflow Data for a Large Hydrological System-An Autoregressive Multivariate Multi-Lag-Model(Simulation Wochentlicher Abflusse fur Ein Grossraumiges Hydrologisches System-Ein Autoregressives, Multivariates Multi-Lag-Modell-),
W82-06826 1512 4A

MUNICIPAL WASTES
Water-Related Environmental Control Requirements at Municipal Solid Waste-to-Energy Conversion Facilities,
W82-00037 1501 5D

Comparative Analysis of Sludge and Refuse Leachate: A Preliminary Report,
W82-00287 1501 5E

Degree of Pollution of Several Major Streams Entering Tolo Harbour, Hong Kong,
W82-02058 1504 5B

How Do You Build When Sewers Are Inadequate,
W82-03592 1508 5D

Contaminant Occurrence in an Unconfined Sand Aquifer at a Municipal Landfill,
W82-03933 1509 5B

Water Quality Assessment for Agana Springs,
W82-05304 1511 5A

MUNICIPAL WASTEWATER
Wastewater Treatment by Rooted Aquatic Plants in Sand and Gravel Trenches,
W82-00093 1501 5D

High-Level Ozone Disinfection of Municipal Wastewater Effluents,
W82-00379 1501 5D

Joint Dry/Wet Weather Treatment of Municipal Wastewater at Clatskanie, Oregon,
W82-00391 1501 5D

Midwestern Wastewater Characteristics,

Nitrogen Removal in a Subsurface Disposal System,
W82-04001 1509 5D

Computer Control of Nitrifying and Denitrifying Activated Sludge Process,
W82-04025 1509 5D

Acclimation of Sludge for Efficient Removal of Nitrogen from Fermentation Wastewater,
W82-04990 1511 5D

Nitrogen Control for the Partly Sewered Basin of Yodo River-Lake Biwa System,
W82-05244 1511 5D

Single Sludge Nitrogen Removal from Industrial Wastewater,
W82-05245 1511 5D

Phosphorus and Nitrogen Removal at Cadillac, Michigan,
W82-05270 1511 5D

Ammonium Uptake by Micronesian Species of Gracilaria (Rhodophyta),
W82-05311 1511 5G

International Nutrient Control Technology for Municipal Effluents,
W82-05321 1511 5D

Ammonia and Total Kjeldahl Nitrogen Removal in Aerated Lagoons,
W82-05420 1511 5D

Investigations of Natural Hungarian Zeolite for Ammonia Removal,
W82-05482 1511 5D

The Influence of Nitrogen on Phosphorus Removal in Activated Sludge Plants,
W82-05504 1511 5D

NITROPHENOLS

Gas-Liquid Chromatographic Determination of Some Chloro- and Nitrophenols by Direct Acetylation in Aqueous Solution,
W82-05363 1511 5A

NITROSAMINES

Photolysis of N-Nitrosodi-n-Propylamine in Water,
W82-00164 1501 5B

Nitrosamines in Tap Water After Concentration by a Carbonaceous Adsorbent,
W82-00459 1501 5A

NITROSAMINES *DIETHANOLAMINE

Formation of N-Nitrosodiethanolamine from Diethanolamine in Lake Water and Sewage,
W82-00796 1502 5A

NITROUS OXIDE

Nitrous Oxide Emission from Simulated Overland Flow Wastewater Treatment Systems,
W82-01624 1503 5D

Nitrous Oxide in Freshwaters of the Great Lakes Basin,
W82-01841 1504 2H

Nitrous Oxide Concentrations in Lakes: Variations with Depth and Time,
W82-02553 1505 2H

A New Indicator of the Activated Sludge Process - Nitrous Oxide,
W82-04018 1509 5D

Studies on Biological Nutrients Removal from Fermentation Wastewater (III). Operational Conditions Elimiating the Evolution of Nitrous Oxide in a Denitrification Process,
W82-04991 1511 5D

NIZHNEKAMSK

Application of a Two-Dimensional Model of Formation of Storm Runoff to Calculation of the Rainwater Collector-Drain Discharge from an Urbanized Territory,
W82-05027 1511 2A

NODULES

Ferromanganese Nodules from Lake Ontario (Bay of Quinte): Minor Element Geochemistry,
W82-01143 1503 2H

NOMENCLATURE

Terminological Confusion--Lake VS. Reservoir,
W82-06551 1512 2H

NOMOGRAPHS

Nomographs for Rapid Solutions for the Streeter-Phelps Equations,
W82-06460 1512 5B

NON-POINT POLLUTION SOURCES

Water Quality: What Should Be Done Today,
W82-03631 1508 6E

NON-POINT SOURCES

Pesticides and PCB in the Grand and Saugeen River Basins,
W82-05641 1511 5B

NONBIODEGRADABLE WASTES

Potential for Land Disposal of Two Nonbiodegradable Wastes,
W82-00939 1502 5D

NUREK RESERVOIR
Structure and Permeability: Geologic Controls on Induced Seismicity at Nurek Reservoir, Tadjikistan, USSR,
W82-05133 1511 2F

NUTRIENT
Preliminary Pollution Surveys Around the South-Western Cape Coast. Part 4: Salt River Mouth, Table Bay,
W82-03367 1507 5B

NUTRIENT CYCLING
The Effects of Acid Rain on Forest Nutrient Status,
W82-06860 1512 5C

NUTRIENT DYNAMICS
Floodwater Nutrient Processing in a Louisiana Swamp Forest Receiving Agricultural Runoff,
W82-05622 1511 5C

Modeling of Phytoplankton-Nutrient Dynamics in Saginaw Bay, Lake Huron,
W82-05639 1511 5C

NUTRIENT LOADING CONTROL
A Control Model for Phosphorus Loading Reduction Under Uncertainty,
W82-03421 1508 5G

NUTRIENT REDUCTION
The OECD Cooperative Programme on Eutrophication; Canadian Contribution, Summary Report,
W82-06566 1512 5A

NUTRIENT RELEASE
Release of Phosphorus by Certain Benthic Invertebrates,
W82-01502 1503 2H

NUTRIENT REMOVAL
Water Quality from Two Small Forested Watersheds in Southern Illinois,
W82-01140 1503 4C

Nutrient Runoff from Agricultural and Non-Agricultural Watersheds,
W82-01662 1503 5B

Crop Residue Removal and Tillage; Effects on Soil Erosion and Nutrient Loss in the Corn Belt,
W82-01770 1503 2J

Reducing Ground-Water Pollution from Municipal Waste-Water Irrigation of Rhodes Grass Grown on Sand Dunes,
W82-02391 1505 3C

Concepts in Aquatic Treatment System Design,
W82-02593 1505 5D

Studies on the Ability of a Potamogeton Pectinatus Community to Remove Dissolved Nitrogen and Phosphorus Compounds from Lake Water,
W82-02724 1506 5B

Wastewater Treatment by a Prototype Slow Rate Land Treatment System,
W82-02981 1506 5D

Wastewater Effects on a Waterhyacinth Marsh and Adjacent Impoundment,
W82-03634 1508 5D

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--II. Biological Productivity of Artificial Food Chains,
W82-04197 1509 5D

Aquacultural Approaches to Recycling of Dissolved Nutrients in Secondarily Treated Domestic Wastewaters--I. Nutrient Uptake and Release by Artificial Food Chains,
W82-04371 1510 5D

Stream Transport of Nutrients Through a Wetland,
W82-04857 1511 5B

The Effects of Varying Culture Nitrogen and Phosphorus Levels of Nutrient Uptake and Storage by the Waterhyacinth Eichhornia Crassipes (Mart) Solms,
W82-05098 1511 5G

Retention of Urban Derived Phosphorus by an Alluvial Swamp of the Coastal Plain of Georgia,
W82-05286 1511 5B

Water Treatment by Aquatic Ecosystem: Nutrient Removal Reservoirs and Flooded Fields,
W82-06078 1512 5D

An Ion Exchange Process to Recover Nutrients from Sewage,
W82-06516 1512 5D

NUTRIENT REQUIREMENTS
The Effect of Environmental Factors on Phytoplankton Growth: Temperature and the Interactions of Temperature with Nutrient Limitation,
W82-02221 1505 2H

The Effect of Environmental Factors on Phytoplankton Growth: Light and the Interactions of Light with Nitrate Limitation,
W82-02331 1505 2H

Improved Water and Nutrient Management Through High Frequency Irrigation,
W82-05313 1511 3F

NUTRIENT TRANSFORMATIONS
Interactions of Heterotrophic Bacteria in the Sediment Water Phases of Two Contrasting Rivers,
W82-06564 1512 5A

NUTRIENT TRANSPORT
Completion of the List of Analytical Solutions for Nutrient Transport to Roots 1. Exact Linear Models,
W82-03327 1507 5E

NUTRIENTS
Slash Treatment After Clearcutting Lodgepole Pine Affects Nutrients in Soil Water,
W82-00130 1501 4C

An Empirical Equation for Predicting Soluble Phosphorus Loads from Agricultural Watersheds,
W82-00134 1501 5B

Sediment and Nutrient Movement from the Black Creek Watershed,
W82-00135 1501 5B

Modeling the Relationship Between Development and Storm Water and Nutrient Runoff,
W82-00260 1501 2A

Lignocellulose Mineralization by Arctic Lake Sediments in Response to Nutrient Manipulation,
W82-00270 1501 2H

Comparison of Automated Segmented-Flow and Discrete Analyzers for the Determination of Nutrients in Water,
W82-00483 1501 5A

Vegetation and Nutrient Status of Northern Michigan Bogs and Conifer Swamps with a Comparison to Fens,
W82-00484 1501 2I

Sediments as a Source of Phosphate: A Study of 38 Impoundments,
W82-00653 1502 2H

Effect of pH and Redox Potential on Concentration of Dissolved Nutrients in an Estuarine Sediment,
W82-00795 1502 2L

Nitrogen and Phosphorus Recycling in Lake Sammamish, A Temperate Mesotrophic Lake,
W82-00824 1502 2H

Sediment-Based Nutrition of Submersed Macrophytes,
W82-00843 1502 2H

Limnological Characteristics of Several Lakes on the Lake Wales Ridge, South-Central Florida,
W82-00914 1502 2H

The Use of Algal Assays and Chlorophyll Concentrations to Determine Fertility of Water in Small Impoundments in West Virginia,
W82-00919 1502 2H

Influence of Phosphorus Loads and of Some Limnological Processes on the Purity of Lake Water,
W82-00923 1502 2H

The Effect of Changes in the Nutrient Income on the Condition of Lake Washington,
W82-00987 1502 2H

Phosphorus, Nirogen, and Organic Carbon Flux in a Headwater Stream,
W82-01021 1502 2K

Water Relations, Soil Fertility, and Plant Nutrient Composition of a Pygmy Oak Ecosystem,
W82-01034 1502 2I

Nutrient Budget Studies for Forests Along an Elevational Gradient in New Mexico,
W82-01036 1502 2K

Water Chemistry Changes During Artificial Aeration of Spruce Knob Lake, West Virginia,
W82-01049 1502 5G

Changes in Soil Water Quality Resulting from Three Timber Cutting Methods and Three Levels of Fiber Utilization,
W82-01135 1503 2G

Nutrient Loading of Southern Lake Michigan by Dry Deposition of Atmospheric Aerosol,
W82-01152 1503 5B

Physico-Chemistry, Destratification and Nutrient Budget of a Lowland Eutrophicated Malaysian Reservoir and Its Limnological Implications,
W82-01360 1503 2H

Enrichment Ratios for Water Quality Modeling,
W82-01410 1503 2J

Estimating Soluble (PO4-P) and Labile Phosphorus in Runoff from Croplands,
W82-01412 1503 5B

Soluble N and P Concentrations in Surface Runoff Water,

Biogeochemistry of Mountain Stream Waters: The Marmot System,
W82-06569 1512 5B

National Interlaboratory Quality Control Study No 27, PCBs, in Naturally Contaminated Dry Sediments,
W82-06574 1512 5B

Areal Extent of a Plume of Mineralized Water from a Flowing Artesian Well in Dade County, Florida,
W82-06680 1512 5B

Flow Characteristics and Water-Quality Conditions in the Spokane River, Coeur d'Alene Lake to Post Falls Dam, Northern Idaho,
W82-06681 1512 5B

Organic Solutes in Ground Water at the Idaho National Engineering Laboratory,
W82-06688 1512 7C

Evaluation of a Predictive Ground-Water Solute-Transport Model at the Idaho National Engineering Laboratory, Idaho,
W82-06689 1512 5B

Model Ecosystem for Environmental Transport of Xenobiotics,
W82-06760 1512 5B

Differential Phosphorus Assimilation in Attached vs. Unattached Microorganisms,
W82-06762 1512 5B

Locating Monitoring Wells,
W82-06848 1512 8B

A Case Study of a Chemical Spill: Polychlorinated Biphenyls (PCBS). 2. Hydrogeological Conditions and Contaminant Migration,
W82-06866 1512 5B

PATH OFF POLLUTANTS

Circular Wall Jets in Coflowing Streams,
W82-04999 1511 5B

PATHOGENIC BACTERIA

Enterotoxigenic Bacteria in Food and Water from an Ethiopian Community,
W82-04463 1510 5A

PATHOGENS

Isolation and Identification of Pathogenic Microorganisms at Wastewater-Irrigated Fields: Ratios in Air and Wastewater,
W82-00579 1502 5A

Behavior and Transport of Microbial Pathogens and Indicator Organisms in Soils Treated with Organic Wastes,
W82-00797 1502 5B

Microbiology: Detection of Bacterial Pathogens and Their Occurrence,
W82-01288 1503 5B

Disease Outbreaks Caused by Drinking Water,
W82-01289 1503 5C

Density Levels of Pathogenic Organisms in Municipal Wastewater Sludge - A Literature Review,
W82-04400 1510 5E

Sewage Sludge Pathogen Transport Model Project,
W82-04403 1510 5A

The Continuing Struggle of Waterborne Illness,
W82-05366 1511 5C

The Occurrence of Sewage-Borne Pathogens in the UK,
W82-05476 1511 5B

Criteria for Achieving Pathogen Destruction During Composting,
W82-05697 1511 5D

Fate of Pathogens in Thermophilic Aerobic Sludge Digestion,
W82-06772 1512 5D

PATHOLOGY

Histopathological Changes in Two Estuarine Fishes Exposed to Crude Oil and Its Water-Soluble Fractions,
W82-03020 1507 5C

PATUXENT RIVER

Role of Natural Colloids in the Transport of Hydrophobic Pollutants,
W82-04539 1510 5B

Seasonal Distribution of Bdellovibrios at the Mouth of the Patuxent River in the Chesapeake Bay,
W82-04924 1511 2L

Composition of Estuarine Colloidal Material: Major and Trace Elements,
W82-05137 1511 2L

Distribution of Suspended Sediment in the Patuxent River, Maryland During Dredging Operations for Construction of a Pipeline,
W82-05198 1511 2J

PAVEMENT

Runoff and Pollution Abatement Characteristics of Concrete Grid Pavements,
W82-02801 1506 5B

PAVING

An Overview of Porous Pavement Research,
W82-05744 1511 5D

Status of Porous Pavement Research,
W82-06665 1512 8G

PAWTUXET RIVER

Oxidation of Phenolic Antioxidants in a River System,
W82-01801 1504 5B

PAYETTE RIVER BASIN

Water Resources Appraisal for Hydroelectric Licensing; Payette River Basin, Idaho.
W82-03043 1507 6D

PEABODY LAKE

Absorption of Fenitrothion by Plankton and Benthic Algae,
W82-00874 1502 5B

PEACE RIVER

Peace River Site C Project: Environmental Studies; Development of a Mitigation and Compensation Program; and Project Licensing,
W82-03618 1508 6G

PEACH

Diurnal Variation in Water Potential Components and Stomatal Resistance of Irrigated Peach Seedlings,
W82-02202 1505 2I

PEACHES

Effect of Irrigation and Tree Density on Peach Production,
W82-00120 1501 2I

Control of Peach Tree Growth and Productivity by Regulated Water Supply, Tree Density, and Summer Pruning,
W82-01883 1504 2I

Improved Water and Nutrient Management Through High-Frequency Irrigation, Vol. 3: Determining the Transpiration Rate of Peach Trees Under Two Trickle Irrigation Regimes,
W82-05312 1511 3F

PEAK DEMAND

Peak Period Design Standards for Small Western U.S. Water Supply Systems,
W82-04249 1509 6D

A Method for Estimating Peak Water Demand of Multifamily Residences,
W82-04734 1510 6D

Water Rate Studies and Rate Making Philosophy,
W82-06222 1512 6C

PEAK DEMANDS

The Cost of Peak Capacity Water,
W82-04065 1509 6B

PEAK DISCHARGE

Investigations of Catastrophic Maximum Discharges of the Araks River,
W82-05591 1511 2E

PEAK FLOW

A Practical Method of Estimating Peak from Mean Daily Flows With Application to Streams in Ontario,
W82-06568 1512 2E

PEAK LOADS

Pumped-Storage Development in Brazil. Part III,
W82-03381 1507 8A

PEANUTS

Improved Water and Nutrient Management Through High-Frequency Irrigation, Vol 2: Response of Peanuts to Irrigation Management at Different Crop Growth Stages,
W82-05293 1511 3F

PEARL RIVER
The Identification and Treatment of Bromides and Trihalomethanes in Potable Water from the Pearl River at Jackson, MS: Evaluation of Toxicity on Species Diversity,
W82-04413 1510 5A

Hydrologic Analysis of Pearl River Floods, April 1979 and April 1980, in Louisiana and Mississippi,
W82-05216 1511 2E

PEAT BOGS
The Patterned Mires of the Red Lake Peatland, Northern Minnesota: Vegetation, Water Chemistry, and Landforms,
W82-02300 1505 2H

Size and Shape in Raised Mire Ecosystems: A Geophysical Model,
W82-06215 1512 2G

PECONIC BAY ESTUARY
Seasonal Variation of Vitamin B12, B12 Analogs, and Phytoplankton in a Long Island Estuary,
W82-02282 1505 2L

PECOS RIVER
Paleoflood Hydrology,
W82-03761 1509 2E

PECOS RIVER BASINS
Miscellaneous Surface-Water Data, Pecos River Basin, New Mexico,
W82-02827 1506 7C

PEE DEE RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing; Yadkin-Pee Dee River Basin; North Carolina, South Carolina, and Virginia,
W82-03042 1507 6D

PEEL-HARVEY ESTUARY
Nitrogen and Phosphorus Nutrition of Cladophora in the Peel-Harvey Estuarine System, Western Australia,
W82-03398 1507 2L

PEFORMANCE EVALUATION
Comparative Performance of Rotating Biological Contractors Using Air and Pure Oxygen,
W82-05859 1511 5D

PELICAN BAY
Dual Distribution System Solves Pelican Bay's Water Supply Problems,
W82-04193 1509 5F

PENFIELD
The Effects of Urbanization on Small Watersheds and Groundwater,
W82-02738 1506 5C

PENIKESE ISLAND
The Freshwater and Brackish-Water Diatoms of Penikese Island, Massachusetts: 1923-1973,
W82-02696 1506 2H

PENNSYLVANIA
The Influence of Stream Order and Selected Stream Bed Parameters on Fish Diversity in Raystown Branch, Susquehanna River Drainage, Pennsylvania,
W82-00109 1501 2E

Legal Obstacles and Incentives to the Development of Small Scale Hydroelectric Power in Pennsylvania.
W82-00752 1502 6E

Pennsylvania Ground Water Problems and Needs,
W82-01058 1502 4B

Water Resources Data for Pennsylvania, Water Year 1980--Volume 2. Susquehanna and Potomac River Basins.
W82-01212 1503 7C

Legal Challenge of the Ungaged Watershed,
W82-01664 1503 2E

Water Resources Data for Pennsylvania, Water Year 1980--Volume 3. Ohio River and St. Lawrence River Basins.
W82-02494 1505 7C

Delineation of Acid Mine Drainage Potential of Coal-Bearing Strata of the Pottsville and Allegheny Groups in Western Pennsylvania,
W82-02534 1505 6A

Fluorescence Spectra of Water-Soluble Humic Materials and Some Potential Precursors,
W82-02648 1506 2K

Water Resources Data for Pennsylvania, Water Year 1980--Volume 1. Delaware River Basin.
W82-04521 1510 7C

Groundwater Resources of the Williamsport Region, Lycoming County, Pennsylvania,
W82-04971 1511 2F

Groundwater and Geology of the Cumberland Valley, Cumberland County, Pennsylvania,
W82-04972 1511 2F

Groundwater Resources of the Gettysburg and Hammer Creek Formations, Southeastern Pennsylvania,
W82-04973 1511 2F

Hydro-Economic Analysis and Projection of Irrigation Water Demands in Pennsylvania,
W82-05558 1511 6C

Hydrology of Area 3, Eastern Coal Province, Pennsylvania,
W82-05831 1511 7C

Hydrology of Area 4, Eastern Coal Province, Pennsylvania, Ohio, and West Virginia,
W82-05833 1511 7C

Hydrology of Area 5, Eastern Coal Province, Pennsylvania, Maryland, and West Virginia,
W82-05834 1511 7C

An Evaluation of the Effects of Acid Rain on Low Conductivity Headwater Streams in Pennsylvania,
W82-05843 1511 5B

Federal Water Pollution Control Act's Notice Requirement Liberally Construed,
W82-05986 1512 6E

Components for a Treatment Plant Safety Program,
W82-06992 1512 5G

PENOBSCOT RIVER BASIN
Water Resources Appraisal for Hydroelectric Licensing: Penobscot River Basin, Maine,
W82-01763 1503 6D

PENSTOCKS
Comparison of Isostatic and Hyperstatic Penstocks at Santa Isabel, Bolivia,
W82-05561 1511 8A

PENTACHLOROPHENOL
Enhanced Biodegradation of Pesticides in Soil to Alleviate Contaminated Runoff,
W82-04967 1511 5G

A Simple Spectrophotometric Technique for the Determination of Pentachlorophenol in Water,
W82-05725 1511 5A

PENTICTON
Design and Cost Comparison of Biological Nitrogen Removal Processes,
W82-01544 1503 5D

PEOPLE'S REPUBLIC OF CHINA
A New Era for China's Hydropower,
W82-00335 1501 8A

China's Potential for Hydro Development,
W82-00336 1501 8A

Yangtze Gorges Scheme Could Yield 110 TWh/Year.
W82-01394 1503 8A

PEOPLES REPUBLIC OF CHINA
Dam Construction in China.
W82-00334 1501 8A

PERCH
Endangered Estuarine Receiving Waters: The Effects of Low-Flow Land Runoff on Headwaters Biota,
W82-02165 1505 5C

The Schooling Mechanism of Young Perch (Perca Fluviatilis) in the Open Part of Lake-Type Reservoirs (As Exemplified by Rybinsk Reservoir),
W82-02954 1506 2H

The Ecological Significance of a Stunted White Perch Population in an Eutrophic Maine Pond,
W82-04418 1510 5C

Manganese-54 Accumulation by Chlorella SPP., Daphnia Magna and Yellow Perch (Perca Flavescens).
W82-06904 1512 5B

PERCH LAKE
Chemistry of Interstitial Water and Bottom Sediments as Indicators of Seepage Patterns in Perch Lake, Chalk River, Ontario,
W82-02304 1505 2A

PERCHED GROUNDWATER
Steady State Perched Groundwater Mounds on Thick Sublayers,
W82-06317 1512 2F

PERCOLATING FILTERS
A Note on the Fate of El Tor Cholera and Other Vibrios in Percolating Filters,
W82-00566 1502 5D

Pulsed-Bed Technique Can Cut Treatment Stages,
W82-04613 1510 5D

PERCOLATION
Soil Percolation Tests,
W82-01044 1502 2G

Simulation of Flow Patterns and Ion-Exchange in Soil Percolation Experiments. Part II. Ion-Exchange Processes,
W82-03335 1507 5B

Simulation of Soil Moisture, Evapotranspiration and Deep Percolation in Agricultural Watersheds,
W82-03513 1508 2A

Comparison of Methods ot Estimate Deep Percolation Rates,
W82-06867 1512 2G

PERFORATED DRAIN PIPES
Effect of Perforation Shape and Pattern on the Performance of Drain Pipes,
W82-03792 1509 8B

PERFORMANCE EVALUATION

Furrow Irrigation Practices in Northern Colorado,
W82-00139 1501 3F

Water Conservation Devices for New or Existing Dwellings,
W82-00401 1501 3D

Survey of Treatment Plant Design and Operation Deficiencies,
W82-01543 1503 5D

Operational Problems with Rotating Biological Contactors,
W82-01549 1503 5D

High Temperature Ultrafiltration with Kynar Poly(Vinylidene Fluoride) Membranes,
W82-01566 1503 5D

Ski-Jump Spillway for India's Ukai Dam,
W82-02430 1505 8A

Improvement of the Seals of Expansion Joints of Hydraulic Structures,
W82-02669 1506 8A

Methods for Evaluating Performance of Filter Media,
W82-02684 1506 5D

Comparative Performance of Dual- and Mixed-Media Filters,
W82-03659 1508 5F

Effect of Perforation Shape and Pattern on the Performance of Drain Pipes,
W82-03792 1509 8B

A Retrospective Benefit-Cost Analysis of Water Resource Projects in The Cumberland River Basin,
W82-03917 1509 6B

Evaluation of a Chimney Drain Design in an Earthfill Dam,
W82-04675 1510 8D

Strategies for the Control of Activated Sludge Plants Treating Industrial Wastewaters,
W82-04838 1511 5D

PHOTOSYNTHETIC BACTERIA
Photosynthetic Bacterial Production and Carbon Mineralization in a Meromictic Lake,
W82-03403 1508 2H

Environmental Factors Affecting the Growth of Photosynthetic Bacteria in Lakes,
W82-03712 1508 2H

Land Water Interactions: Effects of Introduced Nutrients and Soil Particles on Reservoir Productivity,
W82-06710 1512 2J

PHOTOSYNTHETIC INHIBITORS
Herbicides in Kansas Waters--Evaluations of the Effects of Agricultural Runoff and Aquatic Weed Control on Aquatic Food Chains,
W82-06304 1512 5C

PHTHALATES
Determination of Phthalates in Industrial and Municipal Wastewaters,
W82-02999 1506 5A

PHYSICAL PROPERTIES
Aquasols: The Behavior of Small Particles in Aquatic Systems,
W82-00540 1502 1B

The Spreading of Thin Liquid Films on a Water-Air Interface,
W82-01955 1504 1B

Major Physical Features of Long Point Bay and Its Watershed,
W82-02579 1505 2H

Surface Viscosity of Water,
W82-03501 1508 1A

Determination of Characteristic Values for Physical and Chemical Lake Sediment Parameters,
W82-04586 1510 2H

PHYSICOCHEMICAL PROPERTIES
Diel Variations of Selected Physico-Chemical Parameters in Lake Kissimmee, Florida,
W82-00535 1502 2H

Classification of Central Amazon Lakes on the Basis of their Microbiological and Physico-Chemical Characteristics,
W82-00666 1502 2H

Diurnal, Depth-Wise, and Seasonal Changes of Physico-Chemical Factors in Sathiar Reservoir,
W82-01372 1503 2H

Physical and Chemical Studies of Lago Tupe; A Central Amazonian Black Water 'Ria Lake',
W82-01381 1503 2H

Diel Variations of Certain Physico-Chemical Parameters of Water in Selected Aquatic Systems,
W82-05097 1511 2H

Physicochemistry of Water in the St. Lawrence Gulf and Estuary (Physico-Chimie des eaux du Golfe et de l' Estuaire Saint-Laurent),
W82-05763 1511 5B

Correlations Between Predominant Heterotrophic Bacteria and Physicochemical Water Quality Parameters in Two Canadian Rivers,
W82-06544 1512 5B

PHYSICOCHEMICAL TREATMENT
Physical and Chemical Methods,
W82-01241 1503 5D

Determining Maximum Influent Concentrations of Priority Pollutants for Treatment Plants,
W82-02307 1505 5A

Physical/Chemical Treatment of Coke Plant Wastewater,
W82-03033 1507 5D

Demonstration Physical Chemical Sewage Treatment Plant Utilizing Biological Nitrification,
W82-04397 1510 5D

Selected Organic Pesticides, Behavior and Removal from Domestic Wastewater by Chemical and Physical Processes,
W82-05481 1511 5D

PHYSIOCHEMICAL TREATMENT
Physical-Chemical Treatment and Disinfection of Stormwater,
W82-06389 1512 5G

PHYSIOLOGICAL ECOLOGY
Sodium Regulation in the Tidepool Copepod Tigriopus Californicus,
W82-03262 1507 5A

PHYSIOLOGY
Neurochemical and Physiological Changes in a Teleost Fish Induced by Exposure to the Water Soluble Fraction of South Louisiana Crude Oil or Its Toxic Aromatic Components,
W82-03511 1508 5C

PHYTOPLANKTON

Reduction, Methylation, and Incorporation of Arsenic into Lipids by the Marine Phytoplankton Dunaliella Tertiolecta,
W82-00239 1501 5B

Effects of Halogenated Organic Compounds on Photosynthesis in Estuarine Phytoplankton,
W82-00266 1501 5C

The Prediction of Lacustrine Phytoplankton Diversity,
W82-00319 1501 2H

The Harvest of Microalgae from the Effluent of a Sewage Fed High Rate Stabilization Pond by Tilapia Nilotica. Part 1: Description of the System and the Study of the High Rate Pond,
W82-00455 1501 5D

The Importance of Regenerated Nitrogen to Phytoplankton Productivity in a Subalpine Lake,
W82-00476 1501 2H

Temporal and Spatial Scales in Phytoplankton Ecology. Mechanisms, Methods, Models and Management,
W82-00594 1502 5G

Annual Succession of Phytoplankton in One Heated Pond in Central Finland,
W82-00673 1502 5C

Measurement of Particulates Extrained in Some Great Lakes Power Plant Cooling Water: An Exercise in Futility,
W82-00782 1502 6G

Grazing Rate Determination of Corynoneura Scutellata Winnertz (Chironomidae:Diptera),
W82-00822 1502 2H

Phosphate Models, a Gap to Bridge,
W82-00929 1502 2H

Uptake of Polychlorinated Biphenyls by Natural Phytoplankton Assemblages: Field and Laboratory Determination of C14-PCB Particle-Water Index of Sorption,
W82-01032 1502 5B

A Bioassay Study of Effects of Zooplankton, Iron and NTA on the Phytoplankton Productivity of a Marl Lake,
W82-01157 1503 2H

Phytoplankton Productivity and Standing Crop in the Vicinity of the Lake Huron-Saginaw Bay Front,
W82-01164 1503 2H

Effects of Atmospheric Precipitation Additions on Phytoplankton Photosynthesis in Lake Michigan Water Samples,
W82-01196 1503 2H

Phytoplankton of Four Rivers, the Tyne, Wear, Tees and Swale,
W82-01376 1503 2E

The Effect of Fertilization with Phosphorus and Nitrogen Versus Phosphorus Alone on Eutrophication of Experimental Lakes,
W82-01457 1503 5C

Eutrophication of the Salt Valley Reservoirs, 1968-73. I. The Effects of Eutrophication on Standing Crop and Composition of Phytoplankton,
W82-01653 1503 5C

Phytoplankton Photosynthesis and Its Relation to Standing Crop and Nutrients in Two Warm-Monomictic South Island Lakes,
W82-01700 1503 2H

Ecological Studies of Phytoplankton in the Waikato River and Its Catchment,
W82-01704 1503 5C

Effect of the Liming of Intensively Exploited Ponds on Phytoplankton Development,
W82-01923 1504 2H

Phytoplankton Distributions Observed During a 3 1/2 Days Fixed-Station in the Lower St. Lawrence Estuary,
W82-01938 1504 2L

Phytoplankton Accumulation in Langmuir Cells,
W82-01946 1504 2H

A Control Mechanism of the Phytoplankton Respiration in a Eutrophic Reservoir,
W82-02030 1504 2H

Seasonal and Diurnal Changes of Chlorophyll in a Tropical Fresh Water Impoundment,
W82-02052 1504 2H

Phytobenthos of the River Tees and Its Tributaries,
W82-02065 1504 2K

Phytoplankton Distribution in the Southern and Middle Parts of Lake Baikal,
W82-02078 1504 2H

Bacterioplankton and Phytoplankton in the Kiev Sector of Kanev Reservoir During the Period of Its Formation,
W82-02081 1504 2H

Some Effects of Sewage Discharge Upon Phytoplankton in Hong Kong,
W82-02095 1504 5C

Effects of Freshwater Flow on Salinity and Phytoplankton Biomass in the Lower Hudson Estuary,
W82-02117 1505 2L

Phytoplankton Production and Community Composition in a Marsh-Dominated Estuary Which Receives Sewage Waste,
W82-02179 1505 5C

The Effect of Environmental Factors on Phytoplankton Growth: Temperature and the Interactions of Temperature with Nutrient Limitation,
W82-02221 1505 2H

Some Measurements on Near Surface Turbulence in the Depth Direction and Some Phytoplankton Distribution Implications,
W82-02227 1505 7B

Heavy Metals and Marine Phytoplankton: Correlation of Toxicity and Sulfhydryl-Binding,
W82-02272 1505 5C

Seasonal Variation of Vitamin B12, B12 Analogs, and Phytoplankton in a Long Island Estuary,
W82-02282 1505 2L

The Effect of Environmental Factors on Phytoplankton Growth: Light and the Interactions of Light with Nitrate Limitation,
W82-02331 1505 2H

Interactions Between Lugol's Fixative and Ethylene in the Acetylene-Reduction Assay for Nitrogenase Activity in Lake Water,
W82-02380 1505 2K

Effects of pH, Phosphate, and Ammonia on the Rate of Uptake of Nitrate and Ammonia by Freshwater Phytoplankton,
W82-02398 1505 5C

Spatial and Temporal Overlap in Lake Phytoplankton Communities,
W82-02610 1506 2H

Response of Subtropical Phytoplankton to Power Plant Entrainment,
W82-02708 1506 5C

Effects of Whole Lake Mixing on Water Quality and Phytoplankton,
W82-02823 1506 5G

Plankton Studies in San Francisco Bay. I. Chlorophyll Distributions and Hydrographic Properties of the San Francisco Bay Estuary, July 1977 - December 1979,
W82-02831 1506 2L

Plankton Studies in San Francisco Bay. II. Phytoplankton Abundance and Species Composition, July 1977 - December 1979,
W82-02832 1506 2L

Production Strategies in Antarctic Inland Waters: Phytoplankton Eco-Physiology in a Permanently Ice-Covered Lake,
W82-02862 1506 2C

The Use of Dialyzing Sacks in Estimation of Production of Bacterioplankton and Phytoplankton,
W82-02866 1506 7B

The Effect of Alpha-Hydroxybenzylmethanesulfonate on Photosynthesis and Excretion of Chlorella and Natural Phytoplankton in a Lake,
W82-02918 1506 5C

Physicochemical Influences on Phytoplankton Production in a Tropical Alpine Lake,
W82-02921 1506 2H

The Influence of Hydrodynamic Transport on Phytoplankton Dynamics in Homogeneous Lakes,
W82-03023 1507 2H

Response of Phytoplankton to Acidification in Experimental Streams,
W82-03036 1507 5C

Observations on a Gyrodinium Aureolum (Dinophyta) Bloom Off the South Coast of Ireland,
W82-03053 1507 5C

Relationship Between Chlorophyll-a Concentration and Phytoplankton Biomass in Several Reservoirs in Czechoslovakia,
W82-03185 1507 2H

The Composition and Ecology of Periphyton Communities in Freshwaters. II. Inter-Relationships Between Water Chemistry, Phytoplankton Populations and Periphyton Populations in a Shallow Lake and Associated Experimental Reservoirs ('Lund Tubes'),
W82-03217 1507 2H

Limnologic Study of Lake Pavin (France) 1: Abiotic Factors and Phytoplankton (Contribution a L'etude Limnologique Du Lac Pavin (France) 1: Facteurs Abiotiques et Phytoplancton),
W82-03219 1507 2H

Physical Variability and Phytoplankton Communities IV. Temporal Changes in the Phytoplankton Community of a Physically Variable Lake,
W82-03229 1507 2H

Mechanisms of Rapid Photosynthetic Adaptation in Natural Photoplankton Communities. II. Changes in Photochemical Capacity as Measured by DCMU-Induced Chlorophyll Fluorescence,
W82-03244 1507 2H

Physical Variability and Phytoplankton Communities: II. Primary Productivity by Phytoplankton in a Physically Variable Environment,
W82-03336 1507 5C

Algal Sedimentation in Relation to Phytoplankton Periodicity in Rostherne Mere,
W82-03414 1508 2H

The Phytoplankton and Protozooplankton of the Euphotic Zone of Lake Tanganyika: Species Composition, Biomass, Chlorophyll Content, and Spatio-Temporal Distribution,
W82-03419 1508 2H

Effects of Some Representative Petroleum Refinery Effluent Compounds on Photosynthesis and Growth of Natural Marine Phytoplankton Assemblages: Part I--Cresols,
W82-03470 1508 5C

A Culture Model for Phytoplankton Succession in the Potomac River Near Washington, D.C. (U.S.A.),
W82-03765 1509 5B

Diel Variation in the Abundance, Vertical Distribution, and Species Composition of Phytoplankton in a Eutrophic English Lake,
W82-04294 1510 5C

Vertical Mixing and Photosynthetic Capacity of Estuarine Phytoplankton (Melange Vertical et Capacite Photosynthetique du Phytoplancton Estuarien (Estuaire du Saint-Laurent)),
W82-04331 1510 2L

The Identification and Treatment of Bromides and Trihalomethanes in Potable Water from the Pearl River at Jackson, MS: Evaluation of Toxicity on Species Diversity,
W82-04413 1510 5A

An Annotated Key to the Identification of Commonly Occurring and Dominant Genera of Algae Observed in the Phytoplankton of the United States,
W82-04524 1510 5C

Effect of River Discharge on the Distribution Pattern of Dissolved Constituents in the Gamo Estuary, Miyagi Prefecture,
W82-04543 1510 2L

Addition of Radiocarbon to the Mixed-Layers of Two Small Lakes: Primary Production, Gas Exchange, Sedimentation and Carbon Budget,
W82-04730 1510 2H

Investigations on the Sedimentation in the Darst-Zingst Bodden Chain - A Contribution to Establishment of an Energy and Matter Balance in the Ecosystem. Part 2: Research on the Sedimentation of Plankton. (Untersuchungen Zur Sedimentation in der Darss-Zingster Boddenkette Ein Beitrag zur Aufstellung Einer Energie-und-Stoffbilanz im Okosystem. Tiel 2: Untersuchungen zur Sedimentation des Planktons),
W82-04761 1511 2L

Abiogenic Elimination of Nutrients in a Newly Built Reservoir (Twistetalsperre, Nordhessen) (Abiogene Nahrstoffeliminierung in einer Neuentstandenen Talsperre (Twistetalspherre, Nordhessen),
W82-04768 1511 2H

Primary Production in Saline Lakes,

Polychlorinated Biphenyl Transport in the Hudson River, New York,
W82-00008 1501 5B

Relationship of Water Quality of Hudson River, New York, During Peak Discharges to Geologic Characteristics of Contributing Subbasins,
W82-00009 1501 5B

POLYCHLORINATED BIPHENYLS
Modeling the Flux of Atmospheric Polychlorinated Biphenyls Across the Air/Water Interface,
W82-00193 1501 5B

New Liquid Chromatographic Detection System for Environmental Pollutants,
W82-00740 1502 5A

Determination of Low NG/L Levels of Polychlorinated Biphenyls in Drinking Water by Extraction with Macroreticular Resin and Analysis Using a Capillary Column,
W82-00875 1502 5A

Uptake of Polychlorinated Biphenyls by Natural Phytoplankton Assemblages: Field and Laboratory Determination of C14-PCB Particle-Water Index of Sorption,
W82-01032 1502 5B

Chlorinated Hydrocarbons as a Factor in the Reproduction and Survival of Lake Trout (Salvelinus Namaycush) in Lake Michigan,
W82-01079 1502 5C

PCB Residues in Bottom Sediments Collected From the Bay of Quinte, Lake Ontario 1972-1973,
W82-01155 1503 5B

Influence of PCBs in Water on Uptake and Elimination of DDT and DDE by Lake Trout,
W82-01342 1503 5C

The Influence of Chemical Conditioning and Dewatering on the Distribution of Polychlorinated Biphenyls and Organochlorine Insecticides in Sewage Sludges,
W82-01387 1503 5E

Polychlorinated Biphenyls and Other Organic Chemical Residues in Fish from Major United States Watersheds Near the Great Lakes, 1978,
W82-01583 1503 5A

Investigation of Selective Uptake of Polychlorinated Biphenyls by Spartina Alterniflora Loisel,
W82-01813 1504 5B

PCBs in the Housatonic River: Determination and Distribution,
W82-02255 1505 5A

Biodegradation of Aroclor 1221 Type PCBs in Sewage Wastewater,
W82-02899 1506 5D

Polychlorinated Biphenyls in Sewage Sludge and Sediments of the New York Bight,
W82-02904 1506 5A

Survey of Polychlorinated Biphenyls in Industrial Effluents in Canada.
W82-03107 1507 5A

Analytical Reference Materials. III. Preparation and Homogeneity Test of Large Quantities of Wet and Dry Sediment Reference Materials for Long Term Polychlorinated Biphenyl Quality Control Studies,
W82-03224 1507 5A

Degradation of Polychlorinated Biphenyls in Sediments of the Great Lakes,
W82-03536 1508 5B

Accumulation of Polychlorinated Biphenyls in Atlantic Tomcod (Microgadus Tomcod) Collected from the Hudson River Estuary, New York,
W82-03777 1509 5C

Adsorption of PCBs by Cellulose Fiber Filteraids and Carbonaceous Adsorbents Used for Water Treatment,
W82-03937 1509 5F

Analysis of PCBs in Sediment by Glass Capillary Gas Chromatography,
W82-04916 1511 5A

Pesticides and PCB in the Grand and Saugeen River Basins,
W82-05641 1511 5B

Poisons in the Hudson,
W82-05705 1511 5G

Bioconcentration of a Hexachlorobiphenyl in Great Lakes Planktonic Algae,
W82-05991 1512 5B

Influence of a Hexachlorobiphenyl in Great Lakes Phytoplankton in Continuous Culture,
W82-05994 1512 5C

Polychlorinated Biphenyl and Organochlorine Insecticide Concentrations in Forty Sewage Sludges in England,
W82-06081 1512 5A

Transport of PCBs in Aquatic Laboratory Model Ecosystems from Sediment to the Atmosphere Via the Surface Microlayer,
W82-06180 1512 5B

Polychlorinated Biphenyls (PCBS): An Australian Viewpoint on a Global Problem,
W82-06232 1512 5B

PCB Uptake by Five Species of Fish in Lake Michigan, Green Bay of Lake Michigan, and Cayuga Lake, New York,
W82-06493 1512 5B

National Interlaboratory Quality Control Study No 27, PCBs, in Naturally Contaminated Dry Sediments,
W82-06574 1512 5B

National Interlabratory Quality Control Study No 25, PCBs in Wet Sediments,
W82-06575 1512 5A

Biotransformation of PCB by Natural Assemblages of Freshwater Microorganisms,
W82-06719 1512 5B

Effects of Polychlorinated Biphenyls and Environmental Bio-Transformation Products on Aquatic Nitrification,
W82-06753 1512 5C

A Case Study of a Chemical Soil: Polychlorinated Biphenyls (PCBS) 1. History, Distribution, and Surface Translocation,
W82-06865 1512 5B

A Case Study of a Chemical Spill: Polychlorinated Biphenyls (PCBS). 2. Hydrogeological Conditions and Contaminant Migration,
W82-06866 1512 5B

Residues of PCB in a Cladophora Community Along the Lake Huron Shoreline,
W82-06938 1512 5C

POLYCHLORINATED BYPHENYLS
1980 Annual Report - A Perspective on the Problem of Hazardous Substances in the Great Lakes Basin Ecosystem,
W82-00707 1502 5C

POLYELECTROLYTES
Research on Piezodialysis - Sixth Report,
W82-05294 1511 3A

POLYMER MEMBRANES
Studies on Synetheses and Permeabilities of Special Polymer Membranes.28. Permeation Characteristics and Structure of Interpolymer Membranes from Poly(Vinylidene Fluoride) and Poly(Styrene Sulfonic Acid),
W82-06109 1512 3A

POLYMERS
Flocculation of Clay Particles with a Synthetic Anionic Polymer,
W82-00773 1502 5F

Open-Pore Polyurethane as a Medium for Coal Conversion Process Aqueous Effluent Cleanup,
W82-01577 1503 5D

Specific and Chelate Exchangers: New Functional Polymers for Water and Wastewater Treatment,
W82-04275 1510 5F

A Simple Microdetermination of Polymer Floccalants (Polyacrylamides and Guar) in Mine Water,
W82-04457 1510 5A

Development of Evaluation of Ion-Exchange Resins for Removal of Specific Metals in Water Treatment,
W82-05282 1511 5F

Use of Synthetic Adsorbents in Chemical Processes,
W82-05404 1511 5D

Mechanisms and Methods for Polymer Conditioning of Activated Sludge,
W82-05445 1511 5D

An Ion-Exchange Process with Thermal Regeneration XIV Thermallv Regenerable Resin Systems with High Capacities,
W82-06101 1512 3A

POLYPROPYLENE SHEETING
Effectiveness of Dupont Typar Sheeting in Controlling Macrophyte Regrowth After Overwinter Drawdown,
W82-04246 1509 5G

PONDING
An Infiltration Model: Development and Evaluation of Its Parameters,
W82-00137 1501 2G

Ponded Infiltration Into Simple Soil Systems: 3. The Behavior of Infiltration Rate With Time,
W82-03366 1507 2G

Infiltration into Two-Layered Soil Profiles,
W82-04536 1510 2G

PONDS
Fenitrothion Sprayed on a Pond: Kinetics of Its Distribution and Transformation in Water and Sediment,
W82-00159 1501 5B

Residues of Isobornyl Thiocyanoacetate (Thanite) and a Metabolite in Fish and Treated Ponds,
W82-00570 1502 5B

Zooplankton Abundance and Diversity in Central Florida Grass Carp Ponds,
W82-01520 1503 2H

Influence on Groundwater from the Bermed Infiltration Pond,
W82-01622 1503 5D

Biological and Physical Investigations of Bodies of Water Beneath Dense Water Hyacinth Populations Before and After Chemical Treatment,
W82-01678 1503 5B

A Gel Partition Model for Organic Desorption from a Pond Sediment,
W82-01844 1504 5A

A Simple Device for Quantitative Pseudoperiphyton Sampling,
W82-01894 1504 7B

Effect of the Liming of Intensively Exploited Ponds on Phytoplankton Development,
W82-01923 1504 2H

The Hydroflora of Urban Ponds as an Index of Their Sanitary and Biological State,
W82-01924 1504 2H

Biodegradation of Sodium Alkylbenzenesulfonate in Plankton-Containing Pond Water,
W82-01925 1504 5B

Limnology and Performance of Waste Treatment Lagoons,
W82-02026 1504 5D

Estimation of the Production of Planktonic Infusorians in Connection with Fluctuations in Their Abundance,
W82-02072 1504 2H

Effect of Fertilizers on the Primary and Bacterial Production of Rearing Ponds in the Volga Delta,
W82-02077 1504 2H

Trophic Structure and Energy Flow in a Texas Pond,
W82-02397 1505 2H

Reassessment of the Effects of Construction Dewatering on Ground-Water Levels in the Cowles Unit, Indiana Dunes National Lakeshore, Indiana. Supplement to Geological Survey Water-Resources Investigations 78-138,
W82-02478 1505 4A

The Freshwater and Brackish-Water Diatoms of Penikese Island, Massachusetts: 1923-1973,
W82-02696 1506 2H

Limnological Studies of a Freshwater Fish Pond at Burdwan, West Bengal, India,
W82-03186 1507 2H

Signal Analysis of Irradiation, Temperature and Primary Production in a Small Artificial Pond, II. The Residual Spectra,
W82-03465 1508 2H

Water Chemistry of Alabama Ponds,
W82-03534 1508 2K

Sealing of Lagoons and Ponds: Proposed Quality Requirements for Soil Liners,

Status of Porous Pavement Research,
W82-06665 1512 8G

Moisture and Heat Transport in Hysteretic, Inhomogeneous Porous Media: A Matric Head-Based Formulation and a Numerical Model,
W82-06857 1512 2G

An Upstream Finite Element Method for Solution of Transient Transport Equation in Fractured Porous Media,
W82-06858 1512 2F

POROUS CUP

A More Versatile Soil Water Sampler,
W82-02523 1505 7B

POROUS MEDIA

A Non-Equilibrium Thermodynamics Approach to Transport Phenomena in Capillary Porous Media,
W82-00697 1502 2F

Mass Transport of Solutes in Dual-Porosity Media,
W82-01104 1503 5B

Scaling of Infiltration Behavior in Dissimilar Porous Materials,
W82-01105 1503 2G

A Stochastic Approach for Describing Convective-Dispersive Solute Transport in Saturated Porous Media,
W82-01461 1503 5B

Integral Equation Formulation for Ground-Water Flow,
W82-02716 1506 2F

Influence of Heat Dispersion on Steady Convection in Anisotropic Porous Media,
W82-02924 1506 2F

Molecular Approach to the Foundations of the Theory of Solute Transport in Porous Media. I. Conservative Solutes in Homogeneous Isotropic Saturated Media,
W82-03316 1507 2F

Boundary Integral Equation Solutions to Moving Interface Between Two Fluids in Porous Media,
W82-03577 1508 2F

A Derivation of the Equations for Transport of Liquid and Heat in Three Dimensions in a Fractured Porous Medium,
W82-04888 1511 2F

An Overview of Porous Pavement Research,
W82-05744 1511 5D

Immobilized Microbes and a High-Rate, Continuous Waste Processor for the Production of High Btu Gas and the Reduction of Pollutants,
W82-06005 1512 5D

Porous Media Equivalents for Networks of Discontinuous Fractures,
W82-06851 1512 2F

Moisture and Heat Transport in Hysteretic, Inhomogeneous Porous Media: A Matric Head-Based Formulation and a Numerical Model,
W82-06857 1512 2G

An Upstream Finite Element Method for Solution of Transient Transport Equation in Fractured Porous Media,
W82-06858 1512 2F

PORT VALDEZ
Dissolved Hydrocarbons and Related Microflora in a Fjordal Seaport: Sources, Sinks, Concentrations, and Kinetics,
W82-01816 1504 5B

Deep Water Renewal in Subarctic Fjord,
W82-03675 1508 2L

PORTAGE
Final Environmental Impact Statement, City of Portage Wastewater System, Columbia County, Wisconsin.
W82-00356 1501 6G

PORTAGE LAKES
Algal Bioassay of the Portage Lakes, Summit County, Ohio,
W82-04813 1511 2H

PORTLAND
Energy Costs and Portland Water Supply System,
W82-02586 1505 5F

POSTIMPOUNDMENT
An Assessment of Streamflow, Water Quality, and the Effects of Constructing an Impoundment on Bridge Creek at Augusta, Wisconsin,
W82-06677 1512 2E

POTABLE WATER
Chemical, Physical, and Radiological Quality of Selected Public Water Supplies in Florida, February-April 1980,
W82-00010 1501 5F

Ozone Treatment of Potable Water - Part I,
W82-00451 1501 5F

European Communities Directive Relating to the Quality of Water Intended for Human Consumption,
W82-00506 1502 6D

Assessment of Some Aqueous Residual Chlorine Measurements,
W82-00867 1502 5F

Potable Water Treatment by Dissolved Air Flotation and Filtration,
W82-06353 1512 5F

POTAMOGETON
Growth and Reproduction of Potamogeton Crispus in a South African Lake,
W82-03406 1508 2H

POTASSIUM
Sodium-Potassium Ratios in Soil Solution and Plant Response Under Saline Conditions,
W82-00469 1501 3C

Effect of Irrigation Frequency and Nitrogen on Groundnut Yield and Nutrient Uptake,
W82-06230 1512 3F

POTATO WASTES
Treatment of Potato-Processing Waste Water by an Anaerobic Lagoon-Filter System,
W82-00226 1501 5D

POTATOES
Odorous Compounds from Potato Processing Waste Effluent Irrigation Fields: Volatile Acids,
W82-00156 1501 5E

Aerated Drip Irrigation,
W82-02186 1505 3F

Effect of Saline Irrigation Water on the Yield of Potato,
W82-02396 1505 3C

Anaerobic Fermentation - Filtration of Potato Processing Wastewater,
W82-04713 1510 5D

POTENTIAL WATER SUPPLY
Verification of the Potential Yield and Chemical Quality of the Shallow Dolomite Aquifer in Dupage County, Illinois,
W82-03100 1507 2F

POTENTIOMETERS
Multiple Potentiometric System for Continuous Determination of Chloride, Fluoride, Nitrate, and Ammonia in Natural Waters,
W82-06718 1512 5A

POTENTIOMETRIC HEAD
An Integral Transform Method for the Linearized Boussinesq Groundwater Flow Equation,
W82-01984 1504 2F

POTENTIOMETRIC LEVEL
Potentiometric Surface of the Floridan Aquifer in the Suwannee River Water Management District, Florida, May 1980,
W82-00024 1501 7C

Potentiometric Surface of the Floridan Aquifer in the Northwest Florida Water Management District, May 1980,
W82-00025 1501 7C

Potentiometric-Surface Map for the Cretaceous Aquifer, Virginia Coastal Plain, 1978,
W82-00727 1502 7C

Potentiometric Surface of the Wilcox-Carrizo Aquifer; Bienville, Red River, Northern Natchitoches, and Southern Webster Parishes, Louisiana,
W82-00728 1502 7C

Numerical Simulation of Potentiometric Surface Changes Caused by a Proposed Open-Pit Anthracite Mine,
W82-00819 1502 6A

Approximate Altitude of Water Levels in Wells in the Chicot and Evangeline Aquifers in the Houston Area, Texas, Spring 1981,
W82-02459 1505 2F

Potentiometric Surface of the Floridan Aquifer, Southwest Florida Water Management District, May 1981,
W82-02464 1505 7C

Potentiometric Surface of the Floridan Aquifer, St. John's River Water Management District and Vicinity, Florida, May 1981,
W82-02479 1505 7C

Potentiometric Surface Maps of the Sparta Sand Northern Louisiana and Southern Arkansas, 1900, 1965, 1975, and 1980,
W82-02839 1506 2F

Map Showing the Potentiometric Surface of the Magothy Aquifer in Southern Maryland, August 1980,
W82-03981 1509 7C

Map Showing How the Potentiometric Surface of the Magothy Aquifer of September 1979 Differed from the Potentiometric Surface of September 1977, in Southern Maryland,
W82-03983 1509 7C

Ground-Water Levels in Selected Well Fields and in West-Central Florida, May 1981,
W82-03992 1509 7C

Potentiometric Surface of the Floridan Aquifer in Central Sumter County, Florida, May 1981,
W82-04507 1510 7C

Map Showing the Potentiometric Surface of the Aquia Aquifer, May 19-23, 1980,
W82-04978 1511 7C

Chloride and Total Hardness Concentrations of Water From the Upper Part of the Floridan Aquifer in St. Johns County, Florida,
W82-05829 1511 7C

Map Showing how the Potentiometric Surface of the Magothy Aquifer of August 1980 Differed

from the Potentiometric Surface of September 1977, in Southern Maryland,
W82-05838 1511 7C

Potentiometric Surface of the Floridan Aquifer, Southwest Florida Water Management District, September 1981,
W82-05840 1511 7C

Potentiometric Surface of the Floridan Aquifer in the St. Johns River Water Management District and Vicinity, Florida, September 1981,
W82-05849 1511 7C

Potentiometric Surface of the Floridan Aquifer in Central Sumter County, Florida, September 1981,
W82-05850 1511 7C

Potentiometric Map of the Sparta Aquifer System in Mississippi, Fall 1980,

Application of Fluidic Devices for Control of Wastewater Treatment Operations,
W82-04013 1509 5D

A Survey of Quality Control Practices in Water Bacteriology Laboratories,
W82-04111 1509 5A

Analytical Quality Control,
W82-04345 1510 5G

Controlling the Quality of Compaction of Earth Fill in the Construction of High Dams,
W82-05109 1511 8A

QUANTITATIVE ANALYSIS
Subdomain Integration Model of Ground-Water Flow,
W82-02550 1505 2F

QUEBEC
Mercury and Selenium Concentrations in Fish, Sediments, and Water of Two Northwestern Quebec Lakes,
W82-00876 1502 5B

Spatial and Temporal Overlap in Lake Phytoplankton Communities,
W82-02610 1506 2H

Multivariate Analysis and Geochemical Interpretation of Spatial Variability of the Water Quality of Southern Quebec Rivers. (Analyse Multivariee et Interpretation Geochimique de la Variabilite Spatiale de la Qualite de l'Eau Des Rivieres Du Quebec Meridional),
W82-02662 1506 2K

Susceptibility of Aquatic Ecosystems to the Effects of Atmospheric Pollutant Fallout in Quebec,
W82-03106 1507 5C

Ultraplankton Biomass, Productivity and Efficiency in Lac Matamec, A Precambrian Shield Lake,
W82-04383 1510 2H

Prediction of Water Inflow to Lake Memphremagog (Prevision des Apports Hydriques au lac Memphremagog),
W82-04459 1510 2A

Effects of Soil Moisture, Planting Date, and Weeds on Cereal Yields (Effets de l'Humidite du Sol, des Dates de Semis et des Mauvaises Herbes sur le Rendement des Cereales),
W82-04470 1510 2I

James Bay Spillways and Control Structures,
W82-04692 1510 8A

Promising Steps Toward a New Ottawa River Regulation,
W82-05394 1511 6E

Some Paleolimnological Aspects of the Most Recent Sediments of Lac Laflamme (Laurentides Provincial Park, Quebec) in Relation to Atmospheric Transportation of Pollutants,
W82-06577 1512 5A

Stable Carbon Isotope Ratio of Submerged Freshwater Macrophytes,
W82-06972 1512 5C

Phosphorus Release by Submerged Macrophytes: Significance to Epiphyton and Phytoplankton,
W82-06977 1512 5B

RADAR
Relation of Satellite-Based Thunderstorm Intensity to Radar-Estimated Rainfall,
W82-00806 1502 2B

Simulation of the Topographic Influence on SLAR Data for Soil Moisture Detection in a Hilly Area,
W82-01605 1503 2G

Observations of Two Colorado Thunderstorms by Means of a Zenith-Pointing Doppler Radar,
W82-01967 1504 2B

Evaluations of Illinois Weather Modification Projects of 1976-1980: A Summary,
W82-03006 1507 3B

Rainfall Prediction-Measurement Systems and Rainfall Design Information for Urban Areas,
W82-03008 1507 7B

Radar Measurements of Estuarine Currents and Tides,
W82-03360 1507 2L

Comparison of Results Obtained with the VIDIAZ Spectropluviometer and the Joss-Waldvogel Rainfall Disdrometer in a 'Rain of a Thundery Type',
W82-03707 1508 2B

Aircraft Radar Responses to Soil Moisture,
W82-04187 1509 7B

A Simple Method for Estimating Convective Rain Volume Over an Area,
W82-04201 1509 7B

A Preliminary Study of Comparative Measurements of Rainfall Rate Using The Differential Reflectivity Radar Technique and A Raingage Network,
W82-04263 1510 2B

Differences Between Some Radar Rainfall Estimation Procedures in a High Rain Rate Gradient Storm,
W82-04265 1510 2B

RADIAL GATES
Hydraulic Gates,
W82-02206 1505 8C

Prospects of Using Radial Gates on Overflow Dams of Large Hydroelectric Stations,
W82-02693 1506 8A

RADIATION
Reactor-Released Radionuclides in Susquehanna River Sediments,
W82-03189 1507 5B

RADIOACTIVE DATING
Radiocarbon Dating of Groundwater of the Aquifer Confined in the Lower Triassic Sandstones of the Lorraine Region, France,
W82-02877 1506 2F

The Waters of Merom: A Study of Lake Huleh 7. Diatom Stratigraphy of the 54-M Core,
W82-06880 1512 5C

RADIOACTIVE TECHNIQUES
Algal-Bacterial Symbiosis in the Chowan River, NC,
W82-02177 1505 5A

RADIOACTIVE TRACERS
An Approach to Determining Pathways and Residence Time of Groundwaters: Dual Radiotracer Dating,
W82-01348 1503 2F

The Application of Radioactive Tracers for Determination of Bed-Load Transport in Alluvial Rivers,
W82-01893 1504 2J

Orthophosphate and Its Flux in Lake Waters,
W82-03613 1508 2H

Rates of Recent Sedimentation in Lake Pepin,
W82-03922 1509 2J

Infiltration Rates of Rainwaters in Sri Lanka Measured by Using Tritium Tracer,
W82-05941 1512 2F

RADIOACTIVE TRACES
Fate of Suspended Biological Solids Discharged to Receiving Waters,
W82-05448 1511 5B

RADIOACTIVE WASTE DISPOSAL
Absorption of Radium and Thorium From New Mexico Uranium Mill Tailing Solutions,
W82-00040 1501 5D

Strategy for Radioactive Waste Disposal in Crystalline Rocks,
W82-00299 1501 5E

Water Level Data for Wells in and Near Burial Ground 3, Oak Ridge National Laboratory, Tennessee, 1975-1979,
W82-00423 1501 7C

Dissolution of Salt Deposits by Brine Density Flow,
W82-01016 1502 2F

Factors Affecting Radionuclide Availability to Vegetables Grown at Los Alamos,
W82-01109 1503 5B

Studies on Unsaturated Zone Hydrology and Radionuclide Migration at a Shallow-Land Burial Site,
W82-01172 1503 5B

U.S. Geological Survey Research in Radioactive Waste Disposal--Fiscal Year 1979,
W82-04500 1510 5E

Results of Hydrologic Tests and Water-Chemistry Analyses, Wells H-4A, H-4B, and H-4C at the Proposed Waste Isolation Pilot Plant Site, Southeastern New Mexico,
W82-04517 1510 5B

Influence of an Americium Solid Phase on Americium Concentrations in Solutions,
W82-04720 1510 5B

A Wind-Powered, Ground Water Monitoring Installation at a Radioactive Waste Management Site in Idaho,
W82-05233 1511 5B

Characterization of Drained and Undrained Response of Thermally Loaded Repository Rocks,
W82-05904 1512 2F

Final Environmental Impact Statement; Defense Waste Processing Facility, Savannah River Plant, Aiken, S.C.
W82-06087 1512 6G

Evaluation of a Predictive Ground-Water Solute-Transport Model at the Idaho National Engineering Laboratory, Idaho,
W82-06689 1512 5B

Radioactive Wastes,
W82-06920 1512 5E

RADIOACTIVE WASTES
Application of Immobilized Hydrogenase for the Detritiation of Water,
W82-00768 1502 5D

Retention of Radionuclides by Some Aquatic Fresh Water Plants,
W82-00853 1502 5B

Radioactive Wastes,

RADIOACTIVITY TECHNIQUES

High Resolution Alpha Spectroscopy by Liquid Scintillation Techniques,
W82-05541 1511 5A

Direct Snow-Water Equivalent Measurements by Air-Borne Gamma-Ray Spectrometry,
W82-05643 1511 2C

RADIOCHEMICAL ANALYSIS

Evaluation of Methods for the Assay of Radium-228 in Water,
W82-05212 1511 5A

RADIOISOTOPES

Geologic and Hydrologic Factors Controlling Radon-222 in Ground Water in Maine,
W82-01222 1503 2F

Americium in Intertidal Sediments from the Coastal Environs of Windscale,
W82-02098 1504 5B

Hydrological Studies Possible with Radionuclides of Bomb-Test, Primordial and Natural Origin to Complement Investigations Using Manufactured Radiotracers,
W82-03836 1509 5B

Determination of Recent Deposition Rates in Lake Constance with Radioisotopic Methods,
W82-03883 1509 2J

A Survey of Radioactive Effluent Releases from Byproduct Material Facilities,
W82-03963 1509 5B

Radionuclides in Mono Lake, California,
W82-05461 1511 5B

Elevated Concentrations of Actinides in Mono Lake,
W82-05520 1511 5B

Determination of Recent Desposition Rates in Lake Constance with Radioisotopic Methods,
W82-05625 1511 5B

Effects of Selected Organic Compounds on Radionuclide Adsorption to Sediments in Freshwater Systems,
W82-05724 1511 5C

Effects on Global Supplies of Freshwater,
W82-06733 1512 5C

Manganese-54 Accumulation by Chlorella SPP., Daphnia Magna and Yellow Perch (Perca Flavescens),
W82-06904 1512 5B

RADIOMETERY

Remote Sensing of Soil Moisture Content Over Bare Field at 1.4 GHz Frequency,
W82-01345 1503 7B

RADIOMETRY

Multifrequency Radiometer Detection of Submarine Freshwater Sources Along the Puerto Rican Coastline,
W82-01349 1503 3B

RADIONUCLIDES

Radionuclide Concentrations in Streams in the Upper Blackfoot River Basin, Southeastern Idaho,
W82-00418 1501 5A

RADIUM

Absorption of Radium and Thorium From New Mexico Uranium Mill Tailing Solutions,
W82-00040 1501 5D

Uranium Isotopes and 226Ra Content in the Deep Groundwaters of the Tri-State Region, U.S.A.,
W82-02930 1506 5A

Method of Selective Dissolution for Characterization of Particulate Forms of Radium and Barium in Natural and Waste Waters,
W82-03879 1509 5A

Radon and Radium Discharge to Surface Streams,
W82-03881 1509 5B

Radium Content and the 226Ra/228Ra Activity Ratio in Groundwater from Bedrock,
W82-05450 1511 2K

RADIUM-226

Data Base Development for the Design of a Radium-226 Removal Process,
W82-01188 1503 5D

RADIUM RADIOISOTOPES

Treatment Technology to Meet the Interim Primary Drinking Water Regulations for Inorganics: Part 5,
W82-04106 1509 5F

Evaluation of Methods for the Assay of Radium-228 in Water,
W82-05212 1511 5A

High Resolution Alpha Spectroscopy by Liquid Scintillation Techniques,
W82-05541 1511 5A

RADON

Some Recent Studies on Groundwater Radon Content as an Earthquake Precursor,
W82-01127 1503 2F

Radon-222, In Potable Water Supplies of New England,
W82-01221 1503 5B

Geologic and Hydrologic Factors Controlling Radon-222 in Ground Water in Maine,
W82-01222 1503 2F

Vertical Mixing Rates in Fjords Determined Using Radon and Salinity as Tracers,
W82-02576 1505 2L

Radon and Radium Discharge to Surface Streams,
W82-03881 1509 5B

RADON REMOVAL

New Techniques to Remove Radon from Ground Water,
W82-03157 1507 5F

RAFT RIVER

Helium Isotopes in Geothermal Systems: Iceland, The Geysers, Raft River and Steamboat Springs,
W82-06085 1512 2F

RAILROAD YARDS

Railroad's Shops Correct an Oily Wastes Problem,
W82-05130 1511 5D

RAILROADS

Pumped-Storage for Swiss Railways, Part One,

Eutrophication of the Salt Valley Reservoirs, 1968-73. I. The Effects of Eutrophication on Standing Crop and Composition of Phytoplankton,
W82-01653 1503 5C

The Landscape of Rutland Water,
W82-06478 1512 6G

RESERVOIR CAPACITY
Safe-Yield Estimates of a Water Supply Reservoir on an Ungaged Stream,
W82-03716 1508 2E

RESERVOIR CONSTRUCTION
Impact of Construction of a Hydroelectric Project on the Water Quality of Five Lakes in Nova Scotia,
W82-00227 1501 5C

Theory of Ecological Prediction of Limnetic Ecosystems,
W82-00597 1502 6G

An Investigation Into the Effects of Thermal Movement in the Walls of Service Reservoirs,
W82-01396 1503 8F

Sulby Reservoir - Providing Water for the Isle of Man,
W82-02068 1504 8A

Reliability Programing in Reservoir Management 1. Single Multipurpose Reservoir,
W82-03148 1507 6A

Design Technique Development for Dams in South Africa,
W82-06011 1512 8A

Some Geotechnical Aspects of the Construction of the 'Safety Reservoir Broechem',
W82-06012 1512 8A

Construction Criteria of the Mery-Sur-Oise Storage Basin - Improvements in Water Quality Obtained,
W82-06013 1512 5G

The Biesbosch Water Storage Scheme,
W82-06014 1512 8A

RESERVOIR COVERS
Covering Distribution Storage, Panel Discussion, Design Aspects and Alternatives,
W82-04701 1510 5G

RESERVOIR DESIGN
The Limitations and Usefulness of Streamflow Generation Methods: A Case Study,
W82-00229 1501 6A

Performance Evaluation of a Stochastic Optimization Model for Reservoir Design and Management with Explicit Reliability Criteria,
W82-01462 1503 8A

Tectonic State: Its Significance and Characterization in the Assessment of Seismic Effects Associated with Reservoir Impounding,
W82-01951 1504 8E

Approximate Sizing of Reservoirs for Detention Time,
W82-04315 1510 8A

Estimation of Extreme Low Flows for Pumped Storage Reservoir Design,
W82-04334 1510 2E

Safety Analysis of High Hazard Deteriorating Concrete Gravity Dam-Reservoir Systems Including Corrective Measure - Earthquake and Dynamic Study,
W82-05296 1511 8A

Multi-Decision Analysis for Large-Scale River-Basin Reservoir Systems,
W82-05659 1511 2E

The Biesbosch Water Storage Scheme,
W82-06014 1512 8A

RESERVOIR EVAPORATION
Reservoir Operation for Water Conservation.
W82-04165 1509 3B

Modelling Evaporation from Reservoirs,
W82-04722 1510 2D

RESERVOIR FILLING
Tectonic State: Its Significance and Characterization in the Assesament of Seismic Effects Associated with Reservoir Impounding,
W82-01951 1504 8E

RESERVOIR FISHERIES
Gonad Development, Fecundity, and Spawning Season of Largemouth Bass in Newly Impounded West Point Reservoir, Alabama-Georgia,
W82-01080 1502 2H

RESERVOIR LININGS

Succeeding with Liner Installation,
W82-00909 1502 8G

Membrane Liner Seals 278-Acre Reservoir.
W82-02361 1505 8G

RESERVOIR MANAGEMENT

LARM Two-Dimensional Model: An Evaluation,
W82-02597 1505 4A

A Decomposition Method For The Long-Term Scheduling Of Reservoirs in Series,
W82-04205 1509 6A

Stochastic State Variable Dynamic Programming for Reservoir Systems Analysis,
W82-04430 1510 6A

RESERVOIR OPERATIN

Modified Standard Operation Rules for Reservoirs,
W82-05658 1511 4A

RESERVOIR OPERATION

Northeastern New Jersey Grapples With a Drought,
W82-00289 1501 8A

An Analysis of Reservoir Storage Contents for the Proposed Enlargement of Bumping Lake in Washington,
W82-00421 1501 4A

Performance Evaluation of a Stochastic Optimization Model for Reservoir Design and Management with Explicit Reliability Criteria,
W82-01462 1503 8A

Operating Policies for a Surface/Ground Water System,
W82-01741 1503 4B

Weekly Multipurpose Planning Model for TVA Reservoir System,
W82-02319 1505 6A

Analysis of Firm Water Supply Under Complex Institutional Constraints,
W82-02501 1505 6A

Operation Policy Analysis: Sam Rayburn Reservoir,
W82-02589 1505 6A

Application of a Single Reservoir Operation Policy to a Rain Water Cistern System,
W82-03088 1507 3B

Reliability Programing in Reservoir Management 1. Single Multipurpose Reservoir,
W82-03148 1507 6A

Reliability Programming in Reservoir Management 2. Risk-Loss Functions,
W82-03245 1507 6A

Optimal Reservoir Management and Crop Planning Under Deterministic and Stochastic Inflows,
W82-03914 1509 3F

Recreational Enhancement of High Country Water Supply Reservoirs,
W82-03923 1509 6A

Aggregation-Disaggregation Techniques for the Operation of Multi-Reservoir Systems,
W82-03954 1509 6A

Report of the River Master of the Delaware River for the Period December 1, 1979 -- November 30, 1980,

Drought Management: Expecting the Unexpected,
W82-05649 1511 3D

SAN FRANCISCO BAY

The Nutritional Significance of the Distribution of Suspended Particulate Material in the Upper San-Francisco Bay-Estuary,
W82-02140 1505 2L

Scientific Progress and Deteriorating Ecosystems; San Francisco Bay and the 1970's,
W82-02156 1505 6E

Plankton Studies in San Francisco Bay. I. Chlorophyll Distributions and Hydrographic Properties of the San Francisco Bay Estuary, July 1977 - December 1979,
W82-02831 1506 2L

Plankton Studies in San Francisco Bay. II. Phytoplankton Abundance and Species Composition, July 1977 - December 1979,
W82-02832 1506 2L

Oil and Grease in Stormwater Runoff,
W82-05557 1511 5C

SAN FRANCISCO BAY AREA

Chrysotile Asbestos Fibers in Drinking Water from Asbestos-Cement Pipe,
W82-01592 1503 5B

Increasing Hydrogen Ion Activity of Water in Two Reservoirs Supplying the San Francisco Bay Area, California,
W82-03081 1507 5B

SAN JOAQUIN RIVER

Impact of Water Resource Development on Salinization of Semi-Arid Lands,
W82-01024 1502 5B

SAN JUAN BASIN

Erodibility of Selected Soils and Estimates of Sediment Yields in the San Juan Basin, New Mexico,
W82-05223 1511 2J

SAN JUAN-CHAMA PROJECT

Hydraulic Sediment Model Study for Proposed Blanco Diversion Dam Modification,
W82-00446 1501 8A

SAN LUIS PASS

Analysis of Marine Sediment, Water and Biota for Selected Organic Pollutants,
W82-04823 1511 5A

SAN LUIS VALLEY

Waterlogging Control for Improved Water and Land Use Efficiencies: A Systematic Analysis,
W82-02455 1505 6A

SAN PEDRO

Characterisation of Domestic and Industrial Sewage in Southern California Coastal Sediments Using Nitrogen, Carbon, Sulphur, and Uranium Tracers,
W82-00147 1501 5B

SAND

Movement of Loose, Sandy Detritus by Shallow Water Flows: An Experimental Study,
W82-00776 1502 2J

Two Bed-Load Formulas: An Evaluation,
W82-02375 1505 2J

Clarification with Microsand Seeding. A State of the Art,
W82-03880 1509 5F

Bearing Capacity of Sand Bases (Discussion of Construction Specifications),
W82-05583 1511 8D

Laboratory Investigation of Deformations of Canals in Sand,
W82-06990 1512 8B

SAND AQUIFERS
Contaminant Occurrence in an Unconfined Sand Aquifer at a Municipal Landfill,
W82-03933 1509 5B

SAND FILTERS
A Successful Low Technology Wastewater Process,
W82-01178 1503 5D

Sand-Filter Trenches for Purification of Septic Tank Effluent: I. Clogging Mechanism and Soil Physical Environment,
W82-03238 1507 5D

Sand-Filter Trenches for Purification of Septic Tank Effluent: II. The Fate of Nitrogen,
W82-03239 1507 5D

Designing for Coarse Sand Filtration Systems,
W82-03478 1508 5D

Slow-Sand Test-Beds Help Refine Design,
W82-04614 1510 5F

Biological Denitrification for Potable Water Treatment,
W82-05247 1511 5F

Land Application of Secondary Effluent at Lake George, NY,
W82-05704 1511 5D

UV Disinfection for Onsite Sand Filter Effluent,
W82-05937 1512 5D

SAND MOUNDS
Flow Calculations for Household Effluent Disposal in Elevated Sand Mounds,
W82-01660 1503 5E

SAND WAVES
Discussion of 'Visualization of Separation over Sand Waves',
W82-03783 1509 8B

SANDS
The Likelihood of Active Groundwater Recharge in the Botswana Kalahari,
W82-05657 1511 4B

SANDSTONES
Test and Control Programme for Twiste Dam Situated in Sandstone and with Restricted Extent of Sub-Surface Sealing (Mess- und Uberwachungsprogramm Einer Stauanlage im Buntsandstein bei Begrenzter Untergrundabdichtung am Beispiel der Twistetalsperre),
W82-06632 1512 8D

SANDUSKY RIVER
Limnetic Larval Fish of the Maumee and Sandusky River Estuaries,
W82-01197 1503 7A

SANGAMON RIVER
Evaluating Stream Standard Violations Using a Water Quality Data Base,
W82-04286 1510 5A

SANITARY ENGINEERING
Assessment of the National Water Quality Management Program, Volume 2: Construction Grants.
W82-02182 1505 6E

Treating Infiltration at Its Source Reduces Capital Costs.
W82-03564 1508 5D

Cost of Wash Houses and Comfort Stations at Recreation Areas,
W82-06042 1512 6C

SANITARY ENGINEERING *COST ANALYSIS
Evaluation of Biological Nitrification - Denitrification at Penticton, British Columbia,
W82-06379 1512 5D

SANITARY LANDFILLS
Effects of Sanitary Landfill Leachage on Some Soil Chemical Properties,
W82-01480 1503 5E

A Finite Element Model for the Migration of Leachate from a Sanitary Landfill in Long Island, New York - Part II: Application,
W82-03220 1507 5B

Prediction of Leachate Accumulation in Sanitary Landfills,
W82-03934 1509 5B

SANITATION
Rural Sanitation in Developing Countries,
W82-01392 1503 5D

Wanted: Water for Development,
W82-02088 1504 6D

Water Supply and Sanitation Decade Programme,
W82-02757 1506 5F

Integrated Planning of Rural Water Supply and Sanitation,
W82-03916 1509 5G

International Decade on Drinking Water and Sanitation,
W82-04230 1509 6E

They Don't Activate Their Sludge in Lagos or Lahore,
W82-06075 1512 5F

SANMENXIA RESERVOIR
Sediment Regulation Problems in Sanmenxia Reservoir,
W82-03072 1507 2J

SANTA BARBARA BASIN
Natural Abundances of 15N as a Source Indicator for Near-Shore Marine Sedimentary and Dissolved Nitrogen,
W82-00283 1501 5B

SANTA CRUZ COUNTY
Evaluation of Ground-Water Monitoring Network, Santa Cruz County, California,
W82-00023 1501 7A

SANTEE RIVER
Santee-Cooper Rediversion: Projected Impacts on Fishery Resources and Wildlife Habitats,
W82-02168 1505 4A

SANTEE RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing; Santee River Basin; South Carolina-North Carolina.
W82-01765 1503 6D

SANTIAGO
Chemical Fractionation of Heavy Metals in Wastewater-Affected Soils,
W82-04781 1511 5B

SAPROBIC INDEX
Comparison of a Few Systems for the Determination of Saprobic and Trophic Degree on the Basis of Plankton Data,
W82-00664 1502 2H

SAPROBITY
Experience with a Simple Method for the Biological Evaluation of Surface Water Quality,
W82-02029 1504 5A

SASKATCHEWAN
The Nature of Selected Prairie Lake and Stream Sediments,
W82-00815 1502 2J

The Effect of Snow Trapping and Cropping Sequence on Moisture Conservation and Utilization in West-Central Saskatchewan,
W82-01117 1503 3F

A Case Study of Rural Opposition Toward River Valley Planning,
W82-05386 1511 6E

Operational Research Techniques in River Basin Management,
W82-05387 1511 6A

Seasonal Variation of Nitrogen and Phosphorus Species in the Red River,
W82-06573 1512 5B

A Case Study of a Chemical Soil: Polychlorinated Biphenyls (PCBS) 1. History, Distribution, and Surface Translocation,
W82-06865 1512 5B

SASKATCHEWAN GLACIER
Glacier Surveys in Alberta - 1979,
W82-01855 1504 2C

SATELLITE TECHNOLOGY
SEASAT SAR Response from Water Resources Parameters,
W82-00101 1501 7B

Quantitative Assessment of Tidal Wetlands Using Remote Sensing,
W82-00781 1502 7B

Relation of Satellite-Based Thunderstorm Intensity to Radar-Estimated Rainfall,
W82-00806 1502 2B

Satellite Rain Estimation in the U.S. High Plains,
W82-00808 1502 2B

Interpretation of Surface-Water Circulation, Aransas Pass, Texas, Using Landsat Imagery,
W82-00904 1502 7B

Effect of Grain Size and Snowpack Water Equivalence on Visible and Near-Infrared Satellite Observations of Snow,
W82-01311 1503 7B

The Inference of Gate Convective Rainfall from SMS-1 Imagery,
W82-01519 1503 7B

A Comparison of Two Satellite Rainfall Estimates for GATE,
W82-01533 1503 7B

Determination of Moisture from NOAA Polar Orbiting Satellite Sounding Radiances,
W82-01535 1503 2B

Remote Sensing in Development,
W82-01719 1503 7B

Spatial Simulation of Snow Processes,
W82-01887 1504 2C

The Use of Remote Sensing for an Integrated Inventory of a Semi-Arid Area,
W82-01910 1504 7B

Measurement of Irrigated Acreage in Western Kansas from Landsat Images,
W82-01939 1504 7B

Monitoring Freshwater Inflow to Estuaries by Remote Sensing,
W82-02138 1505 7A

Evaluation of Remote Sensing Data for Input into Hydrological Simulation Program-Fortran (HSPF),
W82-02986 1506 7B

Use of Environmental Satellite Data for Input to Energy Balance Snowmelt Models,
W82-03048 1507 7B

Remote Sensing from Space-II.
W82-03248 1507 7B

Remote Sensing Applications for Resource Management,
W82-03279 1507 7B

Use of Visible and Thermal Satellite Data to Monitor an Intermittently Flooding Marshland,
W82-03682 1508 7B

Watershed Model Study Using LANDSAT Image Data,
W82-03814 1509 2A

Areal Distribution of Snow Water Equivalent Evaluated by Snow Cover Monitoring,
W82-03842 1509 2C

Water Resources Investigations in West Central Iran Using Landsat Data,
W82-03927 1509 7B

Operational Applications of Satellite Snow Cover Observations,
W82-04150 1509 7B

New Developments in Automated Biosensing from Remote Water Quality Stations and Satellite Data Retrieval for Resources Management,
W82-04800 1511 7B

Automated Biomonitoring Applications in Remote Water Quality Surveillance and Time Rated Toxicological Assay,
W82-05305 1511 7B

Tropical Cyclone Rainfall Characteristics as Determined from a Satellite Passive Microwave Radiometer,
W82-06214 1512 2B

Optimizing the Evaluation of Lake Water Quality Through Analysis of Existing Remotely Sensed Data,
W82-06370 1512 7C

Estimation of Runoff-Producing Precipitation with the Aid of Satellite Imagery (Ermittlung Abflusswirksamer Niederschlage Aus Satellitendaten),
W82-06823 1512 2B

SATHIAR RESERVOIR

Diurnal, Depth-Wise, and Seasonal Changes of Physico-Chemical Factors in Sathiar Reservoir,
W82-01372 1503 2H

SATURATED FLOW

A Stochastic Approach for Describing Convective-Dispersive Solute Transport in Saturated Porous Media,
W82-01461 1503 5B

SATURATED SOILS

On Determining Volumetric Soil Moisture Variations in Peat by the Gravimetric Method,
W82-05616 1511 2G

SATURATION

Solubilities of Gypsum and Halite in the Dead Sea and in Its Mixtures with Seawater,
W82-03708 1508 2K

SATURATION INDEX

Factors Affecting Marl Deposition in Knowlton Lake, Southeastern Ontario,
W82-04031 1509 2K

SATURATION ZONE

Components of Saturated Zone Thickness in a Nigerian Basement Complex Regolith,
W82-01710 1503 2F

SAUDI ARABIA

Osmotic Potentials of Roots of Onions and Their Rhizospheric Soil Solutions when Irrigated with Saline Drainage Waters,
W82-03263 1507 3C

Jeddah IV Seawater Desalination and Power Plant in Operation in Saudi Arabia (Meerwasserentsalzungs und Kraftanlage Jeddah IV in Saudi - Arabien in Betrieb),
W82-04581 1510 3A

Material Specification and the Availability and Life of Desalination Equipment in Both Saudia Arabia and the Arabian Gulf,
W82-06126 1512 3A

SAVANNAH RIVER BASIN

Water Resources Appraisals for Hydroelectric Licensing; Savannah and Edisto River Basins Area; Georgia-South Carolina-North Carolina.
W82-01440 1503 6D

SAVANNAH RIVER IMPOUNDMENTS

The Effect of Season and Location on Phosphoadenylate Concentrations and Adenylate Energy Charge in Two Species of Freshwater Clams,
W82-00810 1502 2H

SAVANNAH RIVER PLANT

Final Environmental Impact Statement; Defense Waste Processing Facility, Savannah River Plant, Aiken, S.C.
W82-06087 1512 6G

SAVINJA RIVER

Evaluation of the Polluted River Savinja with the Help of Macrophytes,
W82-01377 1503 5C

SAW MILLS

Potential Eutrophication of the Rideau River by an Urban Drainage Waterway,
W82-00834 1502 5C

SCALE FORMATION

Morphology of Inhibitor-Treated CaCo3 Precipitate,
W82-06120 1512 3A

SCALE INHIBITION

Scale Inhibition of Calcium Sulfate by a Fluidized Bed,
W82-06104 1512 3A

SCALE PREVENTION

Non-Acid Pretreatment and Management of Microorganisms in Seawater Desalination by Reverse Osmosis,
W82-02108 1505 3A

SCALING

An Experimental Project to Determine the Parameters of Silica Scaling in Reverse Osmosis Systems,
W82-02451 1505 5D

Precipitation Kinetics of Calcium Carbonate and Magnesium Hydroxide in a Scaling System,
W82-03136 1507 2K

The Siderite Model of The Formation of Corrosion-Resistant Scales,
W82-04270 1510 5F

Start-Up Problems of Sludge Dewatering Facility,
W82-05444 1511 5D

Morphology of Inhibitor-Treated CaCo3 Precipitate,
W82-06120 1512 3A

SCALLOP

A Study on the Accumulation of Copper and Zinc in the Mid-Gut Gland of Cultured Scallop for Environmental Monitoring, (In Japanese),
W82-02379 1505 5B

SCALLOPS

Growth of the Bay Scallop, Argopecten Irradians, in a Waste Recycling Aquaculture System,
W82-00842 1502 3C

SCHELDE BASIN

A New Method of Cubature Using Spline Functions,
W82-04939 1511 2L

SCHELDT ESTUARY

Coprostanol and Bacterial Indicators of Faecal Pollution in the Scheldt Estuary,
W82-04923 1511 5A

SCIENTIFIC PERSONNEL

Laboratory Services in Regional Water Authorities,
W82-06256 1512 5G

SCOTLAND

The Effect of Centrifugation on the Suspended Particles of River Waters,
W82-00124 1501 5A

The Design and Interpretation of Marine Pollution Surveys,
W82-00700 1502 6E

Factors Affecting the Chemistry of Precipitation and River Water in an Upland Catchment,
W82-01322 1503 2K

Airy Holm Dam - Kielder Water Scheme,
W82-03070 1507 8A

Mineral Composition of Phragmites Australis in Scottish Lochs as Related to Eutrophication. I. Seasonal Changes in Organs,
W82-05099 1511 2H

Bed-Material Size and the Riffle-Pool Sequence,
W82-05958 1512 2J

Quantitative Relationships Between Numbers of Fluvial Cycles, Bulk Lithological Composition and Net Subsidence in a Scottish Namurian Basin,
W82-05959 1512 2J

Discharge to the North Sea,
W82-06248 1512 5E

Ecology of Streams Draining Forested and Non-Forested Catchments in an Area of Central Scotland Subject to Acid Precipitation,
W82-06909 1512 5C

SCOUR

Evaluating Scour at Culvert Outlets,
W82-01934 1504 4D

An Evaluation of Aquatic Life Found at Hydraulic Scour Sites in the Columbia River Estuary Selected for Potential Sediment Deposition,
W82-02132 1505 2L

The Vortex Scour Mechanism at Bridge Piers,
W82-04642 1510 8B

Calculation of Local Scour of Rock Foundations by High-Velocity Flows,
W82-04775 1511 8B

Calculation of Large Unlined Canals,
W82-05131 1511 8B

SCREENS

Cooling Water Intake Screening Devices Used to Reduce Entrainment and Impingement,
W82-01442 1503 8I

Use of Fish Larva Morphometry to Predict Exclusion Capabilities of Small-Mesh Screens at Cooling-Water Intakes,
W82-02687 1506 8I

How Screen Mounting Affects Microscreening Hydraulics,
W82-05168 1511 5D

SEA ICE

The Distribution of Sea Ice Meltwater in the Eastern Canadian Arctic,
W82-00966 1502 2C

018 Modelling of Freshwater Inputs in Baffin Bay and Canadian Arctic Coastal Waters,
W82-01590 1503 2C

Quantitative Composition, Distribution, Community Structure and Standing Stock of Sea Ice Microalgae in the Canadian Arctic,
W82-02649 1506 2C

SEA LEVEL

The Effects of Man on Basin Runoff, and on the Water Balance and Water Stage of the Caspian Sea,
W82-01709 1503 4C

Tides and Tidal Datums in the United States,
W82-02982 1506 2A

Disequilibrium Profile of the Potomac River Near Washington, D.C. - A Result of Lowered Base Level or Quaternary Tectonics Along the Fall Line,
W82-05134 1511 2E

SEA URCHINS

Kraft Pulp Mill Effluent and Sediment Can Retard Development and Lyse Sea Urchin Eggs,
W82-03610 1508 5C

SEA WALLS

Large Rubble-Mound Breakwater Failures,
W82-00862 1502 8D

SEA WATER

Model Experiments on the Growth of Enteric Bacteria in Fresh and Sea Water,
W82-02377 1505 5A

Effects of Phenol on Oxygen Consumption in The Whelk, Bullia Digitalis (Dillwyn),
W82-04262 1510 5C

SEALANTS

Post-Treatment Process for Reverse Osmosis Membranes,
W82-02454 1505 3A

Improvement of the Seals of Expansion Joints of Hydraulic Structures,
W82-02669 1506 8A

Security Aspects at the Design and Construction of Sealing for Dams (Sicherheitsaspekte Bei Konstruktion Und Ausfuhrung Von Dammidichtungen),
W82-06241 1512 8G

SEALING

Test and Control Programme for Twiste Dam Situated in Sandstone and with Restricted Extent of Sub-Surface Sealing (Mess- und Uberwachungsprogramm Einer Stauanlage im Buntsandstein bei Begrenzter Untergrundabdichtung am Beispiel der Twistetalsperre),
W82-06632 1512 8D

Application of Ozone to Eliminate Tertiary Treatment of Wastewater Used for Industrial Cooling,
W82-06709 1512 5F

SEASONAL DISTRIBUTION

On August Mean Temperature and the Succeeding Season's Rainfall Over South Africa,
W82-00692 1502 2B

Gonad Development, Fecundity, and Spawning Season of Largemouth Bass in Newly Impounded West Point Reservoir, Alabama-Georgia,
W82-01080 1502 2H

SEASONAL EFFECTS

Seasonal Variations in Primary Production in Surface Waters of the Saguenay River (Variations Saisonnieres de la Production Primaire dans les eaux de Surface de la Riviere du Saguenay),
W82-04678 1510 5C

SEASONAL RATIOS

Seasonal Variation of Nitrogen and Phosphorus Species in the Red River,
W82-06573 1512 5B

SEASONAL VARIATION

Model of the Seasonal Dynamics of an Ecosystem of a Shallow Lake,
W82-00552 1502 2H

Annual Succession of Phytoplankton in One Heated Pond in Central Finland,
W82-00673 1502 5C

Variations of pH with Annual Cumulative Precipitation in Acid Forest Soils,
W82-01118 1503 2G

Changes in Lake Ontario Total Phosphorus Concentrations, 1976-1978,
W82-01126 1503 2H

A Successful Low Technology Wastewater Process,
W82-01178 1503 5D

Seasonal Features of Zooplankton Assemblages in the Nearshore Area of Southeastern Lake Michigan,
W82-01192 1503 2H

Diurnal, Depth-Wise, and Seasonal Changes of Physico-Chemical Factors in Sathiar Reservoir,
W82-01372 1503 2H

Year-to-Year Changes in the Salinity of the Eastern English Channel, 1948-1973: A Budget,
W82-01399 1503 2A

Phytoplankton Photosynthesis and Its Relation to Standing Crop and Nutrients in Two Warm-Monomictic South Island Lakes,
W82-01700 1503 2H

Benthic Macroinvertebrates of Lake Taupo,
W82-01702 1503 2H

Seasonal Evaluation of Organics Removal at a Conventional Water Treatment Plant,
W82-02248 1505 5F

Seasonal and Diurnal Fluctuations of Oomycete Propagule Numbers in the Free Water of a Freshwater Lake,
W82-02274 1505 2H

Seasonal Variation of Vitamin B12, B12 Analogs, and Phytoplankton in a Long Island Estuary,
W82-02282 1505 2L

An Investigation of the Influence of Bacteriophages on the Bacterial Flora and Purification Powers of Activated Sludge,
W82-02433 1505 5E

Studies on the Seasonal Changes of Dissolved Organic Carbon, Nitrogen, Phosphorus and Urea Concentrations in Lake Biwa,
W82-02768 1506 2H

Seasonal Change in Ciliate Populations in the Bottom Sediment of a Polluted River,
W82-02797 1506 5C

Seasonal Salinity Variations in Cleveland Bay, Northern Queensland,
W82-02878 1506 2L

Periphyton in the Volta Lake. I. Seasonal Changes on the Trunks of Flooded Trees,
W82-02882 1506 2H

Periphyton in the Volta Lake. II. Seasonal Changes on Wooden Blocks with Depth,
W82-02883 1506 2H

Factors Influencing the Composition, Structure and Density of a Population of Benthic Invertebrates,
W82-02909 1506 2H

Seasonal Variation in Heterotrophic Activity and Population Density of Planktonic Bacteria in a Clean River,
W82-03405 1508 7B

Analysis of Temporal Changes in Fish Assemblages in Serpentine Creek, Queensland,
W82-03407 1508 2L

Algal Sedimentation in Relation to Phytoplankton Periodicity in Rostherne Mere,
W82-03414 1508 2H

Natural Temporal Variations in the Chemistry of Shallow Groundwater, Athabasca Oil Sands Area, Alberta,
W82-03611 1508 2K

Marginal Cost and Seasonal Pricing of Water Service,
W82-04273 1510 6C

Secular Changes in Annual and Seasonal Great Lakes Precipitation, 1854-1979, and Their Implications for Great Lakes Water Resource Studies,
W82-04431 1510 2B

Regional Hydrologic Models for Climatology: An Application to Three Wisconsin Watersheds,
W82-04483 1510 2A

Seasonality of Flooding and the Assessment of Seasonal Flood Risk,
W82-04646 1510 2E

Seasonal Changes in the Depth Distributions of Interstitial Salinities in the Fraser River Estuary, British Columbia,
W82-04717 1510 2L

Effects of Use Pattern, Cover, Soil Drainage Class, and Overwinter Changes on Rain Infiltration on Campsites,
W82-04858 1511 2G

Seasonal Distribution of Bdellovibrios at the Mouth of the Patuxent River in the Chesapeake Bay,
W82-04924 1511 2L

Diel Variations of Certain Physico-Chemical Parameters of Water in Selected Aquatic Systems,
W82-05097 1511 2H

Mineral Composition of Phragmites Australis in Scottish Lochs as Related to Eutrophication. I. Seasonal Changes in Organs,
W82-05099 1511 2H

Man-Made Storage of Water Resources--A Liability to the Ocean Environment. Part II,
W82-05126 1511 4A

Seasonal Risk-Based Reservoir Operating Rules,
W82-05299 1511 4A

Techniques of Trend Analysis for Monthly Water Quality Data,
W82-05344 1511 7C

The Chemistry of Suspended Matter in Esthwaite Water, A Biologically Production Lake with Seasonally Anoxic Hypolimnion,
W82-05416 1511 2K

Climate Variation and the Mobility and Storage of Sediment in Watersheds,
W82-05931 1512 4D

Weak Acid Concentrations and River Chemistry in the Tovdal River, Southern Norway,
W82-06052 1512 2K

Stochastic Trigger Model for Flood Peaks 1. Development of the Model,
W82-06325 1512 2E

Seasonal Variability and Transport of Suspended Microfungi in a Southeastern Salt Marsh,
W82-06536 1512 2L

Seasonal and Long-Term Changes in Surface Cover of Aquatic Plants in a Shallow Pond, Ojaga-Ike, Chiba, Japan,
W82-06900 1512 5C

Dynamics of a Subtropical Plankton Community, with Emphasis on the Copepod Mesocyclops Edax,
W82-06906 1512 5C

Seasonal Variation of Infiltration Capacities of Soils in Western Oregon,
W82-06961 1512 2G

SEASONAL VARIATIONS

Climatic Factors Contributing to Year-To-Year Variation in Grain Yield of Corn on Brookston Clay,
W82-01115 1503 2I

Occurrence, Distribution and Seasonal Periodicity of Some Aquatic Fungi of Sat-Tal (Nainital), India,
W82-02894 1506 2H

Seasonal Stream Temperature Changes Following Forest Harvesting,
W82-04870 1511 4C

Tracking Seasonal Load Variations,
W82-05787 1511 5D

Seasonal and Diurnal Changes in the Predominant Heterotrophic Bacterial Species of the Meduxnekeag River,
W82-06562 1512 5A

Cadmium in Gammaridae (Amphipoda: Crustacea) of the Rivers Werra and Weser-II. Seasonal Variation and Correlation to Temperature and Other Environmental Variables,
W82-06659 1512 5B

Annual Variations in Abundance of Zooplankton in Lake Valencia (Venezuela),
W82-06765 1512 5C

SEATTLE

Effects of Renton Wastewater Treatment Plant Effluent on Water Quality of the Lower Green/Duwamish River,
W82-01063 1502 5D

The Impact of Effluent from the Renton Wastewater Treatment Plant on the Dissolved Oxygen Regimen of the Lower Green/Duwamish River,
W82-01064 1502 5D

Stranglehold on the Skagit,
W82-03490 1508 6G

The Costs of Internal Corosion in Water Systems,
W82-03809 1509 5F

SEAWATER

A Salicylate-Hypochlorite Method for Determining Ammonia in Seawater,
W82-00238 1501 5A

Water-Rock Partition Coefficients and the Composition of Natural Waters - A Reassessment,
W82-00284 1501 2K

Survival of Human Enteroviruses in the Hawaiian Ocean Environment: Evidence for Virus-Inactivating Microorganisms,
W82-00587 1502 5C

Modification of the Standard Most-Probable-Number Procedure for Fecal Coliform Bacteria in Seawater and Shellfish,
W82-00646 1502 5A

Simultaneous Determination of Iron, Cadmium, Zinc, Copper, Nickel, Lead, and Uranium in Seawater by Stable Isotope Dilution Spark Source Mass Spectrometry,
W82-00786 1502 5A

Sea Urchin Sperm Bioassay for Sewage and Chlorinated Seawater and Its Relation to Fish Bioassays,
W82-00988 1502 5A

Organic Matrix Modifiers for Direct Graphite Furnace Atomic Absorption Determination of Cadmium in Seawater,
W82-01085 1502 5A

Comparison of Methods for the Determination of Trace Elements in Seawater,
W82-01086 1502 5A

Dissolved Hydrocarbons and Related Microflora in a Fjordal Seaport: Sources, Sinks, Concentrations, and Kinetics,
W82-01816 1504 5B

The Geochemical Control of Seawater (Sillen Revisited),
W82-01936 1504 2K

Non-Acid Pretreatment and Management of Microorganisms in Seawater Desalination by Reverse Osmosis,
W82-02108 1505 3A

Effects of Alterations of Freshwater Inflows into Matagorda Bay, Texas,
W82-02149 1505 6G

The Design of Sea Outfalls with Reference to EEC Amenity Water Pollution Criteria,
W82-02449 1505 5E

Particulate and Dissolved Lipids in Sea Water,
W82-02727 1506 5A

Sea Water Distillation in Jersey and Its Use to Augment Conventional Water Resources,
W82-02748 1506 3A

An Ion-Association Model for Estimating Acidity Constants (At 25 C and 1 ATM Pressure) in Electrolyte Mixtures Related to Seawater (Ionic Strength < 1 MOL/KG H20),
W82-03194 1507 1B

Community Metabolism of Adenylates by Microheterotrophs from the Los Angeles Harbor and Southern California Coastal Waters,
W82-03301 1507 5B

Analysis of Trace Elements in Seawater. Part II. Determination of Heavy Metal Traces in Sea Water by X-Ray Fluorescence Analysis with Totally Reflecting Sample Holders,
W82-03333 1507 5A

From Screening to Filtration: Treating the Water Supply,
W82-03739 1508 3A

Determination of Trace Elements in Seawater by Neutron Activation Analysis and Electrochemical Separation,
W82-04530 1510 5A

VTE/VC for Sea Water,
W82-04909 1511 3A

The Effect of Pressure on the Solubility of Minerals in Water and Seawater,
W82-05135 1511 1B

SEBASTICOOK RIVER BASIN

Time-of-Travel Study in the Sebasticook River Basin, Maine,
W82-03982 1509 5B

SECCHI DISKS

Secchi Disc Relationships,
W82-06627 1512 2H

SECONDARY PRODUCTIVITY

Methane Production from Ozonated Pulp Mill Effluent,
W82-00155 1501 5D

Sedimentological and Biological Changes in the Windsor Mudflat, an Area of Induced Siltation,
W82-00548 1502 5C

SECONDARY WASTEWATER

Phosphorus Dynamics of a Florida Freshwater Marsh Receiving Treated Wastewater,
W82-00108 1501 5E

Organic Constituents of Mutagenic Secondary Effluents from Wastewater Treatment Plants,
W82-06178 1512 5D

Microstrainer Theory and the Filtrability Index of Sewage Effluents,
W82-06647 1512 5D

SECONDARY WASTEWATER TREATMENT

Final Environmental Impact Statement, City of Portage Wastewater System, Columbia County, Wisconsin.
W82-00356 1501 6G

An Alternative Wastewater Disinfectant,
W82-00950 1502 5D

New Secondary Treatment System Brought On-Line at Georgia-Pacific,
W82-01009 1502 5D

Detroit's WWTP: One of the World's Biggest,
W82-01865 1504 5D

Secondary Treatment Waivers Issued, Controversy Continues,
W82-02652 1506 6E

Water Reclamation by the Use of Soil-Turfgrass Systems in the Southwest USA,
W82-02817 1506 3C

Trihalomethane Formation from Humic Materials in Chlorinated Reclaimed Wastewater,
W82-03517 1508 5D

An Investigation of Biologically Adjusted pH Changes in Domestic Sewage Effluent,
W82-03953 1509 5D

Relative Effects on Stream Biota of Chlorine and Ammonia Occurring in Secondary Sewage,
W82-04409 1510 5C

Parallel Evaluation of Air- and Oxygen-Activated Sludge,
W82-04624 1510 5D

A Low-Cost Secondary Treatment Alternative,
W82-05169 1511 5D

Economic Impact Analysis of Combined Sewer Overflow Regulations on East St. Louis, R81-12
W82-06099 1512 5G

SEDIMENT
Primary Productivity and Nutrients in the Sediment Retention Basin of Lake Monroe,
W82-06470 1512 5C

SEDIMENT-CARRYING CAPACITY
Selecting a Formula to Estimate Sediment Transport Capacity in Nonvegetated Channels,
W82-01405 1503 2J

Estimating Sediment Transport Capacity in Watershed Modeling,
W82-02265 1505 2J

SEDIMENT CONCENTRATION
Mt. St. Helens and the Fish,
W82-02508 1505 2J

Effects of Fine Sediments on Growth of Juvenile Coho Salmon in Laboratory Streams,
W82-02639 1506 5C

SEDIMENT CONTROL
Hydraulic Sediment Model Study for Proposed Blanco Diversion Dam Modification,
W82-00446 1501 8A

Analysis of National Water Pollution Control Policies 2. Agricultural Sediment Control,
W82-01293 1503 6A

Erosion and Sedimentation Control in Regional and Site Planning,
W82-01552 1503 4D

Santee-Cooper Rediversion: Projected Impacts on Fishery Resources and Wildlife Habitats,
W82-02168 1505 4A

Cumulative Effects of Logging Road Sediment on Salmonid Populations in the Clearwater River, Jefferson County, Washington,
W82-02507 1505 2J

Characterization of Spawning Gravel and Stream System Evaluation,
W82-02509 1505 2J

Mapping Sediment Sources in a New Zealand Mountain Watershed,
W82-02885 1506 2J

Sedimentation Control in Indian Reservoirs,
W82-03693 1508 8A

Approximate Sizing of Reservoirs for Detention Time,
W82-04315 1510 8A

Evaluating Sediment Blankets and a Screen for Macrophyte Control in Lakes,
W82-06097 1512 4A

Lake Restoration by Sediment Removal,
W82-06776 1512 5G

SEDIMENT COVERS
Covering Bottom Sediments as a Lake Restoration Technique,
W82-04421 1510 5G

SEDIMENT DEPOSITION
Neap-Spring Tide Sequences of Intertidal Shoal Deposits in a Mesotidal Estuary,
W82-00112 1501 2L

Sites of River-Derived Sedimentation in the Ocean,
W82-01332 1503 7B

Unsteady One-Dimensional Settling of Suspended Sediment,
W82-01463 1503 2J

Diffusion of Sediment on the Lee of Dune-Like Bedforms: Theoretical and Numerical Analysis,
W82-01842 1504 2J

SEDIMENT DEPOSITION, *RESERVOIR SILTING
A Verification Study on a Reservoir Sediment Deposition Model,
W82-01176 1503 2J

SEDIMENT DISCHARGE
Suspended Sediment Production from Forested Watersheds on Oahu, Hawaii,
W82-01531 1503 2J

A Test Utilizing Sediment Traps, Survey Rods, and Radiographs to Monitor Sediment Accumulation from a Dredging Disposal Operation,
W82-01950 1504 7B

Reservoir Sedimentation with Random Deposits,
W82-04443 1510 2J

A Dynamic System Model for Simulating Sediment Discharge,
W82-06876 1512 4D

SEDIMENT DISTRIBUTION
Deposition of Riverborne Organic Carbon in Floodplain Wetlands and Deltas,
W82-00034 1501 2J

Sediment Distribution of Methanogenic Bacteria in Lake Erie and Cleveland Harbor,
W82-01233 1503 2H

Nepheloid and Suspended Particulate Matter in South-Eastern Lake Michigan,
W82-01499 1503 2H

The Effect of Changing Sediment Supply on Sedimentation in a Glacier-Fed Lake,
W82-01510 1503 2H

Size Distribution of Amazon River Bed Sediment,
W82-03488 1508 2J

The Entrainment and Deposition of Fine-Grained Sediments in Lake Erie,
W82-04033 1509 2J

Sediment Transport and Shoaling in Estuarine and Other Shallow-Water Areas,
W82-04753 1511 2L

Sediment Mixing and Accumulation Rate Effects on Radionuclide Depth Profiles in Hudson Estuary Sediments,
W82-05868 1511 2J

SEDIMENT EROSION
Gully Erosion,
W82-01407 1503 2J

An Evaluation of Aquatic Life Found at Hydraulic Scour Sites in the Columbia River Estuary Selected for Potential Sediment Deposition,
W82-02132 1505 2L

Bed Load Fluctuation: Applications,
W82-05000 1511 2J

Preliminary Post-Eruption Sediment Budget for the North Fork Toutle River Drainage, June 1980-May 1981,
W82-06970 1512 4D

Sediment Influx to the Toutle River from Erosion of Tephra, May 1980-May 1981,
W82-06971 1512 4D

SEDIMENT LOAD
Sediment Data for Streams Near Mount St. Helens, Washington–Volume 1, 1980 Water-Year Data,
W82-01792 1503 7C

Flow Regime and Sediment Load Affected by Alterations of the Mississippi River,
W82-02125 1505 4C

Panoche Creek Flood Protection Works.
W82-04068 1509 4A

Sources of Sediment-Induced Reductions in Water Quality Appraised from Catchment Attributes and Land Use,
W82-05494 1511 2J

Supercritical Flow Flumes for Measuring Sediment-Laden Flow,
W82-06959 1512 8B

SEDIMENT SAMPLER
The Kyholm Corer–A Diver-Operated Sediment Corer,
W82-00793 1502 7B

Bedload Transport in an Oregon Coast Range Stream,
W82-03548 1508 2J

A Probe Method for Soil Water Sampling and Subsurface Measurements,
W82-04325 1510 7B

Collapsible-Bag Suspended-Sediment Sampler,
W82-04745 1510 7B

A New Method for Reporting and Interpreting Textural Composition of Spawning Gravel,
W82-06395 1512 8I

SEDIMENT TRANSPORT
Relationship of Water Quality of Hudson River, New York, During Peak Discharges to Geologic Characteristics of Contributing Subbasins,
W82-00009 1501 5B

Secondary Flow, Shear Stress and Sediment Transport,
W82-00117 1501 2J

Sediment and Nutrient Movement from the Black Creek Watershed,
W82-00135 1501 5B

Sediment Transport in Norton Sound, Alaska,
W82-00151 1501 2J

Movement of Loose, Sandy Detritus by Shallow Water Flows: An Experimental Study,
W82-00776 1502 2J

Subsurface Drainage and Sediment Transport Model,
W82-00894 1502 2G

Interpretation of Surface-Water Circulation, Aransas Pass, Texas, Using Landsat Imagery,
W82-00904 1502 7B

Transports in the Duluth-Superior Harbor,
W82-01136 1503 5B

Wave Climate and Potential Longshore Sediment Transport Patterns, Nottawasaga Bay, Ontario,
W82-01156 1503 2J

Selecting a Formula to Estimate Sediment Transport Capacity in Nonvegetated Channels,
W82-01405 1503 2J

Sediment Transport Capacity of Overland Flow,
W82-01408 1503 2J

Concentrated Flow Relationships,
W82-01409 1503 2J

River Bed Aggradation Due to Overloading,
W82-01486 1503 2J

Sediment-Contaminant Transport Model,
W82-01614 1503 5B

Note on Two Limit Distributions of Bedload Movement,
W82-01643 1503 2J

Field Observations of the Isotopic Composition of Particulate Organic Carbon in the Southern North Sea and Adjacent Estuaries,
W82-01714 1503 2J

Sediment Transport and a Reservoir Situation Formula for Zimbabwe-Rhodesia,
W82-01736 1503 2J

Sediment Analyses for Selected Sites in the South Platte River in Colorado and Nebraska, and the North Platte and Platte Rivers in Nebraska--Suspended Sediment, Bedload, and Bed Material,
W82-01776 1503 2J

The Application of Radioactive Tracers for Determination of Bed-Load Transport in Alluvial Rivers,

Plant Improvement for Semi-Arid Rangelands: Possibilities for Drought Resistance and Nitrogen Fixation,
W82-05610 1511 3F

A Prediction Equation for Day Night Wind Ratio Correction on Reference Crop Evapotranspiration,
W82-05722 1511 2D

Effects of Irrigation Frequency on Germination and on Root and Shoot Yields of Acacia Species,
W82-06229 1512 2I

Synthesis of Streamflow Information Relating to the Semi-Arid Karoo Biome of South Africa,
W82-06835 1512 4A

SENECA LAKE
Mercury and Zinc in the Sediments of Seneca Lake, Seneca River, and Keuka Outlet, New York,
W82-01151 1503 5B

SENEGAL RIVER
A Water Quality Assessment of Development in the Senegal River Basin,
W82-01740 1503 6G

SENELIUM
Selenium Content and Its Chemical Form in River Waters of Japan,
W82-04181 1509 5A

SENSITIVITY ANALYSIS
A Comparison of Sensitivity Analysis and Error Analysis Based on a Stream Ecosystem Model,
W82-00991 1502 7A

A Sensitivity and Error Analysis Framework for Lake Eutrophication Modeling,
W82-05739 1511 5C

Ames Salmonella Mutagenicity Assays on Water: Dichloromethane Extracts Versus Preparation of Growth Media with Test Samples,
W82-06548 1512 5A

Sensitivity of SCS Models to Curve Number Variation,
W82-06631 1512 2A

SENSORS
Requirements and Application of Control and Automation Systems in Wastewater Treatment-A Critical View,
W82-03858 1509 5D

Role of Sensors in Trunk Sewers in the Control of Flow and Wastewater Quality,
W82-03859 1509 5D

New Developments in Automated Biosensing from Remote Water Quality Stations and Satellite Data Retrieval for Resources Management,
W82-04800 1511 7B

Ultrasonic Sensors for Monitoring Flows and Sludge Solids Concentrations in Water and Waste-Water Treatment,
W82-04842 1511 5D

SEPARATION TECHNIQUES
Land Restoration Following Oil-Well Drilling,
W82-00057 1501 5D

Process for Removal of Mercury and Mercury Compounds From Aqueous Solutions and Industrial Waste Liquors,
W82-00058 1501 5D

Apparatus for the Purification of Oily Emulsions, Solutions, and Industrial Waste Waters,
W82-00060 1501 5D

High Capacity Waste Water Treatment System,
W82-00066 1501 5D

Removal and Recovery of Organic Pollutants from the Aquatic Enviroment. 2. Removal and Recovery of Dodecylbenzenesulfonate from Aqueous Solution by Cross-Linked Poly(N-Benzyl-4-Vinylpyridinium Halide),
W82-00217 1501 5D

System for Oil and Water Separation,
W82-00611 1502 5D

Superseparation: Soret Effect Reversed,
W82-00791 1502 3A

A Study of a Method for Displacing Soil Solution by Centrifuging with an Immiscible Liquid.
W82-01131 1503 5B

Preconcentration for Trace Element Determination in Aqueous Samples,
W82-01574 1503 5A

Water Purification Studies with Activated Carbon and Foam Flotation,
W82-01692 1503 5D

Cycling Zone Adsorption Applied to Purification of Brackish Water with Thermally Regenerable Ion-Exchange Resins,
W82-01696 1503 3A

Separation of Toxic Organotin Compounds from Aqueous Solution by Adsorption,
W82-02641 1506 5D

Oil-Water Separation by Induced Air Flotation,
W82-03719 1508 5D

Salt Removal from Brackish Water by Continuous Processes with Amphoteric, Thermally Regenerable Ion-Exchange Resins,
W82-03726 1508 3A

Selective Concentration and Isolation of Aromatic Amines from Water,
W82-03829 1509 5D

Treatment Technology to Meet the Interim Primary Drinking Water Regulations for Inorganics: Part 5,
W82-04106 1509 5F

A Study of The Vacuum-Freezing High Pressure Ice-Melting Process,
W82-04166 1509 3A

A Study of the In-Situ Indirect Freezing Process,
W82-04168 1509 3A

Chrysler Upgrades Oily Wastes Treatment in Kokomo,
W82-04285 1510 5D

Treatment of Noncyanide Electroplating Cadmium Wastewater by Reverse Osmosis,
W82-04664 1510 5D

An Exercise in Sludge Consolidation,
W82-04848 1511 5D

How Screen Mounting Affects Microscreening Hydraulics,
W82-05168 1511 5D

Extended Dechlorination Studies with Granular Activated Carbon Filters,
W82-05257 1511 5F

Ion-Precipitate Flotation of Iron-Cyanide Complexes,
W82-05259 1511 5D

Low Pressure Membrane Separation Process to Remove Heavy Metal Complexes,
W82-05284 1511 5D

Overestimation of Orthophosphorus Concentrations in Surface Waters of Southern Lake Michigan: Effects of Acid and Ammonium Molybdate,
W82-05382 1511 5A

Investigations of Natural Hungarian Zeolite for Ammonia Removal,
W82-05482 1511 5D

Extraction of Phenolic Compounds and Organic Acids by Liquid Membranes,
W82-06331 1512 5D

Membrane Separation Processes,
W82-06445 1512 5D

Apparatus for Cleaning Water Containing Foreign Particles Such as Suspended Matters or Oil,
W82-06699 1512 5D

The Removal of Mixtures of Metals by an Adsorbing Colloid Foam Flotation Pilot Plant,
W82-06821 1512 5D

Removal of Zinc by Adsorbing Colloid Foam Flotation: Pilot Plant Study,
W82-06822 1512 5D

The Electrolytic Process for Chromate Removal in Cooling Towers,
W82-06996 1512 5D

SEPTIC SLUDGE

Septage and Wastewater Treatment in the Activated Sludge Process,
W82-05699 1511 5D

SEPTIC TANKS

Mutlichamber Septic Tanks,
W82-00969 1502 5D

Application of Aerial Photographs and Surficial Geologic Maps to the Determination of Suitability of Land for Septic Tank Systems,
W82-01569 1503 7B

Spatial and Temporal Variation of Fecal Coliform Movement Surrounding Septic Tank-Soil Absorption Systems in Two Atlantic Coastal Plain Soils,
W82-02325 1505 5B

Guidelines for Control of Septic Tank Systems,
W82-02599 1505 5B

Distribution of Wastewater in Drain Field Pipes,
W82-02945 1506 8B

Septic Sewage Systems Contaminate Ground Water.

Nitrogen Removal in a Subsurface Disposal System,
W82-04001 1509 5D

Well Water Quality Deterioration in Central Pierce County, Washington,
W82-04133 1509 5B

Cost-Effectiveness Analysis for On-Site Wastewater Treatment Alternatives,
W82-04185 1509 5D

Operational Performance of an RBC Unit in Conjunction with a Septic Tank,
W82-04355 1510 5D

Pressure Distribution Design for Septic Tank Systems,
W82-05439 1511 5E

Factors to be Considered in Disposing Domestic Waste on Problem Sites and Appraisal of Water Quality in a Piedmont Setting,
W82-05536 1511 5D

Treatability of Type A Zeolite in Wastewater–Part II,
W82-05688 1511 5D

Reliability of On-Site Sewage Disposal Systems in Fairfax County, Virginia,
W82-05812 1511 5D

Put Pressure on Sewage,
W82-06732 1512 5D

SEPTIC WASTEWATER

Sand-Filter Trenches for Purification of Septic Tank Effluent: I. Clogging Mechanism and Soil Physical Environment,
W82-03238 1507 5D

Sand-Filter Trenches for Purification of Septic Tank Effluent: II. The Fate of Nitrogen,
W82-03239 1507 5D

Vacuum Filtration of Septage,
W82-04710 1510 5D

Septic Leachate Surveys for Lakeside Sewer Needs Evaluation,
W82-05322 1511 5B

SEPTICITY

Chemistry of Septicity,
W82-00325 1501 5D

SESTON

Seston Dynamics in Southern Appalachian Streams: Effects of Clear-Cutting,
W82-00543 1502 4C

Effect of the Algal Length/Aperture Length Ratio on Coulter Analyses of Lake Seston,
W82-01823 1504 7B

Seston of the Kremenchug Reservoir and Quantitative Proportions of Its Components,
W82-05029 1511 2H

A Comparison of Different Phosphorus Fractions as Predictors of Particulate Pigment Levels in Lake Memphremagog and Its Tributaries,
W82-06496 1512 5C

SETTLEABLE SOLIDS

The Operation of a Waste Treatment Plant. Process Dynamic Considerations,
W82-00298 1501 5D

Predicting Suspended Solids Removal in Pilot Scale Sediment Ponds Utilizing Chemical Flocculation,
W82-03725 1508 5D

SETTLING BASINS

Reassessment of the Effects of Construction Dewatering on Ground-Water Levels in the Cowles Unit, Indiana Dunes National Lakeshore, Indiana. Supplement to Geological Survey Water-Resources Investigations 78-138,
W82-02478 1505 4A

The Use of a Perforated Baffle at the Inlet of Rectangular Settling Basins,
W82-04124 1509 8B

Settling Characteristics of Flocculent Suspension in Defluoridation of Water by Nalgonda Technique,
W82-06441 1512 5F

Primary Productivity and Nutrients in the Sediment Retention Basin of Lake Monroe,
W82-06470 1512 5C

SETTLING TANKS
Primary Sedimentation of Sewage,
W82-03429 1508 5D

Effects of Chemical Addition on the Performance of Settling Tanks,
W82-05701 1511 5D

Plant Expansion Via High-Rate Pretreatment,
W82-05953 1512 5F

Presedimentation Tanks for High Turbid Raw Water,
W82-06444 1512 5F

M B Settler: A More Economical Alternative to Conventional Settler,
W82-06446 1512 5F

SETTLING VELOCITY
Unsteady One-Dimensional Settling of Suspended Sediment,
W82-01463 1503 2J

Settling Velocity of Spherical Particles in Calm Water,
W82-02958 1506 1B

Variation of Sludge Volume Index with Activated Sludge Characteristics,
W82-04555 1510 5D

SEVERN ESTUARY
Seasonal and Spring-Neap Tidal Dependence of Axial Dispersion Coefficients in the Severn - A Wide, Vertically Mixed Estuary,

Effects of Upland Drainage on Estuarine Nursery Areas of Pamlico Sound, North Carolina,
W82-02164 1505 2L

The Relative Abundance of Opossum Shrimp, Mysis Relicta, in Twin Lakes, Colorado Using a Benthic Trawl,
W82-06399 1512 6G

Colorado Cooperative Fishery Research Unit Studies at Twin Lakes, Colorado: 1980 Report of Findings,
W82-06402 1512 6G

SHUBENACADIE-STEWIACKE RIVER
The Shubenacadie-Stewiacke River Basin Study,
W82-05385 1511 6B

SIBERIA
Applicability and Design Criteria of a Blasting Method for Constructing Deep-Cut Sections of a Canal for Transferring Part of the Flow of Siberian Rivers,
W82-02783 1506 8H

Calculation of the Temperature Regime of Hydraulic Fill Dams During Their Construction,
W82-04760 1511 8D

SIERRA NEVADA
Hydrogeology of the Sierra Nevada Foothill Lineament Near Oakhurst, California,
W82-00831 1502 2F

SILENIUM
Interlaboratory Quality Control Study No. 26, Arsenic and Selenium in Water,
W82-01854 1504 5A

SILICA
An Experimental Project to Determine the Parameters of Silica Scaling in Reverse Osmosis Systems,
W82-02451 1505 5D

A New Voltammetric Method for the Determination of Silica Traces in Water,
W82-03270 1507 5A

SILICA SCALING
An Experimental Project to Determine the Parameters of Silica Scaling in Reverse Osmosis Systems,
W82-02451 1505 5D

SILICATES
Silicates as Nonspecific Adsorbents of Bacteriophage: A Model for Purification of Water From Viruses,
W82-00350 1501 5F

SILICON
The Seasonal Variation in Silicon Concentration in Chalk-Streams in Relation to Diatom Growth,
W82-02439 1505 5B

SILTING
Sedimentological and Biological Changes in the Windsor Mudflat, an Area of Induced Siltation,
W82-00548 1502 5C

Sediment Surveys in the Department of Water Affairs,
W82-00680 1502 7B

Estuarine Dredge and Fill Activities: A Review of Impacts,
W82-01805 1504 2L

Effects of Sedimentation on the Gravels of an Industrial River System,
W82-01881 1504 5C

Investigation of Fluvial Processes Under Conditions of Natural Variability of the Runoff,
W82-03906 1509 2J

Modification of Benthic Insect Communities in Polluted Streams: Combined Effects of Sedimentation and Nutrient Enrichment,
W82-06903 1512 5C

SIMAZINE
Relationships Between Pond Sediments and Simazine Loss from Waters of Laboratory Systems,
W82-02330 1505 5B

SIMULATED RAINFALL
Apparatus for the Simulation of Rain in the Laboratory,
W82-00807 1502 2B

Prediction of Leachate Accumulation in Sanitary Landfills,
W82-03934 1509 5B

SIMULATION
Time Distribution of Clock Hour Rainfall,
W82-01402 1503 2A

Colorado River Simulation System; An Executive Summary,
W82-02170 1505 6A

Simulation of Nutrient Balances in a Shallow and Polluted River: A Strategy for Environmental Control,
W82-02354 1505 5B

Simulation of an Aquifer Test on the Tesuque Pueblo Grant, New Mexico,
W82-02465 1505 2F

Determination of Effective Well Block Radii for Numerical Reservoir Simulations,
W82-04732 1510 6A

Robust Flood Frequency Models,
W82-06319 1512 2E

SIMULATION ANALYSES
Total Sludge Quantity Control for Activated Sludge Process,
W82-03847 1509 5D

SIMULATION ANALYSIS
Simulation Modeling of Primary Clarifiers,
W82-01027 1502 6A

Significant Features of Emitter Flushing Mode Characteristics,
W82-01576 1503 3F

Hydrogeology of Well-Field Areas Near Tampa, Florida, Phase 1--Development and Documentation of a Two-Dimensional Finite-Difference Model for Simulation of Steady-State Ground-Water Flow,
W82-01780 1503 6A

An Aquifer Simulation Program for Micro-Based Processors,
W82-01879 1504 2F

Water Temperature Dynamics in Experimental Field Channels: Analysis and Modeling,
W82-03025 1507 1A

Solution of the Continuity Equation for the Karnak Area,
W82-03196 1507 2G

A New Approach to Computerized Control System for the Activated Sludge Process in Transient States,
W82-04027 1509 5D

Organic Load Control of the Activated Sludge Process Based on Predicted Daily Variation of Influent Load,
W82-04028 1509 5D

Reservoir Operation for Water Conservation,
W82-04165 1509 3B

Management System for Control of Process Losses and Spills in the Kraft Pulping Industry,
W82-04846 1511 5D

Incorporation of Chemical Equilibrium, Physico-Chemical Reactions and the Simulation of Inorganic Qualities in a Reservoir Ecologic Model,
W82-05187 1511 2H

River-Basin Simulation in Systems with Large Response Time,
W82-05496 1511 2A

Applications of Simulation to Specific Water Projects,
W82-05522 1511 6A

Multiple Objective Planning of Land/Water Interface in Medium Size Cities: Application to West Lafayette, Indiana,
W82-05550 1511 4A

Role of Sediment in Non-Point Source Salt Loading within the Upper Colorado River Basin,
W82-05551 1511 5B

Issues in Simulation Model Design--A Case Study, W82-05627 1511 4A

Modified Standard Operation Rules for Reservoirs, W82-05658 1511 4A

A Sensitivity and Error Analysis Framework for Lake Eutrophication Modeling, W82-05739 1511 5C

Computer Simulation of the Steady-State Flow System of the Tertiary Limestone (Floridan) Aquifer System in East-Central Florida, W82-05844 1511 2F

A Stochastic Streamflow Model of the Platte River at Overton, Odessa, and Grand Island, Nebraska, W82-06139 1512 2E

A Conceptual Model of Primary Productivity in Shallow Streams Using Biomass Simulation, W82-06153 1512 5C

Simulating and Improving Hydro Plant Control, W82-06202 1512 8C

Simulation of Solute Transport Using a Transfer Function Model, W82-06318 1512 2G

Transpirational Supply and Demand: Plant, Soil, and Atmospheric Effects Evaluated by Simulation, W82-06320 1512 2D

Advanced Calibration Methodology for Hydrologic Rainfall - Runoff Simulation Models, W82-06366 1512 2A

Computer Simulation of Surface Irrigation by Means of Numerical Methods for Finding Optimal Parameters, W82-06781 1512 3F

SIMULATION MODEL
An Evaluation of the Urban Design Storm Concept, W82-04960 1511 6A

SIMULATIONS
Application of Computer Modeling for the Investigation of Ground-Water Contamination, W82-03939 1509 5E

SINAI
Nile Water for Sinai: Framework for Analysis, W82-04203 1509 6A

SINKS
Two-Dimensional Linearized Moisture Flow with Water Extraction, W82-00405 1501 2I

Inorganic Chemistry of Particulate Matter from the Nearshore Zone of Lake Michigan, W82-01959 1504 2H

Nitrous Oxide Concentrations in Lakes: Variations with Depth and Time, W82-02553 1505 2H

Induced Sinkholes: An Engineering Problem, W82-02559 1505 4B

Sinkhole Development Resulting from Ground-Water Withdrawal in the Tampa Area, Florida, W82-04982 1511 2F

SIOUX CITY
Start-Up and Operating Experience with Computerized Control System in a 1.3 CU M/S (30 MGD) Wastewater Treatment Plant, W82-04047 1509 5D

SIRIO-SHF EXPERIMENT
A Rain Attenuation Model for the Sirio-Shf Experiment, W82-06530 1512 7B

SISTER CHROMATID EXCHANGE
Sister Chromatid Exchange as an Indicator of Short Term Chemical Stress in Aquatic Systems, W82-04161 1509 5A

SITE SELECTION
Land Treatment Site Evaluation in Southeastern Mountainous Areas, W82-01596 1503 5D

Geologic and Hydrologic Implications of Hazardous Wastes Management Rules on Siting in North Carolina, W82-01630 1503 5E

Role of the Geotechnical Consultant in Siting Suitable Areas for Hazardous Waste Disposal, W82-01636 1503 5E

Environmental Threshold Functions for User Oriented Resource Planning and Management, W82-04289 1510 6B

The Search for Reservoir Sites in an Urban Environment, W82-04867 1511 8A

Selection of Waste disposal sites, W82-06550 1512 5E

Soil Moisture Use by Mixed Conifer Forest in a summer-Dry Climate,
W82-02558 1505 2I

Nutrient Contents of Precipitation and Canopy Throughfall Under Corn, Soybeans, and Oats,
W82-02574 1505 2I

Models of Water Transport in the Soil-Plant System: A Review,
W82-03066 1507 2I

Structure and Function of Mycorrhizal Rhizomorphs with Special Reference to Their Role in Water Transport,
W82-03190 1507 2I

Evaporation from Vegetation in Landscapes Developing Secondary Salinity Using the Ventilated Chamber Technique, III. Evaporation from a Pinus Radiata Tree and the Surrounding Pasture in an Agroforestry Plantation,
W82-03213 1507 2D

Response of Sorghum to Moisture Stress Using Line Source Sprinkler Irrigation I. Plant-Water Relations,
W82-03265 1507 2I

The Influence of Plant Water Stress on Stomatal Control of Gas Exchange at Different Levels of Atmospheric Humidity,
W82-03272 1507 2D

Completion of the List of Analytical Solutions for Nutrient Transport to Roots 1. Exact Linear Models,
W82-03327 1507 5E

Zinc Deficiency in Wetland Rice Along a Toposequence of Hydromorphic Soils in the Philippines. I. Soil Conditions and Hydrology,
W82-03328 1507 2G

A Field Study with Nitrogen-15 of Soil and Fertilizer Nitrate Uptake and of Water Withdrawal by Spring Wheat,
W82-03410 1508 2I

Application of Soil Water Flow Theory in Field Simulation,
W82-03589 1508 2G

Daily Partitioning of Rainfall to Surface Runoff and Soil Water on Complex Landscapes,
W82-03681 1508 2A

Effects of Decreased Watering on Crop Yields,
W82-04411 1510 2I

Soil and Water Regimes for Optimum and for Maximum Yields,
W82-04415 1510 3F

Effects of Soil Moisture, Planting Date, and Weeds on Cereal Yields (Effets de l'Humidite du Sol, des Dates de Semis et des Mauvaises Herbes sur le Rendement des Cereales),
W82-04470 1510 2I

Sorghum and Barley in Southern Alberta: Grain Yield Response to Irrigation and Fertilizer,
W82-04471 1510 2I

Evaluation of the Effect of Linearization of the Magnus Equation on the Accuracy of Calculating Evaporation from the Surface of Moist Soil and Transpiration,
W82-05031 1511 2D

Soil Water Availability,
W82-05623 1511 2G

Deep Drainage and Water Use of Forests and Pastures Grown on Deep Sands in a Mediterranean Environment,
W82-05629 1511 4B

Effects of Irrigation Frequency on Germination and on Root and Shoot Yields of Acacia Species,
W82-06229 1512 2I

SOIL WATER POTENTIAL

Effects of Joule Heating on Thermocouple Psychrometer Water Potential Determinations,
W82-00892 1502 7B

SOIL WATER TABLE

The Fate of Pollutants in the Vadose Zone, Monitoring Methods and Case Studies,
W82-03735 1508 5B

Effect of Water Management and Bed Height on Sugarcane Yield,
W82-06231 1512 2I

SOILS

Ponded Infiltration Into Simple Soil Systems: 3. The Behavior of Infiltration Rate With Time,
W82-03366 1507 2G

SOLAR ASSISTED DESALINATION

Critical Analysis of a Proposed Solar Assisted HTE Desalination System,
W82-06121 1512 3A

SOLAR ENERGY

Solar Heat Pond System,
W82-02187 1505 3F

Design and Economics of a Solar Heater Aquifer Storage System,
W82-03143 1507 4B

SOLAR RADIATION

Effect of Solar Radiation and Predacious Microorganisms on Survival of Fecal and Other Bacteria,
W82-00491 1501 2L

Estimating Contribution of Overstory Vegetation to Stream Surface Shade,
W82-02301 1505 2I

Sunlight Induced Movement of Planktonic Organisms and Their Relationships to Water Movements,
W82-04417 1510 2H

Photolysis of Polycyclic Aromatic Hydrocarbons in Water,
W82-04835 1511 5B

SOLAR RAIDATION

Attenuation of Incident Solar Radiation in Lake Water,
W82-04180 1509 2H

SOLID WASTE DISPOSAL

Wet Disposal of Fossil Plant Waste: Case History,
W82-04385 1510 5E

Automatic Control of the Sewage Sludge Pyrolysis Process in Multiple Hearth Furnace,
W82-04587 1510 5E

Sludge Tankering Economics - A Fresh Approach,
W82-06076 1512 5E

SOLID WASTES

Solid Wastes and Water Quality,
W82-01269 1503 5B

Duluth Sanitary District First in U.S. to Take Charge of Both Sewage and Refuse.
W82-03249 1507 5E

Reliability of Analytical Methods for Anaerobic Municipal Solid Waste Samples,
W82-04789 1511 5A

Solid Wastes and Water Quality,
W82-06929 1512 5B

SOLIDS

Wastewater Treatment with Powdered Activated Carbon,
W82-02642 1506 5D

SOLIDS CONTACT PROCESSES

Efficiencies of Advanced Waste Treatment Obtained with Upgraded Trickling Filters,
W82-03285 1507 5D

Operational Performance of an RBC Unit in Conjunction with a Septic Tank,
W82-04355 1510 5D

SOLUBILITY

Measurement of the Solubilities of Slightly Soluble Organic Liquids in Water by Elution Chromatography,
W82-00207 1501 5A

Soluble Element Concentrations and Complexation in Southeastern Lake Michigan,
W82-01147 1503 2H

High-Solubility Gas Flotation,
W82-01184 1503 5D

Reducing Plumbosolvency - The Effect of Added Lime on the Loch Katrine Supply to Glasgow,
W82-02446 1505 5F

Estimation of Calcium Sulfate Solution Rate and Effective Aquifer Surface Area in a Ground-Water System near Carlsbad, New Mexico,
W82-02612 1506 2F

Solubilities of Gypsum and Halite in the Dead Sea and in Its Mixtures with Seawater,
W82-03708 1508 2K

Attenuation of Polybrominated Biphenyls and Hexachlorobenzene by Earth Materials,
W82-04620 1510 5B

Influence of an Americium Solid Phase on Americium Concentrations in Solutions,
W82-04720 1510 5B

Oil Slick Mechanics,
W82-05064 1511 5G

The Effect of Pressure on the Solubility of Minerals in Water and Seawater,
W82-05135 1511 1B

Fluorapatite and Fluorite Solubility Controls on Geothermal Waters in Yellowstone National Park,
W82-05449 1511 2K

The Effect of Sulfate on Aluminum Concentrations in Natural Waters: Some Stability Relations in the System Al2O3-SO3-H2O at 298 K,
W82-05581 1511 2K

SOLUBILITY COEFFICIENT

The Concentration and Isotopic Fractionation of Gases Dissolved in Freshwater in Equilibrium with the Atmosphere. 1. Oxygen,
W82-03325 1507 1B

SOLUTE TRANSPORT

Groundwater Contaminant Transport with Adsorption and Ion Exchange Chemistry: Method of Characteristics for the Case Without Dispersion,
W82-00551 1502 5B

The Use of Na/Cl Ratios to Trace Solute Sources in a Semiarid Zone,
W82-00601 1502 7B

Temperature and Solute-Transport Simulation in Streamflow Using a Lagrangian Reference Frame,
W82-00726 1502 2E

Transport of Salts in Soils and Subsoils,
W82-00930 1502 5B

Residence Times of Water and Solutes Within and Below the Root Zone,
W82-00932 1502 2G

Phosphorus, Nirogen, and Organic Carbon Flux in a Headwater Stream,
W82-01021 1502 2K

Mass Transport of Solutes in Dual-Porosity Media,
W82-01104 1503 5B

An Analytical Solution for Solute Transport Through Fractured Media with Matrix Diffusion,
W82-01179 1503 2F

A Stochastic Approach for Describing Convective-Dispersive Solute Transport in Saturated Porous Media,
W82-01461 1503 5B

Composition of Leachage from Surface-Retorted and Unretorted Colorado Oil Shale,
W82-01810 1504 5B

Scale-Dependent Dispersion in a Stratified Granular Aquifer,
W82-01986 1504 2F

Analyses of Solute Distributions in Deeply Weathered Soils,
W82-02764 1506 2K

Leaching of a Sorbed Solute: A Model for Peak Concentration Displacement,
W82-02922 1506 5B

Kd's--Can They Be Used to Describe Reversible Ion Sorption Reactions in Contaminant Migration,
W82-02942 1506 5B

A 'Random Walk' Solute Transport Model for Selected Groundwater Quality Evaluations,
W82-03007 1507 6A

Methods of Discharge Compensation as an Aid to the Evaluation of Water Quality Trends,
W82-03056 1507 7B

Simulation of the Transport of Ion-Exchanging Solutes Using Laboratory-Determined Chemical Parameter Values,
W82-03057 1507 5B

Transport of Ion-Exchanging Solutes in Groundwater: Chromatographic Theory and Field Simulation,
W82-03082 1507 5B

Molecular Approach to the Foundations of the Theory of Solute Transport in Porous Media. I. Conservative Solutes in Homogeneous Isotropic Saturated Media,
W82-03316 1507 2F

Analysis of Longitudinal Dispersion in Unsaturated Flow I. The Analytical Method,
W82-03321 1507 2G

Analytical Solutions for Transpot of Conservative and Nonconservative Contaminants in Groundwater Systems,
W82-03555 1508 5B

Mass Transport. 3. Role of Hydraulic Conductivity Data in Prediction,
W82-03578 1508 2G

Seepage Flow in Extremely Thin Aquifers,
W82-03594 1508 2F

Migration Through Soil of Organic Solutes in AIJ Oil-Seale Process Water,
W82-03640 1508 5B

Characterization of a Contaminant Plume in Ground Water, Meredosia, Illinois,
W82-03645 1508 5B

Flow-System Controls of the Chemical Evolution of Groundwater,
W82-03795 1509 2K

Description of Soil Chemistry During Transient Solute Transport,
W82-03840 1509 2K

Distributed Method of Solving the Convective-Dispersion Equation: 2. Error Analysis and Comparison with Other Methods,
W82-03873 1509 5B

The Distribution and Movement of Solutes Derived from Agricultural Land in The Principal Aquifers of The United Kingdom, with Particular Reference to Nitrate,
W82-03912 1509 5B

Dispersion Coefficients in Estuaries,
W82-04684 1510 5B

Application of an Approximate Analytic Method of Computing Solute Profiles with Dispersion in Soils,
W82-04876 1511 5B

A Contribution to Simplified Models of Field Solute Transport,
W82-0487[illegible] 1511 5B

Numerical Simulation of the Transport and Speciation of Nonconservative Chemical Reactants in Rivers,
W82-05079 1511 5B

Optimal Dynamic Management of Groundwater Pollutant Sources,
W82-05345 1511 5G

Hydrodynamic Dispersion During Absorption in a Fine Sand 1. The Constant Concentration Case,
W82-05347 1511 5B

Role of Sediment in Non-Point Source Salt Loading within the Upper Colorado River Basin,
W82-05551 1511 5B

Transport of Nitrate and Gaseous Denitrification in Soil Columns During Leaching,
W82-05709 1511 5B

Indications of Ground Water Influences on Nutrient Transport Through Schwatka Lake, Yukon Territory,
W82-05741 1511 5B

Selecting a Method for Estimating Substance Loadings,
W82-05746 1511 5B

Diffusive and Hydraulic Transfer of Solutes Through Homogeneous Membranes,
W82-06006 1512 5F

Analytical Solutions of the One-Dimensional Convective-Dispersive Solute Transport Equation,
W82-06408 1512 2G

A Comparison of Numerical Solutions of the One-Dimensional Unsaturated Flow and Mass Transport Equations,
W82-06547 1512 2G

An Upstream Finite Element Method for Solution of Transient Transport Equation in Fractured Porous Media,
W82-06858 1512 2F

SOLUTES

Analysis of Longitudinal Dispersion in Unsaturated Flow I. The Analytical Method,
W82-03321 1507 2G

Simulation of Solute Transport Using a Transfer Function Model,
W82-06318 1512 2G

A Field Test of the Transfer Function Model for Predicting Solute Transport,
W82-06339 1512 2G

SOLVENT EXTRACTION
Treatability of Toxic Wastewater Pollutants by Solvent Extraction,
W82-03127 1507 5D

SOLVENTS
Determination of Trace Quantities of Dimethylsulfoxide in Aqueous Solutions,
W82-00205 1501 5A

Adsorption on Carbon: Solvent Effects on Adsorption,
W82-00619 1502 5F

Continuous Measurement of Organic Solvents in Air and Water (Kontinuierliche Messung Organischer Losemittel in Luft und Wasser),
W82-04579 1510 5A

SONAR
Hydroacoustic Assessment of Pelagic Fish Stocks: A Potential New Management Tool,
W82-06373 1512 8I

SONIFICATION
The Influence of Phytoplankton Composition on the Relative Effectiveness of Grinding and Sonification for Chlorophyll Extraction,
W82-06902 1512 5A

SONOITA CREEK
Estimating Evapotranspiration from the Sonoita Creek Watershed near Patagonia, Arizona,
W82-01306 1503 2D

SONORAN DESERT
Wheat Response to Drought,
W82-02242 1505 2I

SORBENT MATERIALS
Use of Selected Sorbents and an Aqueous Film Foam on Floating Hazardous Materials,
W82-05063 1511 5G

SORGHUM
Modeling Grain Sorghum Ratoon Cropping and Associated Runoff and Sediment Losses,
W82-00113 1501 2G

Land Forming Effects on Dryland Sorghum Production in the Southern Great Plains,
W82-00764 1502 3F

Effect of Soil Water Content and a Growing Season Straw Mulch on Grain Sorghum,
W82-00765 1502 3F

Double and Monocropped Wheat and Grain Sorghum Under Different Tillage and Row Spacings,
W82-01862 1504 2I

Responses of Grain Sorghum to Variable Water Supply Under Two Irrigation Frequencies,
W82-01944 1504 3F

Response of Sorghum to Moisture Stress Using Line Source Sprinkler Irrigation I. Plant-Water Relations,
W82-03265 1507 2I

Drought Resistance of Sorghum Bicolor L. Moench. 3. Seed Germination Under Osmotic Stress,
W82-03479 1508 2I

Sorghum and Barley in Southern Alberta: Grain Yield Response to Irrigation and Fertilizer,
W82-04471 1510 2I

SORPTION
Sorption of Trace Cadmium on Clay Minerals and River Sediments: Effects of pH AND CD(II) Concentrations in a Synthetic River Water Medium,
W82-00174 1501 2K

Sorption-Desorption of Lindane by Anaerobic and Aerobic Soils,
W82-00189 1501 5A

Uptake of Polychlorinated Biphenyls by Natural Phytoplankton Assemblages: Field and Laboratory Determination of C14-PCB Particle-Water Index of Sorption,
W82-01032 1502 5B

Transport of Nonpolar Organic Compounds from Surface Water to Groundwater. Laboratory Sorption Studies,
W82-01873 1504 5B

Properties of the Sorptivity for Exponential Diffusivity and Application to the Measurement of the Soil Water Diffusivity,
W82-01897 1504 2G

PCBs in the Housatonic River: Determination and Distribution,
W82-02255 1505 5A

Kd's--Can They Be Used to Describe Reversible Ion Sorption Reactions in Contaminant Migration,
W82-02942 1506 5B

Removal of Oil Pollutants from Water Bodies by Means of Hydrophobic Sorbents,
W82-03371 1507 5G

Characterization, Renovation, and Utilization of Water from Slurry Transport Systems,
W82-05289 1511 5D

Derivation of an Empirical Sorption Rate Equation by Analysis of Experimental Data,

Viral Pollution Determination of Superficial Waters (River Water and Sea-Water) from the Urban Area of Barcelona (Spain),
W82-05014 1511 5A

SPARTINA
Dieback of Salt-Water Cordgrass (Spartina Alterniflora Loisel.) in the Lower Cape Fear Estu-

ary of North Carolina: An Experimental Approach to Re-Establishment,
W82-00889 1502 2L

SPATIAL DISTRIBUTION

Illustration of the Roles of Snow in the Evolution of the Winter Cover of a Lake,
W82-00267 1501 2C

Spatial Distributions of Pollen in Surface Sediments of the Potomac Estuary,
W82-00757 1502 2L

Nearshore Spatial Distribution of Fishes in Gill Net Samples, Cayuga Lake, New York,
W82-01195 1503 7A

Geographic Variations in Water Quality and Recreational Use Along the Upper Wallowa River and Selected Tributaries,
W82-01681 1503 5A

Hydroacoustic Surveys of Fish Abundance and Distribution in Twin Lakes, Colorado,
W82-02977 1506 6G

Depth, Silt and Current: Factors in the Transverse Microdistribution of the Benthos in the Freshwater Estuary of the St. Lawrence (Profondeur, Vase et Courant, Facteurs de Microrepartition Transversale du Benthos dans l'Estuaire d'eau Douce du Saint-Laurent (Quebec),
W82-04472 1510 2L

Variations in Moisture Deficits over the Maize-Growing Region of South Africa I. Spatial Aspects,
W82-05901 1512 2B

On the Relationship Between Kriging and State Estimation,
W82-06323 1512 7C

Spatial Coherence of Monthly Precipitation in the United States,
W82-06894 1512 2B

SPAWNING

Gonad Development, Fecundity, and Spawning Season of Largemouth Bass in Newly Impounded West Point Reservoir, Alabama-Georgia,
W82-01080 1502 2H

Ecology of Larval Fishes in Lake Oahe, South Dakota,
W82-01444 1503 6G

Cumulative Effects of Logging Road Sediment on Salmonid Populations in the Clearwater River, Jefferson County, Washington,
W82-02507 1505 2J

Characterization of Spawning Gravel and Stream System Evaluation,
W82-02509 1505 2J

Stream System Evaluation with Emphasis on Spawning Habitat for Salmonids,
W82-02552 1505 7B

Placer Mining and Salmon Spawning in American River Basin, California,
W82-05200 1511 8I

SPAWNING GRAVEL

A New Method for Reporting and Interpreting Textural Composition of Spawning Gravel,
W82-06395 1512 8I

SPECIATION

The Physicochemical Speciation of Cd, Pb, Cu, Fe, and Mn in the Final Effluent of a Sewage Treatment Works and Its Impact on Speciation in the Receiving River,
W82-01498 1503 5B

Physiochemical Speciation of Lead in Drinking Water,
W82-03198 1507 5F

Trace Metal Speciation in the Freshwater and Estuarine Regions of the Yarra River, Victoria,
W82-03387 1507 5B

Speciation of Environmental Pollutants by GC-AA and by ESCA. Purification of Water at Ultratrace Levels of Heavy Metals and Complexation Studies by Electrochemical Methods,
W82-03526 1508 5A

SPECIES COMPOSITION

Experimental Manipulation of Algal Bloom Composition by Nitrogen Addition,
W82-00998 1502 5C

Some Effects of Sewage Discharge Upon Phytoplankton in Hong Kong,
W82-02095 1504 5C

Factors Influencing the Composition, Structure and Density of a Population of Benthic Invertebrates,
W82-02909 1506 2H

Physical Variability and Phytoplankton Communities IV. Temporal Changes in the Phytoplankton Community of a Physically Variable Lake,
W82-03229 1507 2H

Depth, Silt and Current: Factors in the Transverse Microdistribution of the Benthos in the Freshwater Estuary of the St. Lawrence (Profondeur, Vase et Courant, Facteurs de Microrepartition Transversale du Benthos dans l'Estuaire d'eau Douce du Saint-Laurent (Quebec),
W82-04472 1510 2L

The Microfauna of Algal Mats and Artificial Substrates in Southern Victoria Land Lakes of Antarctica,
W82-05096 1511 2H

Some Data on the Fauna and Ecology of Metopidae (Infusoria) in Kiev Reservoir,
W82-05332 1511 2H

Benthos Investigations: Sediment Boxes or Natural Bottom,
W82-05378 1511 5C

The Structure of Crustacean Zooplankton Communities in Glaciated Eastern North America,
W82-05379 1511 2H

Structure and Dynamics of Zooplankton Communities in the Littoral Zone of Some North Carolina Lakes,
W82-06911 1512 5C

SPECIES DIVERSITY

The Prediction of Lacustrine Phytoplankton Diversity,
W82-00319 1501 2H

Accurate and Efficient Estimation of Benthic Populations: A Comparison Between Removal Estimation and Conventional Sampling Techniques,
W82-00633 1502 5A

Zooplankton Species Diversity in Lake St. Clair, Ontario, Canada,
W82-01937 1504 5C

Phytoplankton Distributions Observed During a 3 1/2 Days Fixed-Station in the Lower St. Lawrence Estuary,
W82-01938 1504 2L

Analysis of Temporal Changes in Fish Assemblages in Serpentine Creek, Queensland,
W82-03407 1508 2L

Phytoplankton Responses to Ground Water Addition in Central Florida Lakes,
W82-05747 1511 5C

Vegetation Structure and Diversity Components of a Fraser Estuary Tidal Marsh,
W82-06465 1512 2L

Vegetation-Environment Relations in a Brackish Marsh, Lulu Island, Richmond, B.C.,
W82-06497 1512 2L

SPECIFIC CAPACITY

Water Resources of the Kisatchie Well-Field Area Near Alexandria, Louisiana,
W82-02480 1505 7C

SPECIFIC CONDUCTIVITY

The Use of Specific Conductance in Studies of Natural Waters and Soil Solutions,
W82-01646 1503 7A

A Portable System for Measuring Water Temperature, Conductivity, Dissolved Oxygen, Light Attenuation and Depth of Sampling,
W82-05105 1511 7B

SPECIFIC HUMIDITY

Evaluation of the Effect of Linearization of the Magnus Equation on the Accuracy of Calculating Evaporation from the Surface of Moist Soil and Transpiration,
W82-05031 1511 2D

Autocorrelations of Moisture Parameters on Isentropic Surfaces,
W82-06210 1512 2B

SPECIFICATIONS

Material Specification and the Availability and Life of Desalination Equipment in Both Saudia Arabia and the Arabian Gulf,
W82-06126 1512 3A

SPECTRAL ANALYSIS

An Estimation of the Reaeration Coefficient in Natural Streams by Spectral Analysis of Time Series Data,
W82-02458 1505 5G

A Remote Sensing Technique for Estimating Watershed Runoff,
W82-06151 1512 7C

SPECTRAL REFLECTANCE

Spectral Reflectances of Freshwater Ice and Snow from 340 Through 1100 NM,
W82-05556 1511 2C

SPECTROMETERS

Moisture Analysis from Radiosonde and Microwave Spectrometer Data,
W82-04900 1511 2B

SPECTROPHOTOMETRY

Interference of Sulphide in Inorganic Phosphate Determination in Natural Waters,
W82-00154 1501 5A

A Reduction-Spectrophotometric Method for the Determination of Sulphate in Waters,
W82-00850 1502 5A

Evaluation of Ultraviolet Spectrophotometric Determination of Nitrate-Nitrogen in Glacial Snow, Firn and Ice,
W82-01572 1503 5A

A Spectrophotometric Method for the Determination of Anionic Surfactants at Microg/Liter Levels,
W82-03289 1507 5A

Extraction and Spectrophotometric Determination of Cadmium Based on the Formation of a Ternary Complex with Cadion and 1,10-Phenanthroline,
W82-05041 1511 5A

The Effect of Metal Ions on the Ultraviolet Spectra of Humic Acid, Tannic Acid and Lignosulfonic Acid,
W82-06273 1512 2K

SPECTROSCOPY

A Resonance Raman Method for the Rapid Detection and Identification of Bacteria in Water,
W82-00404 1501 5A

High Resolution Alpha Spectroscopy by Liquid Scintillation Techniques,
W82-05541 1511 5A

Inorganics,
W82-06999 1512 5A

SPENCER GULF

The Significance of the Submarine Geology of Upper Spencer Gulf, South Australia, to Environmental Decision-Making,
W82-00314 1501 2L

SPILLS

Use of Selected Sorbents and an Aqueous Film Foam on Floating Hazardous Materials,
W82-05063 1511 5G

Feasibility of Commercialized Water Treatment Techniques for Concentrated Waste Spills,
W82-05068 1511 5G

SPILLWAY CAPACITY

The Future of Flood Estimation and the Flood Studies Report,
W82-04687 1510 2E

SPILLWAY CRESTS

Steady Shallow Flow Over a Spillway,
W82-05086 1511 8B

SPILLWAY GATES

Aeration Characteristics of Flow Release Controls on Illinois Waterway Dams,
W82-04388 1510 5G

SPILLWAYS

Model Study of a Box-Inlet Chute Spillway and SAF Stilling Basin,
W82-00046 1501 8A

Hydraulic Model Study of Daule-Peripa Spillway and Outlet Works,
W82-01446 1503 8A

Passing Floodwaters Over Embankment Dams,
W82-02204 1505 8A

Ski-Jump Spillway for India's Ukai Dam,
W82-02430 1505 8A

Boundary Calculations of Sluice and Spillway Flows,
W82-02677 1506 8B

Measurements of Self-Aerated Flow on a Spillway,
W82-02715 1506 8B

Instrumentation for Aerated Flow on Spillways,
W82-02880 1506 7B

Hydraulic Model Studies of Theodore Roosevelt Dam - South Spillway,
W82-03051 1507 8A

The El Cajon Hydro Project in Honduras, Part Two,
W82-03332 1507 8A

Analysis of the Hydraulic Jump Within a Diverging Rectangular Channel,
W82-04645 1510 8B

James Bay Spillways and Control Structures,
W82-04692 1510 8A

Calculation of Local Scour of Rock Foundations by High-Velocity Flows,
W82-04775 1511 8B

Steady Shallow Flow Over a Spillway,
W82-05086 1511 8B

Determination of the Optimal Height of the Bucket Lip of a Ski-Jump Spillway,
W82-05107 1511 8B

Concrete for Surfaces of High-Head Spillways,
W82-05110 1511 8F

Shaft Spillways Combined with a Water Intake,
W82-05111 1511 8A

An Investigation of a Jet-Assisted Hydraulic Jump,
W82-05279 1511 8B

Aeration at High Velocity Flows,
W82-05602 1511 8A

Investigation of the Overflow Spillway of the Velishchai Reservoir,
W82-06220 1512 8A

Design Flood and Hydrological Risk for Spillways or Reservoirs and Flood Protection Basins (Bemessungshochwasser Und Hydrologisches Versagensrisiko Fur Talsperren Und Hochwasserruckhaltebecken),
W82-06238 1512 8B

SPIRAL-WOUND ELEMENTS

Development of High Salt Rejection Reverse Osmosis Membranes--Final Report, July 1, 1978 Through December 31, 1980,
W82-02109 1505 3A

SPLASH EROSION

Splash Erosion Modeling: Physical Analysis,
W82-05970 1512 2J

SPLIT TREATMENT

Chemical Equilibria in Split-Treatment Softening of Water,
W82-01165 1503 5F

SPOIL BANKS

Vertical Migration and Mortality of Benthos in Dredged Material. Part I: Mollusca,
W82-03317 1507 6G

The Evaluation of the Elutriate Test as a Means of Predicting the Behavior of Selected Chlorinated Hydrocarbons in Dredged Sediment During Open-Water Disposal,
W82-03824 1509 5A

Consequences of Contamination by Heavy Metals in Tidal Estuaries by the Example of the River Elbe (Auswirkungen der Schwermetallbelastung von Tidegewassern am Beispiel der Elbe),
W82-06637 1512 5E

SPOIL DISPOSAL

A Test Utilizing Sediment Traps, Survey Rods, and Radiographs to Monitor Sediment Accumulation from a Dredging Disposal Operation,
W82-01950 1504 7B

Dredged Material Evaluations: Correlations Between Chemical and Biological Evaluation Procedures,
W82-01985 1504 5C

Construction of Containment Facility for Dredged Materials Begins,
W82-03839 1509 5G

Distribution of Suspended Sediment in the Patuxent River, Maryland During Dredging Operations for Construction of a Pipeline,
W82-05198 1511 2J

SPORT FISHING

The Effects of Freshwater Discharges on Sportfishing Catch Rates in the St. Lucie Estuary, Martin County, Florida,
W82-02124 1505 6G

The Warmwater Sport Fishery of Eastern Lake Ontario,
W82-02296 1505 7A

Impact of the 1979 Accident at Three Mile Island Nuclear Station on Recreational Fishing in the Susquehanna River,
W82-03962 1509 5C

SPRAY IRRIGATION

Wastewater Treatment by a Prototype Slow Rate Land Treatment System,
W82-02981 1506 5D

Managing Vegetation in Wastewater Application,
W82-03401 1508 5D

SPRING BROOK BASIN

Comparison of Behavior of Two Sub-Basins in the Turtle Creek Drainage System,
W82-02528 1505 2A

SPRING WATER

Minor - Element Distribution in Mineral and Thermal Waters (Repartition des Elements Traces dans les Eaux Thermo-Minerals),
W82-03541 1508 2F

Geochemical and Isotopic Characteristics of Spring and Groundwater in the State of Sao Paulo, Brazil,
W82-03542 1508 2F

SPRINGFIELD

Infiltration Inflow Analysis: Finding the Source,
W82-05038 1511 5B

SPRINGS

Groundwater Discharge Through Springs with Well-Defined Outlets--A Case Study from Jeloya-Moss, S. Norway,
W82-01748 1503 2F

Geochemical Evidence on the Nature of the Basement Rocks of the Sierra Nevada, California,
W82-02460 1505 2K

Hydrologic Reconnaissance of the Noatak River Basin, Alaska, 1978,
W82-05848 1511 4A

A Faunal Analysis of the Springs off the Ouachita Mountains, Arkansas,
W82-06161 1512 2K

Characterization of Laverkin Springs Water and Methods for Its Reuse in Energy Development,
W82-06400 1512 5G

SPRINGVALE - BEAR CREEK

Final Environmental Impact Statement; Alternative Wastewater Treatment Systems for Rural Lake Projects; Case Study No. 3: Springvale-Bear Creek Sewage Disposal Authority, Emmet County, Michigan.
W82-00364 1501 5D

SPRINKLE IRRIGATION

Influence of Trickle and Sprinkle Irrigation on Golden Delicious Apple Quality,
W82-02001 1504 3F

SPRINKLER IRRIGATION

Water Application Uniformity of Hose Towed Traveler Irrigators,
W82-00296 1501 3F

Saline Irrigation Water.
W82-00512 1502 3F

Traveling Sprinkler System and Method,
W82-00561 1502 3F

Irrigation Management of Colorado River Water with Increase in Salinity,
W82-01226 1503 3C

Solid Set Irrigation System Design Using Linear Programming,
W82-02273 1505 6A

Soil Filtration of Sewage Effluent of a Rural Area,
W82-03004 1507 5D

Design Procedure of Sprinkling Laterals: The Mathematical Background of a Computerized Aid,
W82-03174 1507 3F

Response of Sorghum to Moisture Stress Using Line Source Sprinkler Irrigation I. Plant-Water Relations,
W82-03265 1507 2I

Managing Sprinkle Irrigation with Saline Water for Zero Leaching,
W82-03521 1508 3C

Environmental Effects of Applying Feedlot Runoff to Grassland Plots by Sprinkler Irrigation,
W82-03528 1508 3C

Sprinkler Leveler and Wind Compensating Device,
W82-06164 1512 3F

Responses of 6-Year-Old Diamond Grapevines to the Change from Sprinkler to Trickle Irrigation and to the Time and Method of Applying Nitrogen,
W82-06492 1512 3F

Automation of a Sprinkler Irrigation System by the Utilization of Real Time Weather Information,
W82-06695 1512 3F

SPRINKLERS
Characterizing Sprinkler Distribution Patterns with a Clustering Algorithm,
W82-01575 1503 3F

SPRUCE KNOB LAKE
Water Chemistry Changes During Artificial Aeration of Spruce Knob Lake, West Virginia,
W82-01049 1502 5G

SPRUCE TREES
Winter Water Relations of Red Spruce on Mount Monadnock, New Hampshire,
W82-02634 1506 2I

SRI LANKA
Infiltration Rates of Rainwaters in Sri Lanka Measured by Using Tritium Tracer,
W82-05941 1512 2F

Planning Sri Lanka's Victoria Scheme,
W82-05979 1512 8A

Confluence of Two Jets Created by Two Parallel Segment Gates of a Bottom Outlet (Schussstrahl-Zusammenfuhrung Bei Einem Grundablass Mit Nebeneinyanderliegenden Segmentschutzen).
W82-06243 1512 8B

SRICSI METHODOLOGY
Evaluation of the Stream Reach Inventory and Channel Stability Index for Instream Habitat Analysis,
W82-06308 1512 4D

ST. CLAIR RIVER
Mercury Clean-Up in Canada's Lake St. Clair: Only a Partial Success,
W82-03788 1509 5C

ST. CROIX RIVER
Dissolved Oxygen Modelling of the St. Croix River, Maine - New Brunswick,
W82-06572 1512 5B

ST JOHNS RIVER
Selected Trace Metals in the Upper St. Johns River and Their Land Use Relationships,
W82-04718 1510 5B

ST. JOSEPH RIVER BASIN
Water Resources Apparisals for Hydroelectric Licensing; St. Joseph - Kalamazoo River Basin; Indiana - Michigan,
W82-03044 1507 6D

ST. LAWRENCE ESTUARY
Phytoplankton Distributions Observed During a 3 1/2 Days Fixed-Station in the Lower St. Lawrence Estuary,
W82-01938 1504 2L

On the Advection of Turbidity in the Saint Lawrence Middle Estuary,
W82-02344 1505 2L

A Two-Dimensional Numerical Model of the Vertical Circulation of Tides in the St. Lawrence Estuary,
W82-03386 1507 2L

Vertical Mixing and Photosynthetic Capacity of Estuarine Phytoplankton (Melange Vertical et Capacite Photosynthetique du Phytoplancton Estuarien (Estuaire du Saint-Laurent)),
W82-04331 1510 2L

Initial Colonization of Artificial Substrate: Community Development and Structure Studied by Scanning Electron Microscopy,
W82-05193 1511 2L

Physicochemistry of Water in the St. Lawrence Gulf and Estuary (Physico-Chimie des eaux du Golfe et de l' Estuaire Saint-Laurent),
W82-05763 1511 5B

Variability of Temperature, Salinity and Tidally-Averaged Density in the Middle Estuary of the St. Lawrence,
W82-06533 1512 2L

ST. LAWRENCE RIVER
Zooplankton Sample Variability in a Tidal Estuary: An Interpretative Model,
W82-02306 1505 2L

Simulation of Ice-Cover Growth and Thermal Decay on the Upper St. Lawrence River.
W82-03822 1509 2C

Surface Heat Loss and Frazil Ice Production in The St. Lawrence River,
W82-03925 1509 2C

Depth, Silt and Current: Factors in the Transverse Microdistribution of the Benthos in the Freshwater Estuary of the St. Lawrence (Profondeur, Vase et Courant, Facteurs de Microrepartition Transversale du Benthos dans l'Estuaire d'eau Douce du Saint-Laurent (Quebec),
W82-04472 1510 2L

Winter Heat Budget and Frazil Ice Production in the Upper St. Lawrence River,
W82-05736 1511 2C

Discharge of Metals from the St. Lawrence River,
W82-06190 1512 5B

ST LUCIE ESTUARY
The Effects of Freshwater Discharges on Sportfishing Catch Rates in the St. Lucie Estuary, Martin County, Florida,
W82-02124 1505 6G

ST. THOMAS
Water Conservation Under Conditions of Extreme Scarcity: The U.S. Virgin Islands.
W82-04170 1509 3A

STABILITY ANALYSIS
Gravitational Stability of Water Over Steam in Vapor-Dominated Geothermal Systems,
W82-00963 1502 1A

Stability of Activated Sludge Processes Based on Statistical Measures,
W82-01489 1503 5D

Probabilistic Stability Analysis of Earth Slopes,
W82-01952 1504 8D

Current Methods of Dynamic Analysis for Seismic Stability of Earth Dams,
W82-01953 1504 8D

The Accuracy of Equilibrium Methods of Slope Stability Analysis,
W82-01954 1504 8D

Reliability and Stability of Trickling Filter Processes,
W82-04784 1511 5D

Dynamic Elastic and Absorbing Properties of Soils,
W82-05132 1511 8D

STABILIZATION LAGOONS
New Secondary Treatment System Brought On-Line at Georgia-Pacific,
W82-01009 1502 5D

Lagoons and Oxidation Ponds,
W82-01244 1503 5D

STABILIZATION PONDS
Virus Removal in Waste Stabilization Ponds in India,
W82-00121 1501 5D

The Harvest of Microalgae from the Effluent of a Sewage Fed High Rate Stabilization Pond by Tilapia Nilotica. Part I: Description of the System and the Study of the High Rate Pond,
W82-00455 1501 5D

Dynamic Nutrient Cycle Model for Waste Stabilization Ponds,
W82-01541 1503 5D

Hydraulic Modeling for Waste Stabilization Ponds,
W82-01965 1504 5D

Recommendations for Regulatory Modifications: The Use of Waste Stabilization Pond Systems,
W82-02675 1506 5D

The Development of Design Equations for Facultative Waste Stabilization Ponds in Semiarid Areas,
W82-04641 1510 5D

A Survey of Aerated Lagoon Performance,
W82-06391 1512 5D

Ammonia Nitrogen Removal in Facultative Wastewater Stabilization Ponds,
W82-06454 1512 5D

Nitrogen Dynamics in Waste Stabilization Ponds,
W82-06456 1512 5D

Low-Cost Treatment of Wastewater,
W82-06506 1512 5D

STABLE CHANNEL
Origin of Step-Pool Systems in Mountain Streams,
W82-06335 1512 2J

STABLE CHANNELS
Stable-Channel Design in Gravel-Bed Rivers,
W82-04865 1511 2E

STAGE-DISCHARGE RELATIONS
Stage-Discharge Relations at Dams on the Illinois and Des Plaines Rivers in Illinois,
W82-01793 1503 4A

STAGNANT WATER
Data on the Stagnant Ponds of the Savannah of Lamto (Ivory Coast) (Donnees sur les Milieux Limniques Stagnants des Savanes de Lamto (Cote d'Ivoire)),
W82-01357 1503 2H

STANDARD PLATE COUNT
Analytical Note: Evaluation of the m-SPC Method as a Substitute for the Standard Plate Count in Water Microbiology,
W82-06280 1512 5F

STANDARDS
European Communities Directive Relating to the Quality of Water Intended for Human Consumption,
W82-00506 1502 6D

Alterations in the BOD Procedure for the 15th Edition of 'Standard Methods for the Examination of Water and Wastewater',
W82-01186 1503 5A

Evaluating Stream Standard Violations Using a Water Quality Data Base,
W82-04286 1510 5A

The National Interim Primary Drinking Water Standards. Part II. Impact on Community Water Systems. The Indiana Experience,
W82-05815 1511 5G

Impact of Thermal Standards on Power Plant Water Consumption,
W82-06057 1512 5G

STANDING CROPS
An In Situ Method for Measuring the Primary Productivity and Standing Crop of the Epilithic Periphyton Community in Lentic Systems,
W82-00756 1502 7B

Eutrophication of the Salt Valley Reservoirs, 1968-73. I. The Effects of Eutrophication on Standing Crop and Composition of Phytoplankton,
W82-01653 1503 5C

Moisture Conservation of Interseeded Grasslands Through the Use of Annual and Perennial Crop Barriers,
W82-06148 1512 3F

Determination of the Number of Respiring Thiobacillus Ferrooxidans Cells in Water Samples by Using Combined Fluorescent Antibody-2-(p-Iodophenyl)-3-(p-Nitrophenyl)-5-Phenyltetrazolium Chloride Staining,
W82-06542 1512 5A

STANISLAUS RIVER
Don't Damn the Stanislaus,
W82-03275 1507 6E

STAPHYLOCOCCUS AUREUS
Staphylococcus Aureus in Rural Drinking Water,
W82-00223 1501 5B

STATE ESTIMATION
On the Relationship Between Kriging and State Estimation,
W82-06323 1512 7C

Modelling of the Activated Sludge Process for Microprocessor-Based State Estimation and Control,
W82-06324 1512 5D

STATE JURISDICTION
Summary of the New England Conference on Legal and Institutional Incentives to Small-Scale Hydroelectric Development, January 30-31, 1979, Boston, Massachusetts.
W82-00447 1501 6E

Executive Summary, Legal Obstacles and Incentives to Small-Scale Hydroelectric Development in the Six Middle Atlantic States.
W82-00448 1501 6E

Water - Its Use and the Implications for Arkansas Agriculture.
W82-00714 1502 6D

Ground Water Problems Virginia Portion Ohio River Basin,

W82-04548 1510 5C

Metabolic Response of Fish to Stress,
W82-05159 1511 5C

SUBMARINE SPRINGS
Multifrequency Radiometer Detection of Submarine Freshwater Sources Along the Puerto Rican Coastline,
W82-01349 1503 3B

SUBMERGENCE
Geomorphic and Hydraulic Evolution of Tidal Creeks on a Subsiding Beach Ridge Plain, North Inlet, S.C.,
W82-00150 1501 2L

SUBMERSIBLE PUMPS
Submersible Pumps Help Quell Damage From Mount St. Helens Mudflow.
W82-00509 1502 4D

Description of a New Submersible Filter-Pump Apparatus for Sampling Plankton,
W82-01012 1502 7B

SUBSIDENCE
Legal Aspects of Subsidence Due to Well Pumping,
W82-00170 1501 6E

A Mathematical Model for Consolidation in a Thermoelastic Aquifer Due to Hot Water Injection or Pumping,
W82-00602 1502 2F

Mathematical Model for Regional Land Subsidence Due to Pumping 1. Integrated Aquifer Subsidence Equations Based on Vertical Displacement Only,
W82-01926 1504 2F

Mathematical Model for Regional Land Subsidence Due to Pumping 2 Integrated Aquifer Subsidence Equations for Vertical and Horizontal Displacements,,
W82-01927 1504 2F

Calculation of Earth Dams Being Undermined,
W82-03162 1507 8D

Subsidence--A Geological Problem with a Political Solution.
W82-03452 1508 4B

The Occurrence and Control of Land Subsidence Due to Ground-Water Withdrawal with Special Reference to the San Joaquin and Santa Clara Valleys, California,
W82-03714 1508 4B

Quantitative Relationships Between Numbers of Fluvial Cycles, Bulk Lithological Composition and Net Subsidence in a Scottish Namurian Basin,
W82-05959 1512 2J

SUBSIDIES
An Economic Comparison of the Irrigation of Corn in Humid and Arid Regions of the United States,
W82-05909 1512 6B

SUBSOIL
The Annabrucke River Power Station on the Drau, Constructions Taken to Prevent Erosion in the Vicinity of the Barrage on an Exceptional Subsoil (Das Draukraftwerk Annabrucke, Massnahmen zur Verhinderung der Erosion in Bereich Des Bauwerkes auf Aussergewohnlichem Untergrund),
W82-06636 1512 8E

SUBSTRATES
Perpetual Shoals at the Entrance to Chesapeake Bay: Flow-Substrate Interactions and Mutually Evasive Net Currents,
W82-00149 1501 2L

Monitoring River Periphyton With Artificial Benthic Substrates,
W82-00581 1502 5A

A Portable Pump Sampler for Lotic Periphyton,
W82-00826 1502 7B

The Role of Substratum in Benthic Macroinvertebrate Microdistribution and Litter Decomposition in a Woodland Stream,
W82-01037 1502 2E

Substrate Flux into Biofilms of Any Thickness,
W82-01964 1504 5D

Mineral Nutrient Availability in Watercress Bed Substrates,
W82-02769 1506 2I

The Effects of Sedimentation on Aquatic Life of the Kankakee River, Phase II: Quantitative Studies and Threatened, Endangered, and Rare Species,
W82-04389 1510 5C

Initial Colonization of Artificial Substrate: Community Development and Structure Studied by Scanning Electron Microscopy,
W82-05193 1511 2L

Chemical and Biochemical Oxygen Demand as Indicators of Biodegradable Substrate Concentration,
W82-05466 1511 5D

SUBSURFACE DRAINAGE
Backfill Alteration Effects on Pipe Drainage of a Clay Soil,
W82-00763 1502 4A

Subsurface Drainage and Sediment Transport Model,
W82-00894 1502 2G

Use of Horizontal Drains: Case Histories from the Colorado Division of Highways,
W82-02211 1505 8A

Horizontal Drains and Horizontal Drilling: An Overview,
W82-02215 1505 8A

Nutrient and Sediment Loadings from a Subsurface Drainage System,
W82-02266 1505 5B

Delayed Drainage in a Stream-Aquifer System,
W82-04268 1510 2F

Subsurface Drainage Effects on Erosion,
W82-06795 1512 4D

SUBSURFACE DRAINS
Optimum Depth and Spacing of Subsurface Drains,
W82-05693 1511 8B

SUBSURFACE FILTERS
Filter Criteria for Sub-Surface Drainage,
W82-03660 1508 8G

SUBSURFACE FLOW
Subsurface Flow Velocities Through Selected Forest Soils, South Island, New Zealand,
W82-05712 1511 4C

SUBSURFACE IRRIGATION
Water Movement Factors Important to the Design and Operation of Subirrigation Systems,
W82-04538 1510 3F

SUBSURFACE MAPPING
Mapping Contaminated Soil Plumes by Kriging,
W82-01423 1503 5G

SUBSURFACE WATER
Possibilities of Using Helium and Tritium Surveys for Studying Recharge Conditions of Subsurface Waters,
W82-00302 1501 7B

SUCCESSION
A Model of Natural and Man-Induced Changes in Open Freshwater Wetlands on the Massachusetts Coastal Plain,
W82-00397 1501 2I

A Culture Model for Phytoplankton Succession in the Potomac River Near Washington, D.C. (U.S.A.),
W82-03765 1509 5B

An Approach to the Control of the Activated Sludge System by Use of a Succession Model,
W82-04057 1509 5D

Initial Microbiological Response in Lakes to the Mt St Helens Eruption,
W82-05125 1511 2H

Rutland Water Phytoplankton: The Development of an Asset or a Nuisance,
W82-06473 1512 2H

Vegetation-Environment Relations in a Brackish Marsh, Lulu Island, Richmond, B.C.,
W82-06497 1512 2L

SUDAN
A Combination of Electrical Resistivity, Seismic Refraction, and Gravity Measurements for Groundwater Exploration in Sudan,
W82-00852 1502 2F

The Gezira Scheme--A Study in Failure,
W82-03393 1507 6B

Evaluation of Groundwater Resources in Tokar Delta, Sudan,
W82-06197 1512 2E

Microbiological Examination of Sebeel Water,
W82-06882 1512 5C

SUFFOLK COUNTY
Nitrogen Removal in a Subsurface Disposal System,
W82-04001 1509 5D

Regional Management of Groundwater Recharge and Pollution in a Rapidly Urbanizing Area: Long Island, N.Y.,
W82-04956 1511 4B

SUGAR BEETS
Sugar Beet Production as Influenced by Water Stress,
W82-04086 1509 3F

SUGAR CROPS
Wastewater from a Sugar Refining Industry,
W82-05337 1511 5D

SUGARCANE
Water Requirement for Sugarcane Production,
W82-00899 1502 3F

Remote Detection of Nutrient and Water Deficiencies in Sugarcane Under Variable Cloudiness,
W82-02709 1506 7B

Use of Modified Blaney and Criddle Formula for Estimating Water Requirements,
W82-04667 1510 2D

Effect of Water Management and Bed Height on Sugarcane Yield,
W82-06231 1512 2I

SULFATE
Isotopic and Geologic Studies to Identify the Sources of Sulfate in Groundwater Containing High Barium Concentrations,
W82-03931 1509 2K

SULFATE-REDUCING BACTERIA
Kinetic Analysis of Competition Between Sulfate Reducers and Methanogens for Hydrogen in Sediments,
W82-06886 1512 2H

SULFATE REDUCTION
Dynamics of Bacterial Sulfate Reduction in a Eutrophic Lake,
W82-03119 1507 2H

Sulfate Reduction in the Sediments of a Eutrophic Lake,
W82-03722 1508 2H

Sulfate Reduction and Methanogenesis in the Sediment of a Saltmarsh on the East Coast of the United Kingdom,
W82-06541 1512 2L

SULFATES
Sulfhydrolase Activity in Sediments of Wintergreen Lake, Kalamazoo County, Michigan,
W82-00241 1501 2H

Relationships Between Sulfate and Nitrate Ion Concentrations and Rainfall PH for Use in Modeling Applications,
W82-00507 1502 5B

A Reduction-Spectrophotometric Method for the Determination of Sulphate in Waters,
W82-00850 1502 5A

Analysis of Precipitation Chemistry at a Central Pennsylvania Site,
W82-00980 1502 2K

Molecular Diffusion and the Sedimentary Environment: Results from the In Situ Determination of Whole Sediment Diffusion Coefficients,
W82-03091 1507 2J

Dynamics of Bacterial Sulfate Reduction in a Eutrophic Lake,
W82-03119 1507 2H

Sulfate Reduction in the Sediments of a Eutrophic Lake,
W82-03722 1508 2H

Evidence for Coexistence of Two Distinct Functional Groups of Sulfate-Reducing Bacteria in Salt Marsh Sediment,
W82-04464 1510 2L

Determination of Sulfate in River Water by Flow Injection Analysis,
W82-04891 1511 5A

Sulfate Washout Ratios in Winter Storms,
W82-04898 1511 5B

Automated Turbidimetric Determination of Sulphate in Surface, Ground and Domestic Water by Flow-Injection Analysis,
W82-04935 1511 5A

Sulfate Budget and Model for Sulfate Concentrations in Stream Water at Birkenes, a Small Forested Catchment in Southernmost Norway,
W82-05288 1511 2K

The Effect of Sulfate on Aluminum Concentrations in Natural Waters: Some Stability Relations in the System Al2O3-SO3-H2O at 298 K,
W82-05581 1511 2K

SULFIDE PRECIPITATION
Treatment of Metal Finishing Wastes by Use of Ferrous Sulfide,
W82-03002 1507 5D

SULFIDES
Interference of Sulphide in Inorganic Phosphate Determination in Natural Waters,
W82-00154 1501 5A

Determination of the Solubility of Ferrous Sulfide in a Seasonally Anoxic Marine Basin,
W82-02665 1506 2K

Characterization of Boliden's Sulfide-Lime Precipitation System,
W82-02988 1506 5D

The Origin and Isotopic Composition of Dissolved Sulfide in Groundwater from Carbonate Aquifers in Florida and Texas,
W82-03644 1508 2K

Dissolution of Tetragonal Ferrous Sulfide (Mackinawite) in Anoxic Aqueous Systems. 2. Implications for the Cycling of Iron, Sulfur, and Trace Metals,
W82-03771 1509 2K

Electron-Capture Gas Chromatographic Determination of Sulphide as a New Pentafluorobenzyl Derivative,
W82-04036 1509 5A

Handling and Measurement Techniques for Anoxic Interstitial Waters,
W82-05176 1511 7B

Case Study of Prediction of Sulfide Generation and Corrosion in Sewers,
W82-05267 1511 8G

Sulphide Control in Rising Mains,
W82-05465 1511 5D

A Method for the Determination of Sulphides in Water, Sewage and Effluents,
W82-05477 1511 5A

Determination of Sulphide in Industrial Waste Waters and Sewage Waters with an Iodide-Selective Electrode,
W82-06192 1512 5A

Controlling Sulfides and Odors in Sewers, Part One,
W82-06509 1512 5D

SULFUR
Chloramine-T as A Potential Scrubbing Agent: Removal of Odorous Sulfur-Containing Environmental Pollutants,
W82-00871 1502 5D

Sulfur and Associated Elements and Acidity in Continental and Marine Rain from North Florida,
W82-00965 1502 2B

Deposition of Sulphur Gases from Multiple Scattered Sources in Alberta,
W82-01868 1504 5B

Sulfur and Oxygen Isotopes as Tracers of the Origin of Sulfate in Lake Creteil (Southeast of Paris, France),
W82-03583 1508 2H

The Biogeochemistry of Sulfur in Two Small Lakes,
W82-04726 1510 2H

Sulphur in the Environment: A Review,
W82-05179 1511 5B

Sulfur Bacterial Problems Revisted,
W82-05264 1511 5B

Influence of Ozonation on Sulfur, Nitrogen, Chloride and Phosphorus Systems in Public Drinking Water Supplies,
W82-05907 1512 5F

Determination of Sulphur in Snow by Proton Induced X-Ray Emissions (Pixe) Method,
W82-06082 1512 5A

SULFUR COMPOUNDS
Reduction of Sulfur Compounds in the Sediments of a Eutrophic Lake Basin,
W82-00488 1501 2H

Mass-Transport Limitation to the Rate of Reaction of Gases in Liquid Droplets: Application to Oxidation of SO2 in Aqueous Solutions,
W82-00994 1502 2K

Oxidation of SO2 in Aqueous Droplets: Mass Transport Limitation in Laboratory Studies and the Ambient Atmosphere,
W82-01470 1503 2K

The Prediction of Rain Acidity and SO2 Scavenging in Eastern North America,
W82-02628 1506 5B

Studies of the Transformation of Carbon, Nitrogen, Phosphorus, Sulphur and the Principal Mineral Elements in the Course of Measuring Total Oxygen Demand--III. Transformation of Sulfur (In French),
W82-03486 1508 5A

Sulfur Contituents of Sediments and Their Relationship to Lake Acidification,
W82-03558 1508 5B

Sulfur Speciation and Associated Trace Metals (FE, CU) in the Pore Waters of Great Marsh, Delaware,
W82-05415 1511 2K

SULFUR CYCLE
The Role of Phototrophic Bacteria in the Sulfur Cycle of a Meromictic Lake,
W82-01831 1504 2H

Comparative Aspects of Sulfur Mineralization in Sediments of a Eutrophic Lake Basin,
W82-06888 1512 5C

SULFUR DIOXIDE
Wastewater Dechlorination State-Of-The-Art Field Survey and Pilot Studies,
W82-04392 1510 5D

SULFUR EMISSIONS
The Chemistry and Fishery Status of Acid Lakes in Norway and Their Relationship to European Sulphur Emissions,
W82-03418 1508 5C

SULFURIC ACID
Acid Precipitation: The Importance of Nitric Acid,
W82-00643 1502 2K

Acidity Fluctuations at a Broadland Site in Norfolk,
W82-00656 1502 2K

Quality of Irrigation Water and Effects of Sulfuric Acid and Gypsum on Soil Properties and Sundangrass Yields,
W82-00767 1502 3C

The Relative Contributions of Sulfuric and Nitric Acids in Acid Rain to the Acidification of the Ecosystem. Implications for Control Strategies,
W82-02913 1506 5C

Acid Precipitation in the Washington Cascades,
W82-05287 1511 5B

SUMAS RIVER BASIN
Variations and Mechanisms of Asbestos Fibre Distribution in Stream Water,
W82-01853 1504 5A

SUMMER RAINFALL
An Index of Arizona Summer Rainfall Developed Through Eigenvector Analysis,
W82-01528 1503 2B

SUMPS
Pumped Outlets for Drainage Systems,
W82-04364 1510 8A

Pump Sump Design Experience: Summary,
W82-06419 1512 8C

SUNFLOWER
Sunflower Yield Vs. Water Deficits in Major Growth Periods,
W82-04361 1510 2I

SUNSPOTS
Solar Cycles and Erosional Events on the New South Wales Central and South Coasts,
W82-00318 1501 2J

Cyclic Fluctuations in the Flood Area and Relationship with the Double (Hale) Sunspot Cycle,
W82-04896 1511 2A

SUPERCOOLING
A Balloonborne Instrument for the Measurement of Vertical Profiles of Supercooled Liquid Water Concentration,
W82-01524 1503 7B

SUPERSATUATION
Hydraulic Model Studies - Yellowtail Afterbay Dam Sluiceway,
W82-06962 1512 8A

SUPPLEMENTAL IRRIGATION
Risk and the Demand for Supplemental Irrigation: A Case Study in the Corn Belt,
W82-00522 1502 6A

Sizing Farm Reservoirs for Supplemental Irrigation of Corn. Part I: Modeling Reservoir Size Yield Relationships,
W82-05967 1512 2I

SURFACE DRAINAGE
Preliminary Appraisal of Ephemeral-Streamflow Characteristics as Related to Drainage Area, Active-Channel Width, and Soils in Northwestern New Mexico,
W82-02476 1505 2E

SURFACE FLOW
Surface Water Flow from a South Florida Wetland Area,
W82-02121 1505 2E

SURFACE-GROUNDWATER RELATIONS
Spring Flood: Meltwater or Groundwater,
W82-00531 1502 7B

Ground Water in the Ohio River Basin Portion of Maryland: Problems and Needs,
W82-01054 1502 4B

Design and Merit of a River-Aquifer Model for Optimal Use of Agricultural Water,
W82-01193 1503 6A

Hydraulic Connection Between Lake Michigan and a Shallow Ground-Water Aquifer,
W82-02010 1504 2F

Proceedings and Recommendations of the Workshop on Groundwater Problems in the Ohio River Basin, April 28-29, 1981. Cincinnati, Ohio.
W82-02106 1505 2F

Aquifer Response Due to Zones of Higher Permeability and Storage Coefficient,
W82-02190 1505 2F

Comparison of Groundwater and Surface Water for Patterns and Levels of Contamination by Toxic Substances,
W82-02541 1505 5A

Groundwater Systems Associated with Secondary Salinity in Western Australia.
W82-02770 1506 2F

A 'Random Walk' Solute Transport Model for Selected Groundwater Quality Evaluations,
W82-03007 1507 6A

Isotope Hydrology of Groundwaters in the Pampa Del Tamarugal, Chile,
W82-03651 1508 2F

Surface Water and Groundwater Interactions in a Surficial Aquifer in Northwest Iowa,
W82-03718 1508 2A

Impacts of Surface Drainage on Ground Water Hydraulics,
W82-03753 1509 4C

Radon and Radium Discharge to Surface Streams,
W82-03881 1509 5B

Ground-Water Hydrology of the Mormon Island Crane Meadows Wild-Life Area, Near Grand Island, Hall County, Nebraska,
W82-03991 1509 2F

Effect of Irrigation Pumping on the Ground-Water System in Newton and Jasper Counties, Indiana,
W82-04497 1510 4B

Simulated Hydrologic Effects of Possible Ground-Water and Surface-Water Management Alternatives in and near the Platte River, South-Central Nebraska,
W82-04509 1510 6G

Digital-Model Simulation of the Toppenish Alluvial Aquifer, Yakima Indian Reservation, Washington,
W82-04514 1510 2A

Simulated Interactions Between the Proposed Narrows Reservoir and the Water-Table Aquifer Along the South Platte River, Morgan County, Colorado,
W82-04725 1510 6A

Bedrock Aquifers in the Lower Dirty Devil River Basin Area, Utah, with Special Emphasis on the Navajo Sandstone,
W82-05220 1511 7C

Stream-Aquifer Influence Coefficients as Tools for Simulation and Management,
W82-05346 1511 2F

Daily Operational Tool for Maximum Beneficial Use Management of Surface and Ground Waters in a Basin,
W82-06174 1512 4B

Hydrology and Model of North Fork Solomon River Valley, Kirwin Dam to Waconda Lake, North-Central Kansas,
W82-06684 1512 2A

SURFACE-GROUNDWATER RELATIONSHIPS
Artificial Recharge of Colorado River Water in Las Vegas Valley: Management Options and Potential Aquifer System Responses,
W82-06694 1512 6B

SURFACE IRRIGATION
Soil Water Intake Rates and Surface Irrigation System Characteristics by Soil Series in Southeastern Idaho,
W82-05539 1511 3F

A Kinematic Model for Surface Irrigation: An Extension,
W82-06852 1512 3F

SURFACE RUNOFF
Planning Study to Model and Monitor Coal Pile Run-Off,
W82-00091 1501 6A

Physical Effects of Vehicular Disturbances on Arid Landscapes,
W82-00111 1501 4C

The Effects of Surface Slaty Fragments on Soil Erosion by Water,

Simultaneous Concentration of Salmonella and Enterovirus From Surface Water by Using Micro-Fiber Glass Filters,
W82-00573 1502 5A

Summary Appraisal of Water Resources in the Redmond Quadrangle, Sanpete and Sevier Counties, Utah,
W82-00725 1502 7C

Water Resources Data for Illinois, Water Year 1980--Volume 1. Illinois Except Illinois River Basin.
W82-00731 1502 7C

Water Resources Data for Illinois, Water Year 1980--Volume 2. Illinois River Basin.
W82-00732 1502 7C

Water Resources Data for Utah, Water Year 1980.
W82-00733 1502 7C

Evaluation of an Automatic System for Detection of Toxic Substances in Surface Water Using Trout,
W82-00855 1502 5A

Water Resources Data for Texas, Water Year 1980--Volume 1. Arkansas River Basin, Red River Basin, Sabine River Basin, Neches River Basin, Trinity River Basin and Intervening Coastal Basins.
W82-01201 1503 7C

Water Resources Data for Texas, Water Year 1980--Volume 2. San Jacinto River Basin, Brazos River Basin, San Bernard River Basin and Intervening Coastal Basins.
W82-01202 1503 7C

Water Resources Data for Texas, Water Year 1980--Volume 3. Colorado River Basin, Lavaca River Basin, Guadalupe River Basin, Nueces River Basin, Rio Grande Basin and Intervening Coastal Basins.
W82-01203 1503 7C

Water Resources Data for California, Water Year 1980--Volume 1. Colorado River Basin, Southern Great Basin from Mexican Border to Mono Lake Basin, and Pacific Slope Basins from Tijuana River to Santa Maria River.
W82-01204 1503 7C

Water Resources Data for California, Water Year 1980--Volume 2. Pacific Slope Basins from Arroyo Grande to Oregon State Line Except Central Valley.
W82-01205 1503 7C

Water Resources Data for California, Water Year 1980--Volume 3. Southern Central Valley Basins and the Great Basin from Walker River to Truckee River.
W82-01206 1503 7C

Water Resources Data for California, Water Year 1980--Volume 4. Northern Central Valley Basins and the Great Basin from Honey Lake Basin to Oregon State Line.
W82-01207 1503 7C

Water Resources Data for Hawaii and Other Pacific Areas, Water Year 1980 - Volume 1. Hawaii.
W82-01208 1503 7C

Water Resources Data for Hawaii and Other Pacific Areas, Water Year 1980 - Volume 2. Trust Territory of the Pacific Islands, Guam, American Samoa, and Northern Mariana Islands.
W82-01209 1503 7C

Water Resources Data for South Carolina, Water Year 1980.
W82-01211 1503 7C

Water Resources Data for Pennsylvania, Water Year 1980--Volume 2. Susquehanna and Potomac River Basins.
W82-01212 1503 7C

Water Resources Data for Montana, Water Year 1980--Volume 1. Hudson Bay Basin, Missouri River Basin.
W82-01213 1503 7C

Water Resources Data for Montana, Water Year 1980--Volume 2. Upper Columbia River Basin.
W82-01214 1503 7C

Water Resources Data for Florida, Water Year 1980--Volume 3A: Southwest Florida Surface Water.
W82-01215 1503 7C

Water Resources Data for Colorado, Water Year 1980--Volume 2. Colorado River Basin Above Dolores River.
W82-01217 1503 7C

Tenax-GC Extraction Technique for Residual Polychlorinated Biphenyl and Polyaromatic Hydrocarbon Analysis in Biodegradation Assays,
W82-01235 1503 5A

U.S. Geological Survey Reports on the Water Resources of Florida, 1886-1980, Second Edition,
W82-01778 1503 10C

Water Quality Study -- Southwest Minnesota Public Water Supplies,
W82-01795 1503 2K

Impact of Suburban Residential Development on Water Resources in the Area of Winslow Township, Camden County, New Jersey,
W82-02461 1505 4C

Current Water-Resources Investigations of the U.S. Geological Survey in North Dakota--Fiscal Year 1981.
W82-02463 1505 7C

Water-Resources Information for the Withlacoochee River Region, West-Central Florida,
W82-02473 1505 6B

Water Resources Data for Utah, Water Year 1979.
W82-02474 1505 7C

Water-Resources Investigations of the U.S. Geological Survey in Missouri--Fiscal Year 1981.
W82-02488 1505 7C

Water-Quality Reconnaissance of the Larkin Creek Watershed, Lee and St. Francis Counties, Arkansas,
W82-02489 1505 5A

Water Resources Data for Indiana, Water Year 1980.
W82-02492 1505 7C

Water Resources Data for Florida, Water Year 1980--Volume 4. Northwest Florida.
W82-02493 1505 7C

Water Resources Data for Pennsylvania, Water Year 1980--Volume 3. Ohio River and St. Lawrence River Basins.
W82-02494 1505 7C

Water Resources Data for Wyoming, Water Year 1980--Volume 2. Green River Basin, Bear River Basin, and Snake River Basin.
W82-02495 1505 7C

Water Resources Data for Minnesota, Water Year 1980--Volume 1. Great Lakes and Souris-Red-Rainy River Basins.
W82-02496 1505 7C

Water Resources Data for Minnesota, Water Year 1980--Volume 2. Upper Mississippi and Missouri River Basins.
W82-02497 1505 7C

Water Resources Data for New Mexico, Water Year 1980.
W82-02498 1505 7C

Water Resources Data for Kentucky, Water Year 1979.
W82-02499 1505 7C

Hydrologic Reconnaissance of the Wasatch Plateau-Book Cliffs Coal-Fields Area, Utah,
W82-02500 1505 7C

Chemical Coagulation of Surface Water,
W82-02623 1506 5F

Miscellaneous Surface-Water Data, Pecos River Basin, New Mexico,
W82-02827 1506 7C

Geology and Water Availability of Dallas County, Alabama,
W82-02833 1506 6D

Drainage Areas of Streams at Selected Locations in Kentucky,
W82-02835 1506 7C

Hydrologic Evaluation of a Hypothetical Coal-Mining Site Near Chrisney, Spencer County, Indiana,
W82-02840 1506 6B

Water Resources Data for Alaska, Water Year 1980.
W82-02845 1506 7C

Water Resources Data for Wyoming, Water Year 1980--Volume 1. Missouri River Basin.
W82-02846 1506 7C

Water Resources Data for Mississippi, Water Year 1980.
W82-02847 1506 7C

Remote Synoptic Surface Flow Measurements in Small Bodies of Water,
W82-03012 1507 7B

Observations on Infections Associated with South Wales Natural Waters,
W82-03409 1508 5C

The Characterization and Analysis of Chlorinated Organic Compounds Derived from Chlorination of Humic Substances in Surface Waters,
W82-03529 1508 5A

Enrichment of Dissolved Phenolic Material in the Surface Microlayer of Coastal Waters,
W82-03749 1508 2L

Nitrogen Dynamics in the Surface Waters of the New Jersey Pine Barrens,
W82-03816 1509 2A

Inventory of Surface Water Resources of the Stillwater Creek Watershed and an Investigation into the Effect of Land Use on Water Quality,
W82-03948 1509 7B

Hydrologic Almanac of Florida,
W82-03974 1509 7C

Progress Report on the Effects of Surface Mining on the Surface-Water Hydrology of Selected Basins in the Fort Union Coal Region, North Dakota and Montana,
W82-03975 1509 4C

Water Resources Investigations in Mississippi 1980-81.
W82-03988 1509 7C

Water Resources Data for West Virginia, Water Year 1979. Appendix - Coal Areas.
W82-03990 1509 7C

Water-Quality Reconnaissance of Harding Creek, Lawrence County, Arkansas,
W82-03995 1509 7C

Effects of Land Use on Surface-Water Quality in the East Everglades, Dade County, Florida,
W82-04491 1510 5C

Water Resources Data for Arkansas, Water Year 1980.
W82-04503 1510 7C

Hydrologic Reconnaissance of the Beluga, Peters Creek, and Healy Coal Areas, Alaska,
W82-04504 1510 7C

Water Resources Inventory of Connecticut, Part 7, Upper Connecticut River Basin,
W82-04505 1510 2E

Water-Resources Investigations of the U.S. Geological Survey in Kansas--Fiscal Year 1979 and 1980,
W82-04510 1510 7C

Water-Quality Data for Selected Stations in the East Everglades, Florida,
W82-04513 1510 7C

Water Type and Suitability of Oklahoma Surface Waters for Public Supply and Irrigation. Part 1: Arkansas River Mainstem and Verdigris, Neosho, and Illinois River Basins Through 1978,
W82-04518 1510 7C

Water Resources Data for Pennsylvania, Water Year 1980--Volume 1. Delaware River Basin.
W82-04521 1510 7C

Water Resources Data for West Virginia, Water Year 1980. Appendix - Coal Areas.
W82-04522 1510 7C

Water Resources Data for Louisiana, Water Year 1981--Volume 3. Coastal Louisiana.
W82-04523 1510 7C

Design, Construction and Operation of a New Filter Approach for Treatment of Surface Waters in Southeast Asia,
W82-04869 1511 5F

Index to Water-Resources Data for Louisiana, Surface-Water Records, Water-Quality Records.

SWEET POTATOES
The Effect of Leaf Water Status on Stomatal Activity, Transpiration and Nitrate Reductase of Sweet Potato,
W82-03793 1509 2D

SWIMMING
Recreational Water Quality and Health,
W82-02997 1506 5C

Epidemiological Studies of Otitis Externa: Repot of a Prospective and of a Retrospective Study of Otitis Externa Among Swimmers,
W82-03027 1507 5C

SWIMMING POOLS
Distribution and Balance of Volatile Halogenated Hydrocarbons in the Water and Air of Covered Swimming Pools Using Chlorine for Water Disinfection,
W82-00128 1501 5F

Are Metals from Highway Dustfall Hazardous in Swimming Pools,
W82-01093 1502 5B

Persistence of Pseudomonas Aeruginosa in Chlorinated Swimming Pools,
W82-01124 1503 5A

Nitrates, Chlorates and Trihalomethanes in Swimming Pool Water,
W82-01835 1504 5A

Epidemiological Studies of Otitis Externa: Repot of a Prospective and of a Retrospective Study of Otitis Externa Among Swimmers,
W82-03027 1507 5C

Health Aspects of Waters at Public Health Resorts,
W82-04348 1510 5A

The Hygienic Control of Swimming Baths.
W82-04853 1511 5F

SWINE WASTE
Economic and Technical Evaluations of Swine Manure Management Systems Which Use Land Applications,
W82-02175 1505 5E

SWITZERLAND
On The Use of Carotenoid Stratigraphy in Lake Sediments for Detecting Past Developments of Phytoplankton,
W82-01706 1503 2H

Limitations in Hydrological Interpretations of the Snow Coverage,
W82-01889 1504 2C

Evaluation of a Precipitation Map Using a Smoothed Elevation-Precipitation Relationship and Optimal Estimates (Kriging),
W82-01892 1504 2B

New European Experiences in Removal of Organics in Surface Water Treatment,
W82-02420 1505 5F

Correlation of Oxygen 18 in Precipitation with Temperature and Altitude,
W82-03203 1507 2A

Emergency Water Supply General Report No. 2, Concept for an Emergency Water Supply in Switzerland,
W82-03221 1507 5F

Pumped-Storage for Swiss Railways, Part One,
W82-03468 1508 8A

Chemical and Hydrological Heterogeneity of Groundwaters in the Upper 'Jura Neuchatelois', Switzerland. (Heterogeneite Chimique et Hydrologique Des Eaux Souterraines D'un Karst Du Haut-Jura Neuchatelois, Suisse),
W82-03794 1509 2K

The Overtopping of the Palagnedra Dam,
W82-04952 1511 8A

SYMBIOSIS
Effect of Soil Moisture Stress on Legume-Rhizobium Symbiosis in Soybeans,
W82-01846 1504 2I

SYMPOSIUM
The Potential for Ground-Water Management in the West: A Symposium,
W82-04918 1511 4B

Numerical Methods in Hydraulics,
W82-06614 1512 8B

SYNOPTIC ANALYSIS
Statistical Forecasting of Heavy Rain and Floods in the River Teesta,
W82-04670 1510 2B

SYNTHESIS
Open-Pore Polyurethane as a Medium for Coal Conversion Process Aqueous Effluent Cleanup,
W82-01577 1503 5D

The Development of Dry-RO Membranes from Cellulosis and Noncellulosis Polymers Bearing Quaternary Ammonium Groups,
W82-06152 1512 3A

SYNTHETIC FUELS
Synthetic Fuel Effluents,
W82-01263 1503 5B

A Chironomus Tentans Bioassay for Testing Synthetic Fuel Products and Effluents, with Data on Acridine and Quinoline,
W82-02630 1506 5C

Will Synfuel Development Drain the West Dry,
W82-03292 1507 6D

Synthetic Fuel Effluents,
W82-06800 1512 5D

SYNTHETIC ORGANICS
Evaluation and Treatment of Synthetic Organics in Drinking Water Supplies,
W82-04427 1510 5F

SYRIA
Cost-Benefit Analysis of the Euphrates Dam,
W82-03054 1507 6B

SYSTEMATICS
The Aquatic Insects of The Narraguagus River, Hancock and Washington Counties, Maine,
W82-04167 1509 2E

An Introductory Study of Seasonal Variation in the Aerobic Heterotrophic Bacterial Population of the Saint John River Using Classical Systematics,
W82-06559 1512 5A

SYSTEMS ANALYSIS
Systems Analysis,
W82-01303 1503 6A

Study of a Complex Water Resources System with Screening and Simulation Models,
W82-01309 1503 6A

The Lake Tahoe Basin: A Systems Analysis of Its Characteristics and Human Carrying Capacity,
W82-01807 1504 6A

Systems Analysis Applied to Water Management in Developing Countries: Problems and Prospects,
W82-02441 1505 6A

Application of Reliability Theory to Hydraulic Engineering Design,
W82-02699 1506 8B

An Integrated Mesh-Nodal Method for Steady-State Water Distribution Network Analysis,
W82-03305 1507 5F

Computerized Data Acquisition and Data Handling in Sewage Treatment Plants,
W82-04023 1509 5D

Optimization of Looped Water Distribution Systems,
W82-04045 1509 6A

Alternative Indices of Resilience,
W82-05045 1511 6A

A Report on: Research Needs....Water Conservation in Agriculture,
W82-05308 1511 3F

Qualitative Stability Analysis of Geologic Systems, with an Example from River Hydraulic Geometry,
W82-06717 1512 2E

Systems Analysis,
W82-06997 1512 5G

SYSTEMS ENGINEERING
Computer Modeling Programs: Tools for Model Operations,
W82-04130 1509 6A

TACOMA AREA
Well Water Quality Deterioration in Central Pierce County, Washington,
W82-04133 1509 5B

TADPOLES
Tadpoles as Indicators of Harmful Levels of Pollution in the Field,
W82-00478 1501 5A

TAILINGS
Siting and Design of Tailings Impoundments,
W82-01588 1503 8A

Rosario Dominicana's Cyanide Tailings Dam Construction and Operation.
W82-01589 1503 5D

TAILWATER
Irrigation Tailwater Management,
W82-00392 1501 3C

TAIWAN
Mathematical Modeling of Stream Water Quality by a New Moment Method: Field Investigation of a Tidal River,
W82-01995 1504 7B

TALLABOA VALLEY
Floods of September 16, 1975 in Tallaboa Valley, Puerto Rico,
W82-05230 1511 6F

TAMA RIVER
Distribution of Mutagens in Tama and Ayase River Sediments,
W82-04182 1509 5A

TAMAGAWA RIVER
Seasonal Change in Ciliate Populations in the Bottom Sediment of a Polluted River,
W82-02797 1506 5C

TAMARISK
Age, Spacing and Growth Rate of Tamarix as an Indication of Lake Boundary Fluctuations at Sebkhet Kelbia, Tunisia,
W82-05877 1511 2H

TAME RIVER
The River Tame--A Short History of Water Pollution and Control Within an Industrial River Basin,
W82-05242 1511 5C

TAMPA
Demonstration Testing of Alum Recovery by Liquid Ion Exchange,
W82-01167 1503 5D

Tampa's Hookers Point Awt Plant Working Well.
W82-03455 1508 5D

Sinkhole Development Resulting from Ground-Water Withdrawal in the Tampa Area, Florida,
W82-04982 1511 2F

Water System Design Meets Modern Challenges,
W82-05170 1511 5F

TAMPA BAY
Estuarine Distribution of Saprolegniaceae in the Tampa Bay Area: I,
W82-03469 1508 2L

TAMPA BAY REGION
Tampa Bay Water Guarded by Computer,
W82-00934 1502 4B

TANANA RIVER
Sediment Transport in the Tanana River Near Fairbanks, Alaska, 1977-79,
W82-02472 1505 2J

TANNERY WASTES
Advanced Biological Treatment of Tannery Wastewater,
W82-00337 1501 5D

Chemical Treatment Solves Tannery Waste Problems,
W82-00638 1502 5D

Effects of a Cattleskin Tannery of Stream Quality and Benthic Macroinvertebrates in Central Maine,
W82-00872 1502 5C

Aquatic Microbiology with Reference to Tannin Degradation,
W82-02028 1504 5B

Improved Performance in Combined Nitrification/Denitrification of Tannery Waste,
W82-03277 1507 5D

Reduction of Chromium(VI) by Bacterially Produced Hydrogen Sulphide in a Marine Environment,
W82-03758 1509 5B

TANNIC ACIDS
The Effect of Metal Ions on the Ultraviolet Spectra of Humic Acid, Tannic Acid and Lignosulfonic Acid,
W82-06273 1512 2K

TANNINS
Aquatic Microbiology with Reference to Tannin Degradation,
W82-02028 1504 5B

TANZANIA
Costing Dar-Es-Salaam's Sanitation Plan,
W82-04603 1510 6C

Tanzania's Master Water Plan Will Miss Decade Goal,
W82-04657 1510 5F

TARAWA
A Ground Water Resources Study Of A Pacific Ocean Atoll--Tarawa, Gilbert Islands,
W82-04254 1510 2F

TASMANIA
Ecological Effects of Mine Effluents on the South ESK River, North-Eastern Tasmania. I. Study Area and Basic Water Characteristics,
W82-03322 1507 5C

TASTE
Taste as an Indicator for Drinking Water Quality,
W82-04141 1509 5A

Treating Taste and Odour Problems Using Ozone and Activated Carbon,
W82-04553 1510 5F

TATLOCKIA
Isolation of Pittsburgh Pneumonia Agent from a Hospital Shower,
W82-06891 1512 5B

TAXONOMY
The Prediction of Lacustrine Phytoplankton Diversity,
W82-00319 1501 2H

Numerical Taxonomy Analysis of Bacteria Isolated from the Completed 'Most Probable Numbers' Test for Coliform Bacilli,
W82-01911 1504 5A

Plankton Studies in San Francisco Bay. II. Phytoplankton Abundance and Species Composition, July 1977 - December 1979,
W82-02832 1506 2L

An Annotated Key to the Identification of Commonly Occurring and Dominant Genera of Algae Observed in the Phytoplankton of the United States,
W82-04524 1510 5C

Bacteria Under the Ice,
W82-06561 1512 5A

Seasonal and Diurnal Changes in the Predominant Heterotrophic Bacterial Species of the Meduxnekeag River,
W82-06562 1512 5A

TECHNICAL SOCIETIES
Environmental Studies: Their Implications and the Special Case of Egypt,
W82-02062 1504 6G

TECHNOLOGY
Dredging and Disposal of Toxic Material Using Japanese Technology Suggested for United States,
W82-01026 1502 5E

EPA's I/A Program Speeds Use of New Wastewater Treatment Methods,
W82-03737 1508 5D

Water and Wastewater Treatment in Latin America--Applied Technology,
W82-05425 1511 5F

Procedure for Calculating the Complex Rank Index of Water Quality,
W82-05457 1511 5A

TECHNOLOGY TRANSFER
A Multimedia Information Package Regarding Land Application of Wastewater and Sludge: A Study of Training Dissemination Specialists, Evaluation Methods, and Cost-Effectiveness,
W82-02815 1506 5D

Urgent Problems in the Transfer of Water Resources Knowledge,
W82-03802 1509 7C

The Role of Desalting Tchnology in Water Supply, Wastewater Reuse and Industrial Applications,
W82-05543 1511 3A

Desalination Directory 1981.
W82-05908 1512 3A

TECTONICS
Tectonic State: Its Significance and Characterization in the Assessment of Seismic Effects Associated with Reservoir Impounding,
W82-01951 1504 8E

Disequilibrium Profile of the Potomac River Near Washington, D.C. - A Result of Lowered Base Level or Quaternary Tectonics Along the Fall Line,
W82-05134 1511 2E

TEES RIVER
Economic Instruments for Controlling Effluent Discharges to the River Tees Estuary,
W82-02060 1504 2L

Phytobenthos of the River Tees and Its Tributaries,
W82-02065 1504 2K

TEESTA RIVER
Statistical Forecasting of Heavy Rain and Floods in the River Teesta,
W82-04670 1510 2B

TEHAMA-COLUSA CANAL
West Sacramento Canal Unit Reformulation.
W82-02974 1506 6B

TELEMETRY
Telemetric Water Control System of the Artificially Aerated Mosel River,
W82-04598 1510 5G

Towards Digital Technology in the Measurement and Control of Water Levels,
W82-04847 1511 7B

New Telemetry System for the Cambridge Water Company.
W82-04852 1511 5F

Telemetry and Real Time Environmental Data Acquisition (la Telemetrie et l'Acquisition en Temps Reel des Donnees sur l'Environnement),
W82-05770 1511 7B

Two Techniques for Locating and Sampling Brown Trout Microhabitat Under Complete Ice Cover,
W82-06703 1512 7B

Comparison of Automated Satellite Systems with Conventional Systems for Hydrologic Data Collection in West-Central Florida,
W82-06951 1512 7B

TELTOW CANAL
Evaluation of Water Quality Data Received by Automatic Control Stations at the Teltow-Canal in Berlin (West),
W82-04607 1510 5A

TEMPERATURE
Temperature and Solute-Transport Simulation in Streamflow Using a Lagrangian Reference Frame,
W82-00726 1502 2E

Canopy Temperature as a Crop Water Stress Indicator,
W82-01106 1503 2I

The Effect of Environmental Factors on Phytoplankton Growth: Temperature and the Interactions of Temperature with Nutrient Limitation,
W82-02221 1505 2H

Correlation of Oxygen 18 in Precipitation with Temperature and Altitude,
W82-03203 1507 2A

Physical Variability and Phytoplankton Communities: II. Primary Productivity by Phytoplankton in a Physically Variable Environment,
W82-03336 1507 5C

Estimation of Primary Productivity in Aquatic Systems Using Free Oxygen Measurements,
W82-04256 1510 2H

Temperature Dependency of Biological Denitrification with Organic Materials Addition,
W82-04662 1510 5D

Calculation of the Temperature Regime of Hydraulic Fill Dams During Their Construction,
W82-04760 1511 8D

A Portable System for Measuring Water Temperature, Conductivity, Dissolved Oxygen, Light Attenuation and Depth of Sampling,
W82-05105 1511 7B

Variability of Temperature, Salinity and Tidally-Averaged Density in the Middle Estuary of the St. Lawrence,
W82-06333 1512 2L

TEMPERATURE CONTROL
On August Mean Temperature and the Succeeding Season's Rainfall Over South Africa,
W82-00692 1502 2B

TEMPERATURE EFFECT
Survey of Present Knowledge on Cavitation in Liquids Other Than Cold Water (Thermodynamic Effect),
W82-05280 1511 8B

TEMPERATURE EFFECTS
Relationship Between Thermal Stability and Summer Oxygen Depletion in a Prairie Pothole Lake,
W82-00545 1502 2H

Effect of Temperature on Mineralization by Heterotrophic Bacteria,
W82-00583 1502 5C

Influence of Seasonal Temperature on the Temperature Optima of Bacteria in Sediments of Lake George, New York,
W82-00606 1502 2H

The Effect of Temperature on Salt Uptake by Tomato Plants With Diurnal and Nocturnal Waterlogging of Salinized Rootzones,
W82-00608 1502 2I

Annual Succession of Phytoplankton in One Heated Pond in Central Finland,
W82-00673 1502 5C

Temperature and Water Relation Patterns in Subalpine Understory Plants,
W82-00760 1502 2I

Buoyancy Force Reversals in Vertical Natural Convection Flows in Cold Water,
W82-00981 1502 1A

Numerical Simulation of the Effects of Cooling Tower Complexes on Clouds and Severe Storms,
W82-00995 1502 2B

River Thermal Standards Costs in the Upper Midwest,
W82-01655 1503 6B

The Contributions of Temperature and the Input of Organic Matter in Controlling Rates of Sediment Methanogenesis,
W82-01832 1504 2H

Mixing Zone Analysis for River Plumes,
W82-01961 1504 5B

Some Types of Temperature Inversion Encountered in a Freshwater Lake with Short Residence Time,
W82-02224 1505 2H

Frequencies of Developmental Morphs of Chaoborus Americanus in Four Fishless Bog Lakes,
W82-02238 1505 2H

Productivity and Species Composition of Algal Mat Communities Exposed to a Fluctuating Thermal Regime,
W82-02356 1505 5C

Field Studies of the Temperature Regime and Stress State of the Concrete in Arch Dams Subjected to Various Methods of Cooling,
W82-02387 1505 8A

Structural Characteristics of Algal Communities in Thermal Altered Artificial Streams,
W82-02399 1505 5C

Effect of Pembroke Power Station on the Temperatures in Milford Haven, Wales,
W82-02406 1505 5C

Chironomidae (Diptera) of Baldwin Lake, Illinois, a Cooling Reservoir,
W82-02620 1506 2H

Coupled Heat and Water Flows Around Buried Cables,
W82-02680 1506 2G

On-Site Investigations of the Contact Zone of the Upstream Face of the Concrete Dam on the Ust-Ilim Hydroelectric Station,
W82-02773 1506 8A

An Aerial Technique for Assessing the Impact of Cooling Water Discharges on Receiving Water,
W82-03016 1507 7B

Evaluation of Temperature Effects in Aerated Biotreaters,
W82-03140 1507 5D

Combined Effects of Biological Solids Retention Time and Temperature on the Growth Parameters of Activated Sludge,
W82-04021 1509 5D

Temperature Effects on Biostabilization of Leachate,
W82-04044 1509 5D

Effect of Temperature on Heterotrophic Glucose Uptake, Mineralization, and Turnover Rates in Lake Sediments,
W82-04466 1510 2H

Several Plume Flows in Pure and Saline Water at Its Density Extremum,
W82-05088 1511 2E

Controlled Nucleation and Quasi-Ordered Growth of Ice Crystals From Low Temperature Electrolyte Solutions,
W82-05123 1511 2C

Influence of Temperature on the Anaerobic Acidification of Glucose in a Mixed Culture Forming Part of a Two-Stage Digestion Process,
W82-05240 1511 5D

Biological Monitoring. Part V - Preference and Avoidance Studies,
W82-05340 1511 5C

Ammonia and Total Kjeldahl Nitrogen Removal in Aerated Lagoons,
W82-05420 1511 5D

The Effects of Temperature on the Biochemical Reaction Rates of the Activated Sludge Process,
W82-05431 1511 5D

Influence of Temperature and Time of Incubation on the Estimation of Bacterial Numbers in Tropical Surface Waters,
W82-06037 1512 5A

The Influence of Transient Temperature Changes on the Biodegradation of Nitrilotriacetic Acid in the Activated Sludge Process,
W82-06193 1512 5D

Determination of Reaction Rate Constant and Temperature Coefficient Constant for Dadar Sewage, Bombay,
W82-06438 1512 5D

Recovery of Protein and Oil from Fishery Bloodwater Waste, Effect of pH and Temperature,
W82-06655 1512 5D

TEMPERATURE GRADIENT
The Thermal Response of Lake Ohrid, Yugoslavia to Meteorological Conditions,
W82-02342 1505 2H

A Note on the Development of the Thermocline in Temperate Lakes,
W82-03622 1508 2H

TEMPORAL DISTRIBUTION
Time Distribution of Clock Hour Rainfall,
W82-01402 1503 2A

Recent Acidification of Precipitation in North America,
W82-01514 1503 5B

Zooplankton Abundance and Diversity in Central Florida Grass Carp Ponds,
W82-01520 1503 2H

Physical Variability and Phytoplankton Communities IV. Temporal Changes in the Phytoplankton Community of a Physically Variable Lake,
W82-03229 1507 2H

Downcore Variation in Sediment Organic Nitrogen,
W82-05124 1511 2H

Variations in Moisture Deficits over the Maize-Growing Region of South Africa II: Temporal Aspects,
W82-05900 1511 2B

TENNESSEE

Geologic, Hydrologic and Chemical Data From Test Wells in the Dickson Area, Tennessee,
W82-00090 1501 7C

Water Level Data for Wells in and Near Burial Ground 3, Oak Ridge National Laboratory, Tennessee, 1975-1979,

Trace Metal Geochemistry in Sediments from the Miramichi Estuary, New Brunswick,
W82-00236 1501 5A

Trace Element Concentrations Over Midlake Michigan as a Function of Meteorology and Source Region,
W82-00550 1502 5B

Trace Element Inputs From a Coal Burning Power Plant to Adjacent Terrestrial and Aquatic Environments,
W82-00557 1502 5B

Effect of Leachate Flow Rate on Metal Migration Through Soil,
W82-00565 1502 5E

Trace Element Accumulation, Movement, and Distribution in the Soil Profile From Massive Applications of Sewage Sludge,
W82-00640 1502 5E

Simultaneous Determination of Iron, Cadmium, Zinc, Copper, Nickel, Lead, and Uranium in Seawater by Stable Isotope Dilution Spark Source Mass Spectrometry,
W82-00786 1502 5A

Comparison of Methods for the Determination of Trace Elements in Seawater,
W82-01086 1502 5A

Ferromanganese Nodules from Lake Ontario (Bay of Quinte): Minor Element Geochemistry,
W82-01143 1503 2H

Soluble Element Concentrations and Complexation in Southeastern Lake Michigan,
W82-01147 1503 2H

Preconcentration for Trace Element Determination in Aqueous Samples,
W82-01574 1503 5A

Model of Trace-Metal Partitioning in Marine Sediments,
W82-02824 1506 5B

Minor - Element Distribution in Mineral and Thermal Waters (Repartition des Elements Traces dans les Eaux Thermo-Minerals),
W82-03541 1508 2F

Trace Elements in the Hydrologic Cycle of a Forest Ecosytem,
W82-03690 1508 5B

Determination of Trace Elements in Seawater by Neutron Activation Analysis and Electrochemical Separation,
W82-04530 1510 5A

Pilot Field Studies of FGD Waste Disposal at Louisville Gas and Electric,
W82-05066 1511 5E

Salt and Trace Element Composition of the Water of Lake Malinovoye (Altai Territory): as a Habitat of Artemia Salina,
W82-05455 1511 2H

Analysis of Geothermal Waters by Spark Source Mass Spectrometry,
W82-06464 1512 5A

A Study of Selected Great Lakes Coastal Marshes,
W82-06570 1512 5A

TRACE LEVELS

Identification of Organic Compounds in a Mutagenic Extract of a Surface Drinking Water by a Computerized Gas Chromatography/Mass Spectrometry System (GC/MS/COM),
W82-00256 1501 5A

Trace Constituents in Cloud Water, Rainwater and Aerosol Samples Collected near the West Coast of India During the Southwest Monsoon,
W82-00676 1502 2B

Extraction-Spectrophotometric Determination of Sub-Microgram Amounts of Nitrite Using 4-Nitroaniline and Naphth-1-Ol,
W82-03123 1507 5A

Trace Analyses for Wastewaters,
W82-03639 1508 5A

TRACE METALS

Characterization of Soluble and Colloidal-Phase Metal Complexes in River Water by Ultrafiltration. A Mass-Balance Approach,
W82-00480 1501 5A

Toxicity and Ecological Significance of Trace Elements in Aquatic Environments,
W82-00498 1501 5B

Monitoring Trace Amounts of Cadmium in Natural Waters,
W82-00516 1502 5A

Trace Metal Catalysis in Aquatic Environments,
W82-00629 1502 5B

Trace Metal Fluxes to Nearshore Long Island Sound Sediments,
W82-01040 1502 5B

Trace Metal Mineral Equilibria in Lake Erie Sediments,
W82-01191 1503 2H

Determination of Labilities of Soluble Trace Metal Species in Aqueous Environmental Samples by Anodic Stripping Voltammetry and Chelex Column and Batch Methods,
W82-01229 1503 5A

Determination of Free Metal Ion Concentrations Using Bioassays,
W82-01821 1504 5A

Simultaneous Determination of Trace Metals in Sewage and Sewage Effluents by Inductively Coupled Argon Plasma Atomic Emission Spectrometry,
W82-01828 1504 5A

Inorganic Chemistry of Particulate Matter from the Nearshore Zone of Lake Michigan,
W82-01959 1504 2H

Variations in Trace Metal Content of the Mussel Choromytilus Meridionalis (Kr.) with Season and Sex,
W82-01969 1504 5A

An Analysis of the Aquatic Macrophyte, Myriophyllum Exalbescens, as an Indicator of Metal Contamination of Aquatic Ecosystems near a Base Metal Smelter,
W82-02016 1504 5A

Seasonal Variation in the Trace Metal Content of Mytilus Edulis,
W82-02312 1505 5C

Sources of Twelve Trace Metals in Antarctic Snows Determined by Principal Component Analysis,
W82-02378 1505 5B

Discussion of Trace Metals in the Waters of a Partially-Mixed Estuary,
W82-02542 1505 2L

Kinetics of Trace Metal Partitioning in Model Anoxic Marine Sediments,
W82-02820 1506 5B

Trace Metal Speciation in the Freshwater and Estuarine Regions of the Yarra River, Victoria,
W82-03387 1507 5B

Study of the Transfer of Cd, Pb, Cu, and Zn in Neritic and Estuarine Trophic Chains - I. State in the Internal Estuary of the Loire (France) During the Summer of 1978. (Etude du Transfert de Cd, Pb, Cu et Zn dans les Chaines Trophiques Neritiques et Estuariennes - I. Etat dans l'Estuaire Interne de la Loire (France) au Cours de l'Ete 1978),
W82-03492 1508 5B

Speciation of Trace Di- and Triorganotins in Water by Ion-Exchange HPLC-GFAA,
W82-04037 1509 5A

Sedimentation Rates and Depositional Processes in Lake Superior from Pb210 Geochronology,
W82-04380 1510 2J

Selected Trace Metals in the Upper St. Johns River and Their Land Use Relationships,
W82-04718 1510 5B

Mytilus Californianus as a Bioindicator of Trace Metal Pollution: Variability and Statistical Considerations,
W82-04776 1511 5A

Determination of Trace Metals in Estuarine Sediments by Graphite-Furnace Atomic Absorption Spectrometry,
W82-04893 1511 5A

Anthropogenically Derived Changes in the Sedimentary Flux of Mg, Ni, Cu, Zn, Hg, Pb, and P in Lough Neagh, Northern Ireland,
W82-05145 1511 5B

Metal Surveys in South African Estuaries. II. Knysna River,
W82-05897 1511 5B

Metal Surveys in South African Estuaries. I. Swartkops River,
W82-05898 1511 2B

Trace Metal Relationships at the Sediment-Water Interface,
W82-06362 1512 2K

Metal Surveys in South African Estuaries: III. Hartenbos, Little Brak and Great Brak Rivers,
W82-06387 1512 5B

Metal Surveys in South African Estuaries: II. Knysna Estuary,
W82-06388 1512 2L

The Adsorption of Cu, Mn, and Zn by Iron Oxyhydroxide in Model Estuarine Solutions,
W82-06668 1512 2L

Mechanisms for Trace Metal Enrichment at the Surface Microlayer in an Estuarine Salt Marsh,
W82-06975 1512 5A

TRACERS

Carbon Isotopes as Indicators of the Source and Fate of Carbon in Rivers and Estuaries,
W82-00033 1501 5B

Chemical Indicators of Organic River Sources in Rivers and Estuaries,
W82-00035 1501 5B

The Use of Na/Cl Ratios to Trace Solute Sources in a Semiarid Zone,
W82-00601 1502 7B

Groundwater Contamination by Sanitary Landfill Leachate and Domestic Wastewater in Carbonate Terrain: Principal Source Diagnosis, Chemical Transport Characteristics and Design Implications,
W82-01223 1503 5B

An Approach to Determining Pathways and Residence Time of Groundwaters: Dual Radiotracer Dating,
W82-01348 1503 2F

Simple Retention Time Analysis in Trickling Filters Using Conductivity,
W82-01876 1504 5D

Characterization of Oil Spills on Inland and Estuarine Waters,
W82-02393 1505 5B

Radiotracer Evaluation of Groundwater Dispersion in a Multi-Layered Aquifer,
W82-02870 1506 2F

A Portable Apparatus for the Measurement of Rate of Flow by the Lithium-Tracer Method,
W82-03428 1508 7B

Hydrological Studies Possible with Radionuclides of Bomb-Test, Primordial and Natural Origin to Complement Investigations Using Manufactured Radiotracers,
W82-03836 1509 5B

Detection of Diethylnitrosamine in Nitrite-Rich Water Following Treatment with Rhodamine Flow Tracers,
W82-05022 1511 5B

TRACKING TECHNIQUES

Time-of-Travel Study in the Sebasticook River Basin, Maine,
W82-03982 1509 5B

TRACTIVE FORCES

Tractive Force Design of Vegetated Channels,
W82-00901 1502 4D

Incipient Motion of Sand Particles on Side Slopes,
W82-04368 1510 8D

TRAINING

National Water Data Exchange (NAWDEX) System 2000 Data Retrieval Manual,
W82-00420 1501 10B

Management Training is the Key to Good Operator Performance,
W82-00623 1502 5D

A Multimedia Information Package Regarding Land Application of Wastewater and Sludge: A Study of Training Dissemination Specialists, Evaluation Methods, and Cost-Effectiveness,
W82-02815 1506 5D

TRANSITION FLOW

Experimental Investigation of Accelerated Transitional Flow in Pipes,
W82-06786 1512 8B

TRANSLOCATION

A Case Study of a Chemical Soil: Polychlorinated Biphenyls (PCBS) I. History, Distribution, and Surface Translocation,
W82-06865 1512 5B

TRANSMISSIVITY

Aquifer Parameter Identification with Optimum Dimension in Parameterization,
W82-00131 1501 2F

The Development of Methods for Determining Aquifer Characteristics,
W82-00827 1502 2F

A Method for Estimating Recharge and Boundary Flux from Groundwater Level Observations,
W82-00985 1502 2F

A Comparison of the Incomplete Cholesky-Conjugate Gradient Method with the Strongly Implicit Method as Applied to the Solution of Two-Dimensional Groundwater Flow Equations,
W82-01315 1503 2F

A Formula for Estimating Fissure Transmissivities from Steady-State Injection-Test Data,
W82-02292 1505 8E

Water Resources of the Kisatchie Well-Field Area Near Alexandria, Louisiana,
W82-02480 1505 7C

Geoelectric Soundings for Predicting Aquifer Properties,
W82-02619 1506 2F

Determination of Aquifer Parameters from Large-Diameter Dug Well Pumping Tests,
W82-02917 1506 2F

Use of Longitudinal Conductance in Estimating Transmissivity of Granular Aquifers in Northern Missouri,
W82-03957 1509 2F

Deep Well Disposal of Secondary Effluent in Dade County Florida,
W82-04442 1510 5E

Results of Deep-Well Injection Testing at Mulberry, Florida,
W82-05224 1511 5B

Determination of Aquifer Parameters Using Regression Analysis,
W82-05734 1511 2F

Identification of Aquifer Transmissivities: The Comparison Model Method,
W82-06859 1512 2F

TRANSPARENCY

Prediction Model by Grouping Method of Data Handling (GMDH) for Effluent Quality from Sewage Treatment Plant - Prediction Model of Transparency of Effluent for Automatic Control,
W82-04058 1509 5D

Primary Productivity and Nutrients in the Sediment Retention Basin of Lake Monroe,
W82-06470 1512 5C

TRANSPIRATION

Transpiration, Stomatal Conductance, and Photosynthesis of Tomato Plants With Various Proportions of Root System Supplied With Water,
W82-00504 1502 2I

Leaf and Environmental Parameters Influencing Transpiration: Theory and Field Measurements,
W82-00979 1502 2D

The Effect of Leaf Water Status on Stomatal Activity, Transpiration and Nitrate Reductase of Sweet Potato,
W82-03793 1509 2D

A Comparison of the Structure, Primary Productivity, and Transpiration of Cypress Ecosystems in Florida,
W82-03885 1509 2I

Spacing and Transpiration of Various Sized Clumps of a Desert Grass, Hilaria Rigida,
W82-04295 1510 2D

Improved Water and Nutrient Management Through High-Frequency Irrigation, Vol. 3: Determining the Transpiration Rate of Peach Trees Under Two Trickle Irrigation Regimes,
W82-05312 1511 3F

Transpirational Supply and Demand: Plant, Soil, and Atmospheric Effects Evaluated by Simulation,
W82-06320 1512 2D

Ecological Optimality in Water-Limited Natural Soil-Vegetation Systems 1. Theory and Hypothesis,
W82-06321 1512 2I

TRANSPIRATION CONTROL

Reduced Transpiration and Increased Water Efficiency by Diuron in Corn (Zea Mays),
W82-00196 1501 2D

TRANSPORTATION

Fresh-Water Transport by Sea,
W82-04861 1511 6D

A Case for Regional Sludge Management,
W82-06993 1512 5E

TRAP EFFICIENCY

Sediment Trap Dynamics and Calibration: A Laboratory Evaluation,
W82-00104 1501 7B

Field Assessment of Sediment Traps,
W82-00105 1501 7B

A Review on Sediment Traps in Aquatic Environments,
W82-01020 1502 7B

Sediment and Nutrient Trap Efficiency of a Small Flood-Detention Reservoir,
W82-01471 1503 4A

A New Sediment Trap Efficiency Curve for Small Reservoirs,
W82-03086 1507 8A

Trap Efficiency Study, Highland Creek Flood Retarding Reservoir Near Kelseyville, California, Water Years 1966-77,
W82-05852 1511 2J

TRAVERSE CITY

Direct Filtration Studies at Traverse City Water Treatment Plant,
W82-00945 1502 5F

Down to Earth Leak Detection,
W82-03561 1508 5F

TRAWLING

Effect of Otter Prawn Trawling on the Macrobenthos of a Sandy Substratum in a New South Wales Estuary,
W82-00677 1502 5C

Hydroacoustic Assessment of Pelagic Fish Stocks: A Potential New Management Tool,
W82-06373 1512 8I

TREATED MUNICIPAL WASTEWATER

Effects of Treated Municipal Wastewater on the Hepatic, Xenobiotic, and Steroid Metabolism in Trout,
W82-05406 1511 5C

TREATIES

Review of Treaties on Consumptive Utilization of Waters of Lake Victoria and Nile Drainage System,
W82-05987 1512 6E

TREATMENT PLANTS

Advanced Wastewater Plant is Energy Saver,
W82-01177 1503 5D

Operation Reports: East Bay Municipal District (SD No 1), California.
W82-02707 1506 5D

Water Conservation at Wastewater Treatment Plants,
W82-06512 1512 3C

TREES

Clonal Variations in the Water Relations of Red Osier Dogwood During Cold Acclimation,
W82-00839 1502 2I

Environmental and Physiological Control of Water Flux Through Pinus Contorta,
W82-01827 1504 2D

Water Use Efficiency in Douglas Fir: The Nature of Plant Response to Selected Environmental Variables,
W82-03019 1507 2I

Evaporation from Vegetation in Landscapes Developing Secondary Salinity Using the Ventilated Chamber Technique, III. Evaporation from a Pinus Radiata Tree and the Surrounding Pasture in an Agroforestry Plantation,
W82-03213 1507 2D

Water Stress of Four Windbreak Tree Species During Soil Drying,
W82-06793 1512 2I

TRENCHES

Trenching of Digested Sludge,
W82-00974 1502 5E

Earth-Filled Slurry Walls Provide Economical Seepage Control,
W82-03256 1507 8D

Entrenchment of Sewage Sludge--A Disposal-Use Alternative,
W82-03353 1507 5E

TRIAZINE HERBICIDES

Herbicides in Kansas Waters--Evaluations of the Effects of Agricultural Runoff and Aquatic Weed Control on Aquatic Food Chains,
W82-06304 1512 5C

TRIBUTARIES

Drainage Network Structure and the Diameter-Magnitude Relation,
W82-01308 1503 2A

TRICHLOROETHYLENE

Tying Up TCE,
W82-01866 1504 5G

TRICKLE IRRIGATION

Laser Drip Irrigation.
W82-00771 1502 3F

Trickle Irrigation Lateral Design on Sloping Fields,
W82-01537 1503 8C

Significant Features of Emitter Flushing Mode Characteristics,
W82-01576 1503 3F

Influence of Trickle and Sprinkle Irrigation on Golden Delicious Apple Quality,
W82-02001 1504 3F

Subsurface Trickle Irrigation Mangement with Multiple Cropping,
W82-04356 1510 3F

Improved Water and Nutrient Management Through High-Frequency Irrigation. Vol. 3: Determining the Transpiration Rate of Peach Trees Under Two Trickle Irrigation Regimes,
W82-05312 1511 3F

Soil Moisture Flow for Point and Line Sources - Computer Programs for Linearized Solutions,
W82-05928 1512 2G

Effluent in Trickle Irrigation of Cotton in Arid Zones,
W82-06333 1512 3C

Responses of 6-Year-Old Diamond Grapevines to the Change from Sprinkler to Trickle Irrigation and to the Time and Method of Applying Nitrogen,
W82-06492 1512 3F

TRICKLING FILTERS

Simple Retention Time Analysis in Trickling Filters Using Conductivity,
W82-01876 1504 5D

Coupled Trickling Filter-Rotating Biological Contactor Nitrification Process,
W82-02315 1505 5D

Efficiencies of Advanced Waste Treatment Obtained with Upgraded Trickling Filters,
W82-03285 1507 5D

Reliability and Stability of Trickling Filter Processes,
W82-04784 1511 5D

TRIHALOMETHANE

Trihalomethane Formation in Water Treatment Plants in North Carolina,
W82-06158 1512 5F

TRIHALOMETHANE (THM)

Trihalomethane Formation from Humic Materials in Chlorinated Reclaimed Wastewater,
W82-03517 1508 5D

TRIHALOMETHANES

An Alternative Solution to the THM Problem,
W82-00072 1501 5F

Temporal Variations in Trihalomethane Content of Drinking Water,
W82-00255 1501 5A

Ozone Treatment of Potable Water--Part 2,
W82-00452 1501 5F

A Survey of Trihalomethanes in the Drinking Water System of Murjreesboro, Tennessee,
W82-01817 1504 5B

Nitrates, Chlorates and Trihalomethanes in Swimming Pool Water,
W82-01835 1504 5A

Trihalomethane Formation in North Carolina Drinking Waters,
W82-02195 1505 5B

Bacteria from a Suspended Growth System as Organic Precursors to the Formation of Trihalomethanes,
W82-02806 1506 5F

Removing Trace Organics from Drinking Water Using Activated Carbon and Polymeric Adsorbents,
W82-02987 1506 5F

Trihalomethanes in Drinking Water,
W82-03447 1508 5F

Kinetics of Trihalomethane Formation in Lyophilized Potomac Water,
W82-03596 1508 5F

Algae as Sources of Trihalomethane Precursors,
W82-04149 1509 5B

Removal of Organics by Reactivated Carbon,
W82-04159 1509 5F

The Identification and Treatment of Bromides and Trihalomethanes in Potable Water from the Pearl River at Jackson, MS: Evaluation of Toxicity on Species Diversity,
W82-04413 1510 5A

Control of Trihalomethanes in Drinking Water,
W82-04425 1510 5F

Factors Influencing Formation of Trihalomethanes in Drinking Water with Special Reference to Swedish Conditions,
W82-04826 1511 5F

Preliminary Screening of Bacterial Components as Organic Precursors to the Formation of Trihalomethanes,
W82-04957 1511 5F

Reactivity of Halogens with Aqueous Micropollutants: A Mechanism for the Formation of Trihalomethanes,
W82-05678 1511 5F

Economic Impact Study of R81-11 Trihalomethane Standards for Public Water Supplies,
W82-06098 1512 5F

TRIHALOMETHANES *CHLORINATION

Removing Trihalomethanes from Drinking Water,
W82-00953 1502 5F

TRINITROTOLUENE

Effluent Analysis of Wastewater Generated in the Manufacture of 2,4,6-Trinitrotoluene, 2. Determination of a Representative Discharge of Ether-Extractable Components,
W82-05412 1511 5A

Effluent Analysis of Wastewater Generated in the Manufacture of 2,4,6-Trinitrotoluene. 1. Characterization Study,
W82-05413 1511 5A

TRITICALE

Effect of Irrigation on the Stability of Leaf Size of Wheat, Triticale and Barley,
W82-05972 1512 2I

TRITIUM

Application of Immobilized Hydrogenase for the Detritiation of Water,
W82-00768 1502 5D

Possibility of Using Tritium for Studying Global Circulation of Atmospheric Moisture,
W82-00863 1502 2A

Studies on Unsaturated Zone Hydrology and Radionuclide Migration at a Shallow-Land Burial Site,
W82-01172 1503 5B

Penetration and Distribution of Tritiated Water in Soils of a Lysimeter,
W82-01886 1504 2G

Infiltration Rates of Rainwaters in Sri Lanka Measured by Using Tritium Tracer,
W82-05941 1512 2F

TROPHIC LEVEL

Occurrence of Aphanomyces Ovidestruens, a Fungus Parasitic on Copepods, in Two Eutrophic Lakes,
W82-00304 1501 2H

Comparison of a Few Systems for the Determination of Saprobic and Trophic Degree on the Basis of Plankton Data,
W82-00664 1502 2H

The Effect of Continuous Advanced Wastewater Treatment by the City of Spokane on the Trophic Status of Long Lake, WA During 1979.
W82-01070 1502 2H

An Assessment of the Trophic Status of Deer, Loon, and Diamond Lakes,
W82-01072 1502 2H

Relationships Between Nannoplankton and Lake Trophic Status,
W82-01640 1503 5C

Quantification of the Lake Trophic Typologies of Naumann (Surface Quality) and Thienemann (Oxygen) with Special Reference to the Great Lakes,
W82-02004 1504 2H

Trophic Structure and Energy Flow in a Texas Pond,
W82-02397 1505 2H

On the Trophic Status and Conservation of Kashmir Lakes,
W82-02412 1505 5C

Primary Productivity and Trophic Status of a Kashmir Himalayan Lake,
W82-02414 1505 2H

Nutrient Loading - Trophic State Relationships in Florida Lakes,
W82-02811 1506 5B

Blue-Green Algal Ammonia Uptake in Hypertrophic Prairie Lakes,
W82-02914 1506 2H

Ammonia Volatilization in a Hypertrophic Prairie Lake,
W82-02915 1506 2H

Current Use and Technology of Landsat Mss Data for Lake Trophic Classification,
W82-03755 1509 7B

Input/Output Models as Decision Aids for Lake Restoration,
W82-03924 1509 5G

Seston of the Kremenchug Reservoir and Quantitative Proportions of Its Components,
W82-05029 1511 2H

Interrelationships in the Development of the Three Structural Components of the Plankton in the Off-Bottom Zone of Lakes,
W82-05451 1511 2H

Evaluation of Fourteen Trophic State Indices for Phytoplankton of Indiana Lakes and Reservoirs,
W82-05579 1511 2H

Using Differences Among Carlson's Trophic State Index Values in Regional Water Quality Assessment,
W82-06625 1512 2H

TROPIC ZONE

Factors of the Chemical Composition of Seepage and Groundwaters in the Intertropical Zone (West Africa),
W82-03543 1508 2K

TROPICAL CYCLONES

Effects of Tropical Cyclone Wally in Southeast Viti Levu, Fiji, Easter 1980,
W82-00670 1502 2A

Meteorology of Important Rainstorms in the Colorado River and Great Basin Drainages,
W82-03047 1507 2B

The Significance of Tropical Cyclone Rainfall in the Water Supply of South Florida,
W82-03821 1509 2B

TROPICAL REGIONS

Growth and Nitrogen Fixation of Aeschynomene Under Water Stressed Conditions,
W82-00758 1502 2I

Atmospheric Water Content Over the Tropical Pacific Derived from the Nimbus-6 Scanning Microwave Spectrometer,
W82-01004 1502 7B

Studies of the Hydrobiology of a Tropical Lake in Northwestern Queensland. II. Seasonal Changes in Thermal and Dissolved Oxygen Characteristics,
W82-032'8 1507 2H

Secondary Benthic Production in a Tropical Island Stream,
W82-06933 1512 5C

TROUT

Residues in Cutthroat Trout (Salmo Clarki) and California Newts (Tarichia Torosa) From a Lake Treated With Technical Chlordane,
W82-00558 1502 5C

Toxicity of Five Forest Insecticides to Cutthroat Trout and Two Species of Aquatic Invertebrates,
W82-00590 1502 5C

Evaluation of an Automatic System for Detection of Toxic Substances in Surface Water Using Trout,
W82-00855 1502 5A

Chlorinated Hydrocarbons as a Factor in the Reproduction and Survival of Lake Trout (Salvelinus Namaycush) in Lake Michigan.
W82-01079 1502 5C

Evidence of Natural Reproduction by Planted Lake Trout in Lake Michigan,
W82-01194 1503 8I

Influence of PCBs in Water on Uptake and Elimination of DDT and DDE by Lake Trout,
W82-01342 1503 5C

Mercury in the Muscle Tissue of Fish from Three Northern Maine lakes,
W82-01459 1503 5B

Increased Toxicity of Ammonia to Rainbow Trout (Salmo Gairdneri) Resulting from Reduced Concentrations of Dissolved Oxygen,
W82-01629 1503 5C

Effect of an Aerial Application of Carbaryl on Brook Trout (Salvelinus Fontinalis),
W82-01818 1504 5C

Urban Aquaculture of the Rainbow Trout (Salmo gairdneri),
W82-02812 1506 8I

Hydroacoustic Surveys of Fish Abundance and Distribution in Twin Lakes, Colorado,
W82-02977 1506 6G

Results of Fisheries Investigations at Twin Lakes, Colorado; 1973-76,
W82-02984 1506 6G

Response of Trout Hepatic Mixed-Function Oxidases to Experimental Feeding of Ten Known or Possible Chlorinated Environmental Contaminants,
W82-03609 1508 5C

Evaluation of a Small Diameter Baffled Culvert for Passing Juvenile Salmonids,
W82-04075 1509 8I

Elimination of Hexachlorobenzene (HCB) by Rainbow Trout (Salmo Gairdneri), and an Examination of Its Kinetics in Lake Ontario Salmonids,
W82-05195 1511 5B

Life History and Habitat Utilization of Cutthroat Trout (Salmo Clarki) in a Headwater Stream on the Olympic Peninsula, Washington,
W82-05306 1511 5C

Kraft Pulp Mill Effluent Components Cause Liver Dysfunction in Trout,
W82-05377 1511 5C

Effects of Treated Municipal Wastewater on the Hepatic, Xenobiotic, and Steroid Metabolism in Trout,

UTILITY EXTENSION
Updating Antiquated City Water Systems,
W82-03293 1507 5F

VAALHARTS IRRIGATION PROJECT
Irrigation, Crop Yield and Drainage at the Vaalharts Irrigation Scheme: 3. The Influence of Salinization Above a Shallow Ground Water Table on the Yield of Wheat and Other Crops (In Afrikaans),
W82-04359 1510 2G

VACUUM
Design, Fabrication and Start-Up of a 25,000 Gallons per Day Absorption Freezing Vapor Compression Desalination Pilot Plant,
W82-04724 1510 3A

VACUUM FILTRATION
Vacuum Filtration of Metal Hydroxide Sludges,
W82-00976 1502 5D

Automatic Control of Sludge Conditioning and Vacuum Filtration,
W82-04589 1510 5E

Vacuum Filtration of Septage,
W82-04710 1510 5D

VACUUM SEWERS
Vacuum Sewers--The Future for Sewage Collection,
W82-03394 1507 5G

VADOSE WATER
The Fate of Pollutants in the Vadose Zone, Monitoring Methods and Case Studies,
W82-03735 1508 5B

Carbonate Geochemistry of Vadose Water Recharging Limestone Aquifers,
W82-04526 1510 2F

Vadose Zone Permeability Tests: Summary,
W82-06301 1512 2G

Vadose Zone Permeability Tests: Steady State Results,
W82-06302 1512 2G

Vadose Zone Permeability Tests: Unsteady Flow,
W82-06303 1512 2G

VALVES
The Case for Specifying AWWA Butterfly Valves,
W82-00213 1501 8C

VANADIUM
Determination of Germanium, Vanadium, and Titanium by Carbon Furnace Atomic Absorption Spectrometry,
W82-01836 1504 5A

VAPOR COMPRESSION
Absorption Freezing Vapor Compression - Process Selection, Pilot Plant Design, Process Economics,
W82-06125 1512 3A

VAPOR COMPRESSION DISTILLATION
Treatment of Cooling Tower Blowdown,
W82-03126 1507 5D

Selecting Energy-Efficient Wastewater Treatment Systems,
W82-04904 1511 5D

VAPOR COMPRESSION EVAPORATION
Operating Characteristics of Various Combinations of Working Substances and Feeds in the Schroeder Desalting Process,
W82-02105 1505 3A

VAPOR PRESSURE
Humidity Measurement by Infrared Thermometry,
W82-05611 1511 7B

VARIABILITY
Methanogenesis in Freshwater Sediments: Inherent Variability and Effects of Environmental Contaminants,
W82-01825 1504 5C

A Dynamic Methodology for Characterizing and Monitoring Estuarine Ecosystems,
W82-02167 1505 7A

Evaluating Stream Standard Violations Using a Water Quality Data Base,
W82-04286 1510 5A

Variation in Fecal Pollution Indicators Through Tidal Cycles in the Fraser River Estuary,
W82-05384 1511 5A

Rainfall and Atmospheric Circulation During Drought Periods and Wetter Years in West Africa,
W82-06211 1512 2B

VARIATION COEFFICIENTS
Variance Estimates for a Dynamic Eutrophication Model of Saginaw Bay, Lake Huron,
W82-01917 1504 2H

VEGETABLE CROPS
Yield and Water Use of Vegetable Crops with Seepage and Drip Irrigation Systems,
W82-00544 1502 3F

Ratio Between Evapotranspiration of Irrigated Crops from Floating Lysimeters and Class A Pan Evaporation,
W82-01050 1502 2D

Factors Affecting Radionuclide Availability to Vegetables Grown at Los Alamos,
W82-01109 1503 5B

Fruit, Vegetable, and Grain Processing Wastes,
W82-06918 1512 5D

VEGETATION
SEASAT SAR Response from Water Resources Parameters,
W82-00101 1501 7B

A Model of Natural and Man-Induced Changes in Open Freshwater Wetlands on the Massachusetts Coastal Plain,
W82-00397 1501 2I

The Changing Status of Reedswamp in the Norfolk Broads,
W82-00691 1502 5C

Water Status of Soil and Vegetation in a Shortgrass Steppe,
W82-00761 1502 2I

Quantitative Assessment of Tidal Wetlands Using Remote Sensing,
W82-00781 1502 7B

Vegetational Analysis of Big Run Bog, A Nonglaciated Sphagnum Bog in West Virginia,
W82-00992 1502 2I

Vegetation Selection and Management for Overland Flow Systems,
W82-01500 1503 5E

The Patterned Mires of the Red Lake Peatland, Northern Minnesota: Vegetation, Water Chemistry, and Landforms,
W82-02300 1505 2H

The Utilization of Grass Carp, Ctenopharyngodon Idella Val., for Hydrilla Control in Lake Baldwin, Florida,
W82-05274 1511 4A

Fire and Geomorphic Processes,
W82-06963 1512 2J

VEGETATION EFFECTS
Flow Resistance in Vegetated Waterways,
W82-00152 1501 2E

Tractive Force Design of Vegetated Channels,
W82-00901 1502 4D

The Influence of Plant Communities Upon the Hydrology of Catchments,
W82-00931 1502 2D

Ratio Between Evapotranspiration of Irrigated Crops from Floating Lysimeters and Class A Pan Evaporation,
W82-01050 1502 2D

Estimating Contribution of Overstory Vegetation to Stream Surface Shade,
W82-02301 1505 2I

Water Levels and Losses and Cleaning in Watercourses,
W82-02747 1506 3F

Influence of Vegetation, Rock Cover, and Trampling on Filtration Rates and Sediment Production,
W82-04153 1509 2G

A Review of Catchment Experiments to Determine the Effect of Vegetation Changes on Water Yield and Evapotranspiration,
W82-05647 1511 4C

Forest Management for Increased Water Yield--How Useful in Southern Alberta,
W82-05760 1511 3B

Potential Sediment Production Within Vegetative Communities in Oregon's Blue Mountains,
W82-05867 1511 2J

VEGETATION REGROWTH
Plant Improvement for Semi-Arid Rangelands: Possibilities for Drought Resistance and Nitrogen Fixation,
W82-05610 1511 3F

Effects of Flooding Upon Woody Vegetation Along Parts of the Potomac River Flood Plain,
W82-06683 1512 2E

VELOCITY

An Integral Transform Method for the Linearized Boussinesq Groundwater Flow Equation,
W82-01984 1504 2F

Measuring the Velocity of Water in a Paddled Flocculator,
W82-04102 1509 5F

Velocity Dependence of Phosphorus Transport in a Packed-Bed Reactor,
W82-05335 1511 5D

VELOCITY COEFFICIENTS

Velocity Profiles with Suspended Sediment,
W82-02581 1505 2J

VELOCITY DISTRIBUTION

Vertical Velocity Profiles in Stratified Flows,
W82-01171 1503 8B

Velocity Distributions Under Floating Covers,
W82-05562 1511 2E

VENEZUELA

Annual Variations in Abundance of Zooplankton in Lake Valencia (Venezuela),
W82-06765 1512 5C

VENTILATION

Methane in Water Wells,
W82-05252 1511 5F

Major Factors in Sewer Ventilation,
W82-06462 1512 8A

VERDE RIVER

Reconstructed Stream Flow for the Salt and Verde Rivers from Tree-Ring Data,
W82-04340 1510 2E

VERMONT

Water Resources Data for New Hampshire and Vermont, Water Year 1980.
W82-00076 1501 7C

Vinyl Lined Asbestos Cement Pipe Problems, Operator Aspects,
W82-02898 1506 5B

Experiments in Improving Rural Water Supplies,
W82-04350 1510 5F

A Sensitivity and Error Analysis Framework for Lake Eutrophication Modeling,
W82-05739 1511 5C

VERNA

Hydrogeologic Data from Test Drilling near Verna Beach, Florida, 1978,
W82-00424 1501 2F

VERTICAL DISTRIBUTION

A Two-Dimensional Numerical Model of the Vertical Circulation of Tides in the St. Lawrence Estuary,
W82-03386 1507 2L

VERTICAL TUBE EVAPORATION

Operating Characteristics of Various Combinations of Working Substances and Feeds in the Schroeder Desalting Process.
W82-02105 1505 3A

VIBRATIONS

A Mechanism for the formation of Large Icebergs,
W82-04798 1511 2C

VIBRIO

Incidence of Vibrio Alginolyticus and Bacteria of Sanitary Significance in the Bering Sea,
W82-00490 1501 5A

A Note on the Fate of El Tor Cholera and Other Vibrios in Percolating Filters,
W82-00566 1502 5D

Gauze Filtration and Enrichment Procedures for Recovery of Vibrio Cholerae From Contaminated Waters,
W82-01815 1504 5A

Uptake of Vibrio Cholerae Biotype Eltor from Contaminated Water by Water Hyacinth (Eichornia Crassipes),
W82-03179 1507 5B

VIBRIO CHOLERAE

Influence of Salinity and Organic Nutrient Concentration on Survival and Growth of Vibrio Cholerae in Aquatic Microcosms,
W82-06534 1512 5C

Survival of Vibrio Cholerae and Escherichia Coli in Estuarine Waters and Sediments,
W82-06742 1512 5C

VIBRIO PARAHAEMOLYTICUS

Distribution of Vibrio Parahaemolyticus in Finfish Harvested from Porto Novo (S. India) Environs: A Seasonal Study,
W82-01737 1503 5A

VICTORIA

Terrain, Groundwater and Secondary Salinity in Victoria, Australia,
W82-02046 1504 2F

VIENNA

Design and Operation Interaction--An Example: Main Treatment Plant Vienna,
W82-05356 1511 5D

VILYUY RESERVOIR

The Predicted Content of Organic and Biogenic Matter in the Water of Vilyuy Reservoir and the Extent to Which It Has Been Confirmed,
W82-02080 1504 2H

VIRGIN ISLANDS

Five-Year Plan of the Water Resources Research Center,
W82-05526 1511 6B

VIRGINA

Potentiometric-Surface Map for the Cretaceous Aquifer, Virginia Coastal Plain, 1978,
W82-00727 1502 7C

VIRGINIA

Water Resources of Prince William Forest Park, Virginia,
W82-00026 1501 7C

Kepone in the James River,
W82-00631 1502 5B

Legal Obstacles and Incentives to the Development of Small Scale Hydroelectric Power in Virginia,
W82-00744 1502 6E

Ground Water Problems Virginia Portion Ohio River Basin,
W82-01059 1502 4B

Dendroclimatic Estimates of a Drought Index for Northern Virginia,
W82-02468 1505 2B

Performance of a Large Advanced Waste Treatment Plant,
W82-05251 1511 5D

Virginia Water Resources Research Center Five-Year Plan.
W82-05529 1511 6B

Reliability of On-Site Sewage Disposal Systems in Fairfax County, Virginia,
W82-05812 1511 5D

Policing Demand Through Pricing,
W82-06352 1512 6D

Factors That Affect Use of Direct Filtration in Treating Surface Waters,
W82-06579 1512 5F

York River Destratification: An Estuary-Subestuary Interaction,
W82-06787 1512 2L

Methane Flux in the Great Dismal Swamp,
W82-06840 1512 2H

VIRUS

Positively Charged Filters for Virus Recovery from Wastewater Treatment Plant Effluents.
W82-02338 1505 5A

VIRUSES

Virus Removal in Waste Stabilization Fonds in India,
W82-00121 1501 5D

Influence of Estuarine Sediment on Virus Survival Under Field Conditions,
W82-00199 1501 5A

Method for Recovering Viruses from River Water Solids,
W82-00200 1501 5A

Improved Method and Test Strategy for Recovery of Enteric Viruses from Shellfish,
W82-00219 1501 5A

Evaluation of the Overland Runoff Mode of Land Wastewater Treatment for Virus Removal,
W82-00220 1501 5B

Technique for Determining Total Bacterial Virus Counts in Complex Aqueous Systems,
W82-00222 1501 5A

Concentration of Poliovirus in Water by Molecular Filtration,
W82-00246 1501 5A

Recovery of Indigenous Viruses from Wastewater Sludges, Using a Bentonite Concentration Procedure,
W82-00271 1501 5D

The Effect of Bentonite Clay on Ozone Disinfection of Bacteria and Viruses in Water,
W82-00292 1501 5F

Viral Transport Through Soil Columns Under Conditions of Saturated Flow,
W82-00295 1501 5B

Silicates as Nonspecific Adsorbents of Bacteriophage: A Model for Purification of Water From Viruses,
W82-00350 1501 5F

Application of a Multiple Alginate Filter Method for the Determination of Water Viruses Concentration (Conception D'Une Membrane Filtrante a Base D'Alginate Pour La Concentration Des Virus Hydriques),
W82-00458 1501 5A

Environmental Virology and its Problems,
W82-00505 1502 5A

Evaluation of Various Soil Water Samplers for Virological Sampling,
W82-00572 1502 5A

Relationships Between Environmental Factors, Bacterial Indicators, and the Occurrence of Enteric Viruses in Estuarine Sediments,
W82-00574 1502 5A

Effects of Wastewater Sludge and Its Detergents on the Stability of Rotavirus,
W82-00576 1502 5A

Destruction by Anaerobic Mesophilic and Thermophilic Digestion of Viruses and Indicator Bacteria Indigenous to Domestic Sludges,
W82-00580 1502 5A

1980 Annual Report, Committee on the Assessment of Human Health Effects of Great Lakes Water Quality,
W82-00706 1502 5C

Enteric Viruses in Renovated Water in Manitoba,
W82-01090 1502 5A

A Simple Low Cost Apparatus for Conditioning Large Volumes of Water for Virological Analysis,
W82-01123 1503 5A

Microbiology: Detection, Occurrence, and Removal of Viruses,
W82-01290 1503 5A

Microbiology of Wastewater Treatment,
W82-01291 1503 5D

Mechanism of Enteroviral Inactivation by Ozone.
W82-01482 1503 5D

A Note on the Use of Membrane Faecal Coliform Medium for Enhancing Resolution and Accuracy When Enumerating a Small Plaquing Coliphage,
W82-01507 1503 5A

Survival of Enteroviruses Adsorbed on Glass Microfibers During Postal Transport (Survie de Virus Enteriques Adsorbes sur Microfibre de Verre au Cours d'un Transport Postal),
W82-01637 1503 5A

Development of Immunoenzymatic Methods for Detection and Quantitation of Poliovirus,
W82-02176 1505 5A

Viral Transport to Ground Water at a Wastewater Land Application Site,
W82-02317 1505 3C

Distribution of Ribonucleic Acid Coliphages in Raw Sewage from Treatment Plants in Japan,
W82-02443 1505 5A

Concentration of Virus from Tap Water at Ambient Salt and pH Levels Using Positively Charged Filter Media,
W82-02712 1506 5A

Virus Inactivation in Wastewater Effluents by Chlorine, Ozone, and Ultraviolet Light,
W82-03005 1507 5D

Recovery of Indigenous Enteroviruses from Raw and Digested Sewage Sludges,
W82-03121 1507 5D

Inactivation of Enteroviruses by Ozone,
W82-03208 1507 5F

Evaluating Adsorbent Filter Performance for Enteric Virus Concentrations in Tap Water,
W82-03887 1509 5F

Waterborne Gastroenteritis Due to The Norwalk Agent: Clinical and Epidemiologic Investigation,
W82-03898 1509 5C

Modifications of the Tentative Standard Method for Improved Virus Recovery Efficiency,
W82-04095 1509 5A

Evaluation of the Tentative Standard Method for Enteric Virus Concentration from Large Volumes of Tap Water,
W82-04096 1509 5A

Density Levels of Pathogenic Organisms in Municipal Wastewater Sludge - A Literature Review,
W82-04400 1510 5E

Sewage Sludge Pathogen Transport Model Project,
W82-04403 1510 5A

Possible Waterborne Transmission and Maintenance of Influenza Viruses in Domestic Ducks,
W82-04468 1510 5B

Effects of Chlorine Concentration on the Structure of Poliovirus,
W82-04525 1510 5F

Comparative Disinfection of Poliovirus by Bromine Chloride and Chlorine in a Model Contact Chamber,
W82-04661 1510 5D

Viral Pollution Determination of Superficial Waters (River Water and Sea-Water) from the Urban Area of Barcelona (Spain),
W82-05014 1511 5A

Evaluation of Cell Lines and Immunofluorescence and Plaque Assay Procedures for Quantifying Reoviruses in Sewage,
W82-06735 1512 5A

Evidence That Microorganisms Cause Inactivation of Viruses in Activated Sludge,
W82-06739 1512 5D

Isolation of Enteroviruses from Oxidation Pond Waters,
W82-06750 1512 5D

Reduction of Cytotoxicity in Virus Concentrates from Environmental Samples,
W82-06757 1512 5A

Comparison of Methods for Recovering Indigenous Viruses from Raw Wastewater Sludge,
W82-06890 1512 5A

Microbiology: Detection, Occurrence and Removal of Viruses,
W82-06927 1512 5B

VISAKHAPATNAM BASIN
Groundwater Quality in Visakhapatnam Basin, India,
W82-03552 1508 6D

VISCOSITY
Surface Viscosity of Water,
W82-03501 1508 1A

Viscosity-Controlled Sediment Transport in the Absence of Suspended Load,
W82-04210 1509 2J

VISTULA RIVER
The Plankton of the River Vistula in the Region of Warsaw in the Years 1977-1979,
W82-06021 1512 5A

VITAMINS
Seasonal Variation of Vitamin B12, B12 Analogs, and Phytoplankton in a Long Island Estuary,
W82-02282 1505 2L

VITRIFIED WATER
Complete Vitrification in Pure Liquid Water and Dilute Aqueous Solutions,
W82-03361 1507 1A

VOLATILE ACIDS
Volatile Organic Acids in Lake Water; Their Gas Chromatographic Determination and Ecological Significance,
W82-02720 1506 5A

VOLATILE COMPOUNDS
Analysis of Volatile Organic Compounds in Water, Waste Water and an Industrial Effluent,
W82-04815 1511 5A

VOLATILE ORGANIC COMPOUNDS
Determination of Volatile Organics in Industrial and Municipal Wastewaters,
W82-04396 1510 5A

VOLATILE SOLIDS
Calorific Value of Wastewater Plant Sludges,
W82-04997 1511 5E

VOLATILITY
Detection of Volatile Nitrosamines in Waste Water from Chemical Plants by Combined Capillary Gas Chromatography-Mass Spectrometry,
W82-00856 1502 5A

Volatilization Rates of Intermediate and Low Volatility Chemicals from Water,
W82-04817 1511 5B

Volatilization of Ketones From Water,
W82-05782 1511 5C

VOLCANIC ASH
Toxicity of Mount St. Helens Ash Leachate to a Blue-Green Alga,
W82-00001 1501 5C

Mount St. Helens Volcanic-Ash Fall in the Bull Run Watershed, Oregon, March-June 1980,
W82-00002 1501 5B

Effects of Mount St. Helens Eruption on Selected Lakes in Washington,
W82-00006 1501 2H

VOLCANOES
Toxicity of Mount St. Helens Ash Leachate to a Blue-Green Alga,
W82-00001 1501 5C

Mount St. Helens Volcanic-Ash Fall in the Bull Run Watershed, Oregon, March-June 1980,
W82-00002 1501 5B

Mudflows Resulting From the May 18, 1980, Eruption of Mount St. Helens, Washington,
W82-00003 1501 5B

Channel Conditions in the Lower Toutle and Cowlitz Rivers Resulting From the Mudflows of May 18, 1980,
W82-00004 1501 5B

Effects of the Mount St. Helens Eruption on the Benthic Fauna of the Toutle River, Muddy River, and Pine Creek Drainage Basins, Washington,
W82-00005 1501 5C

Effects of Mount St. Helens Eruption on Selected Lakes in Washington,
W82-00006 1501 2H

Effects of Volcanism on the Glaciers of Mount St. Helens,
W82-00007 1501 2C

The Aftermath at Longview,
W82-00073 1501 5C

Submersible Pumps Help Quell Damage From Mount St. Helens Mudflow.
W82-00909 1502 4D

Sediment Data for Streams Near Mount St. Helens, Washington--Volume 1, 1980 Water-Year Data,
W82-01792 1503 7C

Mt. St. Helens and the Fish,
W82-02508 1505 2J

Initial Microbiological Response in Lakes to the Mt St Helens Eruption,
W82-05125 1511 2H

Chemical Changes of Lakes Within the Mount St. Helens Blast Zone,
W82-05459 1511 5B

Biological Responses on Lakes in the Mount St. Helens Blast Zone,
W82-05519 1511 5C

Effect of Ashfall on Snowmelt Rate at Paradise, Mount Rainier, Washington,
W82-05871 1511 2C

Effects of Suspended Volcanic Sediment on Coho and Chinook Salmon in the Toutle and Cowlitz Rivers,
W82-06706 1512 5C

Impact of Mount St. Helens Eruption on Bacteriology of Lakes in the Blast Zone,
W82-06746 1512 5C

Preliminary Post-Eruption Sediment Budget for the North Fork Toutle River Drainage, June 1980-May 1981,
W82-06970 1512 4D

Sediment Influx to the Toutle River from Erosion of Tephra, May 1980-May 1981,
W82-06971 1512 4D

VOLGA DELTA
Effect of Fertilizers on the Primary and Bacterial Production of Rearing Ponds in the Volga Delta,
W82-02077 1504 2H

VOLGA RIVER
Salinity and Biogenic Material in the North Caspian,
W82-03155 1507 4A

Hypania Invalida in the Volga Resevoirs and Hydrobiological Monitoring,
W82-05331 1511 2H

VOLTA LAKE
Periphyton in the Volta Lake. I. Seasonal Changes on the Trunks of Flooded Trees,
W82-02882 1506 2H

Periphyton in the Volta Lake. II. Seasonal Changes on Wooden Blocks with Depth,
W82-02883 1506 2H

Epidemiology of Human Schistosoma Haematobium Infection Around Volta Lake, Ghana, 1973-75,
W82-05988 1512 5C

VOLTA RIVER
The Role of the Akosombo Dam on the Volta River in Causing Coastal Erosion in Central and Eastern Ghana (West Africa),
W82-06100 1512 2J

VOLTAMMETRY
New High-Performance Analytical Procedure for the Voltammetric Determination of Nickel in Routine Analysis of Water, Biological Materials and Food,
W82-06467 1512 5A

VOLUMETRIC ANALYSIS
Voltammetric Characterization and Chemical Behavior of Inorganic Tin in Natural Waters,
W82-00627 1502 5A

Trace Analysis of Toxic Metals. I. Determination of Lead, Mercury, Cadmium and Thallium by Amperometric Titration,
W82-03236 1507 5A

VORTICES
Model-Prototype Comparison of Free Surface Vortices,
W82-03667 1508 8B

The Vortex Scour Mechanism at Bridge Piers,
W82-04642 1510 8B

WABIGOON RIVER BASIN
Mercury Methylation by Fish Intestinal Contents,
W82-01830 1504 5C

WAKEBY DISTRIBUTION
Determination of the Confidence Intervals of the Wakeby Distribution Using Order Statistics,
W82-01317 1503 2E

WALES
A Successful Transfer,
W82-00309 1501 4A

The Effect of Pollutants from the Coal Industry on the Fish Fauna of a Small River in the South Wales Coalfield,
W82-01389 1503 5C

Charging for Water Supply in England and Wales in the 1980s,

WITHLACOOCHEE RIVER
Water-Resources Information for the Withlacoochee River Region, West-Central Florida,
W82-02473 1505 6B

WOOD
Kinetics and Diffusion Processes in Colour Removal from Effluent Using Wood as an Adsorbent,
W82-02047 1504 5D

WOOD PRESERVING INDUSTRY
Wood Preserving Industry Multimedia Emission Inventory,
W82-02993 1506 5D

WOOD WASTES
Conversion of Abienol into Tetrahydroepimanool by Anaerobic Processes in Woodroom Debarking Effluent,
W82-00860 1502 5C

Control of Bark Landfill Leachates with an Anaerobic Treatment System,
W82-02006 1504 5D

WOODBRIDGE
Monitoring and Controlling Corrosion by Potable Water,
W82-04100 1509 5F

WOODS LAKE
Biogenic and Abiogenic Polynuclear Aromatic Hydrocarbons in Sediments from Two Remote Adirondack Lakes,
W82-04293 1510 5B

WOONSOCKET
Central City Demands in the 80's Woonsocket, Rhode Island,
W82-03665 1508 5F

WORLD METEOROLOGICAL ORGANIZATION
The World Climate Programme,
W82-00317 1501 6A

WRIGHTSVILLE BEACH
Design, Fabrication and Start-Up of a 25,000 Gallons per Day Absorption Freezing Vapor Compression Desalination Pilot Plant.
W82-04724 1510 3A

WYE RIVER
The Application of a Water-Quality Model to the River Wye, Wales,
W82-02876 1506 5A

WYOMING
Water-Resources Investigations of the U.S. Geological Survey in Wyoming, Fiscal Year 1980,
W82-00087 1501 7C

Biological Consequences of Stream Routing Through a Final-Cut Strip Mine Pit: Benthic Macroinvertebrates,
W82-01948 1504 4A

42-Mile Water Pipeline for Coal Boom Town.
W82-02359 1505 6D

Water Resources Data for Wyoming, Water Year 1980–Volume 2. Green River Basin, Bear River Basin, and Snake River Basin
W82-02495 1505 7C

Water Resources Data for Wyoming, Water Year 1980–Volume 1. Missouri River Basin.
W82-02846 1506 7C

Areal Distribution of Snow Water Equivalent Evaluated by Snow Cover Monitoring,
W82-03842 1509 2C

Limnology of the Upper North Platte Reservoir System, Wyoming,
W82-04067 1509 2H

Thickness, Percent Sand, and Configuration of Shallow Hydrogeologic Units in the Powder River Basin, Montana and Wyoming,
W82-04501 1510 7C

Five-Year Water Resources Research and Development Goals and Objectives for Wyoming.
W82-05528 1511 6B

Evaluation of the Stream Reach Inventory and Channel Stability Index for Instream Habitat Analysis,
W82-06308 1512 4D

Calibrating A Mountain Watershed in Wyoming,
W82-06583 1512 2E

Hydrology of Salt Wells Creek–A Plains Stream in Southwestern Wyoming,
W82-06679 1512 2A

An Empirical Method for Determining Average Soil Infiltration Rates and Runoff, Powder River Structural Basin, Wyoming,
W82-06692 1512 2G

WYRE ESTUARY
Plutonium Occurrence and Phase Distribution in Sediments of the Wyre Estuary, Northwest England,
W82-02760 1506 5B

X-RAY EMISSION
Determination of Sulphur in Snow by Proton Induced X-Ray Emissions (Pixe) Method,
W82-06082 1512 5A

X-RAY FLUORESCENCE
Analysis of Trace Elements in Seawater. Part II. Determination of Heavy Metal Traces in Sea Water by X-Ray Fluorescence Analysis with Totally Reflecting Sample Holders,
W82-03333 1507 5A

XENOBIOTIC CHEMICALS
Relationship Between Biotransformation and the Toxicity and Fate of Xenobiotic Chemicals in Fish,
W82-00186 1501 5C

XENOBIOTICS
Model Ecosystem for Environmental Transport of Xenobiotics,
W82-06760 1512 5B

YADKIN RIVER BASIN
Water Resources Appraisals for Hydroelectric Licensing; Yadkin-Pee Dee River Basin; North Carolina, South Carolina, and Virginia,
W82-03042 1507 6D

YAKIMA INDIAN RESERVATION
Digital-Model Simulation of the Toppenish Alluvial Aquifer, Yakima Indian Reservation, Washington,
W82-04514 1510 2A

YAKIMA VALLEY
Consequences and Responsibilities in Drought Forecasting: The Case of Yakima, 1977,
W82-05082 1511 2E

YAMPA RIVER BASIN
Water Resources Appraisal for Hydroelectric Licensing; Yampa River Basin; Colorado, Wyoming.
W82-03045 1507 6D

YANGTZE RIVER
Yangtze Gorges Scheme Could Yield 110 TWh/Year.
W82-01394 1503 8A

YAQUINA BAY
Petroleum Refinery Wastewater Induction of the Hepatic Mixed-Function Oxidase System in Pacific Staghorn Sculpin,
W82-04895 1511 5C

YARRA RIVER
Trace Metal Speciation in the Freshwater and Estuarine Regions of the Yarra River, Victoria,
W82-03387 1507 5B

YEASTS
Assimilation of Lemonade-Processing Wastewater by Yeasts,
W82-00204 1501 5D

YELLOW RIVER
Sediment Regulation Problems in Sanmenxia Reservoir,
W82-03072 1507 2J

YELLOW RIVER BASIN
Erosion and Sediment Control in China's Yellow River Basin,
W82-01729 1503 4D

YELLOWKNIFE BAY
Influence of Water Movements and Other Factors on Distribution and Transport of Heavy Metals in a Shallow Bay (Canada).
W82-05205 1511 5B

YELLOWSTONE NATIONAL PARK
Fluorapatite and Fluorite Solubility Controls on Geothermal Waters in Yellowstone National Park,
W82-05449 1511 2K

YELLOWSTONE RIVER BASIN
Competition for Water Resources: Coal and Agriculture in the Yellowstone Basin,
W82-04805 1511 6D

YEMEN ARAB REPUBLIC
A Qualitative Appraisal of the Hydrology of the Yemen Arab Republic from Landsat Images,
W82-00022 1501 7B

YIELD
Accuracy of Firm Yield Estimates of Direct Supply Reservoirs with Limited Data,
W82-06300 1512 4A

YODO RIVER
Nitrogen Control for the Partly Sewered Basin of Yodo River-Lake Biwa System,
W82-05244 1511 5D

YORK RIVER
York River Destratification: An Estuary-Subestuary Interaction,
W82-06787 1512 2L

YORKSHIRE WATER AUTHORITY
The River Ouse Water Supply Scheme,
W82-01371 1503 5F

Dynamic Parameter Tuning for Water Distribution Network Models in an Extended Period Simulation,
W82-04756 1511 5F

YUCATAN PENINSULA
Chemical Mass-Wasting of the Northern Yucatan Peninsula by Groundwater Dissolution,
W82-01015 1502 2K

YUGOSLAVIA
Evaluation of the Polluted River Savinja with the Help of Macrophytes,
W82-01377 1503 5C

The Thermal Response of Lake Ohrid, Yugoslavia to Meteorological Conditions,
W82-02342 1505 2H

On the Chemistry of Some Salt Lakes and Ponds in Yugoslavia,
W82-04929 1511 2H

YUKON RIVER
Sediment Transport in Norton Sound, Alaska,
W82-00151 1501 2J

YUMA
Development of High Salt Rejection Reverse Osmosis Membranes–Final Report, July 1, 1978 Through December 31, 1980,
W82-02109 1505 3A

YUMA DESALTING TEST FACILITY
Reconnaissance Samplings and Characterization of Aquatic Humic Substances at the Yuma Desalting Test Facility, Arizona,
W82-04983 1511 3A

YUZHNOYE RESERVOIR
The Formation of Water Quality in the Shallows of a Southern Reservoir (Dnieper-Krivoi Rog Canal) Under the Influence of Beds of Higher Aquatic Vegetation,
W82-05453 1511 2H

ZAMBIA
The Hydrogeological Basis for a Water Supply to Kabwe, Zambia,
W82-05804 1511 4B

ZEOLITE
Treatability of Type A Zeolite in Wastewater--Part I,
W82-05687 1511 5D

Treatability of Type A Zeolite in Wastewater--Part II,
W82-05688 1511 5D

ZEOLITES
Sedimentation of Zeolite Type A in Water and Waste Water,
W82-00848 1502 5D

Detergent Builders and Water Quality - A Changing Scene,
W82-03093 1507 5C

Type A Zeolite in the Activated Sludge Process--II: Heavy Metal Removal,
W82-03222 1507 5D

Investigations of Natural Hungarian Zeolite for Ammonia Removal,
W82-05482 1511 5D

Removal of Zeolite Type A During Primary Sedimentation and Its Effect on Metal Removal,
W82-06338 1512 5D

Type a Zeolite in the Activated Sludge Processes - I: Treatment Parameters,
W82-06459 1512 5D

ZERO DISCHARGE
Developments in Wastewater Handling at Power Plants,
W82-05517 1511 5D

ZETA POTENTIAL
Using Zeta Potential to Optimize Coagulating Aid Doses Used to Treat Food Processing Wastes,
W82-01627 1503 5D

Optimizing Coagulation with Pilot Filters and Zeta Potential,
W82-03653 1508 5F

ZIMBABWE
The Decline of Salvinia Molesta on Lake Kariba,
W82-04945 1511 2H

Zimbabwean Hand Pump Passes Village-Level Endurance Tests.
W82-06606 1512 8C

ZINC
Acute Toxicity of Zinc to Some Fishes in High Alkalinity Water,
W82-00713 1502 5C

Aquatic Mosses as Monitors of Heavy Metal Contamination in the River Etherow, Great Britain,
W82-00787 1502 5A

The Impact of an Industrially Contaminated Lake on Heavy Metal Levels in it's Effluent Stream,
W82-00886 1502 5B

Mercury and Zinc in the Sediments of Seneca Lake, Seneca River, and Keuka Outlet, New York,
W82-01151 1503 5B

Atomic Absorption Spectrophotometric Studies of Cadmium and Zinc in Commercial Fertilisers, Soils and River Waters,
W82-01388 1503 5B

Voltammetric Studies on the Stability of the ZN(II) Chelates with NTA and EDTA and the Kinetics of their Formation in Lake Ontario Water,
W82-01839 1504 2H

The Effects of Mine Drainage and Organic Enrichment on Benthos in the River Nent System, Northern Pennines,
W82-02053 1504 5C

A Study on the Accumulation of Copper and Zinc in the Mid-Gut Gland of Cultured Scallop for Environmental Monitoring, (In Japanese),
W82-02379 1505 5B

Changes in Flora Down a Stream Showing a Zinc Gradient,
W82-02946 1506 5C

Zinc in Seawater and Sediments,
W82-03166 1507 5B

Zinc Deficiency in Wetland Rice Along a Toposequence of Hydromorphic Soils in the Philippines. I. Soil Conditions and Hydrology,
W82-03328 1507 2G

Detoxication of Zinc and Cadmium by the Freshwater Protozoan Tetrahymena Pyroformis. I. The Effect of Water Hardness,
W82-03678 1508 5C

Combined Effects of Cadmium and Zinc on a Lake Michigan Zooplankton Community,
W82-04379 1510 5C

The Use of the Three-Ridge Clam (Amblema Perplicata) to Monitor Trace Metal Contamination,
W82-04948 1511 5A

Transport Processes of Copper and Zinc in a Highly Eutrophic and Meromictic Lake,
W82-05518 1511 5B

Transport of Iron, Manganese, Cadmium, Copper, and Zinc by Magela Creek, Northern Territory, Australia,
W82-06054 1512 5B

Comparison of the Extractabilities of Zn, Cu, Ni and Cr from Sewage Sludges Prepared by Treating Raw Sewage with the Metal Salts Before or After Anaerobic Digestion,
W82-06079 1512 5D

Sediment-Water Interactions of Cu, Zn, and Pb Discharged from a Domestic Waste Water Source into a Bay of Lough Neagh, Northern Ireland,
W82-06080 1512 5B

Recovery of Zinc from Wastewater Treatment Sludge,
W82-06485 1512 5E

Heavy Metals in Sludge--Are Their Toxic Effects Additive,
W82-06646 1512 5E

The Adsorption of Cu, Mn, and Zn by Iron Oxyhydroxide in Model Estuarine Solutions,
W82-06668 1512 2L

Pilot Plant Studies of Copper, Zinc, and Trivalent Chromium Removal by Adsorbing Colloid Foam Flotation,
W82-06708 1512 5D

Removal of Zinc by Adsorbing Colloid Foam Flotation: Pilot Plant Study,
W82-06822 1512 5D

ZINC COMPOUNDS
An Experimental Approach to Corrosion Control,
W82-04099 1509 5F

Monitoring and Controlling Corrosion by Potable Water,
W82-04100 1509 5F

ZINC CYANIDE RECOVERY
Demonstration of Zinc Cyanide Recovery Using Reverse Osmosis and Evaporation,
W82-04622 1510 5D

ZIRCONIUM
Phosphorus Inactivation by Zirconium in a Eutrophic Pond,
W82-05856 1511 5G

ZOOPANKTON
Combined Effects of Cadmium and Zinc on a Lake Michigan Zooplankton Community,
W82-04379 1510 5C

ZOOPLANKTON
BIONESS, A New Design in Multiple Net Zooplankton Samplers,
W82-00210 1501 7B

Assessment of Thermal Discharges on Zooplankton in Conowingo Pond, Pennsylvania,
W82-00592 1502 5C

Potential Impact of Size-Selective Planktivory on Phosphorus Release by Zooplankton,

The Crustacean Zooplankton of Mali (West Africa),
W82-01379 1503 2H

Zooplankton Abundance and Diversity in Central Florida Grass Carp Ponds,
W82-01520 1503 2H

The Relative Importance of Protozoans, Rotifers, and Crustaceans in a Freshwater Zooplankton Community,
W82-01840 1504 2H

Zooplankton Species Diversity in Lake St. Clair, Ontario, Canada,
W82-01937 1504 5C

Ecological and Physiological Characteristics of Dikerogammarus Haemobaphes in the Areas in Which Heated Water Is Discharged from the Tripol'ye Power Station,
W82-01970 1504 5C

A Preliminary Study of the Effect of Pumped-Storage Plant Operation on Zooplankton,
W82-01971 1504 5C

The Effects of Freshwater Inflow on Salinity and Zooplankton Populations at Four Stations in the Nueces-Corpus Christi and Copano-Aransas Bay Systems, Texas from October 1972-May 1975,
W82-02133 1505 6G

The Effects of Floods on the Zooplankton Assemblage of San Antonio Bay, Texas During 1972 and 1973,
W82-02136 1505 2L

Frequencies of Developmental Morphs of Chaoborus Americanus in Four Fishless Bog Lakes,
W82-02238 1505 2H

The Recolonization of Lake Tahoe by Bosmina Longirostris: Evaluating the Importance of Reduced Mysis Relicta Populations,
W82-02305 1505 2H

Zooplankton Sample Variability in a Tidal Estuary: An Interpretative Model,
W82-02306 1505 2L

Diel Changes in Plankton and Water Chemistry in Wicken Brickpit,
W82-02411 1505 2H

The Influence of Flatworm Predation on Zooplankton Inhabiting Small Ponds,
W82-02655 1506 2H

A Reexamination of the Zooplankton Community of a Delaware Tidal Stream,
W82-02805 1506 5B

Zooplankton of Lake Taupo,
W82-02888 1506 2H

Contribution to the Limnology of Lake Pavin (France) II. Relationships Between Nonbiological Parameters--Phyto and Zooplankton in the 0-

20 Meter Zone (Contribution A L'Etude Limnologique du Lac Pavin (France). II. Relations Entre Parametres Abiotiques-Phyto et Zooplancton Dans la Zone 0-20 Metres),
W82-03178 1507 2H

The Effect of Suspended Materials on the Zooplankton, I. Natural Environments,
W82-03313 1507 2H

The Phytoplankton and Protozooplankton of the Euphotic Zone of Lake Tanganyika: Species Composition, Biomass, Chlorophyll Content, and Spatio-Temporal Distribution,
W82-03419 1508 2H

Investigations on the Sedimentation in the Darst-Zingst Bodden Chain - A Contribution to Establishment of an Energy and Matter Balance in the Ecosystem. Part 2: Research on the Sedimentation of Plankton. (Untersuchungen Zur Sedimentation in der Darss-Zingster Boddenkette Ein Beitrag zur Aufstellung Einer Energie-und-Stoffbilanz im Okosystem. Tiel 2: Untersuchungen zur Sedimentation des Planktons),
W82-04761 1511 2L

Benthos and Zooplankton of Coal Strip Mine Ponds in the Mountains of Northwestern Colorado, U.S.A.,
W82-04946 1511 5C

Metabolic Activity of Herbivorous Zooplankton in Lake Kinneret (Israel) During 1972-1977,
W82-05074 1511 2H

The Use of Container-Reared Cultures of Cladocera in Polishing Fish Farm Effluents,
W82-05327 1511 5D

The Structure of Crustacean Zooplankton Communities in Glaciated Eastern North America,
W82-05379 1511 2H

Interrelationships in the Development of the Three Structural Components of the Plankton in the Off-Bottom Zone of Lakes,
W82-05451 1511 2H

The Importance of Lacustrine Zooplankton to the Feeding Capacity
